<input checked="" type="checkbox"/> No Design	Subtotal:	\$ 9,874.20
<input type="checkbox"/> Preliminary Design	Engineering: (% +/-)	15% \$ 1,768.20
<input type="checkbox"/> Final Design	Contingency: (% +/-)	20% \$ 2,357.60
	Estimated Project Cost:	\$ 14,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

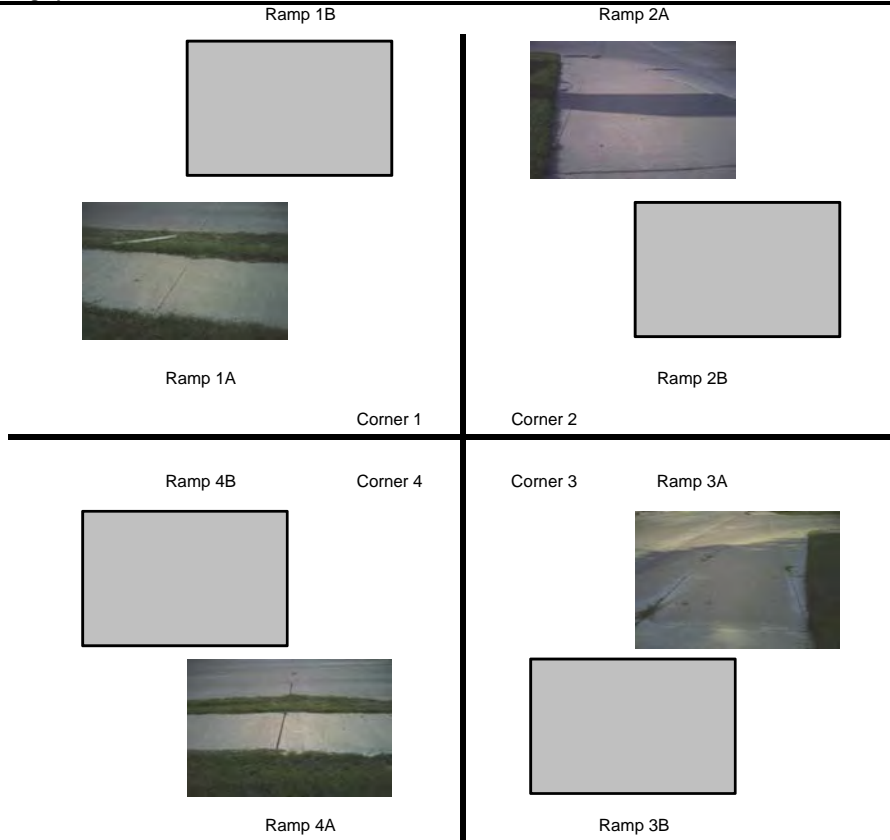

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	X	Repave roadway and install crosswalk pavement markings
Crosswalk striping	N/A	N/A	N/A	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%	X								Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X						X		Install colored truncated domes
No color contrast at base of ramp	X						X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist							X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	M						M

Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H							H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	-	N/A	N/A	
Crosswalk striping	N/A	No	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%			X		X				
Ramp running slope is greater than 8.33%						X			Remove and replace ramp
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area						X			
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X		X				Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp			X		X				Regrade roadway
Ramp not needed due to existing geometry									
Ramp Priority:	-		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

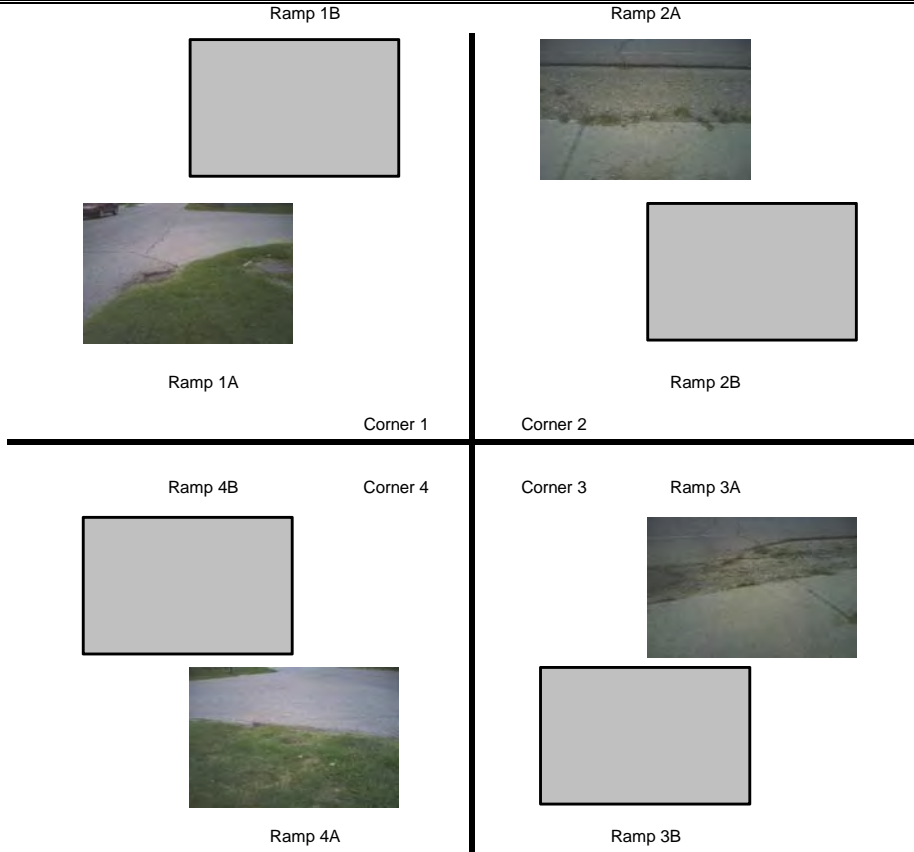

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	N/A	
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	N/A	
Crosswalk striping	N/A	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X		X						Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H

	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X						X		
Ramp running slope is greater than 8.33%	X						X		
Ramp cross slope is greater than 2%	X						X		Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X						X		Install colored truncated domes
No color contrast at base of ramp	X						X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X						X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp	X								Regrade roadway
Ramp not needed due to existing geometry									
Ramp Priority:	H						H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

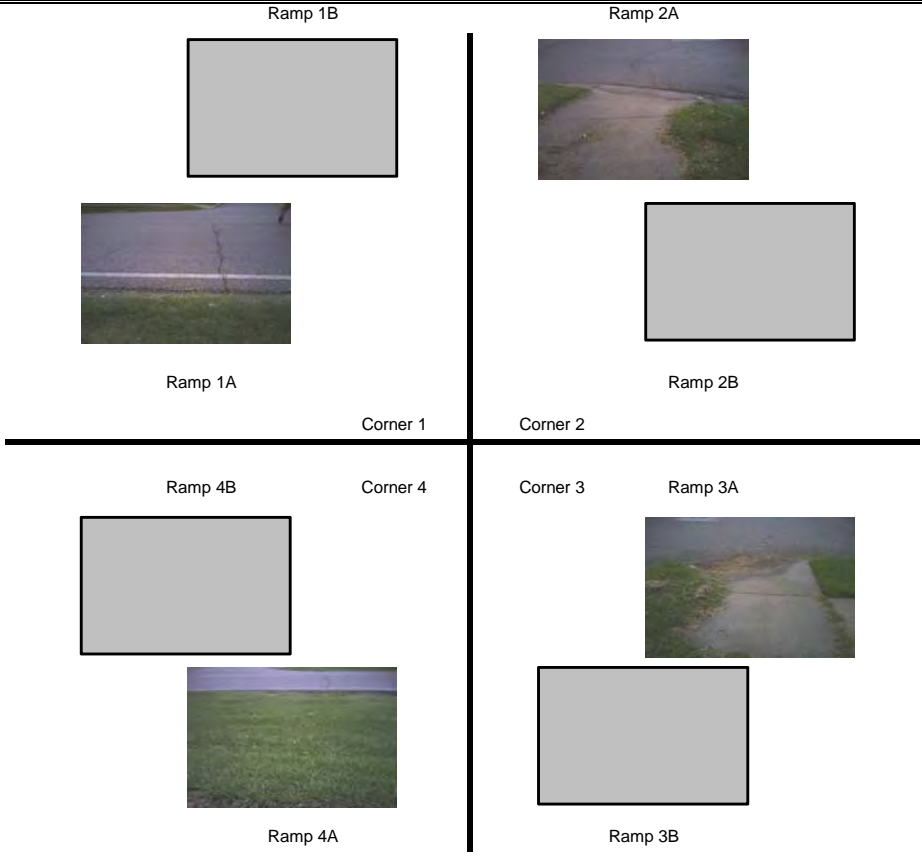

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Good	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	-	N/A	X	Repave roadway and install crosswalk pavement markings
Crosswalk striping	N/A	No	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed			X		X				Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X						X		Install colored truncated domes
No color contrast at base of ramp	X						X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry

