PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

DEPARTMENT:	BOK Center & Tulsa Convention Center (SMG Tulsa)
CONTACT PERSON:	John Dodd
PHONE:	918-894-4270
EMAIL	jdodd@smgtulsa.com

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:

We provide ADA Seating for Events in the BOK Center & Tulsa Convention Center.

We offer Assisted Listening Devices for all Arena Events.

We offer wheelchair assistance for all Events.

We offer Interpreters for Events with enough prior notification (three (3) weeks is posted on our website).

2. Are all programs offered by your department available to someone with a:

Yes.

a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics)

b. Sensory challenge? (Visual loss or hearing loss)

c. Cognitive challenge?

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.

Accommodations are the same just limited to certain areas due to construction of the Buildings.

We provide an ease of access areas for wheelchairs, gurneys, and service animals. We have a designated area for Guests needing Interpreters.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

4. Do any “separate” programs segregate people with disabilities from others participating in the same program service or activity?

All ADA and / Disability Tickets must be purchased via e-mail, phone, or in person at the BOK Center Box Office and is not offered on-line. These tickets are not offered on-line due to limited numbers and keeping them from those that do not have a disability and need for these tickets.

5. If a “separate” program is offered, can a person choose NOT to participate in the separate program and join the mainstream program?

If they do not want ADA and/or Disability Seating then yes they may purchase tickets on-line.

6. Are any additional costs required for someone to participate in the programs, services or activities?

No additional cost to the Guests. All costs are absorbed by the BOK Center, Tulsa Convention Center, or Promoter (Client) of the Event.

7. Are reasonable modifications necessary to provide programs, services and activities?

Yes for Guests needing Interpreters.

8. Does your department offer any licensing or certifications to citizens?

No.

- a. What licenses or certificates are offered?

9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently?

Yes, the Communications aspect breaks down along with the Technology.

10. Is the building your program is in owned by the city or leased?

Owned by the City and Managed by a Private Management Company.

- a. If the building is leased, who is it leased from?

11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.)

We provide Assisted Listening Devices, Qualified Interpreters, and Exchange of Written Notes.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.)

We have Large Print Materials for our A-Z Guide, and Brail on identifying signs throughout the Buildings.

13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)

There are no TDD's for use, but there are computer terminals and Guest Services and SMG Staff in the building when Guests are in the Building.

14. Do any of the programs offered by your department have papers or documents that are given to employees or the public?

Yes, the A-Z Guide.

15. Do any of the programs have any audio/visual media that is offered to employees or to the public?

Yes, the Public Service Announcement prior to all Events.

16. What policies and procedures are in place for each program?

There are Standard Policies based on our A-Z Guide, our Employee Handbooks, and Law.

17. Has your department designated an employee to act as an ADA Coordinator? How long have they been performing this function? Have they previously attended ADA-related training? Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa?

Yes. For two (2) years. Yes at Public Facility Management School provided by IAAM. I have missed one (1) meeting and if not available I send Representative.

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:
2. Are all programs offered by your department available to someone with a:
 - a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics)
Yes
 - b. Sensory challenge? (Visual loss or hearing loss)
Yes
 - c. Cognitive challenge?
Yes
3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.
The same accommodations are offered to all citizens but can be modified to accommodate citizens with disabilities if necessary.
4. Do any "separate" programs segregate people with disabilities from others participating in the same program service or activity?
No

Self-Evaluation Reporting Form

5. If a “separate” program is offered, can a person choose NOT to participate in the separate program and join the mainstream program?
6. Are any additional costs required for someone to participate in the programs, services or activities? **No**
7. Are reasonable modifications necessary to provide programs, services and activities?
No
8. Does your department offer any licensing or certifications to citizens? **No**
 - a. What licenses or certificates are offered?
9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently? **No**
10. Is the building your program is in owned by the city or leased? **Owned by COT**
 - a. If the building is leased, who is it leased from?
11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.) **Written materials are available. Most council meetings are televised and capable of closed captioning.**
12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.) **All committee and standard meetings are available on CD for citizen’s review. Council staff is available to assist citizens with visual impairments.**

Self-Evaluation Reporting Form

13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)
Computer terminals, communication boards
14. Do any of the programs offered by your department have papers or documents that are given to employees or the public? **Yes**
15. Do any of the programs have any audio/visual media that is offered to employees or to the public? **Audio/Visual media**

Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa? A) **Yes** B) **Recently assigned** C) **No** D) **No**

Self-Evaluation Reporting Form

DEPARTMENT:	Communications
CONTACT PERSON:	Lara Christiansen
PHONE:	918-596-7804
EMAIL	lchristiansen@cityoftulsa.org

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:

We provide communication at the City of Tulsa both internally and externally in various forms: the City website, intranet and employee emails and newsletters, written documents and news releases, media interviews, news conferences and public events. We inform the public and City employees about City services, and we provide support for Mayoral initiatives.

The City of Tulsa website is ADA compliant for accessibility.

2. Are all programs offered by your department available to someone with a:

a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics)

Yes. When we are aware that someone has a disability, we would schedule a meeting with that person making sure that he or she could fully participate. We could go down to the Second Floor lobby of City Hall to meet him or her. City Hall is equipped with curb ramps and the elevators have Braille on the buttons and a voice announcing each floor.

We make sure that public meetings are in facilities that have accommodation for disabilities, mainly elevators to a meeting room if it is above ground level.

b. Sensory challenge? (Visual loss or hearing loss) **We could arrange for a sign language interpreter to be at a public meeting if we were notified that a person with hearing loss would be attending.**

Self-Evaluation Reporting Form

If we had a meeting with someone with visual loss, we would describe the surroundings including where to sit or walk. At a public meeting, we could do the same thing to accommodate someone with visual loss the best we could. The person may have either a friend or service animal to help him.

c. Cognitive challenge? **We would follow guidelines from the ADA training: avoid “yes or no” questions because these individuals feel pressure to say yes to please the other person. Ask short questions that require a short answer. Examples would be someone with a learning disability or Down’s Syndrome.**

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.

They are basically the same, except that we would adapt the form of communication differently depending on the particular disability that someone has.

4. Do any “separate” programs segregate people with disabilities from others participating in the same program service or activity? **No.**

5. If a “separate” program is offered, can a person choose NOT to participate in the separate program and join the mainstream program? **We do not offer separate programs for people with disabilities.**

6. Are any additional costs required for someone to participate in the programs, services or activities? **No. If a sign-language interpreter or other assistance is necessary, the service would be provided at the City’s expense.**

7. Are reasonable modifications necessary to provide programs, services and activities? **We would adapt our method of communication as best we could to serve someone with a disability.**

8. Does your department offer any licensing or certifications to citizens? **No**

a. What licenses or certificates are offered? **n/a**

9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently? **No.**

Self-Evaluation Reporting Form

10. Is the building your program is in owned by the city or leased? **City-owned**
- a. If the building is leased, who is it leased from? **n/a**
11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.) **We use the written word for a lot of our communication. This would be very accessible to someone with a hearing impairment. Otherwise, we could provide qualified interpreters or other assistance.**
12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.) **We don't have as much for individuals with visual impairments. We would describe surroundings at both private and public meetings, and the elevators in City Hall have Braille on the buttons and a voice to announce each floor and the direction the elevator is going.**
13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.) **We have computers that could be accessible to these individuals.**
14. Do any of the programs offered by your department have papers or documents that are given to employees or the public? **Yes. That is a lot of what we do, although it may be in the form of emailed documents or website content, which can be printed on paper.**
15. Do any of the programs have any audio/visual media that is offered to employees or to the public? **In addition to the City website, we manage the City's YouTube account, which has audio/visual material accessible to the public.**
16. What policies and procedures are in place for each program? **Our policy is that we provide a public service to communicate about the City's services and programs. We play a major role in public access to information about the City of Tulsa. Our department controls content on the City website, and the City's YouTube account, as well as social media such as Facebook and Twitter.**

Self-Evaluation Reporting Form

17. Has your department designated an employee to act as an ADA Coordinator? How long have they been performing this function? Have they previously attended ADA-related training? Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa?

Yes. I serve as the ADA Coordinator for Communications. I've been in this role for several months, mostly since the City began the Self-Evaluation and Transition Plan. I didn't really know about it until then. I attended the ADA training in August 2010, and I am my department's designee for the Steering Committee.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

DEPARTMENT:	Equipment Management Department
CONTACT PERSON:	John Reel
PHONE:	918-596-9815
EMAIL	jreel@cityoftulsa.org

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:

Equipment Management,

2. Are all programs offered by your department available to someone with a:

a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics)- **Would not be a problem**

b. Sensory challenge? (Visual loss or hearing loss)- **Hearing loss would not be an issue, visual loss would present a challenge for mechanics jobs.**

c. Cognitive challenge?- **Might be an issue**

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.

They would be the same. Office work would be same both ways, but the mechanic work might present a challenge.

4. Do any "separate" programs segregate people with disabilities from others participating in the same program service or activity?

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

Mechanic Work and some of the other tasks in EMD would be a problem for certain types of disabilities.

5. If a “separate” program is offered, can a person choose NOT to participate in the separate program and join the mainstream program?

6. Are any additional costs required for someone to participate in the programs, services or activities?

No

7. Are reasonable modifications necessary to provide programs, services and activities?

No

8. Does your department offer any licensing or certifications to citizens?

No

a. What licenses or certificates are offered?

n/a

9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently?

None that I am aware of.

10. Is the building your program is in owned by the city or leased?

Owned

a. If the building is leased, who is it leased from?

11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.)

None at the present time, I'm sure accommodations could be made if the situation arose.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.)

None at the present time, I'm sure accommodations could be made if the situation arose.

13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)

None at the present time, I'm sure accommodations could be made if the situation arose.

14. Do any of the programs offered by your department have papers or documents that are given to employees or the public?

None at the present time

15. Do any of the programs have any audio/visual media that is offered to employees or to the public?

None at the present time

16. What policies and procedures are in place for each program?

City of Tulsa Policies and Procedures.

17. Has your department designated an employee to act as an ADA Coordinator? How long have they been performing this function? Have they previously attended ADA-related training? Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa?

Yes, John Reel. A couple of months. Attended one class. Not attended meetings yet, but will begin.

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:

- **Accounting for City revenues, expenditures, assets, and liabilities;**
- **Preparing and administering the annual budget;**
- **Processing all requests for purchase of goods and services**
- **Sale of surplus through annual auction**
- **Issuance of regulatory licenses**
- **Maintaining and securing the highest possible prudent return on the City's investment portfolio;**
- **Payroll processing**
- **Assuring timely payment of the City's bills, claims, and debt liabilities;**
- **Developing and monitoring the City's annual capital plan**
- **Maintaining and providing copies of all official and financial documents;**
- **Developing and implementing financial policies and programs consistent with legal requirements; and**
- **Administrating the City of Tulsa and authorities' debt programs.**

2. Are all programs offered by your department available to someone with a:

- a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics) **Yes**
- b. Sensory challenge? (Visual loss or hearing loss) **Yes**
- c. Cognitive challenge? **Yes**

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.

All programs currently offered are the same.

4. Do any “separate” programs segregate people with disabilities from others participating in the same program service or activity?

No

5. If a “separate” program is offered, can a person choose NOT to participate in the separate program and join the mainstream program?

N/A

6. Are any additional costs required for someone to participate in the programs, services or activities?

If we learned that someone needed accommodations not currently provided there could be additional costs involved.

7. Are reasonable modifications necessary to provide programs, services and activities?

Yes. Currently a golf cart is provided at the surplus yard for folks with walking difficulties, but the option to ride the golf cart is provided to all citizens. The auction entryway is oriented to the side of the building with a ramp for wheel chair access if required. A counter at the cashier window is lowered for accessibility.

What if someone uses a wheelchair and is unable to transfer onto a golf cart?

8. Does your department offer any licensing or certifications to citizens?

Yes

- a. What licenses or certificates are offered?
- ♦ **Animal Licenses**
 - ♦ **Beer Sales Licenses**
 - ♦ **Coin Operated Device Decals**
 - ♦ **First Response Certificates (intrusion alarms)**
 - ♦ **Food Establishment Licenses**
 - ♦ **Hotel Licenses**
 - ♦ **Loading Zone Parking Permits**
 - ♦ **Massage Licenses**
 - ♦ **Mixed Beverage Licenses**
 - ♦ **Outdoor Seller Licenses**

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

- ♦ **Package Store and Other Liquor Licenses**
- ♦ **Pawn Broker Licenses**
- ♦ **Recreation Center & Operator Licenses**
- ♦ **Sexually Oriented Business Licenses**
- ♦ **Taxi and Paratransit Chauffeur Licenses**
- ♦ **Taxicab and Paratransit Vehicle Licenses**
- ♦ **Taxicab and Paratransit Company Licenses**
- ♦ **Waste Collection Vehicle Licenses**
- ♦ **Contractor Prequalification Licenses**

Testing required for licensing needs

9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently?

No

10. Is the building your program is in owned by the city or leased?

The buildings are owned by the City.

a. If the building is leased, who is it leased from?

11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.)

None

12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.)

None

13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)

None

14. Do any of the programs offered by your department have papers or documents that are given to employees or the public?

Yes

15. Do any of the programs have any audio/visual media that is offered to employees or to the public?

Yes

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

16. What policies and procedures are in place for each program?

Our policy would be to make reasonable accommodations if necessary.

17. Has your department designated an employee to act as an ADA Coordinator? How long have they been performing this function? Have they previously attended ADA-related training? Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa?

A designee has been in place since 1999. Multiple designees have been performing the ADA function since 1999 through today. The current ADA coordinator has attended the training offered by the City of Tulsa and has been attending the Self-Evaluation and Transition Plan for the City of Tulsa.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

DEPARTMENT:	Gilcrease Museum	
CONTACT PERSON:	Duane H. King Executive Director	Mark Zumwalt Maintenance Foreman
PHONE:	918-596-2710	918-596-2775
EMAIL	<u>Duane-king@utulsa.edu</u>	<u>mark-zumwalt@utulsa.edu</u>

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:
As a public facility and world-renowned institution, Gilcrease Museum strives to offer stimulating exhibitions of the art of the Americas and educational programming opportunities for all ages and abilities.

Included in the offerings at the museum are:

**Exhibitions of permanent and loaned art, artifacts and archival materials,
Public, school and private tours of the galleries and formal gardens,
Audio tours of the galleries and selected special exhibitions,
Art workshops and studio classes for children, teens, individuals and families,
Symposiums, gallery talks, lectures, artists' demonstrations,
Live performances – both theatrical and musical,
Summer and fall Gilcrease Camps for children,
Monthly Sunday matinee films tailored for all ages,
Hands-on gallery material (gallery guides, SmArt Cards, Trailblazer bags, videos),
Art Blast Saturday – a day of activities, music, games, workshops and food,
Scholarly Publications such as the Gilcrease Journal and exhibition catalogues,
Museum Memberships and sponsorship opportunities,
Public and private event catering services, offered through a contractual agreement between the university and Sodexo, is available to the public.
Retail shopping for visitors,
Wheelchairs and ramps are available for those with physical challenges.**

2. Are all programs offered by your department available to someone with a:
 - a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics)
Yes – All areas of the museum and formal gardens are barrier-free and accessible by those with physical challenges.

**Areas of Stuart Park have limited accessibility for the physically challenged.
Walking trails are provided throughout the park, but the main entrance leading**

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

down to the lower park from the upper level is provided by stairs. Vehicle access to the lower portion of Stuart Park is available but the visitor must make arrangements in advance. A parking pad is available in Stuart Park.

b. Sensory challenge? (Visual loss or hearing loss)

Yes - For the visually or hearing impaired, special needs tours of the galleries and gardens may be arranged with advanced notice.

c. Cognitive challenge?

Yes.

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.

All programs offered at the museum are available to those with disabilities. The museum's auditorium is wheelchair accessible and has six areas designated for those in wheelchairs. The auditorium stage has a wheelchair lift adjacent to the stage to allow access to the stage.

If requested, special or private tours of the galleries and gardens for the visually or hearing impaired for groups or individuals may be scheduled with prior arrangement with the tour coordinator.

Free public docent-led tours of the galleries are provided daily at 2:00 p.m.

4. Do any "separate" programs segregate people with disabilities from others participating in the same program service or activity?

At this time, Gilcrease does not offer separate programs for those with disabilities. All are welcome to visit the exhibitions or participate in any of the events or educational program offerings at Gilcrease.

5. If a "separate" program is offered, can a person choose NOT to participate in the separate program and join the mainstream program?

Yes, if a program is ever offered.

6. Are any additional costs required for someone to participate in the programs, services or activities?

The museum charges a general admission fee to visitors. The first Tuesday of each month, Gilcrease offers free admission to all visitors. Members of the museum and school groups receive free admission. A free, one-year Charter membership is available to anyone visiting the museum.

Most activities and educational programming offered at the museum are free and open to the public. Some fees are charged for art studio workshops, classes, Camp Gilcrease,

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

etc. The museum provides scholarships to families with low income or hardships to allow their children to participate in fee-based programming offered at the museum.

7. Are reasonable modifications necessary to provide programs, services and activities?
Yes – Access to Stuart Park from the park’s main entrance on the upper level is needed.

8. Does your department offer any licensing or certifications to citizens?

No

a. What licenses or certificates are offered?

N/A

9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently?

The wheelchairs for museum visitors are available at no cost at the admission desk. The chairs are worn and outdated. The child strollers have broken and none are available at this time.

The public space on the lower floor of the Gilcrease house is handicapped accessible and ADA compliant. A ramp to the entrance of the house is available. The second floor of the Gilcrease house is used for storage and is not ADA compliant.

10. Is the building your program is in owned by the city or leased?

The City of Tulsa owns the building, grounds and Thomas Gilcrease’s home that is located on the property. The first floor of the Gilcrease house is primarily used for the museum’s educational workshops and classes. Occasional private and public events are scheduled on the first floor of the house and throughout its gardens.

a. If the building is leased, who is it leased from?

11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.)

Gilcrease provides written gallery guides, text labels and audio tours. Language translators and “signing” interpreters may be provided upon availability and advanced request by the visitor.

12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.)

Directional signage, including brail, is posted in the galleries and elevators. Gallery text labels are printed in a large format for ease of readability. Guest Services Representatives are stationed throughout the galleries to assist visitors as needed.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)

None at this time.

14. Do any of the programs offered by your department have papers or documents that are given to employees or the public?

The Gilcrease website and Members Newsletter distributed to employees, museum members and the public list the barrier free access to the facility and grounds and all exhibitions and programs offered by the museum.

15. Do any of the programs have any audio/visual media that is offered to employees or to the public?

Yes – Gilcrease's website list information about the museum and its programs.

16. What policies and procedures are in place for each program?

Gilcrease Museum is ultimately governed as stipulated in the Amended Trust Indenture of January 27, 1955 when Thomas Gilcrease deeded his collection to the City of Tulsa.

Trustees, volunteer, and staff members must assure that, as programs are developed, such programs support the mission and public trust responsibilities of the museum. All exhibitions should be founded on scholarship and marked by intellectual integrity.

In addition to abiding by the museum's Code of Ethics, trustees, volunteers, and staff members adhere to the museum's collections management policy and TU's personnel policy and procedures manual. All museum policies have been guided by the AAM Code of Ethics for Museums and the AAMD Professional Practices in Art Museums.

17. Has your department designated an employee to act as an ADA Coordinator? How long have they been performing this function? Have they previously attended ADA-related training? Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa?

Under the current management agreement between the City of Tulsa and The University of Tulsa, the university is responsible for the day-to-day operations of the museum. The museum staff adheres to all university policies, procedures, regulations and applicable federal, state, and city laws and ordinances.

Duane King coordinates with university leadership in the management of the museum. As for the museum's physical plant needs, Mark Zumwalt, the museum's maintenance foreman, ensures that the museum's equipment and physical accessibility are ADA compliant and reports any deficiencies to Dr. King.

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:
Community Development Block Grants (CDBG), Emergency Shelter Grants (ESG), HOME Investment Partnership Grants (HOME), Housing Opportunities for Persons with Aids (HOPWA) , Homelessness Prevention and Rapid Re-Housing Program (HPRP). Monitoring of Federal Entitlement Grants.

2. Are all programs offered by your department available to someone with a:

- a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics) - **Yes**
- b. Sensory challenge? (Visual loss or hearing loss)- **Yes**
- c. Cognitive challenge?- **Yes**

Program services offered by subrecipients may have criteria for participation in their programs based upon the type of activities included in their programs. However, no program is allowed to deny participation solely on the basis of any of the above criteria.

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.

The programs are offered to participants regardless of Disability.

Per our written agreements with subrecipients, we require the following:

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

The Subrecipient must maintain client data demonstrating client eligibility for services provided. Such data shall include, but not be limited, to client name, address, income level or other basis for such determining eligibility, and a description of service provided.

The Subrecipient must agree to comply with all Federal regulations issued pursuant to compliance with Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), which prohibits discrimination against the individuals with disabilities or handicaps in any Federally assisted program. DGA shall provide the Subrecipient with any guidelines necessary for compliance with that portion of the regulations in force during the term of each Agreement.

4. Do any “separate” programs segregate people with disabilities from others participating in the same program service or activity?

There is one program HOPWA that is specifically for persons with AIDS and their families. This is a Federal Mandate.

5. If a “separate” program is offered, can a person choose NOT to participate in the separate program and join the mainstream program?

HOPWA is for those who choose to participate and receive the assistance. They can utilize any other “mainstream programs” for people with AIDS.

6. Are any additional costs required for someone to participate in the programs, services or activities? – **Most agencies that are funded with entitlement grant funds are offered at no cost to the participant.**

7. Are reasonable modifications necessary to provide programs, services and activities? – **Yes, by request when needed.**

8. Does your department offer any licensing or certifications to citizens? - **No**

a. What licenses or certificates are offered?

9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently? - **Unknown**

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

10. Is the building your program is in owned by the city or leased? **Owned by the City- Department of Grants Administration is housed in the OTC.**

a. If the building is leased, who is it leased from?

11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.)

As for any public meetings held by the City of Tulsa, DGA offers to assist with anyone requiring special accommodations. A specific person and contact information is provided with all public notices for these public meetings.

12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.)

For any public meetings DGA offers to assist with anyone requiring special accommodations. (See above)

13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)

For any public meetings DGA offers to assist with anyone requiring special accommodations. (See above)

14. Do any of the programs offered by your department have papers or documents that are given to employees or the public? - **Yes**

15. Do any of the programs have any audio/visual media that is offered to employees or to the public? -**Yes**

16. What policies and procedures are in place for each program? - ??

I found this on the City's website under **Accessibility** (link at the bottom of page).

Accessibility Policy - The pages on this Web site should be accessible to individuals with disabilities in accordance with Section 508 of the Rehabilitation Act. Where possible, they are also in compliance with the World Wide Web Consortium's (W3C) AAA standard.

Images on our Web site are accompanied by alternative text describing graphics if your browser supports the alt-text function. Documents on our Web site are presented in many formats. These formats are generally accessible to users using screen reading software. Some files are posted as Adobe Acrobat PDF (Portable Document Format) files.

Self-Evaluation Reporting Form

DEPARTMENT:	Human Rights Department
CONTACT PERSON:	Michael H. Smith, Ph.D.
PHONE:	596-7824
EMAIL	michaelsmith@cityoftulsa.org

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:

Human Rights Department

"...to promote equal opportunity and democratic rights, and to protect human rights of persons in Tulsa against discrimination because of race, color, religion, sex, national origin, age, disability marital status or familial status, through advisory, educational and enforcement services..."