Estimated Project Cost:	\$	21,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

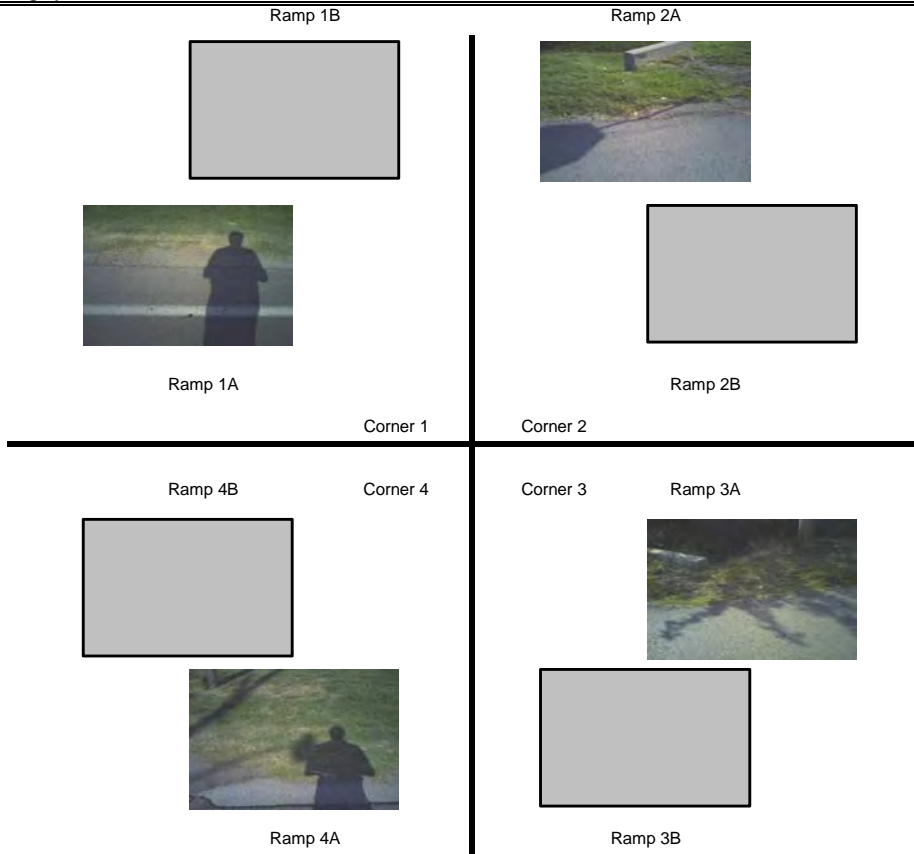

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Good	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	-	N/A	X	Repave roadway and install crosswalk pavement markings
Crosswalk striping	N/A	No	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed					X	X			Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%	X								
Ramp cross slope is greater than 2%									Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X						Install colored truncated domes
No color contrast at base of ramp	X		X						
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		M		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

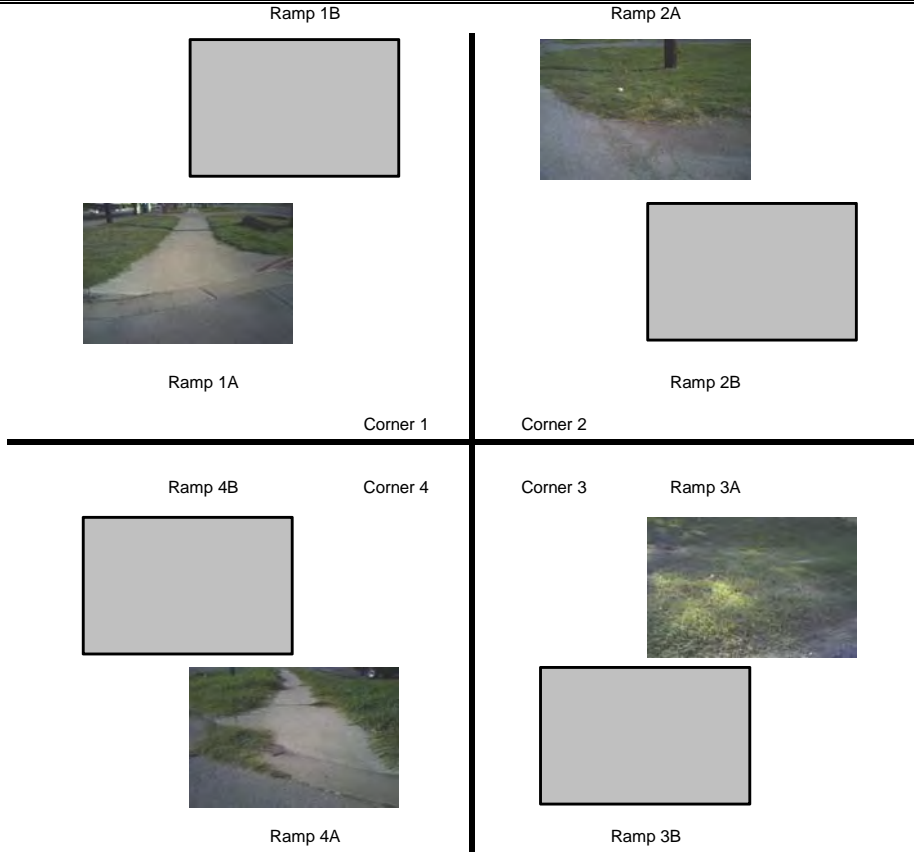

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	N/A	Repare roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	X	N/A	N/A	
Crosswalk striping	N/A	No	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Remove and replace ramp
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									Remove and replace ramp
Ramp running slope is greater than 8.33%			X						
Ramp cross slope is greater than 2%			X		X				
Ramp width is less than 36"									Install colored truncated domes
Obstruction present in ramp or landing area					X				
No textured surface at base of ramp			X		X				
No color contrast at base of ramp			X		X				Install landing area
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X		X				
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									Regrade roadway
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									Regrade roadway
Ramp transition onto roadway is greater than 0.25"			X		X				
Ponding occurs at base of ramp			X		X				
Ramp not needed due to existing geometry									
Ramp Priority:	-		H		H			-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

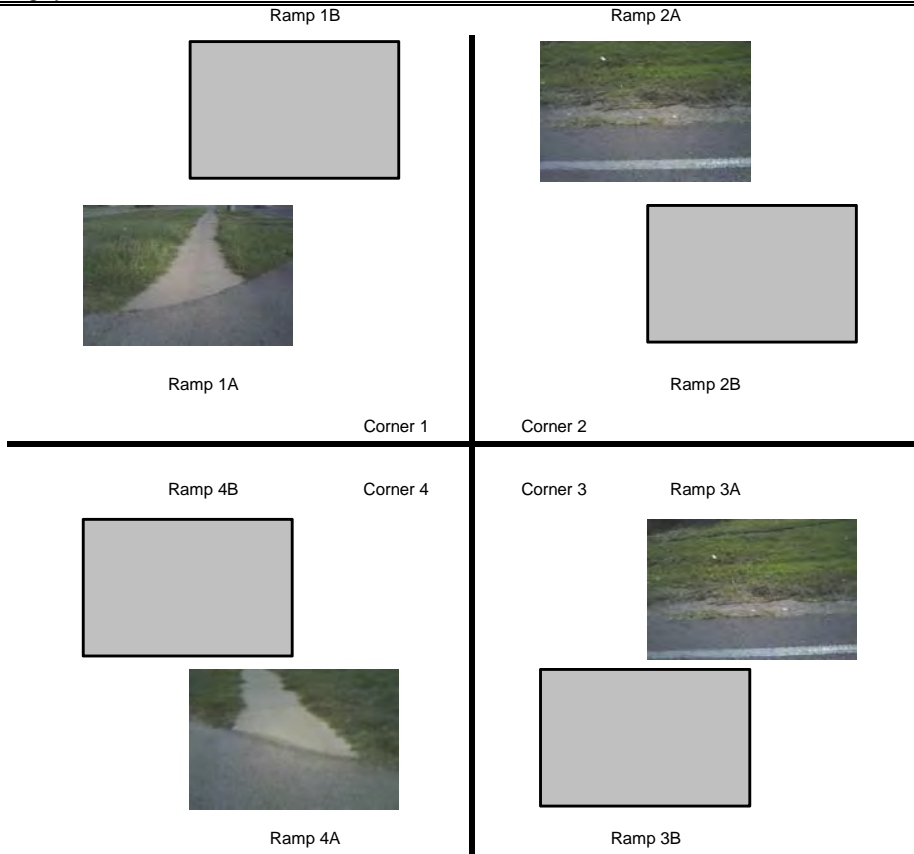

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	X	N/A	N/A	
Crosswalk striping	N/A	No	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed			X						Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp					X				Install colored truncated domes
No color contrast at base of ramp					X				
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-		H		M