The **HUMAN RIGHTS DEPARTMENT (HRD)** is the City of Tulsa department, created by Title 5 of the City of Tulsa Revised Ordinances, that receives and investigates complaints of discrimination in the areas of employment, housing, and public accommodations. HRD is responsible for assuring compliance of City contractors by monitoring their hiring, labor standards, Equal Employment Opportunity (EEO), and Affirmative Action practices.

The Department uses **two approaches** to accomplish the objectives of the Ordinance: proactive and enforcement. The **proactive approach** to implementing the Ordinance is handled through the Community involvement Coordinator by encouraging community support and awareness of human and civil rights programs. This is the public relations and educational unit of the department, which takes the proactive approach of presenting our educational programs to schools, churches, businesses, and civic organizations.

Additionally, the unit conducts special projects, surveys, seminars, public service announcements and participation in various community meetings and activities. This unit also works closely with the Human Rights Commission, Mayor's Commission on the Status of Women, Greater Tulsa Area Indian Affairs Commission, Mayor's Commission on the Concerns of Persons With Disabilities, and the Greater Tulsa Area Hispanic Affairs Commission to assess the needs of the community.

Self-Evaluation Reporting Form

The **Investigative and Enforcement Division enforces** the Ordinance through the investigation of complaints received which allege discrimination in housing, employment and public accommodations. This involves coordinating a system to receive, test, file, and investigate the complaint in order to make a recommendation of "probable cause" or "no probable cause" to the Director. If the Director rules there is probable cause to believe the discrimination occurred, an attempt is made to eliminate the violation by bringing parties together in a conciliation agreement.

2. Are all programs offered by your department available to someone with a:
- a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics)
YES
 - b. Sensory challenge? (Visual loss or hearing loss)
YES
 - c. Cognitive challenge?
YES

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.

All services provided by HRD are for the citizens of Tulsa with disregard to race, religion, ethnicity, sex disability

4. Do any "separate" programs segregate people with disabilities from others participating in the same program service or activity?
NO

5. If a "separate" program is offered, can a person choose NOT to participate in the separate program and join the mainstream program?

NO

6. Are any additional costs required for someone to participate in the programs, services or activities?

NO

 - a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics)
Wheel Chair
 - b. Sensory challenge? (Visual loss or hearing loss)
If necessary will assist.
 - c. Cognitive challenge?
If necessary will assist

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.
As far as I understand accommodations will be made for those that require it to perform work duties.

4. Do any "separate" programs segregate people with disabilities from others participating in the same program service or activity?
Not to my knowledge.

5. If a "separate" program is offered, can a person choose NOT to participate in the separate program and join the mainstream program?
As far as I know they are not required to participate.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

6. Are any additional costs required for someone to participate in the programs, services or activities?
No.
7. Are reasonable modifications necessary to provide programs, services and activities?
Not for my job function.
8. Does your department offer any licensing or certifications to citizens?
No
 - a. What licenses or certificates are offered?
9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently?
N/A
10. Is the building your program is in owned by the city or leased?
City
 - a. If the building is leased, who is it leased from?
11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.)
I am not familiar with these types of aids but I understand they will be provided for someone by the city if necessary.
12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.)
I am not familiar with these types of aids but I understand they will be provided for someone by the city if necessary.
13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)
I am not familiar with these types of aids but I understand they will be provided for someone by the city if necessary.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

14. Do any of the programs offered by your department have papers or documents that are given to employees or the public?

I don't know.

15. Do any of the programs have any audio/visual media that is offered to employees or to the public?

I don't know.

16. What policies and procedures are in place for each program?

I have not read these policies but aid is available for those with challenges.

17. Has your department designated an employee to act as an ADA Coordinator? How long have they been performing this function? Have they previously attended ADA-related training? Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa?

I have been nominated to do so. My first meeting is July 8th. I have not had any training.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

DEPARTMENT:	Municipal Court
CONTACT PERSON:	Frank Nobile
PHONE:	596-7750
EMAIL	fnobile@cityoftulsa.org

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:

The Municipal Criminal Court hears all misdemeanor cases set for court as prescribed by Charter and or Ordinance. We keep all records of the proceedings; we offer probation services and a myriad of services linked to the pursuit of justice.

2. Are all programs offered by your department available to someone with a:

Yes to all

- a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics)
- b. Sensory challenge? (Visual loss or hearing loss)
- c. Cognitive challenge?

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.

They are the same.

4. Do any "separate" programs segregate people with disabilities from others participating in the same program service or activity? **N/A**

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

5. If a “separate” program is offered, can a person choose NOT to participate in the separate program and join the mainstream program?
6. Are any additional costs required for someone to participate in the programs, services or activities? **No**
7. Are reasonable modifications necessary to provide programs, services and activities?
NO
8. Does your department offer any licensing or certifications to citizens?
NO
 - a. What licenses or certificates are offered?
9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently?
No
10. Is the building your program is in owned by the city or leased?
Owned
 - a. If the building is leased, who is it leased from?
11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.)

When notified of a person with a disability we will contact outside vendors who provide the necessary service.

12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.)

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

Signs throughout the building and in the elevators are marked in Brail. There are no other aids, if requested we will make every effort to accommodate the need.

13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)
None
14. Do any of the programs offered by your department have papers or documents that are given to employees or the public? **Yes**
15. Do any of the programs have any audio/visual media that is offered to employees or to the public? **No**
16. What policies and procedures are in place for each program?
Municipal Court abides by all of the P&P of the COT, as well as its own internal P&P's.
17. Has your department designated an employee to act as an ADA Coordinator? How long have they been performing this function? Have they previously attended ADA-related training? Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa? **Yes, 1 year, Yes, Some**

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

DEPARTMENT:	Working In Neighborhoods
CONTACT PERSON:	Tim Cartner
PHONE:	918-596-7218
EMAIL	tcartner@cityoftulsa.org

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:

The Working in Neighborhoods Department works closely with persons with limitations to assist them with compliance to the Zoning and Nuisance ordinances within the City of Tulsa. Working in Neighborhoods coordinates specific needs of the public with Federal Grant programs our Housing Section, the Department of Aging as well as volunteers, church groups and other civic organizations to meet the needs of the public.

2. Are all programs offered by your department available to someone with a:

- a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics)
- b. Sensory challenge? (Visual loss or hearing loss)
- c. Cognitive challenge?

Yes, Working in Neighborhoods coordinates and offers assistance to all citizens lacking the ability to help themselves.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.

Yes, upon discovery of a person in violation of the ordinances that has limitations; the specific needs of the individual are assessed and evaluated. The specific needs are also coordinated with government agencies as well as volunteer groups to fit the specific needs of the person in the community.

4. Do any “separate” programs segregate people with disabilities from others participating in the same program service or activity? No, all persons are evaluated one on one to offer needs as they arise.
5. If a “separate” program is offered, can a person choose NOT to participate in the separate program and join the mainstream program? Yes, assistance is applicable only to persons needing and in agreement to the help needed.
6. Are any additional costs required for someone to participate in the programs, services or activities? No additional cost applies
7. Are reasonable modifications necessary to provide programs, services and activities? Yes, each case is evaluated independently as to the limitations of the party in question, specific needs of the person and the help available to the needs.
8. Does your department offer any licensing or certifications to citizens? No
 - a. What licenses or certificates are offered?
9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently? No

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

10. Is the building your program is in owned by the city or leased? City hall, Owned by the City.

a. If the building is leased, who is it leased from?

11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.)

Working in Neighborhoods does utilize qualified Interpreters provided by the Tulsa Police Department as well as the University of Tulsa.

12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.)

Working in Neighborhoods does utilize qualified Interpreters provided by the Tulsa Police Department as well as the University of Tulsa.

13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)

None other than the assistance provided above.

14. Do any of the programs offered by your department have papers or documents that are given to employees or the public?

All assistance is delivered as the need is recognized. All assistance is specific to the individual needs of the person identified.

15. Do any of the programs have any audio/visual media that is offered to employees or to the public? No

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

16. What policies and procedures are in place for each program?

Working in Neighborhoods, Neighborhood Inspections does have written policy and procedure addressing emotionally disturbed citizens for the safety of the citizen and the employee.

17. Has your department designated an employee to act as an ADA Coordinator? How long have they been performing this function? Have they previously attended ADA-related training? Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa?

Tim Cartner has been designated to act as ADA Coordinator. The assignment is new without previous training.

DEPARTMENT:	Tulsa Performing Arts Center
CONTACT PERSON:	Cyndi Vetter
PHONE:	596-2362
EMAIL	cvetter@cityoftulsa.org

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them

The PAC is a rental facility w/ stage spaces, reception hall, etc. All groups bring in their own performances, meetings, receptions, etc. The PAC as a whole is responsible for accessibility of the building and to encourage anyone who rents the facility of their accessibility responsibilities - ie- hiring interpreters, arranging large print copies of scripts and/or program information, etc.

2. Are all programs offered by your department available to someone with a:

- a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics) yes
- b. Sensory challenge? (Visual loss or hearing loss) yes
- c. Cognitive challenge? yes

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain. No changes are usually necessary. Possibly adding a sign language interpreter for one performance out of 3 or 4 performances. Our building is over 30 years old & is not the most accessible, but usually we can get people where they need to be.

4. Do any "separate" programs segregate people with disabilities from others participating in the same program service or activity?

NO

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

5. If a “separate” program is offered, can a person choose NOT to participate in the separate program and join the mainstream program? n/a

6. Are any additional costs required for someone to participate in the programs, services or activities?

No

7. Are reasonable modifications necessary to provide programs, services and activities?

No

8. Does your department offer any licensing or certifications to citizens?

No

a. What licenses or certificates are offered? none

9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently?

Have had past problems w/ our Infra red listening devices in the smaller theatres, but mostly taken care of these days & functioning.

10. Is the building your program is in owned by the city or leased? Owned

a. If the building is leased, who is it leased from?

11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.)

Ticket office has a TTY, which is rarely used these days. Also ticket sales are available on the Internet. We have infra red listening devices in 3 of 4 performance spaces. Individual producing groups provide sign language interp. and/or captioning (ie Tulsa Opera & Celebrity Attractions)

12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.) This would be the responsibility of the production company renting the space/building. 2 – 3 weeks notice is necessary.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)

TTY in the ticket office. Otherwise this would also be the responsibility of the production company renting the space/building.

14. Do any of the programs offered by your department have papers or documents that are given to employees or the public? Intermission magazine possibly.

15. Do any of the programs have any audio/visual media that is offered to employees or to the public? The Intermission mag. Is also on our website.

16. What policies and procedures are in place for each program? We have a TPAC Operating Policy Manual. In the Introductions it states:..."Permittees and patrons, however, will be responsible for the compliance with all local, state, and federal laws in addition to the ordinances, policies and regulations of the City of Tulsa.

17. Has your department designated an employee to act as an ADA Coordinator? How long have they been performing this function? Have they previously attended ADA-related training? Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa?

Yes, Cyndi Vetter has been attending off & on for the past year.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

DEPARTMENT:	Tulsa Transit
CONTACT PERSON:	Bill Cartwright
PHONE:	918-560-5603
EMAIL	bcartwright@tulsatransit.org

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:

- Fixed Route bus service
- Paratransit Lift Program service

2. Are all programs offered by your department available to someone with a:

- a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics)
Yes
- b. Sensory challenge? (Visual loss or hearing loss)
Yes
- c. Cognitive challenge?
Yes

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.

The services offered are the same, however all of our vehicles are wheelchair equipped to accommodate people with disabilities.

4. Do any "separate" programs segregate people with disabilities from others participating in the same program service or activity?

People must be deemed eligible (not able to use the fixed route) to use the lift program, therefore they are separated from the fixed route.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

5. If a “separate” program is offered, can a person choose NOT to participate in the separate program and join the mainstream program?

Yes

6. Are any additional costs required for someone to participate in the programs, services or activities?

The lift program fare is twice the fixed route fare. This is allowed by FTA guidelines because the program cost is so much higher.

7. Are reasonable modifications necessary to provide programs, services and activities?

Yes. All reasonable modifications have been made to the equipment and the programs.

8. Does your department offer any licensing or certifications to citizens?

We classify people as eligible to participate in the lift program.

a. What licenses or certificates are offered?

Lift program eligibility.

9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently?

Just our buses.

10. Is the building your program is in owned by the city or leased?

Co-owned by the city and the federal government.

a. If the building is leased, who is it leased from?

11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.)

Written materials and on-board public address systems.

12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.)

Assistance locating items, Brail signage, call center assistance, and audio recordings.

13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)

Call center assistance and audio recordings.

PROGRAM, SERVICES AND/OR ACTIVITIES QUESTIONNAIRE

14. Do any of the programs offered by your department have papers or documents that are given to employees or the public?

Yes

15. Do any of the programs have any audio/visual media that is offered to employees or to the public?

We are currently working on audio/video materials that will be distributed to the public.

16. What policies and procedures are in place for each program?

Safety, non-discrimination, hazardous materials, and various operational procedures.

17. Has your department designated an employee to act as an ADA Coordinator? How long have they been performing this function? Have they previously attended ADA-related training? Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa?

We are currently working on this appointment.

Self-Evaluation Reporting Form

DEPARTMENT:	Parks & Recreation--Zoo
CONTACT PERSON:	Gary A. Schellhorn
PHONE:	918-596-9586 (office) 918-261-9106 (cell)
EMAIL	gschellhorn@cityoftulsa.org

Denial of participation. The ADA, like other civil rights statutes, prohibits the denial of services or benefits on specified discriminatory grounds. Just as a government office cannot refuse to issue food stamps or other benefits to an individual on the basis of his or her race, it cannot refuse to provide benefits solely because an individual has a disability.

Equality in participation/benefits. The ADA provides for equality of opportunity, but does not guarantee equality of results. The foundation of many of the specific requirements in the Department's regulations is the principle that individuals with disabilities must be provided an equally effective opportunity to participate in or benefit from a public entity's aid, benefits, and services.

1. What programs or services are offered in your department? Please list them:
[Animal exhibits, educational programs for adults and children, summer camps, open playground, train, carousel, climbing wall, camel rides, special events such as Zoo Run, Halloween, Starry Safari, Spring Fling,, facility rental for private parties](#)

2. Are all programs offered by your department available to someone with a:
 - a. Physical challenge? (Using a wheelchair, canes, crutches, walkers or prosthetics)
[Yes](#)
 - b. Sensory challenge? (Visual loss or hearing loss)
[No](#)
 - c. Cognitive challenge?
[Yes](#)

3. Are programs, services or activities offered by your department the same for people with disabilities or are separate or different accommodations necessary? Explain.
[The same for people with disabilities.](#)

4. Do any "separate" programs segregate people with disabilities from others participating in the same program service or activity?
[No.](#)

5. If a "separate" program is offered, can a person choose NOT to participate in the separate program and join the mainstream program?
[N/A](#)

Self-Evaluation Reporting Form

6. Are any additional costs required for someone to participate in the programs, services or activities?
Yes
7. Are reasonable modifications necessary to provide programs, services and activities?
Yes
8. Does your department offer any licensing or certifications to citizens?
 - a. What licenses or certificates are offered?
No
9. Are there elements or features offered through your programs, services or activities that have broken down or break down frequently?
Zoo is in need of infrastructure repair; some animal exhibits renovation or replacement to meet current industry standards.
10. Is the building your program is in owned by the city or leased?
Owned by City of Tulsa
 - a. If the building is leased, who is it leased from?
11. What auxiliary aids are provided for people with hearing impairments? (that might include: qualified interpreters, note takers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, and exchange of written notes.)
None
12. What auxiliary aids are provided for people with visual impairments? (That might include: qualified readers, taped texts, audio recordings, Brail materials, large print materials, and assistance in locating items.)
None
13. What auxiliary aids are provided for people with cognitive impairments? (That might include: TDD's, computer terminals, speech synthesizers, and communication boards.)
None
14. Do any of the programs offered by your department have papers or documents that are given to employees or the public?
Yes
15. Do any of the programs have any audio/visual media that is offered to employees or to the public?
Yes
16. What policies and procedures are in place for each program?

Self-Evaluation Reporting Form

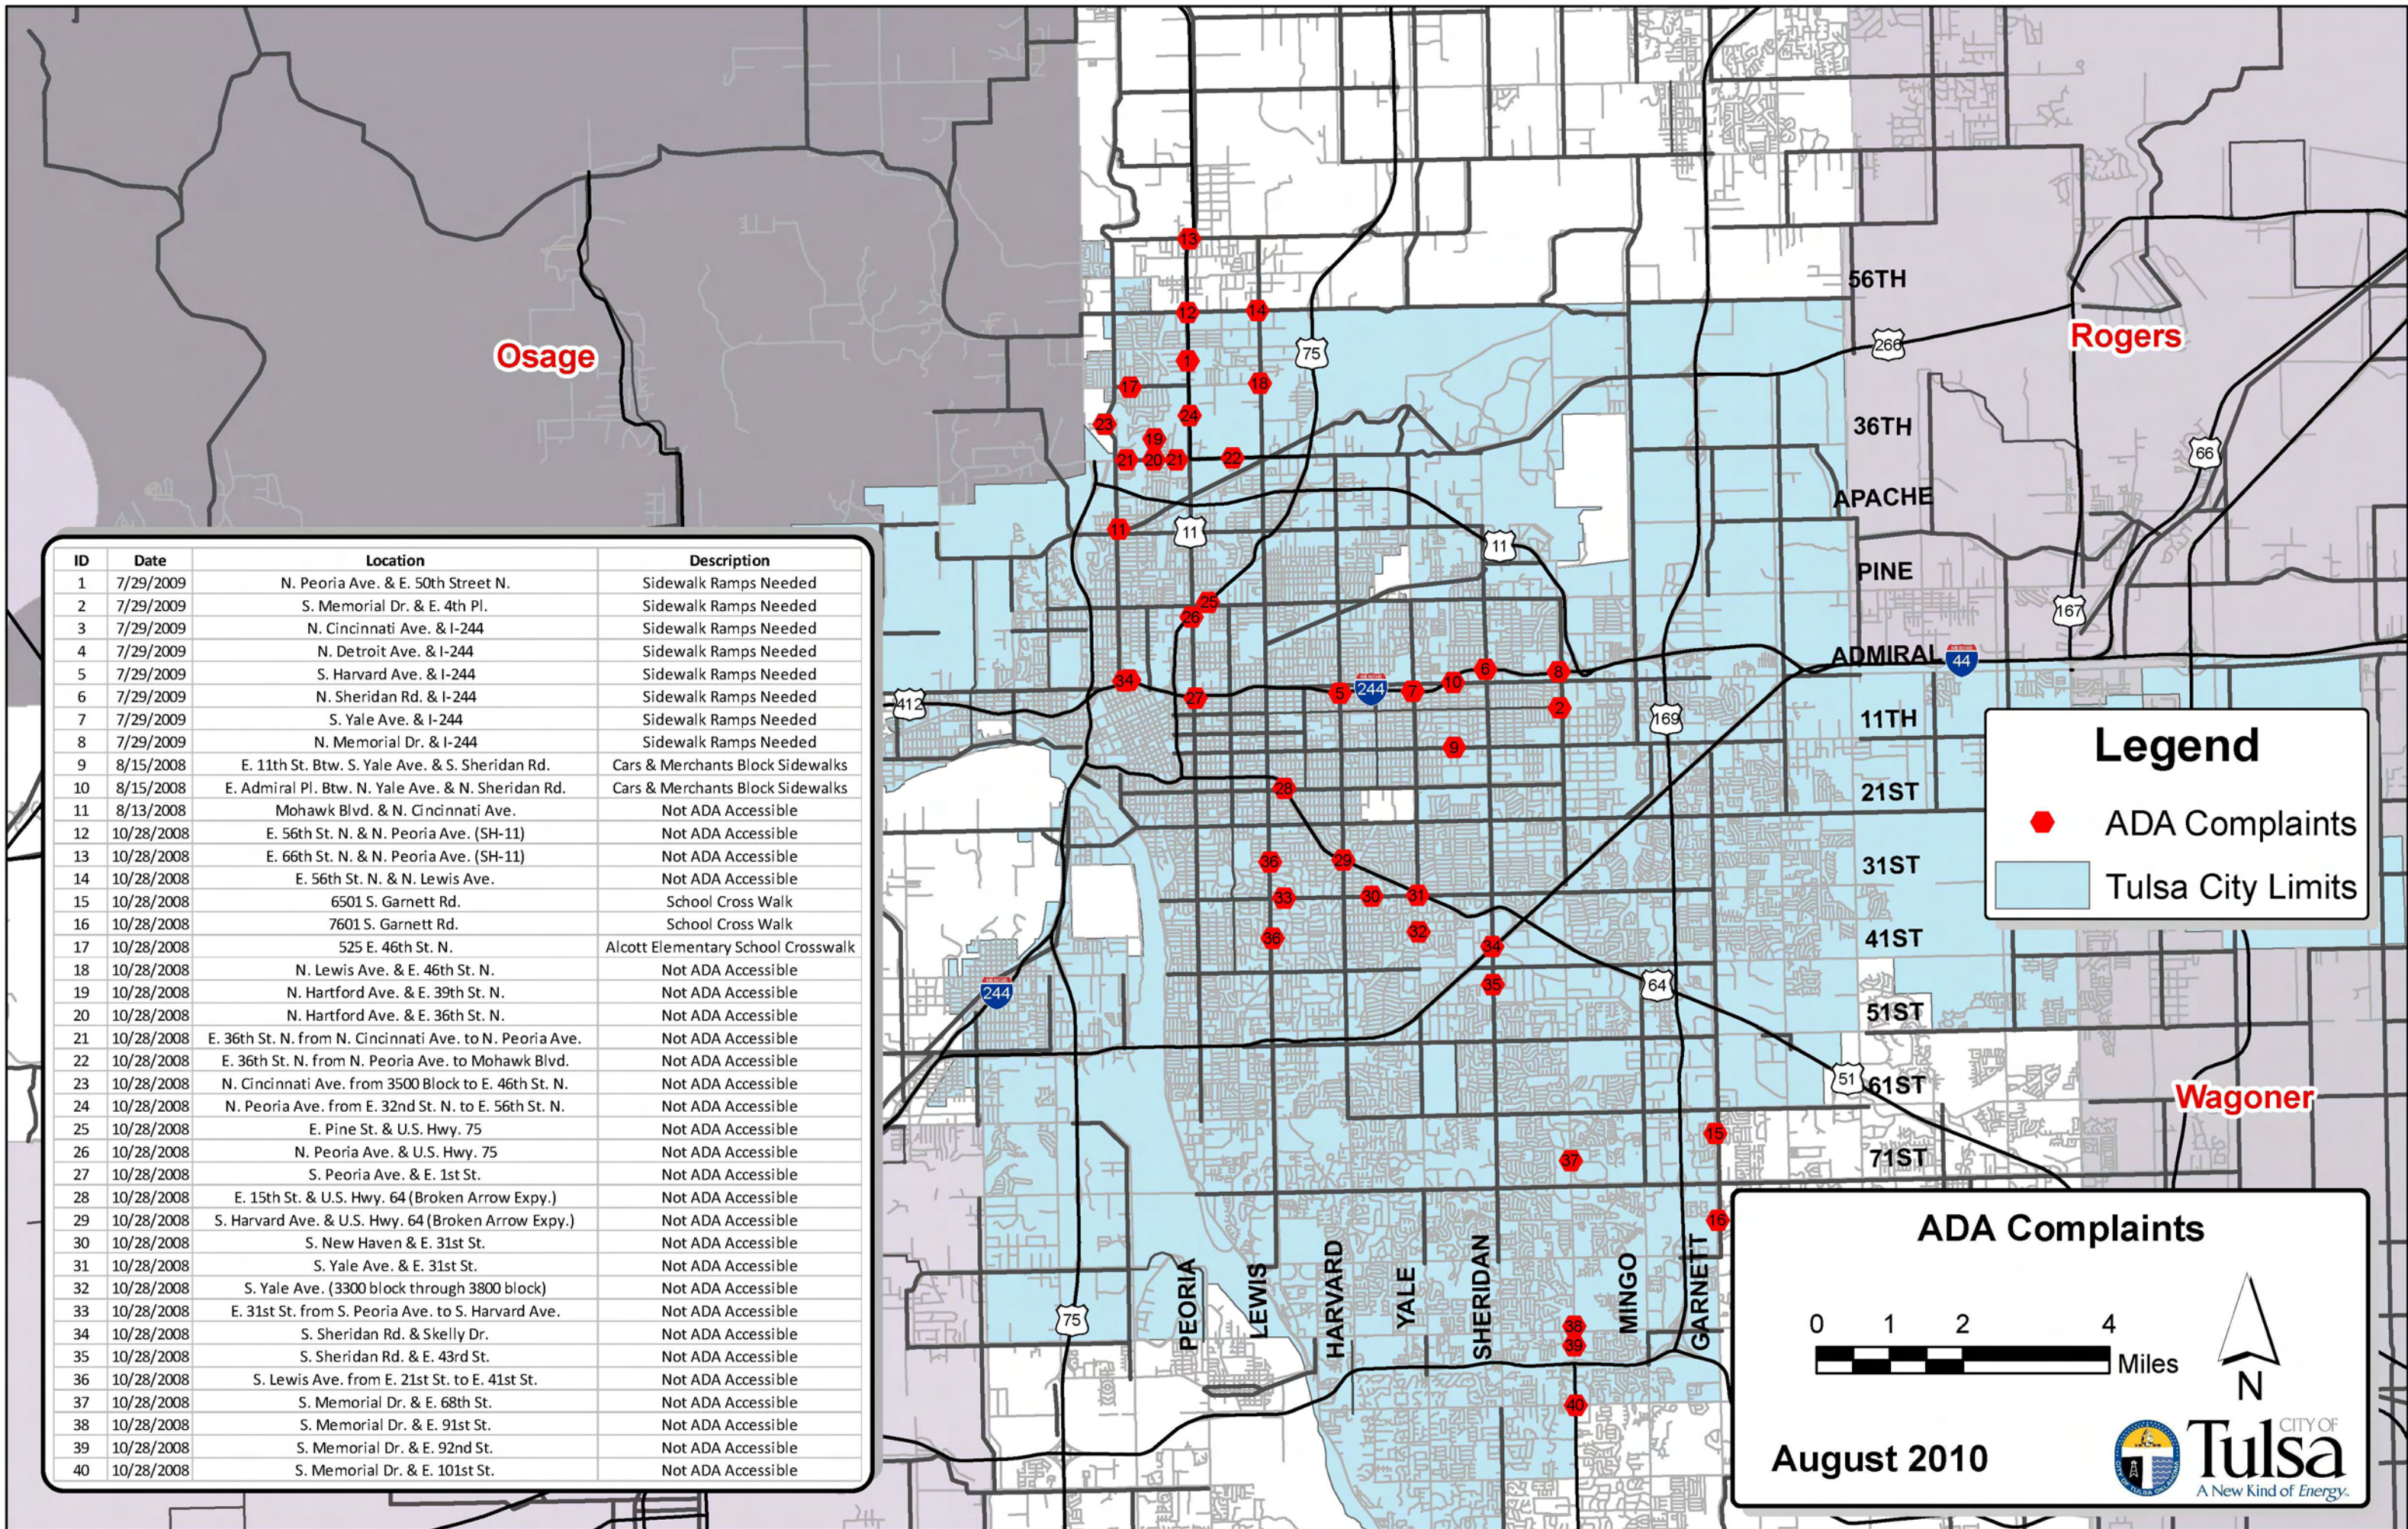

We have operating policies in place for carousel, climbing wall, camel rides, visitor rules in place for zoo guests and curriculum in place for educational programs and classes.

17. Has your department designated an employee to act as an ADA Coordinator? How long have they been performing this function? Have they previously attended ADA-related training? Have they attended on-going meetings for the update of the Self-Evaluation and Transition Plan for the City of Tulsa?

Gary Schellhorn, Public Works

**TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE
KICK-OFF MEETING AGENDA**

March 18, 2010 – 2:30 PM – 4:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa, One Technology Center, 10th Floor, South Conference Room

Items Distributed:

- Agenda
- Proposed Meeting Schedule
- Comment Form

I. Introductions

- Brent Stout, P.E. – Project Manager for City of Tulsa
- Dr. Lana Turner-Addison – Human Rights Department Director
- Dr. Michael Smith – ADA Compliance, Human Rights Department
- Brian Shamburger, P.E. – Project Manager for Kimley-Horn & Associates

II. Project Overview

- Goals and Objectives
- Roles and Responsibilities of Committee Members
- Self-Evaluation Process
- Transition Plan Development
- Staff Training
- Expectations and Implementation

III. Facilities to be included in Self Assessment

- ADA Related Complaints Received
- 10 - City Buildings
- 40 - Transit stops
- 10 - City parking lots
- 5 - Parks
- 200 - Signalized Intersections
- 10 - Miles of Sidewalks and Associated Curb Ramps

IV. Project Website

V. Schedule and Upcoming Meetings

VI. Questions and Comments

VII. Other Discussion Items

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

STAFF ORIENTATION MEETING AGENDA

April 22, 2010, 1:00 PM – 2:30 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa, One Technology Center, 10th Floor, South Conference Room

Items Distributed:

- Agenda

I. Introductions

- Brian Shamburger, P.E. – Project Manager for Kimley-Horn and Associates
- Darren Kaihlanen, Civil Rights Specialist, FHWA Oklahoma Division

II. Self-Evaluation and Transition Plan (20 minutes)

- Project status update
- Role of City Staff ADA Coordinators
- Programs, Services, and Activities
 - Departmental surveys
- Infrastructure
- Public involvement process
- Deliverables
- Schedule

III. Staff Training (5 minutes)

- Discuss proposed City staff training modules

IV. Project Website (5 minutes)

V. Questions and Comments on Plan Presentation (15 minutes)

VI. Presentation by Darren Kaihlanen (30 minutes)

- Overview of ADA Title II and III compliance
- Recent Federal initiatives on accessibility
- Accessibility in public rights-of-way
- Jurisdictional issues

VII. Questions and Comments for Darren Kaihlanen's Presentation (15 minutes)

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

STEERING COMMITTEE MEETING AGENDA

April 8, 2010 – 2:00 PM – 3:30 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa, Public Works Engineering Services
2317 South Jackson Avenue
Conference Room 213
Second Floor, South Building

Items Distributed:

- Agenda
- Preliminary Study Area Exhibits

I. Introductions

- Brent Stout, P.E. – Project Manager, City of Tulsa Public Works Dept.
- Michael Smith, Ph. D. – Compliance Investigations Administrator, Human Rights Dept.
- Brian Shamburger, P.E. – Project Manager for Kimley-Horn and Associates

II. Self-Evaluation Study Areas

- Overview of types of study areas
- Overview of the numbers of locations to be assessed for each area
- Review preliminary locations and discussion
 - Buildings and parking lots
 - Transit stops
 - Parks
 - Signalized intersections
 - Sidewalk and ramp corridors

III. Topics for Next Month's Meeting

- Status of Self-Evaluation field work
- Discuss prioritization factors for improvements to be used in Transition Plan
- Feedback on Project Website
- Staff Training

IV. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

STEERING COMMITTEE MEETING AGENDA

May 6, 2010 – 1:30 PM – 3:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa
One Technology Center
10th Floor
South Conference Room

Items Distributed:

- Agenda
- Preliminary Prioritization Factors

I. Self-Evaluation Status

- Reviewing upcoming stimulus and CIP projects
- Field work schedule

II. Prioritization Factors

- General overview of prioritization process
- Discuss prioritization factors for each of the following:
 - Buildings
 - Parking lots
 - Transit stops
 - Parks
 - Signalized intersections
 - Sidewalk corridors

III. Project Website Status

- Discuss status of project website

IV. Topics for Next Month's Meeting

- Status of Self-Evaluation field work
- Present prioritization matrices for each infrastructure type for review
- Feedback on Project Website

V. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

STEERING COMMITTEE MEETING AGENDA

June 3, 2010 – 1:30 PM – 3:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa
One Technology Center
10th Floor
South Conference Room

Items Distributed:

- Agenda
- Preliminary Prioritization Factors

I. Self-Evaluation Status

- Signalized intersections
- Buildings and parking lots
- Parks
- Transit stops
- Sidewalk corridors

II. Prioritization Matrices

- Discuss prioritization matrices for each of the following:
 - Buildings
 - Parking lots
 - Transit stops
 - Parks
 - Signalized intersections
 - Sidewalk corridors

III. Project Website Status

- Review website layout

IV. Topics for Next Month's Meeting

- Status of Self-Evaluation field work
- Feedback on Project Website

V. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

STEERING COMMITTEE MEETING AGENDA

July 8, 2010 – 1:30 PM – 3:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa - One Technology Center, 10th Floor, South Conference Room

Items Distributed:

- Agenda

I. Self-Evaluation Status

- ADA complaints
- Signalized intersections
- Buildings and parking lots
- Parks
- Transit stops
- Sidewalk corridors

II. Feedback on Project Website

III. Project Schedule

- Work Items
- Project Progress

IV. Programs and Service Questionnaires

- Feedback / comments
- Schedule for follow up interviews

V. Training Modules

- Topics
- Attendance
- Dates for first module

VI. Topics for Next Month's Meeting

- Status and summary of self-evaluation field work
- Discuss infrastructure prioritization matrices
- Review of Boards and Commissions
- ROW Policies and Programs
- Design Standards
- Training Report

VII. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

STEERING COMMITTEE MEETING AGENDA

August 5, 2010 – 1:30 PM – 3:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: OU Schusterman Center, Building 4, Room 138

Items Distributed:

- Agenda
- Infrastructure matrices
- Example project report

I. Self-Evaluation Status

- ADA complaints
- Signalized intersections
- Buildings and parking lots
- Parks
- Transit stops
- Sidewalk corridors
- ADA Questionnaire Results

II. Infrastructure Project Report

- Review and discuss example report

III. Infrastructure Prioritization Matrices

- Review and discuss proposed matrices for each study area

VII. Staff Training

- Discuss training held on August 4th and 5th
- Upcoming training dates
- Video recording of training

VIII. Feedback on Project Website

- Discuss comments or concerns

IX. Topics for Next Month's Meeting

- Summary of infrastructure assessment
- Review of Boards and Commissions
- ROW Policies and Programs
- Design Standards
- Project prioritization
- Transition plan document outline and content

X. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

STEERING COMMITTEE MEETING AGENDA

Thursday, September 2, 2010 – 1:30 PM – 3:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: OU Tulsa Schusterman Center – Learning Center, Room 231

Items Distributed:

- Agenda

I. Summary of Infrastructure Assessment

- ADA complaints
- Signalized intersections
- Buildings and parking lots
- Parks
- Transit stops
- Sidewalk corridors

II. Review of Boards and Commissions

- Discuss findings

III. ROW Policies and Programs

- Discuss findings

IV. Design Standards

- Discuss recommended changes

V. Project Prioritization

- Review initial results

VI. Transition Plan Document

- Discuss outline and content

VII. Training

- Discuss feedback from the training sessions

VIII. Topics for Next Month's Meeting

- Initial improvement costs by priority
- Update of transition plan document
- Review departmental questionnaires

IX. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

STEERING COMMITTEE MEETING AGENDA

Wednesday, October 6, 2010 – 1:30 PM – 3:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa
One Technology Center
3rd Floor
Theatre Room

Items Distributed:

- Agenda

I. Infrastructure Prioritization

- Update on progress

II. Initial Improvement Costs Summary of Infrastructure Assessment

- Signalized intersections
- Sidewalk corridors
- Transit stops

III. Review of Departmental Surveys

- Provide update on questionnaires

IV. Design Standards

- Update on progress

V. Transition Plan Document

- Update on progress

VI. Topics for Next Month's Meeting

- Update of improvement costs
- Boards and Commissions / Design standards updates
- Update of transition plan document

VII. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

STEERING COMMITTEE MEETING AGENDA

Thursday, November 4, 2010 – 1:30 PM – 3:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa
One Technology Center
10th Floor
South Conference Room

Items Distributed:

- Agenda

I. Infrastructure Prioritization Update

- Signalized intersections
- Transit stops

II. Summary of Initial Improvement Costs

- Signalized intersections
- Sidewalk corridors
- Transit stops
- Buildings / Parking Lots
- Parks

III. Design Standards

- Update on progress

IV. Update on Project Schedule

V. Update on Public Involvement

- Transportation Advisory Board – January 4th, 2011
- Public Workshop – January 11th or 18th, 2011
- Mayor’s Commission on the Concerns of the Disabled – January 25th

VI. Topics for Next Month’s Meeting

- Update of improvement costs
- Review of Boards and Commissions
- Design standards review update
- Update of transition plan document

VII. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

STEERING COMMITTEE MEETING AGENDA

Thursday, December 16, 2010 – 1:30 PM – 3:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa
One Technology Center
10th Floor
South Conference Room

Items Distributed:

- Agenda

I. Infrastructure Improvements and Prioritization Update

- Buildings
- Parks

II. Summary of Improvement Costs

- Buildings/Parking Lots
- Parks
- Signalized intersections
- Sidewalk corridors
- Transit stops

III. Update on Draft Transition Plan Document

IV. Discussion on Potential Funding Sources

- Public and/or Private
- ODOT Programs
- Federal Programs
- Allocating portions of City budgets

V. Upcoming Meetings

- Transportation Advisory Board – January 4th
- Public Workshop – January 18th
- Mayor’s Commission on the Concerns of the Disabled – January 25th
- TMAPC – February 2nd
- City Council – February 10th

VI. Topics for Next Month’s Meeting

- Update of transition plan document
- Implementation plan
- Public involvement meetings summaries

VII. Questions and Comments

- TMAPC – April
- City Council – April

VI. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

ADVISORY COMMITTEE MEETING AGENDA

June 3, 2010 – 3:30 PM – 5:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa
One Technology Center
10th Floor
South Conference Room

Items Distributed:

- Agenda
- Project Study Areas
- Preliminary Prioritization Factors

I. Self-Evaluation

- Review of project study areas
- Upcoming stimulus and CIP projects
- Discuss status of field work

II. Prioritization Factors

- General overview of prioritization process
- Discuss prioritization factors for each of the following:
 - Buildings
 - Parking lots
 - Transit stops
 - Parks
 - Signalized intersections
 - Sidewalk corridors

III. Project Website

- Review website layout

IV. Topics for Next Meeting

- Discuss self-evaluation results
- Status of project prioritization
- Discuss content of transition plan document

V. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

ADVISORY COMMITTEE MEETING AGENDA

August 5, 2010 – 3:30 PM – 5:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: OU Schusterman Center, Learning Center, Room 138

Items Distributed:

- Agenda
- Example project report
- Infrastructure matrices

I. Self-Evaluation

- Discuss status of field work and general summary of results
- Review and discuss example project report
- Discuss ADA Questionnaire results

II. Infrastructure Prioritization Matrices

- Review and discuss proposed matrices for each study area

III. Project Website

- Review and discuss project website

IV. Staff Training

- Discuss staff training modules held on August 4th and 5th
- Upcoming training dates

V. Topics for Next Meeting

- Discuss self-evaluation results
- Discuss results of project prioritizations
- Discuss content and outline for transition plan document

VI. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

ADVISORY COMMITTEE MEETING AGENDA

Wednesday, October 6, 2010 – 3:30 PM – 5:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa
One Technology Center
3rd Floor
Theatre Room

Items Distributed:

- Agenda

I. Staff Training

- Discuss training modules held in September

II. Infrastructure Prioritization

- Update on progress

III. Initial Improvement Costs Summary of Infrastructure Assessment

- Signalized intersections
- Sidewalk corridors
- Transit stops
- ADA Complaints

IV. Review of Departmental Surveys

- Provide update on questionnaires

V. Design Standards

- Update on progress

VI. Transition Plan Document

- Update on progress

VII. Topics for Next Month's Meeting

- Update of improvement costs
- Boards and Commissions / Design standards updates
- Update of transition plan document

VIII. Questions and Comments

TULSA ADA SELF-EVALUATION AND TRANSITION PLAN UPDATE

ADVISORY COMMITTEE MEETING AGENDA

Thursday, January 20, 2011 – 3:30 PM – 5:00 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City of Tulsa
One Technology Center
10th Floor
South Conference Room

Items Distributed:

- Agenda

I. Transition Plan Document Update

II. Self-Evaluation Findings and Costs

- Programs, Policies, and Practices
- Construction Standards and Details
- Review of Boards and Commissions
- Buildings/Parking Lots
- Parks
- Signalized intersections
- Sidewalk corridors
- Transit stops

III. Projected Citywide Infrastructure Costs

IV. Discussion on Potential Funding Opportunities

- Federal / State / MPO
- Public
- Private

V. Public Workshop Discussion

VI. Upcoming Meetings

- Mayor's Commission on the Concerns of the Disabled – January 25th
- Transportation Advisory Board – March 1st
- TMAPC – April
- City Council – April

VII. Questions and Comments

**TULSA ADA SELF-EVALUATION AND
TRANSITION PLAN UPDATE**

PUBLIC WORKSHOP AGENDA

Tuesday, January 18, 2011 – 6:00 PM – 7:30 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: The Center for Individuals with Physical Challenges
815 S. Utica Avenue
Tulsa, OK 74104-3633

Items Distributed:

- Agenda
- Study Areas
- Comment Form

I. Introductions

II. Background on ADA

III. City's History with ADA

IV. ADA Transition Plans

V. ADA Transition Plan Update

- a) Steering and Advisory Committees
- b) Staff Training
- c) Project Website
- d) Self-Evaluation
- e) Proposed Funding Sources

VI. Next Steps

VII. Comments and Questions

**TULSA ADA SELF-EVALUATION AND
TRANSITION PLAN UPDATE**

**MAYOR'S COMMISSION ON THE
CONCERNS OF TULSANS WITH DISABILITIES AGENDA**

Tuesday, January 25, 2011 – 3:00 PM – 4:30 PM

Project: Tulsa ADA Self-Evaluation and Transition Plan

Location: City Hall
10th Floor, North Conference Room

Items Distributed:

- Agenda
- Study Areas
- Comment Form

I. Introductions

II. Commission's Role

III. Background on ADA

IV. City's History with ADA

V. ADA Transition Plans

VI. ADA Transition Plan Update

- a) Steering and Advisory Committees
- b) Staff Training
- c) Project Website
- d) Self-Evaluation
- e) Proposed Funding Sources

VII. Next Steps

VIII. Comments and Questions

Appendix D

Infrastructure Reports

CITY OF TULSA – BUILDING REPORT

BUILDING NAME:	Jackson Complex		
TOTAL COSTS:	\$227,988		
GENERAL NOTES:			
	<p>This complex houses City of Tulsa employees only. There are no retail spaces or services for the general public at this facility, which lowers the priority for compliance in the overall city plan. If a person with a disability is hired to work in this facility, the elements necessary for that employee's job will be required to be brought into compliance as a priority. Besides occasional visitors for meetings, the primary user of these buildings are city employees.</p> <p>There are two buildings and a warehouse complex as part of this facility, all included in this report.</p> <p>Hardware is mixed. Some areas have levers and some have knobs that require grasping and twisting. At some point the hardware should be replaced but this isn't a high priority.</p> <p>Several doors have less than the required 18" on the pull side. Every time an area is renovated this should be resolved but it's not necessary to go in just to resolve this issue. Resolving this was not included in costs.</p>		
PARKING LOTS:	This complex has three main parking lots. The visitor lot is in front of the building and serves as the main lot for any non-employees. The north and south lots provide parking for employees of the City of Tulsa. None of the accessible parking spaces in any of the lots comply with the required access standards.		
NUMBER OF ACCESSIBLE PARKING SPACES	VISITORS LOT: 9 spaces/ 2 H/C 1 required	NORTH LOT: 73 spaces/ 6H/C 3 required	SOUTH LOT: 194 Spaces/ 3 H/C 6 required
PARKING VIOLATIONS:			
	<p>Visitors Lot:</p> <p>Neither of the two accessible spaces are compliant. Neither have an access aisle or a compliant path of travel to the entrances they intend to serve. The one furthest south is not necessary and should be removed.</p> <p>North Lot:</p> <p>None of the accessible parking spaces in the north lot have access aisles or a compliant path of travel to the entrance they intend to serve.</p> <p>South Lot:</p> <p>None of the accessible parking spaces in the north lot have access aisles or a compliant path of travel to the entrance they intend to serve. The parallel space provided should be removed completely. Nothing about it complies.</p>		

CITY OF TULSA – BUILDING REPORT

PARKING RECOMMENDATIONS:	
<p style="color: red; margin: 0;">PRIORITY HIGH</p> <p style="color: green; margin: 0;">COST: \$33,579</p>	<p>Visitors Lot: Remove the southern most space. Restripe the northern most space to be a compliant van accessible space and provide a path of travel from the space to the entrance to the main South building entrance.</p> <p>North Lot: Restripe the north lot to include access aisles and a path of travel to the building entrance for each accessible space, making at least one of the spaces van compliant. A path is not required to be striped across the drive, but it is highly recommended for liability purposes.</p> <p>South Lot: Remove the parallel (van) space completely. Move the remaining accessible parking spaces closer to the entrance they are intending to serve, which is the south door to the building.</p>
EXTERIOR CONDITIONS:	
	<p>There is a bus stop directly in front of the building and no path of travel to it. The bus stop itself is also not compliant.</p> <p>There is no accessible route between the north and south buildings. The sidewalk from the south to the north building leads to the stairs at the entry. There is no accessible route to the ramp serving that entrance.</p> <p>The sidewalk in front of the south building has a cross slope up to 8.6%.</p>
RECOMMENDATIONS:	
<p style="color: red; margin: 0;">PRIORITY HIGH</p> <p style="color: green; margin: 0;">COST: \$ 77,228</p>	<p>Provide an accessible route to the bus stop, after the bus stop itself is made compliant.</p> <p>Install a connecting sidewalk from the front of the north building to the base of the ramp so someone using a mobility aide could connect to the ramp.</p> <p>Remove the sidewalk in front of the south building, or replace it so the cross slope does not exceed 2%. Costs provided are for removing it.</p>
SOUTH BUILDING MAIN ENTRANCE:	
	<p>The main entrance to the south building has a slope up to the door of 8.1%. This slope continues right up to the door opening. The route from the accessible parking also needs to be altered for this to be a compliant entrance, that is discussed in the parking section above.</p>
RECOMMENDATION:	
<p style="color: red; margin: 0;">PRIORITY HIGH</p> <p style="color: green; margin: 0;">COST: \$ 3,278</p>	<p>Install a power assisted door mechanism with the button located on a clear and level area that is out of the door swing.</p>
BUILDING SECONDARY ENTRANCE:	
	<p>The southern most entrance to the south building is served by a curb ramp that has both a slope and cross slope that exceed all allowable tolerances. Additionally, there is a slope to the door up to 5.6% which also exceeds allowable tolerances and the door has only 10" on the pull side of the door.</p>

CITY OF TULSA – BUILDING REPORT

	RECOMMENDATION:
PRIORITY MEDIUM COST: \$ 6,556	Replace the curb ramp with a fully compliant curb ramp. Install a power assisted door mechanism with the button located on a clear and level area that is out of the door swing. This resolves both the slope and maneuvering clearance issues.
NORTH BUILDING MAIN ENTRANCE:	
	The main entrance to the north building has both a ramp and stairs serving it. The ramp is substantially compliant, except for the handrails, which are required on both sides and only provided on one. There is a gap at the top of the ramp that's about 1" wide that needs to be filled.
	RECOMMENDATION:
PRIORITY HIGH COST: \$ 3,604	Install handrails on both sides of the ramp. Ensure the handrails comply with all facets required under federal law for handrails.
BUILDING SECONDARY ENTRANCE:	
	The southern most entrance to the north building is served by steps, as is the northernmost door. There is no accessible connection between the two buildings at any of the three entrances. Above, we've discussed the path of travel in the front of the buildings and this is the recommended route.
	RECOMMENDATION:
PRIORITY MEDIUM COST: \$Calculated above	Only needs to be one accessible route between the buildings. The costs noted above provide for a route in the front of the building, making the route between these doors not required. If the path will not be installed in the front of the building, one will need to be provided here.
VERTICAL ACCESS:	
PRIORITY LOW COST: \$ 1,828	Vertical access is provided between the floors of the two main buildings. There is one elevated area in the warehouse building that has no vertical access. There is no requirement to install an elevator for that space. The elevator has the hall call buttons recessed. These need to be either flush or protruding.
SOUTH BUILDING INTERIOR ISSUES, FLOOR #1:	
GENERAL INFORMATION PRIORITY LOW COST: \$ 4,860	Doors are mixed. Some have knobs, some levers. Some of the doors in the individual departments do not have the required maneuvering clearance. The break room has a counter that's 36" high and the sink has cabinets underneath that prevent knee clearance. The paper towel dispenser is mounted at 66" high.
MEN'S RESTROOM:	The stall is 57 1/2" deep instead of 59" as required. The side grab bar is only 36" - 42" is required.