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	-	N/A	
Crosswalk cross slope is greater than 2%	X	N/A	-	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk striping	No	N/A	-	N/A	

Ramp Issues	Ramp ID						Recommendations		
	1A	1B	2A	2B	3A	3B		4A	4B
Ramp does not land in crosswalk	X		X		X		X		Remove and replace crosswalk pavement markings
No 48" extension into crosswalk									
Ramp does not exist and is needed									Remove and replace ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%	X		X		X		X		Remove and replace ramp
Ramp cross slope is greater than 2%	X		X		X		X		
Ramp width is less than 36"									Install colored truncated domes
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X		X		X		Install colored truncated domes
No color contrast at base of ramp	X		X		X		X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X		X		X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"	X		X						Regrade roadway
Ponding occurs at base of ramp	X				X		X		
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		M

Subtotal:	\$	26,057.80
Engineering: (% +/-)	15%	\$ 4,260.94
Contingency: (% +/-)	20%	\$ 5,681.26
Estimated Project Cost:	\$	36,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

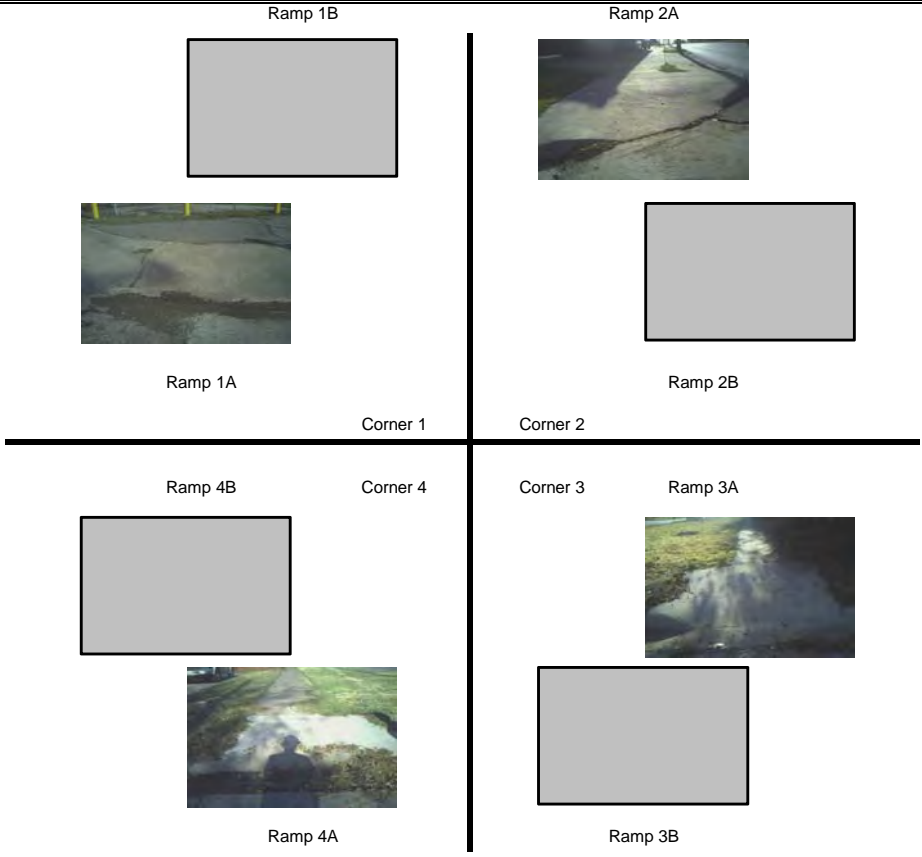

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	Poor	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	-	N/A	-	N/A	
Crosswalk striping	No	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%	X		X		X		X		Remove and replace ramp
Ramp cross slope is greater than 2%	X		X						
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X		X		X		Install colored truncated domes
No color contrast at base of ramp	X		X		X		X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X				X		X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"			X				X		Regrade roadway
Ponding occurs at base of ramp	X		X		X		X		
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Estimated Project Cost:	\$	23,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

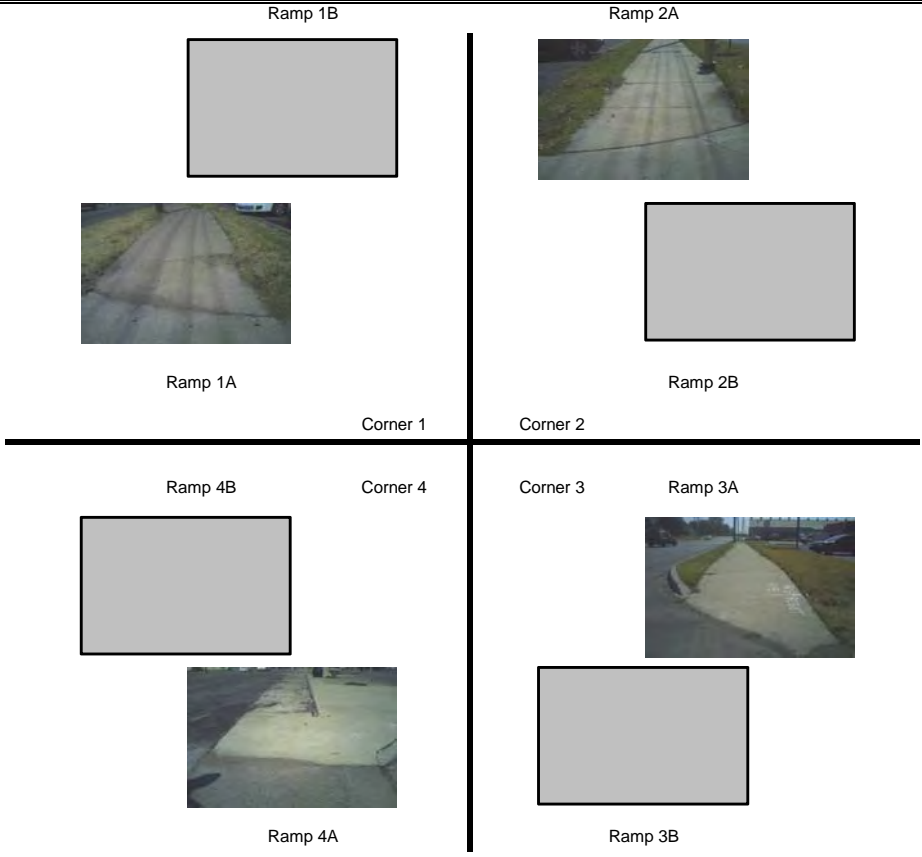

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	Poor	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	N/A	-	N/A	
Crosswalk striping	N/A	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%						X			Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X	X	X	X	X	X	X	X	Install colored truncated domes
No color contrast at base of ramp	X	X	X	X	X	X	X	X	
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X	X	X	X	X	X	X	X	Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp	X	X	X	X	X	X	X	X	Regrade roadway
Ramp not needed due to existing geometry									
Ramp Priority:	M	M	M	M	M	M	M	M

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

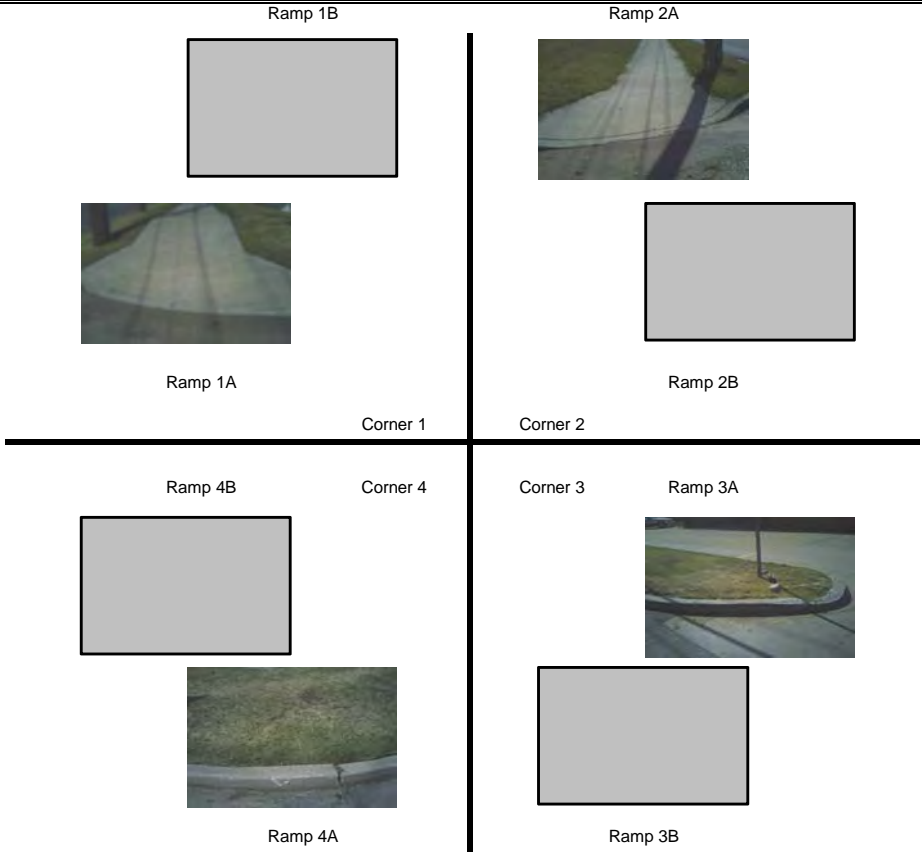

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	-	
Crosswalk striping	N/A	N/A	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%	X						X		Remove and replace ramp
Ramp cross slope is greater than 2%	X						X		
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X						X		Install colored truncated domes
No color contrast at base of ramp	X						X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H						H

Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%			X						
Ramp running slope is greater than 8.33%			X		X				
Ramp cross slope is greater than 2%			X						Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp			X						Install colored truncated domes
No color contrast at base of ramp			X						
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X		X				Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	-	
Crosswalk striping	N/A	N/A	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X								
Ramp running slope is greater than 8.33%	X						X		
Ramp cross slope is greater than 2%									Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"							X		Regrade roadway
Ponding occurs at base of ramp	X						X		
Ramp not needed due to existing geometry									
Ramp Priority:	H						H

Estimated Project Cost:	\$	8,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

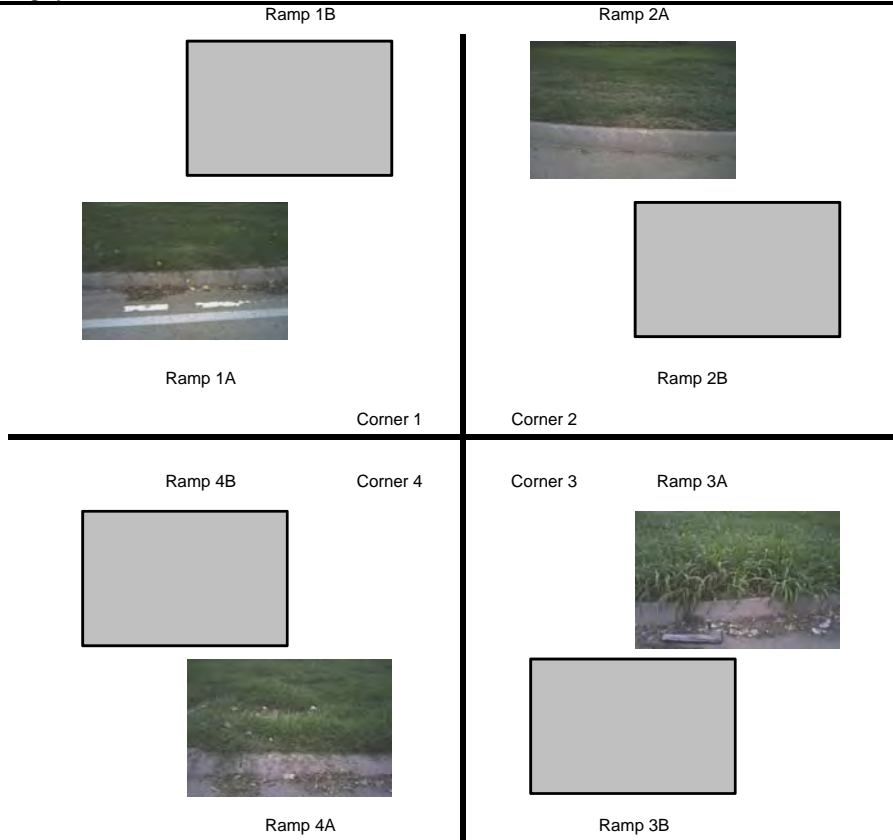

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Good	N/A	N/A	
Crosswalk cross slope is greater than 2%	N/A	-	N/A	N/A	
Crosswalk striping	N/A	No	N/A	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed			X		X				Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

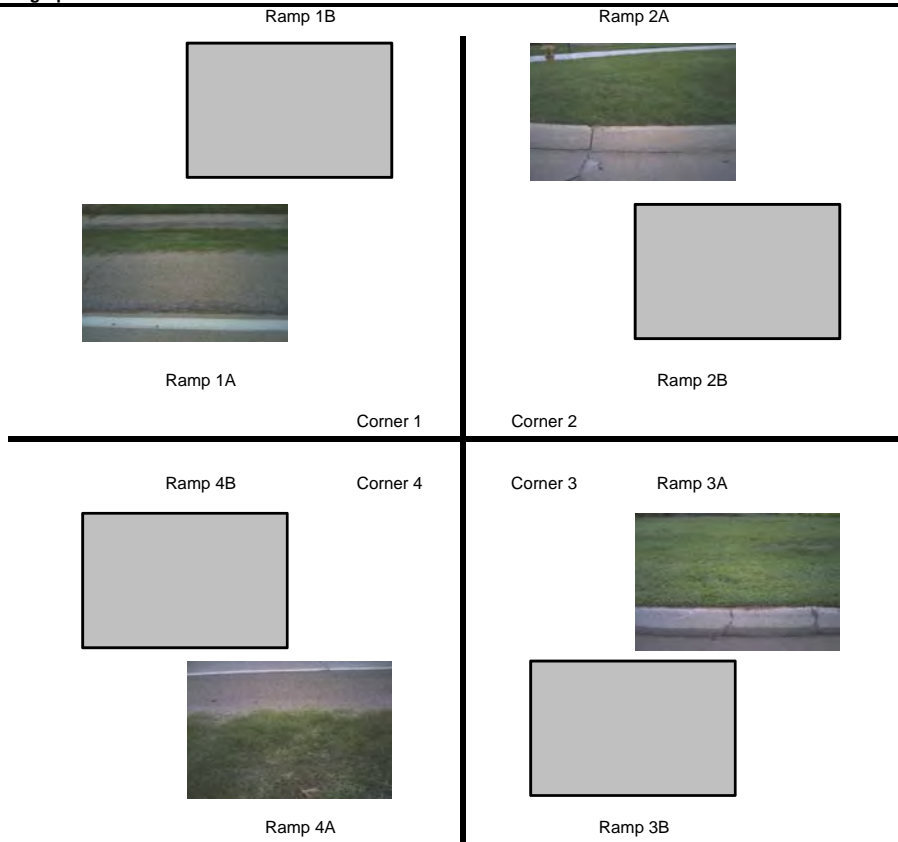

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	-	
Crosswalk striping	N/A	N/A	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%	X						X		Remove and replace ramp
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp	X						X		Regrade roadway
Ramp not needed due to existing geometry									
Ramp Priority:	H						H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	-	
Crosswalk striping	N/A	N/A	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X						X		Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H							H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Good	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	-	N/A	-	
Crosswalk striping	N/A	No	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%	X		X		X		X		Remove and replace ramp
Ramp cross slope is greater than 2%	X		X		X		X		
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X		X		X		Install colored truncated domes
No color contrast at base of ramp	X		X		X		X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X		X		X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		M		H		M