CITY OF TULSA – BUILDING REPORT

<p>PRIORITY LOW COST: \$ 2,740</p>	The signage is mounted on the door instead of the wall next to the door as required.
<p>WOMEN'S RESTROOM:</p> <p>PRIORITY LOW COST: \$ 2,220</p>	<p>The stall is 57 1/2" deep instead of 59" as required.</p> <p>The signage is mounted on the door instead of the wall next to the door as required.</p>
SOUTH BUILDING INTERIOR ISSUES, FLOOR #2:	
<p>GENERAL INFORMATION:</p> <p>PRIORITY LOW COST: \$ 4,860</p>	<p>Doors are mixed. Some have knobs, some levers.</p> <p>Some of the doors in the individual departments do not have the required maneuvering clearance.</p> <p>The break room has a counter that's 34" high and the sink has cabinets underneath that prevent knee clearance.</p>
<p>MEN'S RESTROOM:</p> <p>PRIORITY LOW COST: \$ 7,430</p>	<p>The stall is 57" deep instead of 59" as required.</p> <p>The urinal is in an alcove 38" deep and only 34" wide instead of 36" wide as required.</p> <p>The urinal center line is 15" from the wall instead of 18" as required.</p> <p>Water closet center line is 21" instead of the required 18".</p> <p>The signage is mounted on the door instead of the wall next to the door as required.</p>
<p>WOMEN'S RESTROOM:</p> <p>PRIORITY LOW COST: \$ 2,220</p>	<p>The stall is 56" deep instead of 59" as required.</p> <p>The signage is mounted on the door instead of the wall next to the door as required.</p>
SOUTH BUILDING INTERIOR ISSUES, FLOOR #3:	
<p>GENERAL INFORMATION</p> <p>PRIORITY LOW COST: \$ 980</p>	<p>Doors are mixed. Some have knobs, some levers.</p> <p>Some of the doors in the individual departments do not have the required maneuvering clearance.</p>
<p>MEN'S RESTROOM:</p> <p>PRIORITY LOW COST: \$4,725</p>	<p>The stall is 58" deep instead of 59" as required.</p> <p>The urinal center line is 12 1/2" from the wall instead of 18" as required.</p> <p>The signage is mounted on the door instead of the wall next to the door as required.</p>
<p>WOMEN'S RESTROOM:</p> <p>PRIORITY LOW COST: \$ 2,220</p>	<p>The stall is 57" deep instead of 59" as required.</p> <p>The signage is mounted on the door instead of the wall next to the door as required.</p>

CITY OF TULSA – BUILDING REPORT

NORTH BUILDING INTERIOR ISSUES, FLOOR #1:	
GENERAL INFORMATION: <p style="text-align: right; color: #ffcc00;">PRIORITY LOW</p> <p style="text-align: right; color: #008000;">COST: \$ 4,860</p>	<p>Doors are mixed. Some have knobs, some levers.</p> <p>Some of the doors in the individual departments do not have the required maneuvering clearance.</p> <p>The break room has a counter that's 36" high and the sink has cabinets underneath that prevent knee clearance.</p> <p>The Exit buttons are in the corner with no clear floor space in front of them.</p>
MEN'S RESTROOM: <p style="text-align: right; color: #ffcc00;">PRIORITY LOW</p> <p style="text-align: right; color: #008000;">COST: \$ 2,220</p>	<p>The stall is 57" deep instead of 59" as required.</p> <p>The door only has 14 1/2" on the pull side instead of the required 18"</p> <p>The signage is mounted on the door instead of the wall next to the door as required.</p>
WOMEN'S RESTROOM: <p style="text-align: right; color: #ffcc00;">PRIORITY LOW</p> <p style="text-align: right; color: #008000;">COST: \$ 2,220</p>	<p>The stall is 58" deep instead of 59" as required.</p> <p>The signage is mounted on the door instead of the wall next to the door as required.</p>
NORTH BUILDING INTERIOR ISSUES, FLOOR #2:	
GENERAL INFORMATION: <p style="text-align: right; color: #ffcc00;">PRIORITY LOW</p> <p style="text-align: right; color: #008000;">COST: \$ 4,860</p>	<p>Doors are mixed. Some have knobs, some levers.</p> <p>The counter in the reproduction room is mounted at 41 3/4" in height. If remodeled this should be altered, but it's not required to be brought into compliance and isn't included in the costs.</p> <p>The fire extinguishers are mounted so they protrude out 8" into the path of travel. These need to be lowered so the leading edge is at or below 27" aff.</p> <p>Some of the doors in the individual departments do not have the required maneuvering clearance.</p> <p>The break room has a counter that's 36" high and the sink has cabinets underneath that prevent knee clearance.</p>
MEN'S RESTROOM: <p style="text-align: right; color: #ffcc00;">PRIORITY LOW</p> <p style="text-align: right; color: #008000;">COST: \$ 2,220</p>	<p>The stall is 57" deep instead of 59" as required.</p> <p>The center line of the urinal is 13" instead of the required 15"</p> <p>The signage is mounted on the door instead of the wall next to the door as required.</p>
WOMEN'S RESTROOM: <p style="text-align: right; color: #ffcc00;">PRIORITY LOW</p> <p style="text-align: right; color: #008000;">COST: \$ 2,220</p>	<p>The stall is 58" deep instead of 59" as required.</p> <p>The signage is mounted on the door instead of the wall next to the door as required.</p>

CITY OF TULSA – BUILDING REPORT

<p>WOMEN'S RESTROOM:</p> <p>PRIORITY LOW</p> <p>COST: \$ 760</p>	<p>The signage is mounted on the door instead of the wall next to the door as required.</p> <p>The shelf and the paper towel dispenser are protruding objects. These should be relocated or another type spec'd to reduce potential problems.</p>
<p>WAREHOUSE MEN'S ROOM:</p>	<p>There is a very small restroom in the warehouse area that has no access features at all. This is not required to be brought into compliance, but if an employee with a disability is hired, or an employee becomes disabled, an accessible restroom needs to be provided as close as possible to their work area.</p>

CITY OF TULSA – BUILDING REPORT

1. Visitor's parking area. *Parking space needs to be altered to be 96" wide with a 96" access aisle. Slope is slightly over requirement but can be accepted as a structural tolerance. It is recommended to stripe a path across the drive for safety purposes but not required by regulations.*

2. Visitor's parking area. *This accessible space is not necessary. The path of travel from this space to either entrance is not compliant. With the plan for altering the accessible spaces in place, this space can be removed.*

3. South Lot - *This parking space is the only one designated as a "van" accessible parking space and is not compliant. The slopes do not comply, there is no compliant access aisle and no way to make it comply in it's current location. This space needs to be moved closer to the door it's intended to serve.*

4. South Lot – *The rest of the accessible spaces on the west side of the lot should be moved to closer to the door they're intended to serve and ALL need to be restriped to include access aisles. Only one of them will require a 96" access aisle, the rest are required to have a 60" access aisle.*

CITY OF TULSA – BUILDING REPORT

5. North Lot – This lot has six accessible parking spaces and none of them have the required access aisle. At least one must have a 96” access aisle and the others can have a 60” access aisle. Ensure the access aisle connects to the accessible route to the door it’s intended to serve.

6. Entrance doors – The main entry to the South Engineering building has a slope of up to 8.1%. The area in front of the door may not exceed 2% in any direction. A power assisted door will resolve this issue.

7. Entrance doors – The south entry of the South Engineering building has two problems. The curb ramp leading to it has non-compliant slopes and cross slopes and the area in front of the door has a slope as well. The curb ramp will need to be altered and a power assisted door installed.

8. Entrance doors – The main entry door to the North Building is acceptable, but the ramp to it needs a little work. A handrail is only provided on one side, when both sides are required, and the one provided doesn’t comply. Handrails need to be replaced and the gap at the top needs to be filled.

CITY OF TULSA – BUILDING REPORT

9. Path between buildings – The path of travel between the North and South buildings is not compliant. Directly between the buildings there are steps and the sidewalks in front do not connect. IF people need to travel between buildings a compliant path of travel needs to be provided.

10. Path between buildings – The front path of travel between the North and South buildings has a sidewalk, but the sidewalk from the South Building only connects to the steps of the North building. It does not connect to the ramp so there is no accessible path.

BUILDING NAME:	Animal Shelter
TOTAL COSTS:	\$ 28,990
GENERAL NOTES:	
	<p>This building is an animal shelter. There are areas of it that are open to the public to review and choose pets, and other areas that are for employees only. The higher priority is placed on the public areas. Employee areas do not need to be altered unless an alteration is planned for other reasons or they hire someone with a disability to work there. Then the areas frequented by the employee, and all common use areas, will need to be brought into compliance.</p> <p>Hardware is mixed, some levers have replaced knobs but not in all areas. At some point the hardware should be replaced but this isn't a high priority.</p> <p>Because of the connection between people with disabilities and animals, as well as the connection between the elderly and animals, this facility is a higher priority than most.</p>
PARKING LOTS:	<p>This complex has two main public parking lots with 58 parking spaces total. The back lot appears to be used for employees and all accessible parking spaces are located in the front lot. The total number of spaces for both lots is 56 (24 in the front and 32 in the back). The public appears to utilize the front lot.</p> <p>The number of accessible spaces provided is acceptable for the total number of parking spaces.</p>
NUMBER OF ACCESSIBLE PARKING SPACES	<p><u>BOTH LOTS:</u></p> <p>56 spaces/ 3 H/C</p> <p>3 required</p>
PARKING VIOLATIONS:	
	<p>The accessible parking spaces are substantially compliant but the path of travel serving them is not. This path of travel has a slope that is almost double the allowable slope for a ramp and is a danger. This is a VERY high priority item. The current slope is up to 15.8% and is not allowed to exceed 8.33% for a ramp. No handrails or other features are provided on this slope for safety.</p> <p>Additionally, the signage for the parking spaces is too low. The signage is required to be a minimum of 60" to the bottom most character.</p>
PARKING RECOMMENDATIONS:	
	<p>Remove the non-compliant walk and install a compliant ramp. It appears this will have to be a switchback ramp to achieve compliance. Because of the liability issues, this should be a very high priority.</p> <p>PRIORITY HIGH COST: \$14,550</p> <p>Replace the accessible parking spaces signage poles with poles that hold the signs a minimum of 80" above the parking surface.</p>
BUILDING INTERIOR ISSUES:	
GENERAL INFORMATION:	<p>Areas of this building have been altered for compliance, but are not fully compliant. The public areas are the main areas of focus, as noted above. All employee areas have to be brought into compliance if a</p>

<p>PRIORITY HIGH* COST: \$1,850</p> <p>PRIORITY LOW COST: \$3,900</p> <p>* This is for the main transaction counter. The rest of the elements are a low priority.</p>	<p>renovation occurs or if an employee with a specific need is hired.</p> <p>The break room has a 36" counter with cabinets underneath, which prevents the required knee clearance underneath. The counter needs to be lowered to 34" and knee clearance provided.</p> <p>The main transaction counter is 41 1/2" high. This is required to be lowered to 36" maximum height.</p> <p>The employee break room has a 36" counter with cabinets underneath, which prevents the required knee clearance underneath. The counter needs to be lowered to 34" and knee clearance provided.</p>
<p>PUBLIC RESTROOM:</p>	<p>This restroom is substantially compliant.</p>
<p>PRIVATE RESTROOM:</p> <p>PRIORITY LOW COST: \$ 150</p>	<p>This restroom is substantially compliant except the mirror is mounted at 47" instead of the required 40" to the bottom of the reflecting surface. The mirror should be lowered 7" for compliance.</p>
<p>EMPLOYEE WOMEN'S RESTROOM</p> <p>PRIORITY LOW COST: \$ 4,270</p>	<p>The mirror is mounted at 48" instead of the required 40" to the bottom of the reflecting surface. The mirror should be lowered 8" for compliance.</p> <p>No bench is installed in the locker room. This needs to be installed if there is an employee with a disability on staff.</p> <p>The shower has accessible features, but there is no clear floor space behind the shower seat. 12" is required to be provided behind the shower seat. This only needs to be altered if there is an employee with a disability needing this requirement.</p>
<p>EMPLOYEE MEN'S RESTROOM</p> <p>PRIORITY LOW COST: \$ 4,270</p>	<p>The mirror is mounted at 48" instead of the required 40" to the bottom of the reflecting surface. The mirror should be lowered 8" for compliance.</p> <p>No bench is installed in the locker room. This needs to be installed if there is an employee with a disability on staff.</p> <p>The shower has accessible features, but there is no clear floor space behind the shower seat. 12" is required to be provided behind the shower seat. This only needs to be altered if there is an employee with a disability needing this requirement.</p>

CITY OF TULSA – BUILDING REPORT

BUILDING NAME:	Tulsa City Hall
TOTAL COSTS:	\$78,120
GENERAL NOTES:	
	<p>This building is located in a downtown area and is served by a surface parking lot that is not actually part of the facility and is shared with the Performing Arts Center. The website offers a couple other parking options, but this lot seems to be utilized the most for City Hall visitors and is marked as such.</p> <p>This facility was built/renovated since ADA went into effect and is expected to be fully compliant. It's also one of the most visible buildings for the city because it's City Hall.</p> <p>Not every floor of this building is occupied by the City. Floors not noted in this report either are not part of the city's space or it was secured and we were unable to access it.</p> <p>Most of the floors have problems with the knee clearance under the sink. This particular item is being marked as a low priority because of changes in new federal regulations.</p>
PARKING LOTS:	<p>As noted above, the accessible parking is primarily located in the surface lot located directly across the street from City Hall. The intersection curb ramps were part of the downtown study and details of those are in another report completed as part of this process.</p> <p>This lot has a total of 282 parking spaces. Currently there are 7 designated as accessible. The slope of the spaces designated are not fully compliant but are within a reasonable tolerance.</p>
NUMBER OF ACCESSIBLE PARKING SPACES	<p><u>SURFACE LOT:</u> 282 spaces all together, 7 spaces marked as accessible and 7 are required</p>
PARKING VIOLATIONS:	
	<p>It is our understanding this lot is privately owned, not owned by the city. As such, the city is not responsible for making changes so no recommendations have been made. Fortunately, it's in substantial compliance.</p>
BUILDING, ENTRANCES:	
	<p>The main entrance is substantially compliant, both for employees and visitors.</p>
VERTICAL ACCESS:	
	<p>Vertical access is provided between the floors of this building.</p>

CITY OF TULSA – BUILDING REPORT

BUILDING INTERIOR ISSUES:	
GROUND FLOOR:	
GENERAL INFORMATION: <p style="text-align: right; color: red; margin: 0;">PRIORITY HIGH</p> <p style="text-align: right; color: green; margin: 0;">COST: \$ 2,235</p>	<p>All visitors check in at the main security desk. This desk is substantially compliant but the lowered section is not used as it should be. Once the check in procedures are complete, the door leading to the elevators is a heavy door, requiring more than 5 lbs. of pressure to open. This can be alleviated with a power assisted door mechanism if adjusting the closer doesn't work.</p>
SECOND FLOOR:	
GENERAL INFORMATION: <p style="text-align: right; color: red; margin: 0;">PRIORITY HIGH</p> <p style="text-align: right; color: green; margin: 0;">COST: \$ 6,235</p>	<p>This is a very public floor with citizen utilities and high traffic. The following issues were found in the general services offered on this floor:</p> <p>FINES: (CASHIER) – There is a lowered counter, but it wasn't open at the time of the inspection. We stopped on this floor several times over the past several months and have yet to find that counter open. If only one counter is open it MUST be the accessible one. This is a program and policy issue that needs to be resolved.</p> <p>UTILITIES – The counter serving this department is at 44 ½" and does not have a lowered section. This must be resolved as part of this process.</p> <p>HR – The reception counter serving this department is at 44 ½" and does not have a lowered section. This must be resolved as part of this process.</p> <p>CITY COUNCIL CHAMBER – This had a meeting in progress but appeared to be substantially compliant.</p>
MEN'S RESTROOM: <p style="text-align: right; color: orange; margin: 0;">PRIORITY LOW</p> <p style="text-align: right; color: green; margin: 0;">COST: \$ 950</p>	<p>The centerline of the water closet is 19 ½" instead of the required 18". This exceeds allowable tolerances. This is such a minimal issue it is recommended this only be addressed if it becomes an issue for someone or if the restroom is substantially renovated.</p>
WOMEN'S RESTROOM: <p style="text-align: right; color: orange; margin: 0;">PRIORITY MEDIUM</p> <p style="text-align: right; color: green; margin: 0;">COST: \$ 160</p>	<p>No signage is provided for this restroom.</p>
THIRD FLOOR:	
GENERAL INFORMATION: <p style="text-align: right; color: orange; margin: 0;">PRIORITY MEDIUM</p> <p style="text-align: right; color: green; margin: 0;">COST: \$ 5,750</p>	<p>The door into the main operations area on the North end has only 9" on the pull side instead of the required 18". This far exceeds any allowable tolerances and needs to be resolved. This can be done by either moving the door to allow proper maneuvering clearances or installing a power assisted door mechanism. Costs provided are for the power assisted door mechanism.</p> <p>The phone provided to ring people into the floor is mounted with the highest operable part is at 57". This needs to be lowered so the highest operable part does not exceed 48".</p> <p>The kitchen in the Executive Briefing Center has the required knee clearance, but the sink is installed in a 36" counter instead of the required 34" counter.</p>

CITY OF TULSA – BUILDING REPORT

<p>MEN'S RESTROOM (North):</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$1,150</p>	<p>The back grab bar is mounted at 41" and is required to be between 33" and 36" aff. Since a range is given, the grab bar needs to be in that 3" range.</p> <p>The mirror is mounted at 46 ¾" to the bottom of the reflecting surface instead of the required 40" maximum height.</p>
<p>WOMEN'S RESTROOM (North):</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 3,450</p>	<p>The back grab bar is mounted at 41" and is required to be between 33" and 36" aff. Since a range is given, the grab bar needs to be in that 3" range.</p> <p>The mirror is mounted at 47" to the bottom of the reflecting surface instead of the required 40" maximum height.</p> <p>The centerline of the water closet is 19 ½" instead of the required 18".</p> <p>The door thresholds are too high. They are required to be no more than ¼" abrupt level change and can go to ½" with a 1:2 bevel. They may not be over that. This threshold needs to be altered for compliance.</p>

FIFTEENTH FLOOR:	
<p>PRIORITY MEDIUM COST: \$ 6,750</p>	<p>GENERAL INFORMATION:</p> <p>The phone provided to ring people into the floor is mounted with the highest operable part is at 60". This needs to be lowered so the highest operable part does not exceed 48".</p> <p>The reception counter serving this department is at 42" and does not have a lowered section. This must be resolved as part of this process.</p> <p>The pantry has a 36" high counter and sink with cabinets that prevent the required clear knee space.</p>
<p>PRIORITY MEDIUM COST: \$1,250</p>	<p>MEN'S RESTROOM (North):</p> <p>The lavatory is mounted at the right height but only has 25 1/2" of knee clearance instead of the required 29". There is an accessible lavatory in the accessible stall, but that can't be the only accessible lavatory. One in the common use area must also be compliant.</p> <p>The mirror is mounted at 47 3/4" to the bottom of the reflecting surface instead of the required 40" maximum height.</p>
<p>PRIORITY MEDIUM COST: \$1,250</p>	<p>WOMEN'S RESTROOM (North):</p> <p>The lavatory is mounted at the right height but only has 25 1/2" of knee clearance instead of the required 29". There is an accessible lavatory in the accessible stall, but that can't be the only accessible lavatory. One in the common use area must also be compliant.</p> <p>The mirror is mounted at 47 3/4" to the bottom of the reflecting surface instead of the required 40" maximum height.</p>
<p>PRIORITY MEDIUM COST: \$2,675</p>	<p>UNISEX RESTROOM, BOTH SIDES:</p> <p>The lavatory has no knee clearance.</p> <p>The mirror is mounted at 47 3/4" to the bottom of the reflecting surface instead of the required 40" maximum height.</p> <p>No grab bars are installed.</p> <p>The water closet is at standard heights (16") and the required clear floor space is not provided.</p> <p>The door is heavy, requires 18 lbs. of pressure to open instead of the required 5 lbs. This must be resolved.</p>

CITY OF TULSA – BUILDING REPORT

1. Main Entry. The main entry door is compliant. The only entry issue is the door from the reception area to the elevators is too heavy and must either have the closer adjusted or a power assist device installed.

2. Restroom Mirrors. The mirrors are mounted at 47" to 49" to the bottom of the reflecting surface. These need to be lowered to 40"

3. Restrooms. Unisex restrooms provided on the 15th floor, on both sides, do not have the required clear floor space because of the glass partition. Grab bars are not installed and the water closets are not at accessible heights. These are required to fully comply.

4. Internet Cafes. All of the internet cafes have fixed seating with no accessible seating provided. At least 5% of the fixed seating is required to comply.

CITY OF TULSA – BUILDING REPORT

5. Counters - Internet Cafes. *All of the internet cafes have fixed seating with no accessible seating provided. At least 5% of the fixed seating is required to comply.*

6. Transaction Counters. Some departments have a lowered counter and some do not. All are required to have a counter lowered to 36" for access. Those that have them **MUST** have the accessible counter open during all hours of operation. If only one counter is in use, it must be the accessible one.

CITY OF TULSA – BUILDING REPORT

BUILDING NAME:	Tulsa Convention Center
TOTAL COSTS:	\$ 229,599
GENERAL NOTES:	
	<p>This building is located in a downtown area and is served by a parking garage. This is a highly visible, high traffic facility that has been built in several phases, so there are areas that are brand new and areas that are very old. Some of the older areas have been brought into compliance, but some have not been. This building is quite complex so each section</p> <p>Hardware is mixed, some levers have replaced knobs but not in all areas. At some point the hardware should be replaced beginning with the public areas. Employee only areas should be done, but on a lower priority. ANY construction done within the building should trigger the hardware replacement for that area.</p> <p>The path of travel followed for this report began in the newest section (2009 addition) and followed through to the oldest section.</p> <p>Every non-compliant restroom in this building needs to have signage indicating the location of the nearest accessible restroom, until it's brought into compliance.</p>
PARKING LOTS:	<p>The Tulsa Convention Center parking garage has a posted vertical clearance of 7'2", which does not allow for high profile vans. Van spaces are required to be provided somewhere, so that area needs to be identified and available. THIS IS A HIGH PRIORITY.</p> <p>The garage has 1,395 parking spaces available and is required to have 24 accessible parking spaces, four of which must be van accessible. The spaces provided in the garage do not have a compliant path of travel and many of them don't have signage.</p>
NUMBER OF ACCESSIBLE PARKING SPACES	1,395 parking spaces/25 accessible spaces provided.
PARKING VIOLATIONS:	
	<p>The parking spaces are required to have access aisle that connect to an accessible path of travel and some of the spaces have access aisles but the path of travel requires travel behind parked cars or in a vehicular path.</p> <p>Each accessible space is required to have a sign indicating it's a reserved space. Several of the spaces, especially on the ground level, have no signage.</p>
PARKING RECOMMENDATIONS:	
	<p>Ensure each accessible parking space has both a sign and a path of travel that does not require the user to travel behind parked cars or in the vehicular route.</p> <p>PRIORITY HIGH COST: \$16,569</p> <p>Provide van accessible parking somewhere, preferably in a covered area. A minimum of three van spaces need to be provided.</p>

CITY OF TULSA – BUILDING REPORT

VERTICAL ACCESS:	
	Vertical access is provided between the floors of this building.
CONVENTION CENTER INTERIOR ISSUES:	
NEW AREA (2009 ADDITION):	
GENERAL INFORMATION: <p style="text-align: right;">PRIORITY HIGH COST: \$20,000</p>	In assembly areas, when the fixtures of the men's and women's restrooms added together are 20 or more there is a requirement for a single user, fully compliant "family" restroom. The north end of the 2009 addition has two large, compliant restrooms and a compliant staff restroom but no "family" restroom as required. Because this is new construction and required under the law and standards in effect at the time the building was built, one needs to be added in this area. Costs can vary depending upon the available plumbing lines, we are adding \$20,000 for this to be done as an estimated cost. Installing this is a high priority.
MEN'S RESTROOM:	The restroom closest to the entrance of the 2009 addition is substantially compliant.
WOMEN'S RESTROOM:	The restroom closest to the entrance of the 2009 addition is substantially compliant.
(1984 ADDITION):	
GENERAL INFORMATION:	<p>This area was built prior to the ADA going into effect. Compliance is required based on a clause for barrier removal under the law. This area was evaluated based on what has been brought into compliance as part on the overall barrier removal program.</p> <p>No "family" restroom is noted in this area either but they weren't required to be installed at this point in time.</p>
MEN'S RESTROOM: <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 2,850</p>	<p>The ambulatory stall is 38" wide instead of the required 36" width.</p> <p>The standard stall is only 48" wide and has the flush control on the wrong side of the water closet. This is required to be brought into compliance with the 60" stall requirement as part of the barrier removal requirement.</p>
WOMEN'S RESTROOM: <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 2,850</p>	<p>The ambulatory stall is 39" wide instead of the required 36" width.</p> <p>The standard stall is only 48" wide and has the flush control on the wrong side of the water closet. This is required to be brought into compliance with the 60" stall requirement as part of the barrier removal requirement.</p>
2nd SET: MEN'S RESTROOM: <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 2,850</p>	The standard stall is only 42" wide and has the flush control on the wrong side of the water closet. This is required to be brought into compliance with the 60" stall requirement as part of the barrier removal requirement.
2nd SET: WOMEN'S RESTROOM:	The standard stall is only 42" wide and has the flush control on the wrong side of the water closet. This is required to be brought into compliance with the 60" stall requirement as part of the barrier removal

CITY OF TULSA – BUILDING REPORT

<p>PRIORITY MEDIUM COST: \$ 3,850</p>	<p>requirement.</p> <p>The door to the stall has only 12" on the pull side instead of the required 18" on the pull side.</p>
<p>EXHIBIT HALLS:</p>	<p>The exhibit halls 1 and 2 are substantially compliant.</p>
<p>2ND EXHIBIT HALL AREA:</p>	
<p>GENERAL INFORMATION:</p>	<p>This area has two sets of restrooms. Both of these sets are described below.</p>
<p>WOMEN'S RESTROOM #1:</p> <p>PRIORITY MEDIUM COST: \$ 4,250</p>	<p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 48", which is not fully compliant. This needs to be altered for compliance.</p> <p>The ambulatory stall is 38" wide instead of the required 36" width.</p>
<p>WOMEN'S RESTROOM #2:</p> <p>PRIORITY MEDIUM COST: \$ 5,650</p>	<p>There is only 7 3/4" on the pull side of this door. A minimum of 18" is required, 24" is preferred. The door either needs to be altered, or a power assist mechanism installed. The costs provided are for a power assist mechanism to be installed.</p> <p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 42", which is not fully compliant. This needs to be altered for compliance.</p> <p>There is a non compliant ambulatory stall. There is one stall with an outward swinging door but no grab bars installed. This should be made into an ambulatory stall.</p>
<p>MEN'S RESTROOM #1:</p> <p>PRIORITY MEDIUM COST: \$ 4,250</p>	<p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 48", which is not fully compliant. This needs to be altered for compliance.</p> <p>The ambulatory stall is 38" wide instead of the required 36" width.</p>
<p>MEN'S RESTROOM #2:</p> <p>PRIORITY MEDIUM COST: \$ 5,650</p>	<p>There is only 12" on the pull side of this door. A minimum of 18" is required, 24" is preferred. The door either needs to be altered, or a power assist mechanism installed. The costs provided are for a power assist mechanism to be installed.</p> <p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 42", which is not fully compliant. This needs to be altered for compliance.</p> <p>There is a non compliant ambulatory stall. There is one stall with an outward swinging door but no grab bars installed. This should be made into an ambulatory stall.</p>
<p>MAIN CONCOURSE, EXHIBIT AREA "A"</p>	
<p>GENERAL INFORMATION:</p> <p>PRIORITY MEDIUM COST: \$ 3,360</p>	<p>Knobs are noted throughout this area and should be replaced with lever hardware that does not require tight grasping and twisting to operate.</p> <p>The concession area has counters at 43" high. Concession counters are required to be lowered for compliance.</p>

CITY OF TULSA – BUILDING REPORT

	<p>There is a private restroom for the box office that was locked. Nobody knew where the key was, so it was not evaluated as part of this study.</p>
<p>WOMEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 5,650</p>	<p>There is only 8" on the pull side of this door. A minimum of 18" is required, 24" is preferred. The door either needs to be altered, or a power assist mechanism installed. The costs provided are for a power assist mechanism to be installed.</p> <p>The signage is mounted on the door instead of the wall next to the door as required.</p> <p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 42", which is not fully compliant. This needs to be altered for compliance.</p> <p>There is non compliant ambulatory stall. There is one stall with an outward swinging door but no grab bars installed. This should be made into an ambulatory stall.</p>
<p>MEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 4,250</p>	<p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 42", which is not fully compliant. This needs to be altered for compliance.</p> <p>There is no compliant ambulatory stall. There is one stall with an outward swinging door but no grab bars installed. This should be made into an ambulatory stall.</p>
<p>WOMEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 4,250</p>	<p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 42", which is not fully compliant. This needs to be altered for compliance.</p> <p>There is no compliant ambulatory stall. There is one stall with an outward swinging door but no grab bars installed. This should be made into an ambulatory stall.</p>
<p>MEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 4,250</p>	<p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 42", which is not fully compliant. This needs to be altered for compliance.</p> <p>There is no compliant ambulatory stall. There is one stall with an outward swinging door but no grab bars installed. This should be made into an ambulatory stall.</p>
<p>ADMINISTRATIVE OFFICES:</p>	
<p>GENERAL INFORMATION:</p>	<p>Knobs are noted throughout this department and should be replaced with lever hardware that does not require tight grasping and twisting to operate.</p> <p>Only one drinking fountain is provided. Where there is one there must be two. One at wheelchair heights and one for people who have trouble bending or stooping. A second drinking fountain needs to be installed.</p> <p>The catering kitchen has only 3 1/2" on the pull side of the door. A minimum of 18" is required and the door either needs to be altered or a auto assist door mechanism installed.</p> <p>The break area has a sink mounted at 36' with cabinets underneath that prevent knee clearance. The counter needs to be lowered to not exceed 34" in height.</p>

CITY OF TULSA – BUILDING REPORT

<p>PRIORITY LOW COST: \$ 6,750</p>	<p>The administrative office has only 4 3/4" on the pull side of the door. A minimum of 18" is required and the door either needs to be altered or a auto assist door mechanism installed.</p>
<p>WOMEN'S RESTROOM:</p> <p>PRIORITY MEDIUM COST: \$ 4,250</p>	<p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 42", which is not fully compliant. This needs to be altered for compliance. Additionally, the path of travel to the stalls does not provide the required maneuvering clearance for the door that's required. This toilet room will need to be altered for compliance.</p> <p>The mirror is mounted at 49" instead of the required 40" maximum from the floor.</p>
<p>MEN'S RESTROOM:</p> <p>PRIORITY MEDIUM COST: \$ 4,250</p>	<p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 34 1/2", which is not compliant. This needs to be altered for compliance.</p> <p>The urinal is not compliant and only has 26" path of travel to it. It needs to be a minimum of 30" wide.</p>
<p>WOMEN'S RESTROOM (2nd SET):</p> <p>PRIORITY MEDIUM COST: \$ 1,550</p>	<p>The accessible stall has the right size, but is not completely compliant. The center line is 20 1/2" which exceeds the 16" to 18" requirement. The flush control is mounted on the wrong side of the water closet and needs to either be moved or have an auto flush installed.</p> <p>The toilet paper is mounted 4" above the grab bar, which obstructs the use of the grab bar. It must be a minimum of 12" above the grab bar and needs to be moved for compliance.</p>
<p>MEN'S RESTROOM (2nd SET):</p> <p>PRIORITY MEDIUM COST: \$ 2,360</p>	<p>The accessible stall has the right size, but is not completely compliant. The center line is 21" which exceeds the 16" to 18" requirement.</p> <p>The urinal is in an alcove that is only 29" wide. When in an alcove, the path of travel to the urinal must be a minimum of 36" wide. This needs to be altered for compliance.</p>
1964 BUILDING - ASSEMBLY AREA	
<p>GENERAL INFORMATION:</p> <p>PRIORITY MEDIUM COST: \$ 1,460</p>	<p>Knobs are noted throughout this area and should be replaced with lever hardware that does not require tight grasping and twisting to operate.</p>
<p>WOMEN'S RESTROOM:</p> <p>PRIORITY MEDIUM COST: \$ 4,250</p>	<p>There is only 15" on the pull side of this door. A minimum of 18" is required, 24" is preferred. The door either needs to be altered, or a power assist mechanism installed. The costs provided are for a power assist mechanism to be installed.</p> <p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 36", which is not compliant. This needs to be altered for compliance.</p>
<p>MEN'S RESTROOM:</p> <p>PRIORITY MEDIUM COST: \$ 4,250</p>	<p>There is only 15" on the pull side of this door. A minimum of 18" is required, 24" is preferred. The door either needs to be altered, or a power assist mechanism installed. The costs provided are for a power assist mechanism to be installed.</p> <p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 38", which is not compliant. This needs to be altered for compliance.</p>

CITY OF TULSA – BUILDING REPORT

SECOND FLOOR ASSEMBLY AREA:	
GENERAL INFORMATION: <p style="text-align: right;">PRIORITY HIGH COST: \$16,250</p>	<p>The ramp to the stage is dangerous and needs to be replaced. The slope measures from 17.3% to 17.9%, which far exceeds any reasonable tolerances. This is a liability issue and a very HIGH priority that needs to be addressed.</p> <p>The concession area has counters at 43" high. Concession counters are required to be lowered for compliance.</p>
WOMEN'S RESTROOM: <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 4,250</p>	<p>There are six stalls and none are compliant. A 5' wide stall should be provided but the widest stall provided is 38", which is not compliant. This needs to be altered for compliance. Additionally, one of the stalls is required to be an ambulatory stall with grab bars on both sides and an outward swinging door.</p> <p>There is a standard height drinking fountain in the women's room vestibule. No accessible drinking fountain is provided.</p>
MEN'S RESTROOM: <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 3,250</p>	<p>There are no compliant stalls. A 5' wide stall should be provided but the widest stall provided is 38", which is not compliant. This needs to be altered for compliance.</p>
THIRD FLOOR ASSEMBLY AREA:	
GENERAL INFORMATION: <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 9,640</p>	<p>The men's and women's dressing rooms provided for this area have no accessible features. These need to be altered so at least one has a five foot wide turning area and a fully compliant bench installed.</p> <p>None of the showers provided comply. At least one of each type of dressing room needs to have a compliant shower.</p>
WOMEN'S RESTROOM: <p style="text-align: right;">PRIORITY MEDIUM COST: \$150</p>	<p>The signage is mounted on the wrong side of the door. It's required to be on the latch side of the door no more than 8" from the door frame.</p> <p>The rest of this restroom is substantially compliant.</p>
MEN'S RESTROOM:	<p>This restroom is substantially compliant.</p>
ARENA:	
GENERAL INFORMATION: <p style="text-align: right;">PRIORITY HIGH COST: \$ 18,720</p>	<p>This arena has accessible seating but does not have the required fixed companion seats. Fixed companion seats must be installed for compliance and must be the same size, comfort and quality as all other seats in this arena.</p> <p>The concession counters are 43" high and are required to be lowered for compliance.</p> <p>The men's and women's restrooms (in the Perry suite) are required to have been built fully compliant, but are not. The doors are only 27" wide and do not have the required 18" on the pull side. Neither room has the required 5' turning radius. These need to be altered for compliance.</p> <p>This floor has several restrooms. One men's and one women's restroom are substantially compliant (except for the entry doors) and the other is not. The ones that are not either need to be brought into compliance or have signage install indicating the location of the nearest accessible stall.</p>

CITY OF TULSA – BUILDING REPORT

WOMEN'S RESTROOM: PRIORITY HIGH COST: \$ 1,720	There are six stalls and one is compliant, but the door into the restroom is only 29" wide. This door needs to be altered to a minimum of 32" clear width for compliance or people needing the accessible stall can't get into it.
MEN'S RESTROOM: PRIORITY HIGH COST: \$ 1,720	There are five stalls and one is compliant, but the door into the restroom is only 29" wide. This door needs to be altered to a minimum of 32" clear width for compliance or people needing the accessible stall can't get into it.
WOMEN'S RESTROOM: PRIORITY HIGH COST: \$ 4,250	The entry door is only 29" clear width. It's required to have a minimum 32" clear width. This restroom only has one ambulatory stall and no standard stall. The rest of the features are compliant.
MEN'S RESTROOM: PRIORITY HIGH COST: \$ 4,250	The entry door is only 29" clear width. It's required to have a minimum 32" clear width. This restroom only has one ambulatory stall and no standard stall. The rest of the features are compliant.
SECOND SIDE OF THE ARENA:	
GENERAL INFORMATION: PRIORITY HIGH COST: \$ 13,250	This arena has accessible seating but does not have the required fixed companion seats. Fixed companion seats must be installed for compliance and must be the same size, comfort and quality as all other seats in this arena. The concession counters are 43" high and are required to be lowered for compliance. This floor has several restrooms. One men's and one women's restroom are substantially compliant (except for the entry doors) and the other is not. The ones that are not either need to be brought into compliance or have signage install indicating the location of the nearest accessible stall.
WOMEN'S RESTROOM: PRIORITY HIGH COST: \$ 2,350	There are six stalls and one is compliant, but the door into the restroom is only 29" wide. This door needs to be altered to a minimum of 32" clear width for compliance or people needing the accessible stall can't get into it. The accessible stall has the flush control on the wrong side. This needs to be altered or an auto-flush installed.
MEN'S RESTROOM: PRIORITY HIGH COST: \$ 2,350	There are five stalls and one is compliant, but the door into the restroom is only 29" wide. This door needs to be altered to a minimum of 32" clear width for compliance or people needing the accessible stall can't get into it. The accessible stall has the flush control on the wrong side. This needs to be altered or an auto-flush installed.
WOMEN'S RESTROOM: PRIORITY HIGH COST: \$ 4,250	The entry door is only 29" clear width. It's required to have a minimum 32" clear width. This restroom only has one ambulatory stall and no standard stall. A standard stall should be planned to be installed. The rest of the features are compliant.

CITY OF TULSA – BUILDING REPORT

<p>MEN'S RESTROOM:</p> <p align="right">PRIORITY HIGH COST: \$ 4,250</p>	<p>The entry door is only 29" clear width. It's required to have a minimum 32" clear width.</p> <p>This restroom only has one ambulatory stall and no standard stall. A standards stall should be planned to be installed. The rest of the features are compliant.</p>
<p>LOWER LEVEL ARENA:</p>	
<p>WOMEN'S RESTROOM:</p> <p align="right">PRIORITY HIGH COST: \$ 4,250</p>	<p>There are six stalls and none are compliant. A 5' wide stall should be provided but the widest stall provided is 39", which is not compliant. This needs to be altered for compliance. Additionally, one of the stalls is required to be an ambulatory stall with grab bars on both sides and an outward swinging door.</p> <p>The entry door to this toilet room is only 29" wide and needs to be altered so the clear width is a minimum of 32" clear.</p>
<p>MEN'S RESTROOM:</p> <p align="right">PRIORITY HIGH COST: \$ 4,250</p>	<p>There are three stalls and none are compliant. A 5' wide stall should be provided but the widest stall provided is 38", which is not compliant. This needs to be altered for compliance.</p> <p>The entry door to this toilet room is only 29" wide and needs to be altered so the clear width is a minimum of 32" clear.</p>
<p>WOMEN'S RESTROOM:</p> <p align="right">PRIORITY HIGH COST: \$ 4,250</p>	<p>There are twelve stalls and none are compliant. A 5' wide stall should be provided but the widest stall provided is 39", which is not compliant. This needs to be altered for compliance. Additionally, one of the stalls is required to be an ambulatory stall with grab bars on both sides and an outward swinging door.</p> <p>The entry door to this toilet room is only 29" wide and needs to be altered so the clear width is a minimum of 32" clear.</p> <p>None of the lavatories or mirrors are compliant.</p>
<p>MEN'S RESTROOM:</p> <p align="right">PRIORITY HIGH COST: \$ 6,550</p>	<p>There are six stalls and none are compliant. A 5' wide stall should be provided but the widest stall provided is 39", which is not compliant. This needs to be altered for compliance. Additionally, one of the stalls is required to be an ambulatory stall with grab bars on both sides and an outward swinging door.</p> <p>The entry door to this toilet room is only 29" wide and needs to be altered so the clear width is a minimum of 32" clear.</p> <p>None of the lavatories or mirrors are compliant.</p> <p>None of the urinals are compliant.</p>

CITY OF TULSA – BUILDING REPORT

1. Entrances. The main entry doors are substantially compliant and have signage indicating the accessible routes.

2. Entrances. The main entry doors are substantially compliant and have signage indicating the accessible routes.

3. Restrooms. The majority of the restrooms are not compliant. It is necessary to make more of the restrooms compliant in the older area. Most of the restrooms have alternate stalls only and some, like this one, don't have a compliant path of travel to the stall,

4 Doors. Doors in the public areas are required to have lever hardware that does not require tight grasping/twisting to operate.

CITY OF TULSA – BUILDING REPORT

5. Restrooms. Even some of the larger restrooms only have alternate stalls. Standard stalls, that are 5' wide, are required in all the public restrooms unless there is a structural reason why they can not be provided.

6. Showers - None of the showers provided for performers are compliant. Even when seats are installed they do not meet any published standards. At least one dressing room/shower area needs to be compliant in each area.

7. Seating - Seating platforms are provided for accessible seating, but no fixed companion seats are provided.

CITY OF TULSA – BUILDING REPORT

BUILDING NAME:	Gilcrease Museum	
TOTAL COSTS:	\$ 65,472	
GENERAL NOTES:		
	<p>This complex is comprised of two buildings, one has historical designation. The main building is the museum and our main focus of this report. The historical building will be discussed, but there are elements that are allowed to be non-compliant because of the historical designation. The historical building is used for art classes for adults and children and that requires as much access as possible without damaging historical value.</p> <p>The main building, the museum, is required to be fully compliant. It currently has very few compliant restrooms, even in areas that have recently been renovated. Some are identified as accessible, but are not. Because of renovations and the amount of time that has already passed, restrooms should be a priority for this facility.</p> <p>Hardware is mixed, some levers have replaced knobs but not in all areas. At some point the hardware should be replaced but this isn't a high priority.</p>	
PARKING LOTS:	<p>This complex has two main parking lots. The "main" lot (as referred to in this report) serves both the mansion and the main museum. The "back" lot (as referred to in this report) only serves the museum and appears to be used more for employee parking than for the public, although it is not designated that way.</p> <p>SEE NOTE BELOW:</p>	
NUMBER OF ACCESSIBLE PARKING SPACES	<p><u>MAIN LOT:</u> 109 spaces/ 6 H/C 5 required</p>	<p><u>BACK LOT:</u> 67 spaces/ 4H/C 3 required</p>
PARKING VIOLATIONS:		
	Main Lot:	The main parking lot has six accessible parking spaces, none of which are fully compliant. The slope of the accessible parking spaces range from 2.4% to 4.5%. These are never supposed to be over 2% in any direction. The path of travel from the accessible parking spaces to the building entrances, for both buildings, is not compliant. This will need resolution for compliance.
	Back Lot:	None of the accessible parking spaces in the back lot have access aisles or a compliant path of travel to the building entrance. See sections below for the exterior conditions. -
SPECIAL NOTE	<p>PLEASE NOTE: The "back" parking lot seems to also be the lot for Stuart Park. Although Stuart Park was not studied as part of this project, it does not appear to have any access to it and should be looked at relatively quickly.</p>	

CITY OF TULSA – BUILDING REPORT

PARKING RECOMMENDATIONS:	
<p style="color: red; margin: 0;">PRIORITY HIGH</p> <p style="color: green; margin: 0;">COST: \$4,579</p>	<p>Main Lot:</p> <p>The slope of the accessible parking spaces exceeds the required 2%. The spaces on both ends (closest to and furthest from the building) are the two worst, in terms of slope. I recommend using a 1% tolerance (allowing slopes up to 3%). Using that formula, the only two spaces that need resolution are the first and last spaces, where slopes are up to 4.5%. If these are altered (or topped) to get the slope down below 3%, the other four spaces are in an acceptable tolerance.</p> <p>Back Lot:</p> <p>Restripe the lot so each accessible parking space has an access aisle, and the access aisle leads to an accessible route to the accessible entrance.</p>
EXTERIOR CONDITIONS, MAIN PARKING LOT:	
	<p>The main parking lot has a path of travel from it to the main museum building as well as to the historical mansion, neither of these paths comply:</p> <p>The path from the accessible parking in the main lot to the historical mansion has a cross slope up to 4.4% after the street is crossed, and requires travel in a vehicular route.</p> <p>The sidewalk from the accessible parking is close to compliant, there are a couple areas that have the sidewalk sections that don't match so they are level. The level changes are over 1/4" and, therefore, need to be resolved.</p> <p>There is a level change along the path of travel from the mansion to the main museum, where the street is crossed.</p>
RECOMMENDATIONS:	
<p style="color: red; margin: 0;">PRIORITY HIGH</p> <p style="color: green; margin: 0;">COST: \$ 3,478</p>	<p>Ensure the cross walk goes from the end of the sidewalk (leading to the accessible spaces) directly across the street to the mansion. Replace the bottom of the sidewalk (approximately 7 feet) with a path of travel that meets the slope and cross slope requirements. The rest of the path of travel is acceptable.</p> <p>Grind the level changes down to provide a smooth transition from the accessible parking to the main museum building entrance or provide a beveled transition to overcome them with a smooth transition.</p>
EXTERIOR CONDITIONS, BACK PARKING LOT:	
	<p>The curb ramp from the back parking to the main entry does not comply. The slope and cross slope both exceed acceptable tolerances. This needs to be altered for compliance.</p>
RECOMMENDATION:	
<p style="color: red; margin: 0;">PRIORITY HIGH</p> <p style="color: green; margin: 0;">COST: \$ 2,685</p>	<p>Replace the curb ramp that leads from this parking lot to the museum building.</p>

CITY OF TULSA – BUILDING REPORT

MANSION BUILDING, MAIN ENTRANCE:	
	The threshold to the main entry is too high, measuring 1" in level change. The door has a round knob that requires tight grasping and twisting to operate.
	RECOMMENDATION:
PRIORITY MEDIUM COST: \$ 1,110	Install new door threshold or ramp to overcome level change, provide lever hardware IF doing so will not interfere with historic value.
VERTICAL ACCESS, MANSION BUILDING:	
PRIORITY MEDIUM* COST: \$	Vertical access is not provided between the floors of this building. No public activities occur upstairs and currently no public access is provided for anyone. If the use of this building is altered and the upstairs is utilized for public activities, an elevator will need to be installed unless doing so would interfere with historical significance.
<small>*As noted ... costs for elevator installation were not figured into the spread sheet and will only become necessary if the upper level is used for public purposes.</small>	Since the upstairs is not currently open to the public, the cost of the elevator installation was not included in the costs and will only become an issue if building use is changed.
MANSION BUILDING INTERIOR ISSUES:	
GENERAL INFORMATION	Nothing in this building has been altered for compliance and only slight modifications have been made. Because the building is only used for a few classes, and not used on a regular daily basis. no cost has been spent on modifying this building, except in the restrooms. All other elements will need to be altered for compliance unless protected as historically significant elements.
MEN'S RESTROOM (Single user):	The grab bars are mounted at 37" aff instead of the required 36" aff. The center line of the water closet is 19 1/4" instead of the required 18". The flush control mechanism is on the wrong side of the water closet. The signage is mounted on the door instead of on the wall next to the door as required. It will need to be moved for compliance.
PRIORITY LOW COST: \$ 1,235	
WOMEN'S RESTROOM (Single user):	The grab bars are mounted at 37" aff instead of the required 36" aff. The side grab bar is mounted too close to the back wall, it is required to be 12" from the back wall. The signage is mounted on the door instead of on the wall next to the door as required. It will need to be moved for compliance.
PRIORITY LOW COST: \$ 460	
MAIN MUSEUM BUILDING INTERIOR ISSUES:	
GENERAL INFORMATION:	Access has been provided to all of the galleries.
PRIORITY MEDIUM* COST: \$ 4,860	The main entry counter provided is 48" high and will need to be lowered to 36" maximum for compliance.
PRIORITY LOW** COST: \$ 1,100	The door to the volunteer area does not have the required 18" on the pull side of the door. This will either need to be altered or a power assisted door added.