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

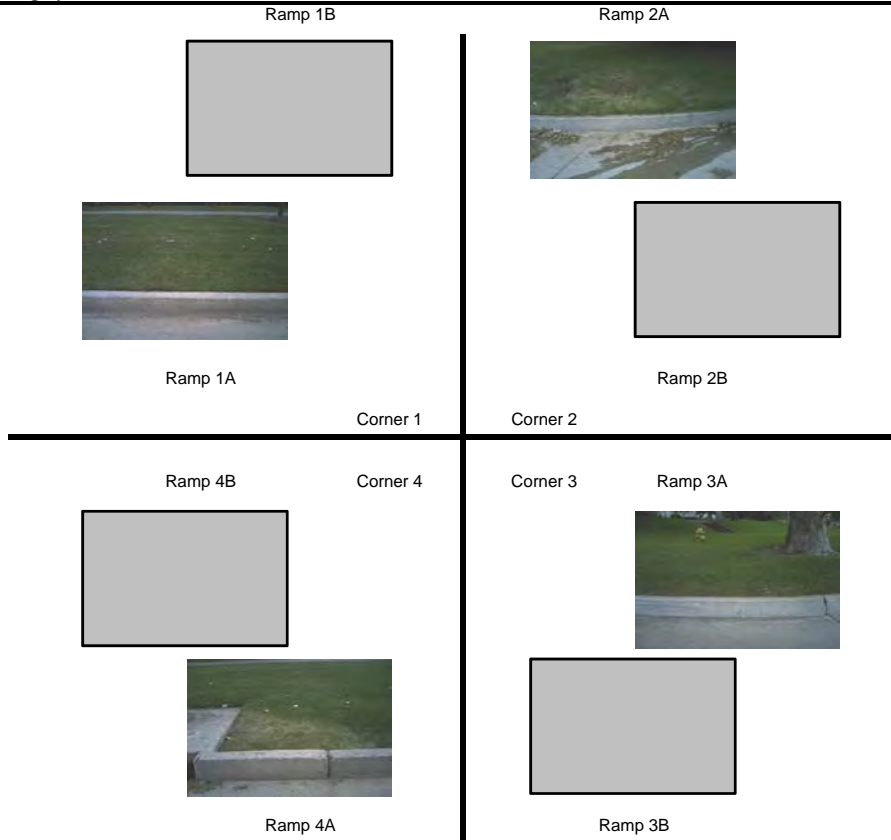

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	X	Repave roadway and install crosswalk pavement markings
Crosswalk striping	N/A	N/A	N/A	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X						X		Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H							H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Good	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	-	N/A	X	Repave roadway and install crosswalk pavement markings
Crosswalk striping	N/A	No	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%								X	
Ramp cross slope is greater than 2%	X		X					X	Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X		X			X	Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	M		M		M			H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	Poor	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	-	N/A	-	
Crosswalk striping	N/A	No	N/A	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X		X		X				Install handicap ramp
Flare cross slope is greater than 10%						X			
Ramp running slope is greater than 8.33%						X			
Ramp cross slope is greater than 2%									Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp							X		Install colored truncated domes
No color contrast at base of ramp							X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist							X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"							X		Regrade roadway
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	Poor	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	-	N/A	-	
Crosswalk striping	N/A	No	N/A	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X		X						Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%					X				Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp					X	X			Install colored truncated domes
No color contrast at base of ramp					X	X			
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist					X	X			Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"					X	X			Regrade roadway
Ponding occurs at base of ramp					X	X			
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	Poor	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	-	N/A	-	
Crosswalk striping	N/A	No	N/A	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X		X		X		X		Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2'									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H

Contingency: (% +/-)	20%	\$ 1,753.49
Estimated Project Cost:	\$	9,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	-	
Crosswalk striping	N/A	N/A	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%							X		
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%	X								Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist							X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	L		-		-			H

	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	Poor	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	X	
Crosswalk striping	N/A	N/A	N/A	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%	X								Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X						X		Install colored truncated domes
No color contrast at base of ramp	X						X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X						X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	M							M

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	N/A	N/A	
Crosswalk cross slope is greater than 2%	-	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X								
Ramp running slope is greater than 8.33%	X								
Ramp cross slope is greater than 2%									Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X						Install colored truncated domes
No color contrast at base of ramp	X		X						
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		-		-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Good	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	-	N/A	-	
Crosswalk striping	N/A	No	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed			X		X				Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%								X	
Ramp cross slope is greater than 2%	X							X	Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X							X	Install colored truncated domes
No color contrast at base of ramp	X							X	
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X								Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp								X	Regrade roadway
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H			M

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

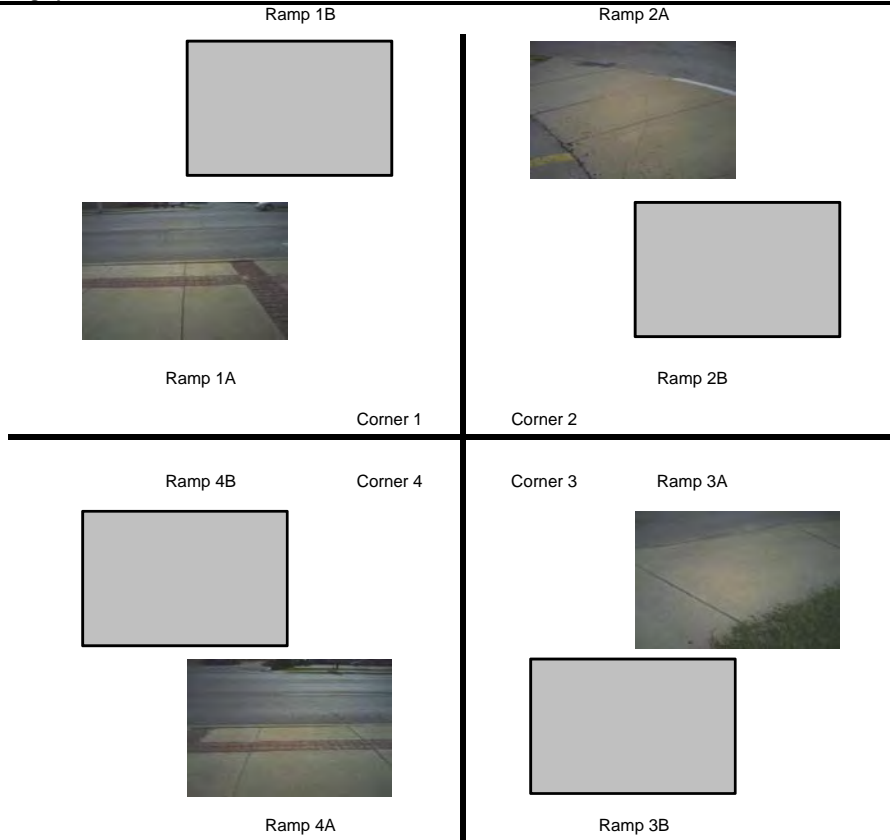

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	-	N/A	N/A	
Crosswalk striping	N/A	No	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed			X	X					Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-		H	H

	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed			X		X				Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	Poor	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	-	N/A	-	
Crosswalk striping	N/A	No	N/A	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed			X		X				Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-		H		H			-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	Poor	Poor	Poor	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	-	-	X	X	
Crosswalk striping	No	No	No	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X		X		X		X		Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H		

End of Project Description for Project 46001 Intersection of N. Boulder Ave. at W. Fairview St.

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	Good	Good	Good	
Crosswalk cross slope is greater than 2%	-	-	-	-	
Crosswalk striping	No	No	No	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%			X				X	X	
Ramp running slope is greater than 8.33%							X		Remove and replace ramp
Ramp cross slope is greater than 2%							X		
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X	X	X	X					Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2'									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

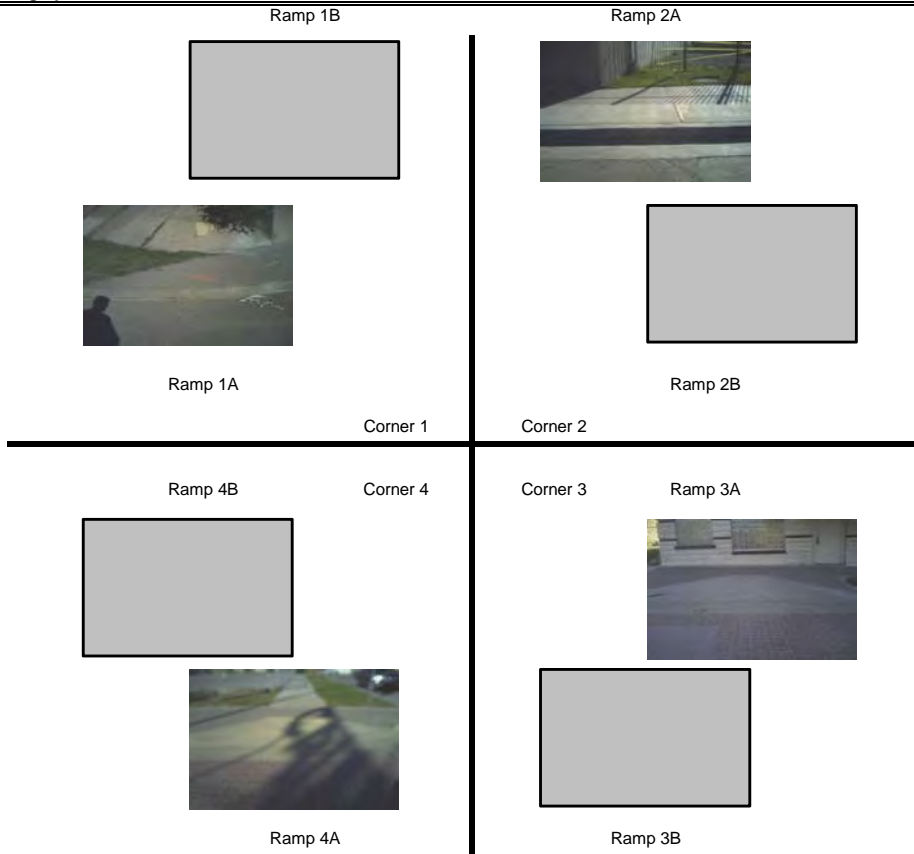

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	Poor	Poor	Poor	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	-	-	-	-	
Crosswalk striping	No	No	No	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed			X						Install handicap ramp
Flare cross slope is greater than 10%	X				X	X			
Ramp running slope is greater than 8.33%	X				X		X		
Ramp cross slope is greater than 2%	X				X				Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X				X				Install colored truncated domes
No color contrast at base of ramp	X				X				
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X				X	X	X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"	X								Regrade roadway
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H	H	M