CITY OF TULSA – BUILDING REPORT

<p>* This cost is for altering both the counter in the gift shop and the main counter. Restroom costs are under the restroom sections.</p> <p>**This cost is for altering the door in the volunteer area.</p>	<p>Most of the restrooms do not comply. We have elevated the priority to bring the restrooms near the Vista Room and Restaurant into compliance. At least one of the two sets needs to comply if both sets can't be done (which is what we recommend). Make sure ALL non compliant restrooms have signage indicating the location of the nearest accessible restroom.</p>
<p>GIFT SHOP:</p> <p style="text-align: right;">Costs noted above</p>	<p>Both of the counters in the gift shop are too high. The main counter is 42" high and the jewelry counter is 40" high. Both need to be lowered, or have a section that is at least 36" wide lowered, to 36" maximum height.</p>
<p>MEN'S RESTROOM (nearest gift shops):</p> <p style="text-align: right;">PRIORITY LOW COST: \$ 5,160</p>	<p>The pipes are not wrapped underneath the lavatory.</p> <p>The stall is only 36" wide with grab bars on both sides.</p> <p>The urinal center line is 12 1/2" from the wall instead of 18" as required. It's in an alcove 27" deep, which means the path of travel to it needs to be 36"</p> <p>Water closet center line is 14 1/2" instead of the required 18".</p>
<p>WOMEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY LOW COST: \$ 5,160</p>	<p>The pipes are not wrapped underneath the lavatory.</p> <p>The stall is only 36" wide with grab bars on both sides. Five stalls are provided, none of which are accessible.</p> <p>Water closet center line is 20 1/4" instead of the required 18".</p>
<p>LEARNING CENTER, BREAK ROOMS AND MISCELLANEOUS ROOMS, FIRST FLOOR</p>	
<p>GENERAL INFORMATION</p> <p style="text-align: right;">PRIORITY LOW COST: \$ 4,240</p>	<p>The ramps throughout the galleries are slightly over the maximum slope, but within 1% which is an acceptable tolerance. We do not recommend fixing these ramps. Existing conditions would prevent full compliance and it would be a waste of money.</p> <p>The break room has a 36" counter with cabinets underneath, which prevents the required knee clearance underneath.</p> <p>The dressing room is 44" by 57", which does not allow the five foot turning radius as required.</p> <p>The coffee bar in the administration area is 36" high with cabinets underneath preventing the required knee clearance.</p>
<p>MEN'S RESTROOM (by Vista room)</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$4,525</p>	<p>This restroom has a 29" door and no accessible features. Nothing compliant at all in these restrooms. Because of the location of these restrooms, best serving the Vista Room, these should be brought into compliance as a higher priority.</p>
<p>WOMEN'S RESTROOM (by Vista room):</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$4,525</p>	<p>This restroom has a 29" door and no accessible features. Nothing compliant at all in these restrooms. Because of the location of these restrooms, best serving the Vista Room, these should be brought into compliance as a higher priority.</p>

CITY OF TULSA – BUILDING REPORT

<p>MEN'S RESTROOM (by restaurant)</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$4,775</p>	<p>This restroom has no accessible features. Nothing compliant at all in these restrooms.</p> <p>Because of the location of these restrooms, best serving the restaurant, these should be brought into compliance as a higher priority.</p>
<p>WOMEN'S RESTROOM (by restaurant)</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$4,775</p>	<p>This restroom has no accessible features. Nothing compliant at all in these restrooms.</p> <p>Because of the location of these restrooms, best serving the Vista Room, these should be brought into compliance as a higher priority.</p>
<p>MISCELLANEOUS ROOMS, SECOND LEVEL</p>	
<p>GENERAL INFORMATION:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$1,765</p>	<p>The stair case is an overhead protrusion. The area under the stairs needs to be protected so it isn't a potential hazard. This can be done many ways. A railing could be installed, a decorative feature can be installed, permanent storage could be provided ... anything that protects the area underneath the stairs.</p> <p>The volunteer break room has a 36" counter with cabinets underneath that prevent knee clearance.</p>
<p>EMPLOYEE RESTROOM:</p> <p style="text-align: right;">PRIORITY LOW COST: \$ 3,180</p>	<p>These restrooms have no accessible features.</p>
<p>VOLUNTEER MEN'S AND WOMEN'S RESTROOM (Single User):</p> <p style="text-align: right;">PRIORITY LOW COST: \$ 220</p>	<p>(These are the most compliant restroom found)</p> <p>The mirrors in both restrooms are mounted at 49 1/2" to the bottom of the reflecting surface.</p> <p>The signage is mounted on the door instead of the wall next to the door as required.</p>
<p>MISCELLANEOUS ROOMS, THIRD LEVEL</p>	
<p>MEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY LOW COST: \$ 3,465</p>	<p>The stall is only 48" wide with grab bars on both sides.</p> <p>The pipes under the lavatory are not wrapped or protected from contact.</p> <p>The shower has no access features. This is not required to be brought into compliance unless necessary to accommodate an employee.</p> <p>The door has only 13 1/4" on the pull side of the door. 18" is required.</p>
<p>WOMEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY LOW COST: \$ 4,175</p>	<p>The stall is only 48" wide with grab bars on both sides.</p> <p>The pipes under the lavatory are not wrapped or protected from contact.</p> <p>The shower has no access features. This is not required to be brought into compliance unless necessary to accommodate an employee.</p> <p>The door has only 12 1/4" on the pull side of the door. 18" is required.</p>

CITY OF TULSA – BUILDING REPORT

1. Back parking area. *Parking spaces need to be altered so each one has an access aisle. One must be a van accessible space with a 96" access aisle and the others can be car spaces with 60" access aisles.*

2. Back parking area. *This curb ramp does not meet either the running or cross slope requirements. This should be replaced for compliance.*

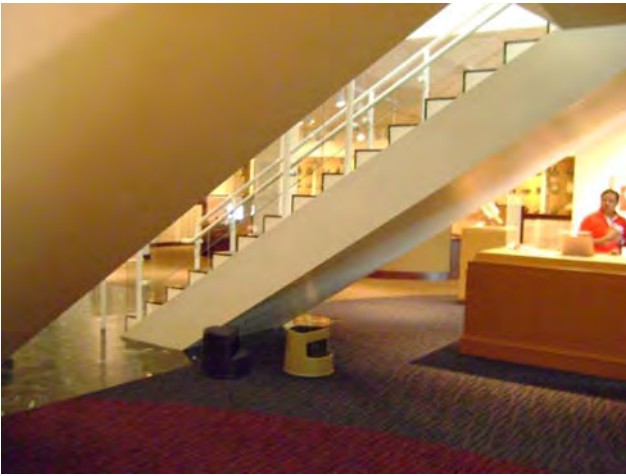

3. Restrooms. *The majority of the restrooms are not compliant. It is necessary to make more of the restrooms compliant, especially those near the Vista room and the restaurant.*

4 Restrooms. *The majority of the restrooms are not compliant. It is necessary to make more of the restrooms compliant, especially those near the Vista room and the restaurant.*

CITY OF TULSA – BUILDING REPORT

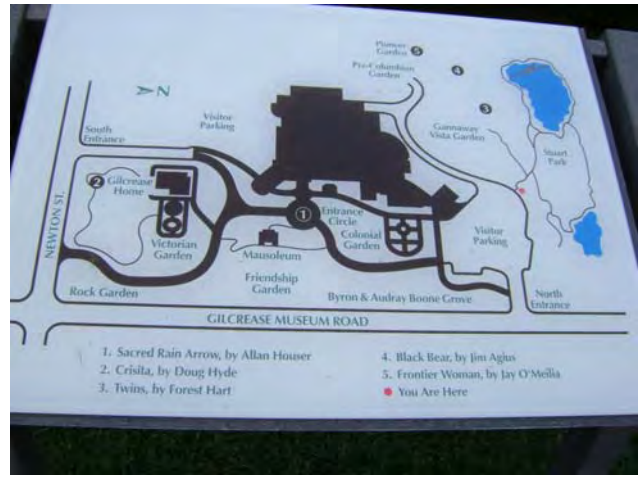

5. Second Level - These stairs are overhead protrusions. Something needs to be provided to protect the area underneath them from potential contact. There are many options on what can be put under there.

6. Break Rooms/coffee bars - All of the sinks serving coffee bars and break rooms have 36" counters and cabinets underneath the sinks, which obstruct the required knee clearance.

7. Showers - The showers provided have no access features. Showers should only be made compliant if used by the public, or a specific employee needs access features. Otherwise, compliance for these is a low priority.

8. Stuart Park - This park was not on our list to review, but the parking for the Museum appears to be the parking for this park. If this is the only parking, none of the accessible spaces in this lot serve this park and no accessible route to the park was noted. We felt this should be mentioned for future planning.

CITY OF TULSA – BUILDING REPORT

BUILDING NAME:	Municipal Courts Building
TOTAL COSTS:	\$ 227,312
GENERAL NOTES:	
IMPORTANT NOTE:	<p>This complex is located in a downtown area. Some of the parking provided is in the lot adjacent to the building (behind) and the rest is along downtown streets. The Tulsa Convention Center garage may also be used for this building, but the garage is covered under a different report. None of the parking observed as part of this facility is compliant. The non-compliant items are discussed in more detail below.</p> <p>The highest priority in this building are the courtrooms. NONE of the existing courtrooms have any compliant features. The jury box, witness stand, bailiff's area ALL have to be compliant. The jury deliberation rooms and restrooms for the jury all have to be brought into compliance as part of this process, and should have been done already.</p> <p>This building has a lot of departments that serve the general public. As such, it falls under Title II of the ADA and by now, the majority of the restrooms and public areas should have been brought into compliance. Many have not, so those are on a higher priority now.</p> <p>Hardware is mixed, some levers have replaced knobs but not in all areas. At some point the hardware should be replaced beginning with the public areas. Employee only areas should be done, but on a lower priority. ANY construction done within the building should trigger the hardware replacement for that area.</p>
IMPORTANT NOTE:	<p>PLEASE NOTE: While assessing this facility, there were two officers/employees working who were in wheelchairs. This elevates the need for compliance in the restrooms, break rooms, conference rooms and offices where they frequent, and the city needs to ensure the area they park in is compliant. They appear to work in the "Sex Crimes" area, so this area should be altered as a higher priority. The ADA Coordinator in this area should investigate other potential accommodations needed.</p>
PARKING LOTS:	<p>The accessible parking spaces provided are not compliant. This should be resolved as a higher priority. Additionally, we do not have a full parking count for this facility, but there are only three accessible spaces that directly serve this building.</p> <p>There are parking lots across from the building that were not evaluated as part of this report. It was reported that the lots across the street were not part of this facility, although some may park there to come over. No accessible parking spaces were noted in either lot across the street. Again, that is not part of this report but a facility this size needs to have more than three accessible spaces. There has to be less than 75 parking space for three spaces to be adequate.</p> <p>For the three accessible parking spaces provided, they have no access aisle, no accessible route to the building entrance unless travel takes place in the vehicular route. The curb ramp to the CIC entrance has a steep slope (12.2%) and needs to be replaced.</p>

CITY OF TULSA – BUILDING REPORT

NUMBER OF ACCESSIBLE PARKING SPACES	C.I.C LOT: 3 accessible spaces, none compliant.
PARKING VIOLATIONS:	
	The accessible lot has three accessible parking spaces, none of which are fully compliant. The slope of the accessible parking spaces is acceptable, but there are no access aisles serving the parking spaces. The path of travel from the accessible spaces provided to the entrance at C.I.C requires travel in the vehicular route. This will need resolution for compliance. See sections below for the exterior conditions. -
PARKING RECOMMENDATIONS:	
PRIORITY HIGH COST: \$46,569	Restripe the parking spaces to include an access aisle for each space. Add at least two more spaces when restriping. The access aisle needs to be 96" wide for at least one space and that space must be identified (with signage) as "van" accessible. The rest of the access aisles must be a minimum of 60". Install curb ramps in front of the accessible parking spaces so that each curb ramp serves two spaces and they connect to the accessible route to the entrance. The curb ramps around the building, serving the city streets, also provide access to this building, none of which are currently compliant. The curb ramps serving the streets around this building should all be brought into compliance. The ones providing direct access from the bus stops and parking areas should be completed first.
MUNICIPAL BUILDING, ENTRANCES:	
	The main entrance is substantially compliant. The CIC entrance is also substantially compliant. This building has multiple entrances and more than 50% of them are considered accessible, so no work needs to be done to the entrances themselves.
VERTICAL ACCESS:	
	Vertical access is provided between the floors of this building.
MUNICIPAL BUILDING INTERIOR ISSUES:	
CIC AREA:	
GENERAL INFORMATION	There are many different department in this building. This report follows the path we took, which begins at the CIC entrance. Each department is identified.
MEN'S RESTROOM (inside CIC door):	The door has 16 1/2" on the pull side instead of the required 18". We do not require altering this unless the restroom is going to be altered as part of another project. The lavatory is mounted too low. It's 28 1/4" to the top with only 24 1/4" knee clearance. A minimum of 27" knee clearance is required. Lavatory must be raised for compliance. The top of the lavatory should

CITY OF TULSA – BUILDING REPORT

<p>PRIORITY MEDIUM COST: \$ 2,235</p>	<p>not exceed 34" aff.</p> <p>The stall door is directly in front of the water closet instead of opening to the wide side of the water closet as required. The partition needs to be moved for compliance.</p> <p>The flush control mechanism is on the wrong side of the water closet.</p>
<p>WOMEN'S RESTROOM (inside CIC door):</p> <p>PRIORITY MEDIUM COST: \$ 1,460</p>	<p>The door has 17" on the pull side instead of the required 18". We do not require altering this unless the restroom is going to be altered as part of another project.</p> <p>The lavatory is mounted too low. It's 29" to the top with only 25" knee clearance. A minimum of 27" knee clearance is required. Lavatory must be raised for compliance. The top of the lavatory should not exceed 34" aff.</p> <p>The paper towel dispenser is a protruding object. It protrudes 11" into the path of travel and is mounted above 27". Nothing over 4" is allow to protrude into the circulation path. Either move the dispenser so it's not part of a circulation path or replace it with a compliant type.</p>
<p>NEW COM INV CENTER:</p> <p>PRIORITY HIGH COST: \$ 16,750</p>	<p>This area is newly built and not yet open. Because it's new construction, anything wrong needs to be resolved as a high priority:</p> <p>The door between the family waiting area and the main area has only 5 7/8" on the pull side, instead of the required 18" on the pull side. This door needs to be altered for compliance or a power assisted door opener needs to be installed. For budget purposes, the cost of the power door is figured.</p> <p>The sally port has no access to it. This is required to be altered for full compliance. This requires installation of a curb ramp and path of travel into the building.</p> <p>The counter is mounted at 49". Since this is a transaction counter, it should not be higher than 36" or there must be a section at least 36" wide at 36".</p>
<p>FORENSICS:</p>	<p>This area was locked and we were unable to gain access. Because of the specialized use of this space, there is no requirement for anything inside it to be brought into compliance unless there is an employee with a disability who needs something altered.</p>
<p>POLICE RECORDS:</p> <p>PRIORITY MEDIUM COST: \$ 2,220</p>	<p>The transaction counter is 45" high instead of the required 36" height. The counter will need to be altered for compliance.</p>
DETECTIVE DIVISION:	
<p>GENERAL INFORMATION</p> <p>PRIORITY LOW COST: \$ 980</p>	<p>The counter in this area is compliant.</p> <p>The break room counter, however, is not. This counter is 36" high with cabinets under the sink which prevents the required knee clearance. Because this is a common use area it is required to comply, even though only employees use it.</p> <p>The offices all have round knobs that require tight grasping and twisting. Hardware should be replaced</p>

CITY OF TULSA – BUILDING REPORT

	<p>for compliance.</p> <p>The dressing room is 44" by 57", which does not allow the five foot turning radius as required.</p> <p>The coffee bar in the administration area is 36" high with cabinets underneath preventing the required knee clearance.</p>
<p>UNMARKED DETECTIVE RESTROOM: PRIORITY MEDIUM COST: \$6,658</p>	<p>This restroom has only 4" on the pull side of the door. A minimum of 18" is required. The door will be required to be altered for compliance or a power assisted device installed. Costs estimated are for the installation of a power assist device.</p> <p>There are no compliant stalls. A single 5' wide stall should be provided.</p> <p>The urinal is 24" high, it is not allowed to be more than 17" and must be lowered for compliance.</p> <p>The lavatory is the right height but the pipes underneath it are not wrapped, the faucets require tight grasping and twisting to operate and the mirror is mounted at 48" instead of the required 40" height.</p>
POLICE RECORDS:	
<p>WOMEN'S RESTROOM: PRIORITY MEDIUM COST: \$ 5,650</p>	<p>There are no compliant stalls. A 5' wide stall should be provided.</p> <p>The lavatory is the right height but the pipes underneath it are not wrapped, the faucets require tight grasping and twisting to operate and the mirror is mounted at 48" instead of the required 40" height.</p> <p>The paper towel dispenser is mounted too high at 61". It needs to be lowered so the highest operable part it 48" maximum.</p> <p>The signage is mounted on the door and needs to be moved to the wall adjacent to the door, no more than 8" from the door frame.</p>
<p>COUNTERS: PRIORITY MEDIUM COST: \$ 4,430</p>	<p>The cashier's counter is 50 1/4" high and is required to be no more than 36" maximum.</p> <p>The Warrants counter is 38" high and is required to be no more than 36" maximum.</p> <p>The court records counter is 38" high and is required to be no more than 36" maximum.</p>
PROBATION OFFICE:	
<p>GENERAL INFORMATION: PRIORITY LOW COST: \$ 860</p>	<p>Knobs are noted throughout this department and should be replaced with lever hardware that does not require tight grasping and twisting to operate.</p>
<p>TWO PRIVATE RESTROOMS:</p>	<p>These restrooms have no accessible features. Since they are for private use, these are not required to be brought into compliance unless the private user needs them to be.</p>
<p>PUBLIC RESTROOM:</p>	<p>There are no compliant stalls. A 5' wide stall should be provided.</p> <p>The lavatory is acceptable. The mirror is mounted at 48" aff and needs to be lowered so the bottom of the reflecting surface is no higher than 40" aff.</p> <p>The paper towel dispenser protrudes into the circulation path 11 1/2". This needs to be moved out of the circulation path or replaced with one that does not protrude more than 4" into the path of travel.</p>

CITY OF TULSA – BUILDING REPORT

<p>PRIORITY MEDIUM COST: \$ 5,320</p>	<p>The signage is mounted on the door and needs to be moved to the wall adjacent to the door, no more than 8" from the door frame.</p>
<p>JUDGE, BALIFF, MINUTE CLERK, LAW LIBRARY AND JUDICIAL AREAS</p>	
<p>GENERAL INFORMATION: PRIORITY LOW COST: \$ 460</p>	<p>Knobs are noted throughout this department and should be replaced with lever hardware that does not require tight grasping and twisting to operate.</p>
<p>DIVISION I JURY ROOM: PRIORITY MEDIUM COST: \$ 3,220</p>	<p>Break room has 36" high counters with cabinets under the sink that prevent the required knee clearance. Since this is used by the general public, it is required to be brought into compliance on a higher priority. That means the counter must be lowered to 34" and knee clearance provided.</p> <p>The big screen mounted on the wall is a protruding object. It protrudes 24" into the circulation path at 56" height. This either needs to be raised so it is above 80" or something permanent mounted underneath it.</p>
<p>JUDGE'S CHAMBER</p>	<p>The door to the Judge's Chamber has only 16" on the pull side instead of the required 18". We do not recommend altering this unless there is a judge who needs the alteration.</p>
<p>JUDGE'S RESTROOM:</p>	<p>This restrooms has no accessible features. Since it is for private use, it is not required to be brought into compliance unless the private user needs it to be.</p>
<p>WARRANT OFFICE: PRIORITY LOW COST: \$ 260</p>	<p>Knobs are noted throughout this department and should be replaced with lever hardware that does not require tight grasping and twisting to operate.</p>
<p>THIRD FLOOR:</p>	
<p>COUNTY HOLDING FOR COURTS: PRIORITY MEDIUM COST: \$ 3,450</p>	<p>301 Conference Room - Has 36" high counter with cabinets under the sink that prevent the required knee clearance. This is required to be brought into compliance, which means the counter must be lowered to 34" and knee clearance provided.</p>
<p>POLICE CHIEF BREAK ROOM: PRIORITY MEDIUM COST: \$ 4,650</p>	<p>Break room has 36" high counter with cabinets under the sink that prevent the required knee clearance. It is required to be brought into compliance, which means the counter must be lowered to 34" and knee clearance provided.</p> <p>The reception desk is currently 42" and needs to be lowered to 36" or have a section of it that is 36" wide lowered to 36" for compliance.</p>
<p>MEN'S RESTROOM: PRIORITY LOW COST: \$ 4,630</p>	<p>The stall is only 48" wide with grab bars on both sides. The center line of the water closet is 21". This needs to be a 5' wide stall and the center line of the water closet is required to be 18".</p> <p>The pipes under the lavatory are not wrapped or protected from contact.</p> <p>The urinal needs to be lowered so the rim is no higher than 17" aff.</p>
<p>INTERNAL AFFAIRS: PRIORITY LOW</p>	<p>Break room has 36" high counter with cabinets under the sink that prevent the required knee clearance. It is required to be brought into compliance, which means the counter must be lowered to 34" and knee clearance provided.</p>

CITY OF TULSA – BUILDING REPORT

COST: \$ 5,860	The reception desk is currently 42" and needs to be lowered to 36" or have a section of it that is 36" wide lowered to 36" for compliance.
SEX CRIMES:	
GENERAL INFORMATION: <p style="text-align: right;">PRIORITY LOW COST: \$ 6,840</p>	<p>Break room has 36" high counter with cabinets under the sink that prevent the required knee clearance. It is required to be brought into compliance, which means the counter must be lowered to 34" and knee clearance provided.</p> <p>The reception desk is currently 42" and needs to be lowered to 36" or have a section of it that is 36" wide lowered to 36" for compliance.</p> <p>The door to the break room has only 4 3/4" on the pull side where 18" minimum is required. This door needs to be moved or a power assisted device installed for compliance.</p> <p>The phones (for public use) are mounted with the highest operable part at 58" instead of 48" as required.</p>
WOMEN'S RESTROOM: <p style="text-align: right;">PRIORITY LOW COST: \$ 2,150</p>	<p>This restroom is substantially compliant except for the location of the paper towel dispenser, which protrudes into the circulation path.</p> <p>Only one drinking fountain is provided and it's at standard heights. A drinking fountain at accessible heights (36") needs to be added.</p>
COMSTAT PLAZA:	
GENERAL INFORMATION:	The majority of the offices/rooms in this area have knobs as door hardware instead of levers. Hardware should be replaced as areas are altered and/or if there is an employee with limited dexterity in the area.
WOMEN'S RESTROOM: <p style="text-align: right;">PRIORITY LOW COST: \$ 3,720</p>	<p>The stall is only 41" wide with grab bars on both sides.</p> <p>The pipes under the lavatory are not wrapped or protected from contact. The faucets require tight grasping and twisting to operate.</p> <p>Signage is mounted overhead instead of on the wall next to the latch side of the door.</p>
MEN'S RESTROOM: <p style="text-align: right;">PRIORITY LOW COST: \$ 920</p>	<p>The pipes under the lavatory are not wrapped or protected from contact. The faucets require tight grasping and twisting to operate.</p> <p>Signage is mounted overhead instead of on the wall next to the latch side of the door.</p>
COMSTAT ROOM: <p style="text-align: right;">PRIORITY LOW COST: \$ 3,850</p>	This is a huge room with three sinks installed, none of which comply. All three sinks are on 36" counters with cabinets underneath that prevent the required clear floor space. ONE of them should be altered so the counters are 34" high and the required knee clearance is provided. Because of the use of this space, this only needs to be done if there is an officer or employee in a wheelchair who needs it, or if the room is loaned or rented out to the public for any reason.
SECOND FLOOR, COMSTAT:	
WOMEN'S RESTROOM: <p style="text-align: right;">PRIORITY LOW</p>	<p>The stall is only 41" wide with grab bars on both sides.</p> <p>The pipes under the lavatory are not wrapped or protected from contact. The faucets require tight</p>

CITY OF TULSA – BUILDING REPORT

COST: \$ 3,720	<p>grasping and twisting to operate.</p> <p>Signage is mounted overhead instead of on the wall next to the latch side of the door.</p>
<p>COMSTAT BREAK ROOM:</p> <p>PRIORITY LOW</p> <p>COST: \$ 4,250</p>	<p>Break room has 36" high counter with cabinets under the sink that prevent the required knee clearance. It is required to be brought into compliance, which means the counter must be lowered to 34" and knee clearance provided.</p> <p>The microwave oven is mounted on a high shelf so the highest operable part is 68". This either needs to be lowered or a second microwave provided at accessible heights. This does not need to be done unless employees with disabilities use this area or the area is loaned/rented out to other departments or to the general public.</p>
GYM:	This gym area is substantially compliant.
OFFENDER REGISTRATION:	
<p>GENERAL INFORMATION:</p> <p>IMPORTANT NOTE:</p> <p>PRIORITY HIGH</p> <p>COST: \$ 3,850</p>	<p>This area is a higher priority because of the access to the public.</p> <p>This area is served through the parking garage/overhang and other vehicles use this space. There are offenders who frequent this area who use wheelchair and a ramp is provided. However, when the "Crime Scene" van backs in it tends to pull all the way to the curb and blocks the access between the ramp and the entry door. Installation of a wheel stop 3 1/2' from the curb will protect the accessible route for this department.</p> <p>The break room has 36" high counter with cabinets under the sink that prevent the required knee clearance. It is required to be brought into compliance, which means the counter must be lowered to 34" and knee clearance provided.</p>
<p>TWO UNMARKED RESTROOMS:</p> <p>PRIORITY MEDIUM</p> <p>COST: \$ 3,910</p>	<p>These are single user restrooms, not marked "men's and women's". The size is acceptable but no grab bars are installed. The slope of the floor in both of them exceeds the allowable 2% slope. We recommend concentrating on making ONE of these fully accessible to serve the population and make sure it is properly marked with signage.</p> <p>Install the proper grab bars.</p> <p>The water closets are at standard heights (15"), replace one of them with a 17" to 19" high seat.</p> <p>Fix the floor area on one of them to ensure the slope of the floor does not exceed more than 2% to the drain.</p>
TAEMA AREA - BASEMENT	
<p>GENERAL INFORMATION:</p> <p>PRIORITY LOW</p>	<p>The main door in this area has only 2" on the pull side instead of the required 18". This will need to be altered for compliance.</p> <p>Only one drinking fountain is provided. Where there is one, there must be two. One for people who use wheelchair (mounted at 36" to the spout) and one at standard heights (38" to 43" to the spout). Install another drinking fountain to satisfy this requirement.</p> <p>The break room has 36" high counter with cabinets under the sink that prevent the required knee</p>

CITY OF TULSA – BUILDING REPORT

<p>COST: \$ 5,340</p>	<p>clearance. It is required to be brought into compliance, which means the counter must be lowered to 34" and knee clearance provided.</p> <p>The majority of the offices/rooms in this area have knobs as door hardware instead of levers. Hardware should be replaced as areas are altered and/or if there is an employee with limited dexterity in the area</p>
<p>DIRECTOR'S OFFICE</p>	<p>There is a small single user restroom that has no access features and a 25" entry door. This is not required to be brought into compliance unless the area is altered or the user of this space needs it to be done to accommodate a disability.</p>
<p>WOMEN'S RESTROOM:</p> <p>PRIORITY LOW COST: \$ 5,740</p>	<p>The door into this room is only 29" wide with only 4" on the pull side of the door. The door must be a minimum of 32" clear width with at least 18" on the pull side of the door.</p> <p>The stall is only 40" wide with grab bars on both sides and the door swings in. A stall that is a minimum of 60" wide is required, with clear floor space for the water closet.</p> <p>The pipes under the lavatory are not wrapped or protected from contact. The faucets require tight grasping and twisting to operate.</p> <p>The shower has no access features. This is not required to be brought into compliance unless necessary to accommodate an employee.</p>
<p>MEN'S RESTROOM:</p> <p>PRIORITY LOW COST: \$ 5,740</p>	<p>The door into this room is only 29" wide with only 4" on the pull side of the door. The door must be a minimum of 32" clear width with at least 18" on the pull side of the door.</p> <p>The stall is only 40" wide with grab bars on both sides and the door swings in. A stall that is a minimum of 60" wide is required, with clear floor space for the water closet.</p> <p>The pipes under the lavatory are not wrapped or protected from contact. The faucets require tight grasping and twisting to operate. The mirror is mounted at 45" instead of 40" as required.</p> <p>The shower has no access features. This is not required to be brought into compliance unless necessary to accommodate an employee.</p>
<p>NOTE:</p>	<p>There is an accessible shower in this area, but the seat was taped up and it has a fixed shower head. It would be easy to make this shower fully compliant and use it as a unisex shower to serve this area.</p>
<p>FULL KITCHEN:</p> <p>PRIORITY LOW COST: \$ 4,860</p>	<p>A full kitchen is provided but not currently used. If this area is altered and this kitchen becomes used, the following things will have to be addressed:</p> <p>The kitchen has a 36" high counter with cabinets under the sink that prevent the required knee clearance. It is required to be brought into compliance, which means the counter must be lowered to 34" and knee clearance provided.</p> <p>There are two doors into this kitchen, both have knob hardware and between 3" and 4" on the pull side of the door. At least one of the doors needs to be changed to have accessible lever hardware and at least 18" on the pull side of the door.</p>

CITY OF TULSA – BUILDING REPORT

DIVISION I COURT	
PRIORITY HIGH COST: \$ 18,920	This court has no access to it at all. The jury box, witness stand, judge's bench, bailiff's area all have no access to them. This needs to be altered as a HIGH priority.
DIVISION II COURT	
PRIORITY HIGH COST: \$ 18,920	This court has no access to it at all. The jury box, witness stand, judge's bench, bailiff's area all have no access to them. This needs to be altered as a HIGH priority.
DIVISION III COURT	
PRIORITY HIGH COST: \$ 18,920	This court has no access to it at all. The jury box, witness stand, judge's bench, bailiff's area all have no access to them. This needs to be altered as a HIGH priority.

CITY OF TULSA – BUILDING REPORT

1. Back parking area. *Parking spaces need to be altered so each one has an access aisle. One must be a van accessible space with a 96" access aisle and the others can be car spaces with 60" access aisles.*

2. Back parking area. *This curb ramp does not meet either the running or cross slope requirements. This should be replaced for compliance as a bare minimum, but the installation of new curb ramps directly serving the parking spaces is ultimately required. .*

3. Restrooms. *The majority of the restrooms are not compliant. It is necessary to make more of the restrooms compliant, especially those noted in this report as a high priority, where they serve the general public.*

4 Break Rooms/coffee bars. *All of the break room and coffee bars are on 36" high counters with cabinets that prevent knee clearance. These will need to be altered for compliance and the areas that serve the general public are the ones that should be done first. Those are noted in this report.*

CITY OF TULSA – BUILDING REPORT

5. Counters - Many of the counters where information is exchanged are mounted too high. Counters may not be higher than 36". Long counters can have a section that is at least 36" wide at the 36" height.

6. Drinking fountains - Most areas have only one drinking fountain. Where there is one there must be two. One at accessible heights (36" high) and one for people who have trouble bending or stooping (standard height 38" to 43"). In some cases the one provided is accessible (above) and in some cases it's standard. In each area, the other style drinking fountain needs to be installed.

7. Signage - Signage is required to be mounted at 60" to the center of the sign and have both raised texture and Braille. Signage like this is not allowed to be the only means of identifying a space.

8. Jury boxes - None of the jury boxes or courtrooms have access to them. This is a high priority item that must be brought into compliance as quickly as possible. You can start with one of the courtrooms, but all should have been done by now and this process should begin quickly.

CITY OF TULSA – BUILDING REPORT

	
<p>9. Offender Registration - When the crime scene van pulls all the way back, which it often does, it blocks the only route to the Offender Registration office. A wheel stop needs to be installed to protect this accessible route.</p>	

CITY OF TULSA – BUILDING REPORT

BUILDING NAME:	Mary K Oxley Nature Center
TOTAL COSTS:	\$33,500
GENERAL NOTES:	
	<p>This building is open to the public year round. It serves student classes as well as the general public. There are many trails around the property with natural views. This building was built brand new and, therefore should be fully compliant.</p> <p>While there are many compliant features, full compliance was not achieved in this new property.</p> <p>Even the exterior trails need to have some level of accessibility.</p> <p>Because this building was built new and was supposed to be in compliance, ALL items noted are a high priority.</p>
PARKING LOTS:	<p>There is only one lot serving this building and it has 28 total parking spaces. There are two that are designated as accessible but they have no access aisle provided and do not have proper signage.</p> <p>The path of travel from the parking lot to the main entrance of the building has a ramp, but the foliage is overgrown and not maintained. This will need to be a regular maintenance item for this ramp as well as along the trails. A minimum width of 36" must be maintained.</p> <p>The number of accessible spaces provided is acceptable for the total number of parking spaces.</p>
NUMBER OF ACCESSIBLE PARKING SPACES	<p>28 spaces/ 2 H/C</p> <p>2 required</p>
PARKING VIOLATIONS:	
	The accessible parking spaces have no access aisles and do not have proper signage. They are required to be fully compliant.
PARKING RECOMMENDATIONS:	
<p style="color: red; text-align: center;">PRIORITY HIGH</p> <p style="color: green; text-align: center;">COST: \$ 2,550</p>	<p>Restripe these spaces so they are 96" wide and share a 96" access aisle. Install signage indicating they are reserved accessible parking spaces and at least one of them must have a "van" accessible sign.</p> <p>The accessible parking spaces signage poles need to provide the signs a minimum of 80" above the parking surface.</p> <p>Additionally, ensure the ramp to the main entrance is properly maintained and foliage keeps the path of travel clear.</p>
BUILDING INTERIOR ISSUES:	
GENERAL INFORMATION:	The vestibule doors open separately and only have 45" between them. They are required to have a minimum of 48" between them. The most cost effective solution is to adjust the power assisted doors so they open together when activated.

CITY OF TULSA – BUILDING REPORT

<p>PRIORITY HIGH COST: \$ 4,550</p>	<p>The classroom, which is open to the public, has a 36" counter with cabinets underneath, which prevents the required knee clearance underneath. The counter needs to be lowered to 34" and knee clearance provided.</p> <p>The employee break room has a 36" counter with cabinets underneath, which prevents the required knee clearance underneath. The counter needs to be lowered to 34" and knee clearance provided.</p>
<p>MEN'S AND WOMEN'S PUBLIC RESTROOMS: PRIORITY HIGH COST: \$ 1,670</p>	<p>This restroom is substantially compliant except the baby changing tables are located inside the accessible stalls. They are required to be located in the common use areas. The most cost effective solution would be to install a second one in a compliant location so patching of the walls isn't necessary in the accessible stall. .</p>
<p>SINGLE USER PRIVATE RESTROOM: PRIORITY HIGH COST: \$ 3,880</p>	<p>This restroom is substantially compliant except it has a shower with no compliant features. Not even the size of the shower complies. Additionally, there is a slope to the drain in the shower that exceeds the allowable 2% slope. This slope must be maintained in all directions. This is required to be compliant since it was built brand new.</p>
BUILDING EXTERIOR ISSUES:	
<p>RAMP TO RED FOX TRAIL: PRIORITY HIGH COST: \$ 15,850</p>	<p>This ramp is not compliant, yet was built brand new. The slope at the top is 13.5% which FAR exceeds any allowable tolerance. This ramp also does not have compliant handrails and it has a poor transaction at the bottom.</p> <p>All of these items need to be resolved for compliance. These are high priority items both because it's new construction and because the 13.5% slope is a liability to the city.</p>
<p>EXTERIOR TRAILS: PRIORITY HIGH COST: \$ 5,000</p>	<p>The outdoor trails vary in compliance. While they are not required to be paved, they do have to meet the width requirements and be maintained to reduce ruts and level changes. Generally, a bonding agent will do this.</p> <p>The trails were not in compliant shape at the time of the inspection. This will be an ongoing maintenance issue and a high risk of complaint if not properly maintained. We have added some costs for resurfacing the pits we found, but not enough for the entire trail.</p>

CITY OF TULSA – BUILDING REPORT

1. Parking area. The accessible parking spaces do not have any access aisles or compliant signage. This needs to be altered for compliance.

2. Main Entry Ramp. This ramp had foliage growing into the path of travel and needs to be properly maintained for compliance.

3. Main Entry Ramp. This ramp had foliage growing into the path of travel and needs to be properly maintained for compliance.

4. Classroom sink. This sink is required to be mounted in a 34" high cabinet and have knee clearance underneath.

CITY OF TULSA – BUILDING REPORT

5. Ramp to Red Fox Trail. This ramp has a slope up to 13.5% at the top, which is a liability problem for the city. It also does not have proper handrails or a proper landing at the bottom.

6. Ramp to Red Fox Trail. This ramp has a slope up to 13.5% at the top, which is a liability problem for the city. It also does not have proper handrails or a proper landing at the bottom.

7. Nature trails. The nature trails are not properly maintained. Areas of the trails are less than 36" wide, full of water, have pits or ruts or are overgrown with foliage. These need to be properly maintained in a compliant condition.

8. Shower. The shower has no accessible features. This is required to be a compliant because it's new construction.

CITY OF TULSA – BUILDING REPORT

BUILDING NAME:	Police North
TOTAL COSTS:	\$69,455
GENERAL NOTES:	
	<p>This building is a police building. The occupants are paid police officers but the public visits either voluntarily or involuntarily. It consists of several offices, holding cells, interrogation rooms and administrative duties. A separate area is used as the Telecom Center. The public areas are a higher priority than the office areas, unless an employee with a disability is hired.</p> <p>Hardware is mixed, some levers have replaced knobs but not in all areas. At some point the hardware should be replaced but this isn't a high priority.</p>
PARKING LOTS:	This complex has one main public parking lot with 58 parking spaces. The other lots are secured lots for officers/employees to park and a lot in the back for squad cars to park. This report focuses on the public lot. The employee lot has some accessible spaces available to an employee who needs them and no accessible spaces are required in the squad car lot.
NUMBER OF ACCESSIBLE PARKING SPACES	<p>MAIN LOT:</p> <p>58 spaces/ 6 H/C</p> <p>3 required</p>
PARKING VIOLATIONS:	
Main public lot:	The main public parking lot has six accessible parking spaces, all of which are substantially compliant but none of which are designated as "van" accessible. There are two that have an access aisle that qualifies as van accessible, just no signage designating them as such. The path of travel from the accessible parking spaces to the building entrance is also compliant.
PARKING RECOMMENDATIONS:	
PRIORITY HIGH COST: \$180	Add a sign indicating one of the two spaces directly in front of the entry (served by the wider access aisle) is a "van" accessible space.
MAIN BUILDING ENTRANCE ISSUES:	
MAIN ENTRY	The main entry from the accessible parking has a threshold that is approximately 1" level change. This will need to be resolved for compliance.
RECOMMENDATIONS:	
PRIORITY HIGH COST: \$750	Remove existing threshold, grind down level change where appropriate and install a new threshold with no more than 1/4" abrupt level change. It can go up to 1/2" with a 1:2 bevel.

CITY OF TULSA – BUILDING REPORT

MAIN BUILDING INTERIOR ISSUES:	
GENERAL INFORMATION:	<p>Areas of this building have been altered for compliance, but are not fully compliant. The Telecom area has not been altered for compliance and has a lot of non-compliant areas. This does not appear to be an area where the public is allowed, so access needs to be provided if any alteration occurs OR if there is an employee with a disability that needs the accommodations.</p>
MEN'S RESTROOM: <p style="text-align: right; color: orange;">PRIORITY MEDIUM</p> <p style="text-align: right; color: green;">COST: \$ 1,625</p>	<p>The pipes are not wrapped or otherwise protected underneath the lavatory.</p> <p>The center line of the water closet is 21" instead of the required 18". This exceeds allowable tolerances, but can be resolved by installing wood that is 18" wide and 3" thick underneath the side grab bar. This is the most cost effective way to resolve this issue.</p> <p>The signage is mounted on the door instead of on the wall next to the door as required. It will need to be moved for compliance.</p>
WOMEN'S RESTROOM: <p style="text-align: right; color: orange;">PRIORITY MEDIUM</p> <p style="text-align: right; color: green;">COST: \$ 2,340</p>	<p>The pipes are not wrapped or otherwise protected underneath the lavatory.</p> <p>The flush control mechanism is on the wrong side of the water closet.</p> <p>The lavatory counter is very long and extends into the required clear floor space of the water closet. The counter should be reduced by 18" minimum.</p> <p>The center line of the water closet is 21 1/2" instead of the required 18". This exceeds allowable tolerances, but can be resolved by installing wood that is 18" wide and 3" thick underneath the side grab bar. This is the most cost effective way to resolve this issue.</p> <p>The mirror is mounted at 44" aff and is not allowed to exceed 40" aff.</p> <p>The signage is mounted on the door instead of on the wall next to the door as required. It will need to be moved for compliance.</p>
INTAKE DEPARTMENT:	
GENERAL INFORMATION: <p style="text-align: right; color: red;">PRIORITY HIGH</p> <p style="text-align: right; color: green;">COST: \$ 4,850</p> <p style="text-align: right; color: orange;">PRIORITY LOW**</p> <p style="text-align: right; color: green;">COST: \$ 9,350</p> <p style="color: red; font-size: small;">* This cost is for installing a fully compliant holding cage.</p> <p style="color: orange; font-size: small;">**This cost is for altering the cabinetry in the break room, coffee bar and Commander's kitchen.</p>	<p>There are no accessible holding cells (cages).</p> <p>Benches have secured loops for handcuffs, we need to determine how suspects with disabilities are handled and how they are secured if they can not be handcuffed to the benches. We also need to ensure the police department does not handcuff a suspect who is hearing impaired and communicates via sign language. Sign language interpreters must be available at all times.</p> <p>The break room has a 36" counter with cabinets underneath, which prevents the required knee clearance underneath. The counter needs to be lowered to 34" and knee clearance provided.</p> <p>The coffee bar in the office area has a 36" counter with cabinets underneath, which prevents the required knee clearance underneath. The counter needs to be lowered to 34" and knee clearance provided.</p> <p>The Commander's conference room kitchen has a 36" counter with cabinets underneath, which prevents the required knee clearance underneath. The counter needs to be lowered to 34" and knee clearance provided.</p>

CITY OF TULSA – BUILDING REPORT

<p>MEN'S RESTROOM/LOCKER ROOM:</p> <p style="text-align: right;">PRIORITY LOW COST: \$ 6,160</p>	<p>The pipes are not wrapped underneath the lavatory.</p> <p>The urinal is mounted at 21" to the rim. It's not allowed to exceed 17" and should be lowered 4" for compliance.</p> <p>No bench is installed in the locker room. This needs to be installed if there is an employee with a disability on staff.</p> <p>The shower has accessible features, but there is no clear floor space behind the shower seat. 12" is required to be provided behind the shower seat. This only needs to be altered if there is an employee with a disability needing this requirement.</p> <p>The signage is mounted on the door instead of on the wall next to the door as required. It will need to be moved for compliance.</p>
<p>WOMEN'S RESTROOM/LOCKER ROOM:</p> <p style="text-align: right;">PRIORITY LOW COST: \$ 5,225</p>	<p>The pipes are not wrapped underneath the lavatory.</p> <p>The faucets require tight grasping and twisting to operate. These need to be replaced with lever style faucets.</p> <p>No bench is installed in the locker room. This needs to be installed if there is an employee with a disability on staff.</p> <p>There is no accessible features. This only needs to be altered if there is an employee with a disability needing this requirement.</p> <p>The signage is mounted on the door instead of on the wall next to the door as required. It will need to be moved for compliance.</p>
<p>TELECOM CENTER</p>	
<p>GENERAL INFORMATION</p> <p style="text-align: right;">PRIORITY LOW COST: \$ 8,250</p>	<p>The break room has a 36" counter with cabinets underneath, which prevents the required knee clearance underneath. The counter needs to be lowered to 34" and knee clearance provided.</p> <p>The MSDS counter is 46 3/4" high. This needs to be lowered to a maximum of 36" high or a section of it lowered to the 36" height.</p> <p>The first aid kit is mounted at 61 1/2" in height and needs to be lowered to 48".</p> <p>The service writer counter at the back of the Telecom area is 46 3/4" high. This needs to be lowered to a maximum of 36" high or a section of it lowered to the 36" height.</p> <p>Some of the doors have concrete blocks mounted in the floor that extend 12" into the required clear floor space. These are going to have to be removed for compliance to these doors.</p>
<p>MEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY LOW COST: \$14,525</p>	<p>This restroom has a 22" door and no accessible features. Nothing compliant at all in these restrooms.</p> <p>Fixing these may be cost prohibitive. Costs are provided as a low priority and access should be focused on the main restrooms noted below. These restrooms should have signage indicating the location of the nearest accessible restroom.</p>

CITY OF TULSA – BUILDING REPORT

<p>WOMEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY LOW COST: \$11,150</p>	<p>This restroom has a 22" door and no accessible features. Nothing compliant at all in these restrooms. Fixing these may be cost prohibitive. Costs are provided as a low priority and access should be focused on the main restrooms noted below. These restrooms should have signage indicating the location of the nearest accessible restroom.</p>
<p>MAIN MEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$2,525</p>	<p>The entry door is 29" wide.</p> <p>The center line of the water closet is 21 1/2" instead of the required 18". This exceeds allowable tolerances, but can be resolved by installing wood that is 18" wide and 3" thick underneath the side grab bar. This is the most cost effective way to resolve this issue.</p>
<p>MAIN WOMEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$2,525</p>	<p>The entry door is 29" wide.</p> <p>The center line of the water closet is 21 1/2" instead of the required 18". This exceeds allowable tolerances, but can be resolved by installing wood that is 18" wide and 3" thick underneath the side grab bar. This is the most cost effective way to resolve this issue.</p>
<p>UNMARKED RESTROOM (Back of Telecom area):</p>	<p>This is a tiny little restroom with no access features. We do not recommend making this one accessible, but it should have signage indicating the location of the nearest accessible restroom.</p>

CITY OF TULSA – BUILDING REPORT

1. Back parking area. The parking lot is substantially compliant. Only "van" signs need to be added to the spaces with wider access aisles. .