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	Good	Good	
Crosswalk cross slope is greater than 2%	N/A	N/A	-	-	
Crosswalk striping	N/A	N/A	Yes	Yes	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X								
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry		X	X						Remove ramp
Ramp Priority:	H	H	C		C		C	C

Subtotal:	\$	24,382.80
Engineering: (% +/-)	15%	\$ 3,693.09
Contingency: (% +/-)	20%	\$ 4,924.11
Estimated Project Cost:	\$	33,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

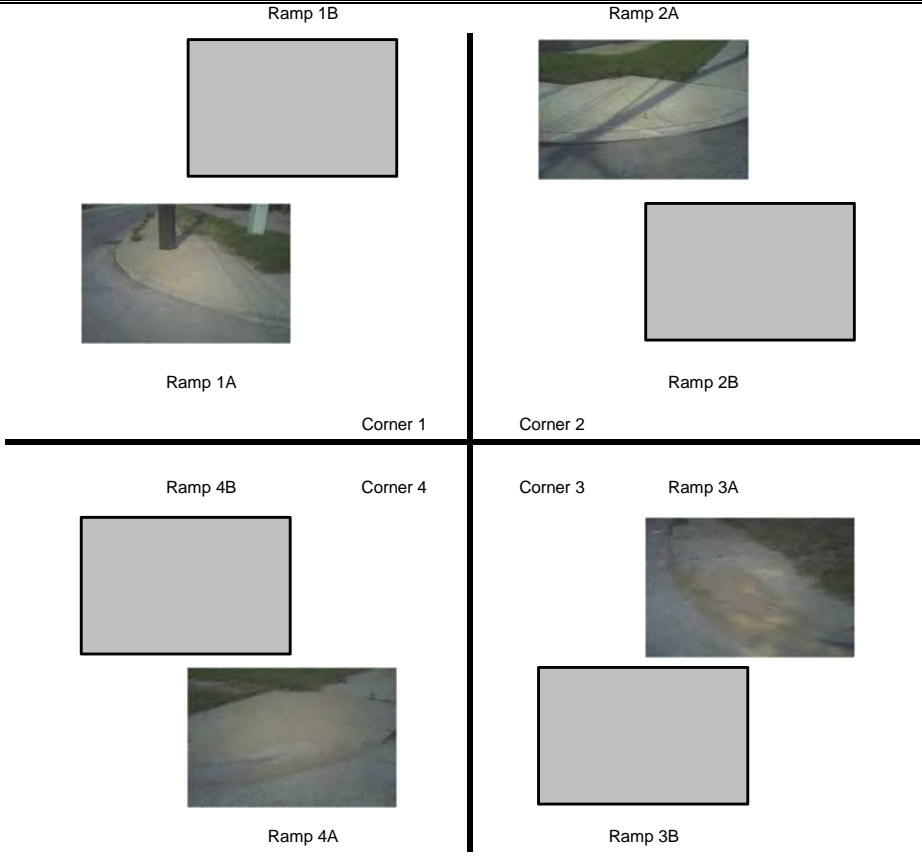

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	Poor	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	-	N/A	-	N/A	
Crosswalk striping	No	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%	X		X		X		X		Remove and replace ramp
Ramp cross slope is greater than 2%					X				
Ramp width is less than 36"									
Obstruction present in ramp or landing area	X								Install colored truncated domes
No textured surface at base of ramp	X		X		X		X		
No color contrast at base of ramp	X		X		X		X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X		X		X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"					X				Regrade roadway
Ponding occurs at base of ramp					X		X		
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H

	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed					X				Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%							X		Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp							X		Install colored truncated domes
No color contrast at base of ramp							X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist							X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"							X		Regrade roadway
Ponding occurs at base of ramp							X		
Ramp not needed due to existing geometry	X								Remove ramp
Ramp Priority:	H				H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

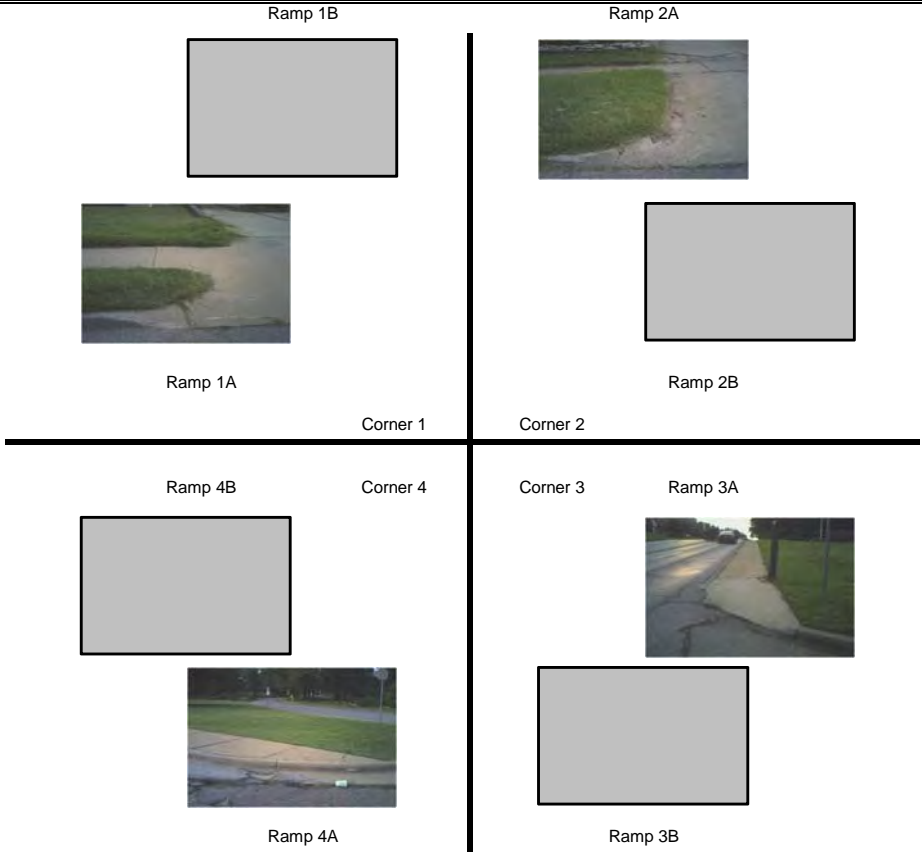

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	N/A	N/A	
Crosswalk cross slope is greater than 2%	-	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X						
Ramp running slope is greater than 8.33%	X		X						
Ramp cross slope is greater than 2%	X		X						Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X						
No color contrast at base of ramp	X		X						Install colored truncated domes
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		-		-

Basis for Cost

- No Design
- Preliminary Design
- Final Design

Subtotal:	\$	11,191.40
Engineering: (% +/-)	15%	\$ 2,060.83
Contingency: (% +/-)	20%	\$ 2,747.77
Estimated Project Cost:	\$	16,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	-	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%			X						
Ramp running slope is greater than 8.33%			X						
Ramp cross slope is greater than 2%									Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area	X								
No textured surface at base of ramp	X		X						Install colored truncated domes
No color contrast at base of ramp	X		X						
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X								Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		-		-

Recommendation Letters

**MAYOR'S COMMISSION ON THE
CONCERNS OF TULSANS WITH
DISABILITIES**

February 28, 2011

Dr. Michael Smith
Compliance Investigations Administrator
Human Rights Department
City of Tulsa
175 East Second Street
Tulsa, Oklahoma 74103

Dear Dr. Smith:

On behalf of the Mayor's Commission on the Concerns of Tulsans with Disabilities, thank you very much for your excellent presentation at our January meeting. We appreciate you taking the time to outline the ADA Transition Plan for the City of Tulsa. The Commission wholeheartedly supports this proposal.

Since the initial implementation of the Americans with Disabilities Act in 1992, the City of Tulsa has continued to grow and prosper. With the steady expansion of neighborhoods and commercial areas, the need for street and sidewalk improvements, modifications to public facilities and expanded transportation options has increased dramatically.

One of the charges of this Commission is to monitor ADA compliance by considering grievances and recommendations from the public and explore possible solutions in concert with the Human Rights Department under the direction of Dr. Lana Turner-Addison. The transition plan as presented will help the City address issues of concern to the community.

Once implemented, the ADA Transition Plan will significantly improve the quality of life for citizens who have disabilities or age-related limitations.

Many thanks to you and your team for all your excellent work. We look forward to assisting with its implementation in any way we can.

Sincerely,

Susan Lively
Chair
Mayor's Commission on the Concerns
of Tulsans with Disabilities

Cc: Lana Turner-Addison Ed.D.
Human Rights Director

April 6, 2011

Dr. Michael Smith
Compliance Investigations Administrator
Human Rights Dept.
City of Tulsa
175, East Second Street
Tulsa, OK 74103

Dear Michael,

The Transportation Advisory Board (TAB) is both concerned about and supports the conclusions of the ADA Self-Evaluation and Transition Plan as presented to the Board on March 3. The Board understands Tulsa to be behind the curve in terms of implementing the Americans With Disabilities Act, which came into effect in 1992. We are concerned at the scale of the problem in both in financial terms (the total cost is put at over \$96 millions) and in terms of quality of life.

We are keen that the process of resolving the issues be undertaken as soon as possible. The City's new Comprehensive Plan (PLANiTULSA) provides the strategic framework and rationale for more investment in mass transit, better provision for cyclists - and in the pedestrian's experience. Accordingly we urge that the ADA Plan be adopted into the Comprehensive Plan.

We want to highlight a number of points not made elsewhere, and to make some recommendations. These are set out below.

Demographics

Our aging population means that the number of people who benefit from ADA-related improvements is growing rapidly. ADA-related, thoroughfare improvements benefit other users too, and help protect children in particular.

Economic Development

Competition among cities is increasingly dependent on quality of life factors such as multi-modal transportation options and livable, pedestrian-friendly neighborhoods.

Functioning, attractive sidewalks boost economic activity of neighborhood businesses and reduce 'vehicle miles travelled' (VMT).

Livable, walkable neighborhoods enable local and small businesses, especially retailers, to survive. People in wheelchairs are customers like anyone else.

Timing

We note that the ADA study coincides with several, important and complementary, transportation policy initiatives by the City and the Tulsa region. We should take advantage of the opportunity to integrate these so as to develop a better-connected and more efficient city:

- (i) The adoption of the new comprehensive plan (PLANiTULSA);
- (ii) 'FastForward': the mass transit project, which holds great promise for Tulsans with disabilities;
- (iii) The first City project to apply 'context-sensitive' design solutions (now a Recommended Practice of the Institute of Transportation Engineers);
- (iv) The adoption of the City's first 'form'-based land use code, which provides for more pedestrian-friendly, transit-friendly, mixed-use neighborhoods in which it is easy and pleasant to get around without a car;
- (v) Funding of a project to evaluate the role of passenger rail in the region;

- (vi) The likely start of work on a regional Bicycle/Pedestrian plan.

Recommendations

Overall Strategy

- The City of Tulsa should view ADA imperatives broadly as (i) a key, constituent element of the Comprehensive Plan, (ii) as an opportunity to improve Tulsa's competitive position, (iii) as the right thing to do for its residents and (iv) as a legal requirement.
- This broad perspective helps make clear the return on investment that all tax-payers derive from the investment required to conform to the ADA. It also enables more balanced decision-making in making hard, budget decisions: such as pedestrian sidewalks vs. streets for automobiles.

Design

- ADA factors should be integrated into the delivery of 'context-sensitive solutions' (CSS) in thoroughfare design.
- 'Complete Streets' and 'Road Diet' are examples of a CSS strategy, and are natural allies of ADA design. These should be considered tools for designing an environment that works for people in wheel-chairs and for everyone else too.
- PLANITULSA's policy that sidewalks should be built into every new project must be rigorously applied.

Mass Transit

- ADA requirements should be explicitly integrated into the region's overwhelmingly-supported 'FastForward' mass transit project, now underway.

Budgeting

- ADA considerations should be integrated into all thoroughfare-related projects forthwith.
- A decisive commitment to ADA funding should be included within the City's FY2012 Budget.
- Each such prioritization should be based on careful, quantitative and strategic evaluation by City planners, City Finance team, Dept. of Human Rights and Public Works.
- Where developers of new real estate projects can make a compelling case to not provide a sidewalk, the developer should pay a commensurate amount into a Sidewalk Fund for use elsewhere in the City.

The Board would be very glad to discuss this with you further if you would like. Thank you again for providing the opportunity for the Board to get involved in this important area of transportation policy.

Daniel Keating

Chair, Transportation Advisory Board, City of Tulsa

RE: Support for City of Tulsa's Updated ADA Self-Evaluation and Transition Plan

Dear Dr. Smith:

On behalf of the Metropolitan Tulsa Transit Authority (MTTA), I fully support the City of Tulsa's Updated ADA Self-Evaluation and Transition Plan, and encourage the City Council, members of the Tulsa Metropolitan Area Planning Commission (TMAPC), and other City leaders to approve the plan and adopt it as part of the Comprehensive Plan for Tulsa.

In addition to the improvements the plan recommends for transit bus stops, accessible sidewalks and curb ramps are vital to MTTA's success. Not only does the general public benefit from increased mobility, but also persons with disabilities need these amenities to get to fixed-route buses. The ability for persons with disabilities to ride fixed-route buses gives them increased mobility options with greater flexibility and spontaneity. Compared to door-to-door service, the cost to ride fixed-route is significantly lower for persons with disabilities, and the cost to provide fixed-route service is dramatically less expensive for MTTA. Needless to say, with shrinking federal, state, and local dollars, it is imperative for MTTA to move as many passengers with disabilities to the fixed-route service as possible.

We congratulate the City of Tulsa for working aggressively to improve accessibility for its citizens with disabilities and quality of life for all Tulsans. Approval of the Updated ADA Self-Evaluation and Transition Plan will allow them to get off to a great start in accomplishing those goals.

Sincerely,

Debbie Ruggles
Director of Paratransit Services

Dear Dr. Smith:

It is truly my pleasure to write this letter of support for the City of Tulsa regarding the recent ADA Self-Evaluation and Transition Plan, which is a comprehensive re-evaluation of City services, activities and programs to determine the extent to which individuals with disabilities may be restricted in their access. During the past year and a half, I have had the opportunity to serve on the Steering Committee overseeing this project. Not only have I been impressed by the thoroughness of the City's oversight and evaluation, I have been even more impressed with the community-based input process used to guarantee that all concerns are taken into account.

It is my understanding that the Transition Plan will be the guide in preparation and implementation of necessary program and facility modifications throughout the City. The updated ADA Self-Evaluation and Transition Plan is significant in that it establishes the City's ongoing commitment to the development and maintenance of policies, programs, and facilities that provide access for all citizens.

The Center for Individuals with Physical Challenges is a non-profit community recreation center in Tulsa serving over 950 individuals with a variety of physical disabilities. Having been in this community for 54 years, we are well aware of the barriers faced by the population we serve. In an effort to be continued advocates on their behalf, we look forward to seeing the Transition Plan move forward and ultimately be approved and adopted as part of the Comprehensive Plan for Tulsa. As final presentations are being made to the Tulsa Metropolitan Area Planning Commission and subsequent meetings with the City Council and other City leaders, it is an honor for The Center for Individuals with Physical Challenges to endorse the overall project.

If I can provide you with further information, do not hesitate to contact me. I can be reached at (918) 794-4509 or via email at lmathis@tulsacenter.org

Sincerely yours,

Lori A. Long, MHR, CFRE
Executive Director

MEMORANDUM

TO: TMAPC MEMBERS
FROM: DANE MATTHEWS, AICP
SUBJECT: AMERICANS WITH DISABILITIES ACT (ADA) SELF-EVALUATION AND TRANSITION PLAN UPDATE
DATE: APRIL 27, 2011
COPY: BRENT STOUT, PUBLIC WORKS DEPARTMENT

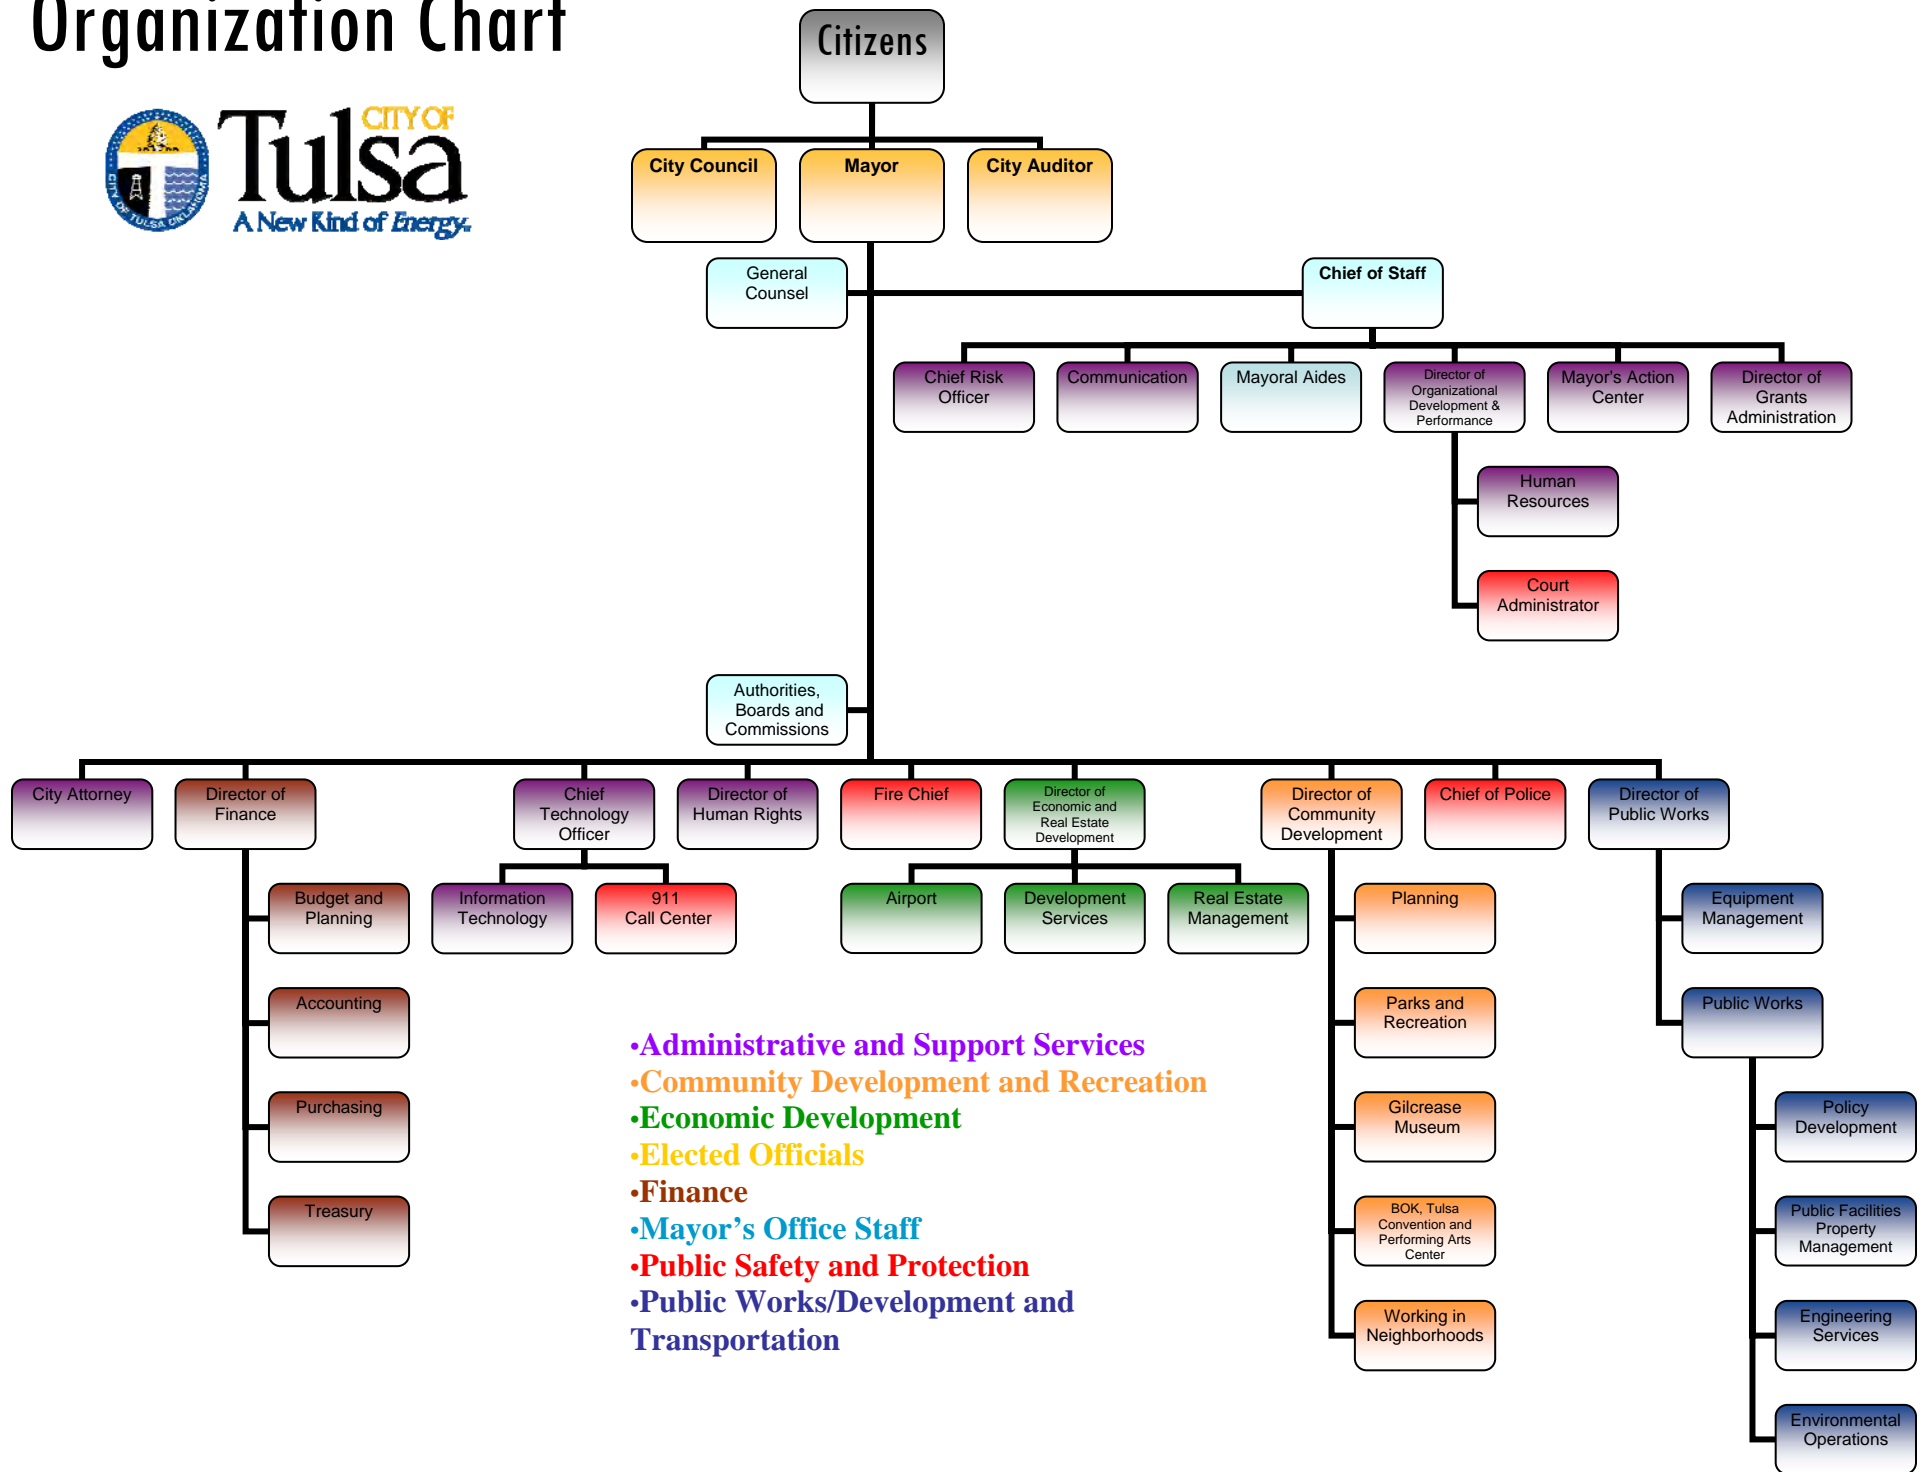

Staff has reviewed the above-referenced plan, which is required to update the City's compliance with Federal ADA regulations and indicate plans for future improvements. The City of Tulsa has long been cognizant of the need for accessibility by all people.

The recently adopted comprehensive plan encourages full accessibility by all residents to all venues within the city by a variety of forms of transportation. The transportation plan component also encourages multi-modal transportation on the major roadways, including sidewalks along streets. The City's Subdivision Regulations also address the need for sidewalks. Currently, the permitting process includes review of building and other plans for compliance with ADA regulations. The public transit system (Tulsa Transit) is now totally ADA accessible and the LIFT program operates to serve its clients as a part of Tulsa Transit. This ADA Plan Update reinforces that proactive approach and emphasizes the vision of the comprehensive plan. Therefore, staff recommends that the ADA Self Evaluation and Transition Plan Update be adopted as part of the comprehensive plan and recommends that the TMAPC do likewise.