2. Public Restrooms. These restrooms are close to compliant but have some non-compliant features noted in this report. Since these are the only public restrooms, they should be brought into compliance.

3. Restrooms. The counter in the women's restroom extends into the clear floor space for the water closet. The counter should be reduced a minimum of 18" to provide the required clear floor space.

4 Holding Cages. There are no compliant holding cages. Arrangements need to be made, and training in place, to ensure suspects with disabilities are properly treated.

CITY OF TULSA – BUILDING REPORT

5. Security Benches. These benches should not be used for people with physical disabilities or people with hearing impairments who communicate through sign language.

6. Doors. These concrete blocks need to be removed for compliance to be achieved at these doors.

CITY OF TULSA – BUILDING REPORT

BUILDING NAME:	Bank of Oklahoma (BOK) Center
TOTAL COSTS:	\$ 237,820
GENERAL NOTES:	
	<p>This building is located in a downtown area and is served by several different parking areas, but does not have any parking that is owned or operated by the entity. Each individual parking lot is required to be fully compliant by now and BOK should ensure lots used for their events are in compliance,</p> <p>This is a brand new building, built since the ADA went into effect. As such, it is expected to be fully compliant with all of the requirements and sits as a high risk building from a litigation standpoint.</p> <p>There are a lot of “little” thing that are not compliant. While these may not be expensive to resolve, added together there is cost involved. For instance, the mirrors in the restrooms are mounted at 40” to the bottom of the frame instead of the reflecting surface, making them all 1” too high. Whether the city chooses to fix that or not is not our decision, but it’s technical non-compliance and we’ve provided costs associated with moving them.</p> <p>Some of the concession areas have ONLY standing tables. Because tables are provided, accessible tables are required. These should be provided in the same area with the same amenities.</p> <p>The biggest, and most expensive issue at BOK is the seating. The accessible seating platforms are required to have FIXED companion seats. They can be removable, if desired, but they can NOT be folding chairs and that is all we saw. Several stadiums have been sued for only providing folding chairs. Since there are no parking lots operated by the Center The fixed seating is your HIGHEST priority.</p>
PARKING LOTS:	As noted above, no parking lots are owned or operated by this facility. There are many lots and garages in the area, totaling about 9,000 parking spaces, but they are not owned or operated by BOK and, therefore, BOK is not accountable for resolution.
BOK INTERIOR ISSUES:	
ADMINISTRATION AREA:	
GENERAL INFORMATION:	There is a break room that has the counter mounted at 34” aff but there are cabinets that prevent knee clearance. At the time this was built, knee clearance was required to be provided for all sinks. That law is now changing and it won’t be required unless there is a stove or cooktop. However, if we use that standard for the break room we will need to be consistent with that standard for other things. That is a choice the city will need to make.
RESTROOMS (admin): PRIORITY MEDIUM COST: \$ 350	<p>Coat hooks are provided but none are at accessible heights. They are mounted at 72 ½”. Install at least one in each area that is no higher than 48” aff.</p> <p>Men’s and women’s restrooms have the mirror mounted at 41” aff to the bottom of the reflecting surface. It’s required to be at 40”.</p>

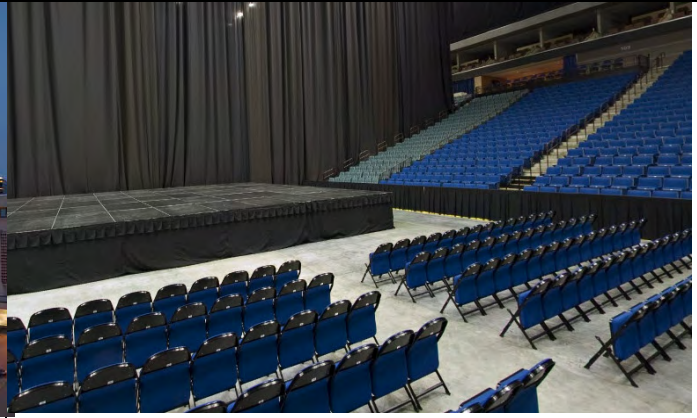

CITY OF TULSA – BUILDING REPORT

GENERAL AREAS, LOWER LEVEL:	
STORAGE ROOM 2b30.20 PRIORITY MEDIUM COST: \$ 300	No visual strobe alarm is provided.
RESTROOMS (By Section 113/114) PRIORITY MEDIUM COST: \$ 1,250	The men's restroom is only 58" wide. It's required to be a minimum of 60" wide. Men's, Women's and Family restroom have the mirrors mounted at 41" to the bottom of the reflecting surface.
CONCESSION TABLES: PRIORITY MEDIUM COST: \$ 840	All of the tables provided are for standing people only. Where those are provided it is required to have some at accessible heights. Ensure at least 5% of the tables provided are fully compliant in each area where tables are provided.
ONEOK SUITE: PRIORITY MEDIUM COST: \$ 450	The seat covers are mounted behind the water closets where there is no clear floor space for access. They need to be moved to a side wall so they can be reached prior to getting on the water closet. Men's and Women's restroom have the mirrors mounted at 41" to the bottom of the reflecting surface.
RESTROOMS (By Section 105) PRIORITY MEDIUM COST: \$3,250	Men's, Women's and Family restroom have the mirrors mounted at 41" to the bottom of the reflecting surface and seat covers are behind the water closets. Seat covers will be required to be moved to an accessible location. The women's restroom has the door opening directly in front of the water closet instead of into the clear floor space. This must be altered for compliance. The men's restroom has the flush control on the wrong side.
RESTROOMS (By Section 102) PRIORITY MEDIUM COST: \$ 1,250	Men's, Women's and Family restroom have the mirrors mounted at 41" to the bottom of the reflecting surface. Women's restroom door has only 10" on the pull side.
GENERAL AREAS, UPPER LEVEL:	
GENERAL INFORMATION: PRIORITY MEDIUM COST: \$ 1,180	All of the restrooms on the upper level have the mirrors mounted at 41" to the bottom of the reflecting surface and the seat covers mounted behind the water closet. This will need to be resolved for full compliance.
SUITES: PRIORITY MEDIUM COST: \$ 840	Tables provided in the suites are all high tables. Please ensure at least one (or 5%) of the tables are at accessible heights.
STAFF KITCHEN: PRIORITY MEDIUM COST: \$ 1,850	Both of the doors going into the staff kitchen area have 1 7/8" on the pull side. At least one of the doors is required to have a minimum of 18" on the pull side.

CITY OF TULSA – BUILDING REPORT

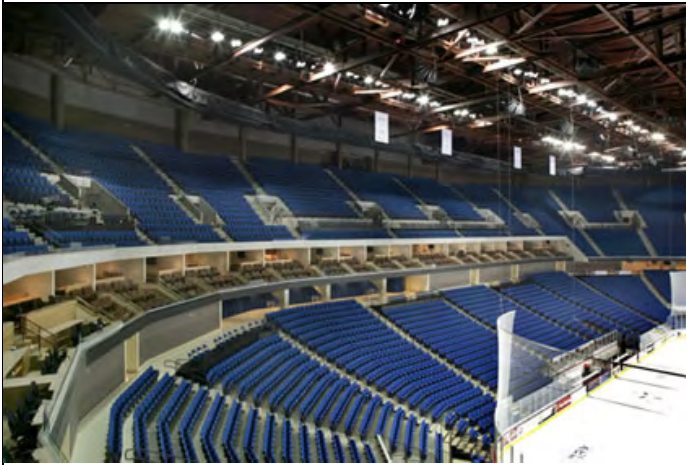

<p>PRIORITY MEDIUM COST: \$ 4,360</p>	<p>Signage is mounted in the wrong place. Needs to be provided on the latch side of the door at 60" to the center of the sign. (1B33.01/1B34.01)</p> <p>The smoking (promoter's) lounge has a sink at 34" with cabinets preventing knee clearance under the sink.</p>
---------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

CITY OF TULSA – BUILDING REPORT

1. Exterior. There is no parking associated with this building. All of the parking is shared parking with other downtown buildings. The path of travel to/from the drop off area and along the exterior routes is substantially compliant.

2. Seating. None of the accessible seating has fixed companion seats as required. This is the HIGHEST priority item for this facility.

3. Seating. None of the accessible seating has fixed companion seats as required. This is the HIGHEST priority item for this facility.

4 Locker Rooms. Each locker room is required to have accessible showers and accessible benches. These have neither. Some of them do not. This is the second highest priority for this facility.

CITY OF TULSA – BUILDING REPORT

5. Suites. *The suites have minor issues, for the most part, but because of the age of the building should all be resolved for compliance.*

CITY OF TULSA – BUILDING REPORT

BUILDING NAME:	Tulsa Performing Arts Center
TOTAL COSTS:	\$ 102,030
GENERAL NOTES:	
	<p>This building is located in a downtown area and is served by a surface parking lot shared with City Hall. This is a highly visible, high traffic facility that is older and t in several phases, so there are areas that are brand new and areas that are very old. Some of the older areas have been brought into compliance, but some have not been. This building is quite complex so each section</p> <p>Hardware is mixed, some levers have replaced knobs but not in all areas. At some point the hardware should be replaced beginning with the public areas. Employee only areas should be done, but on a lower priority. ANY construction done within the building should trigger the hardware replacement for that area.</p> <p>Every non-compliant restroom in this building needs to have signage indicating the location of the nearest accessible restroom, until it's brought into compliance.</p> <p>There is NO access from the employee lounge into the theatres. A lift or some type of accessible route needs to be provided.</p>
PARKING LOTS:	<p>As noted above, the accessible parking is primarily located in the surface lot located directly across the street from City Hall. The intersection curb ramps were part of the downtown study and details of those are in another report completed as part of this process.</p> <p>This lot has a total of 282 parking spaces. Currently there are 7 designated as accessible. The slope of the spaces designated are not fully compliant but are within a reasonable tolerance. There are also three parallel spaces in front of the PAC building that are signed as accessible spaces, but only for a 30 minute period for someone to run into City Hall. There is nothing compliant about these spaces.</p> <p>Finally, there is a parking garage that serves this building. The accessible parking provided in the garage is substantially compliant and serves compliant entrances to the facility.</p>
NUMBER OF ACCESSIBLE PARKING SPACES	<p><u>SURFACE LOT:</u> 282 spaces all together, 7 spaces marked as accessible and 7 are required</p>
PARKING VIOLATIONS:	
	<p>It is our understanding this lot is privately owned, not owned by the city. As such, the city is not responsible for making changes so no recommendations have been made. Fortunately, it's in substantial compliance.</p>
VERTICAL ACCESS:	
	<p>Vertical access is provided between the floors of this building. The employee lounge is up steps and does not have access for the employees from the theaters. A lift is recommended to resolve this issue.</p>

CITY OF TULSA – BUILDING REPORT

PAC INTERIOR ISSUES:	
MAIN LOBBY	
GENERAL INFORMATION:	<p>Some of the signage is located above the doors or on the doors, depending on the door, and have no Braille or raised texture as required.</p> <p>Signage indicates assistive listening systems are available as required.</p>
MEN'S RESTROOM (main lobby): <p style="text-align: right; color: red; margin-top: 10px;">PRIORITY HIGH</p> <p style="text-align: right; color: green; margin-top: 5px;">COST: \$ 1,750</p>	<p>Signage is mounted above the door with no Braille or raised texture.</p> <p>The path of travel to the accessible stall is only 36" wide. This is too narrow for an approach to a door, and we recommend removing the partition shields or replace them with narrower ones so the path of travel is widened. The costs are for replacing them.</p> <p>The paper towels are mounted too high at 59 ½", they need to be lowered to 48".</p>
WOMEN'S RESTROOM (main lobby): <p style="text-align: right; color: red; margin-top: 10px;">PRIORITY HIGH</p> <p style="text-align: right; color: green; margin-top: 5px;">COST: \$ 4,480</p>	<p>Signage is mounted above the door with no Braille or raised texture.</p> <p>There are two stalls, one is 41 ½" wide with grab bars on both sides and the other is 42" wide with the "L" shaped grab bars, neither comply with the standards. These should be altered so there is at least one stall that is 60" wide and meets the requirement for a standard stall.</p> <p>The paper towels are mounted too high at 59 ½", they need to be lowered to 48".</p>
CHAPMAN MUSIC HALL	
GENERAL INFORMATION:	<p>This area was built prior to the ADA going into effect. Compliance is required based on a clause for barrier removal under the law. This area was evaluated based on what has been brought into compliance as part on the overall barrier removal program.</p> <p>There are ramps to get into the Chapman theatre, but the area in front of the door is sloped as well. The areas in front of doors are required to be no more than 2% slope in any direction. Installation of a power assist mechanism on at least one of the doors will alleviate that issue.</p> <p>Seating is dispersed relatively well in this theatre. There are a total of 2,427 seats and accessible seating is dispersed in all levels. The seating posted on the website does not show any options for sitting close to the stage, but options were noted as available at inspection.</p> <p>The signage provided does not comply with the ADAAG requirements for signs. Signage should be replaced with compliant signs.</p> <p>The production room has knobs instead of lever hardware.</p>
MEN'S RESTROOM (promenade level): <p style="text-align: right; color: red; margin-top: 10px;">PRIORITY MEDIUM</p> <p style="text-align: right; color: green; margin-top: 5px;">COST: \$ 1,150</p>	<p>The urinal is in an alcove 31" deep and is only 31" wide. It is required to be a minimum of 36" wide.</p> <p>The standard stall is acceptable but the coat hook is mounted at 67", this can be lowered or an additional one added at accessible heights, not to exceed 48" aff.</p>

CITY OF TULSA – BUILDING REPORT

<p>WOMEN'S RESTROOM (promenade level):</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 150</p>	<p>The standard stall is acceptable but the coat hook is mounted at 67", this can be lowered or an additional one added at accessible heights, not to exceed 48" aff.</p>
<p>2nd SET: MEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 3,450</p>	<p>The standard stall is only 42" wide. This is required to be brought into compliance with the 60" stall requirement as part of the barrier removal requirement.</p> <p>The paper towels are mounted too high at 59 ½", they need to be lowered to 48".</p> <p>The mirror is mounted at 43" aff instead of the required 40" maximum.</p>
<p>2nd SET: WOMEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 3,450</p>	<p>The standard stall is only 42" wide. This is required to be brought into compliance with the 60" stall requirement as part of the barrier removal requirement.</p> <p>The paper towels are mounted too high at 59 ½", they need to be lowered to 48".</p>
<p>Balcony: WOMEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 4,460</p>	<p>The standard stall is only 40 ¼" wide. This is required to be brought into compliance with the 60" stall requirement as part of the barrier removal requirement.</p> <p>The paper towels are mounted too high at 59 ½", they need to be lowered to 48".</p> <p>The mirror is mounted at 47" aff instead of the required 40" maximum.</p> <p>The door has only 12" on the pull side instead of the required 18" minimum. This can be resolved by moving the door or installing a power assisted door mechanism.</p>
<p>Balcony: MEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 4,460</p>	<p>The standard stall is only 40 ¼" wide. This is required to be brought into compliance with the 60" stall requirement as part of the barrier removal requirement.</p> <p>The paper towels are mounted too high at 59 ½", they need to be lowered to 48".</p> <p>The mirror is mounted at 47" aff instead of the required 40" maximum.</p> <p>The door has only 12" on the pull side instead of the required 18" minimum. This can be resolved by moving the door or installing a power assisted door mechanism.</p>
<p>KATHLEEN P. WESBY PAVILLION</p>	
<p>GENERAL INFORMATION:</p>	<p>The bar provided is at 44 ½" with no lowered section.</p> <p>Stage right has a small but relatively compliant single user restroom that serves the green room. The restroom needs no alteration (except a lower coat hook) but the green room needs to have the round knob replaced with a lever.</p> <p>There is a very small kitchen with no access provided. None is required based on the use of the space.</p> <p>Back stage there is a small women's single user restroom that has no access features at all. This won't have to be altered as long as there are other back stage options that are accessible.</p>

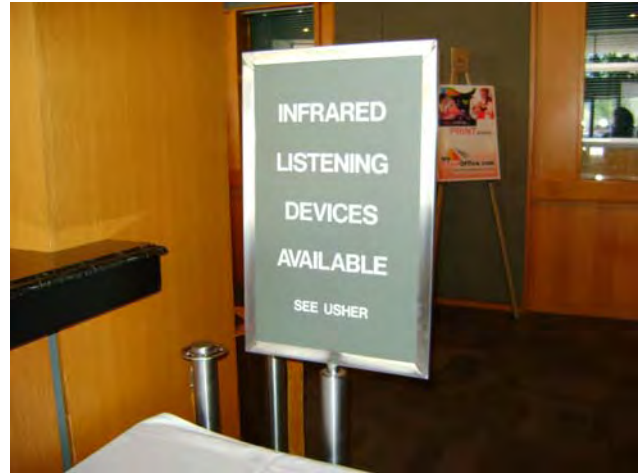

CITY OF TULSA – BUILDING REPORT

	<p>Star room #1 is a compliant dressing room.</p> <p>Star Room #2 and #3 currently have the restroom door swing into them. With the door swing changed, these would be accessible. It is recommended to have the door swing altered.</p> <p>BIG Star room is acceptable with the door swing changed, just like Star rooms #2 and #3.</p> <p>There are several smaller dressing rooms with no access, but as long as those that have access can be easily identified, it's not required to bring them all into compliance.</p> <p>One of the dressing rooms for the second level actors is acceptable except for a 11.9% slope to the shower. This slope needs to be altered so there is at least one dressing room in this area.</p> <p>The Choir dressing room (for Men) is compliant but the stalls are not. There is only a 36" wide stall with grab bars on both sides. We recommend making this accessible for the choir.</p>
<p>PRIORITY MEDIUM COST: \$ 4,880</p>	
LIDDY DOENGES THEATRE	
<p>GENERAL INFORMATION:</p> <p style="text-align: center;">PRIORITY HIGH COST: \$ 37,500</p>	<p>VERY IMPORTANT! The ramp leading to this theater (in the back for employees, not public) has a 28.6% slope that is VERY dangerous. This needs to be replaced with a compliant ramp or a lift that provides safety for those using it. Costs provided include installation of a lift, it seems the most logical approach.</p> <p>Dressing rooms for this theatre have no access to the showers or to the water closets. At least one of the dressing rooms needs to be fully compliant.</p> <p>Dressing Room #2 has a shower that could be compliant but does not have the required 12" behind the seat. The water closet also could be compliant except the door opens directly in front of the water closet instead of into the open area. This is the easiest one to make accessible.</p>
JOHN H WILLIAMS THEATRE	
<p>GENERAL INFORMATION:</p> <p style="text-align: center;">PRIORITY MEDIUM COST: \$ 1,260</p>	<p>Dressing rooms for this theatre are substantially compliant.</p> <p>This theatre seats 437 people and has the accessible seating in the back row. Some front area, or at least mid area, seating should be provided.</p> <p>The ramps between the dressing rooms need to have handrails installed.</p>
DOENGES, NORMAN, WILLIAMS LOBBY	
	<p>The bar in this lobby is 48" high with no lowered area.</p>
<p>WOMEN'S RESTROOM (Three theater lobby)</p> <p style="text-align: center;">PRIORITY MEDIUM COST: \$ 150</p>	<p>This toilet room is substantially compliant except for the signage. It's mounted on the door instead of the wall adjacent to the door, as required, and has no Braille or raised texture characters.</p>

CITY OF TULSA – BUILDING REPORT

<p>MEN'S RESTROOM (Three theater lobby)</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 1,250</p>	<p>This toilet room is substantially compliant except for the signage. It's mounted on the door instead of the wall adjacent to the door, as required, and has no Braille or raised texture characters.</p> <p>The center line for the water closet in this restroom is 21 ½" which far exceeds allowable tolerances. This can be resolved by either moving the water closet or placing a 3 ½" thick piece of wood that is a minimum of 18" wide and 46" long between the grab bar and the wall, so the grab bar is secured to it.</p>
ADMINISTRATIVE AREA	
<p>GENERAL INFORMATION:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 3,360 PRIORITY LOW COST: \$ 24,760</p>	<p>Knobs are noted throughout this area and should be replaced with lever hardware that does not require tight grasping and twisting to operate.</p> <p>The reception desk is 45" high with no lowered area. This should be resolved for compliance.</p> <p>There is a private restroom for the administrative staff that is very tiny with no access features at all. The admin area has employment opportunities and should have an accessible toilet room. Costs have been provided but this isn't a high priority unless someone on the staff needs it done or the area is altered.</p> <p>The door to the employee lounge area has only 8 ½" on the pull side instead of the required 18".</p>
2nd STREET TICKET OFFICE	
<p style="text-align: right;">PRIORITY MEDIUM COST: \$ 1,870</p>	<p>The 2nd Street ticket office has 48" high counters with no lowered area.</p> <p>There is a ramp leading to this area that has a slope of 7.7% and does not have handrails. Handrails must be installed for compliance.</p>

CITY OF TULSA – BUILDING REPORT

1. Restroom. This restroom has the accessible stall at the end and only a 36” wide path of travel to it. We recommend removing the urinal partitions and replacing them with smaller ones.

2. Lobby. The main lobby has the required signage indicating the availability of assisted listening systems.

3. Parking. The parking garage has accessible parking spaces and an accessible route into the building.

4 Parking. The parking garage has accessible parking spaces and an accessible route into the building.

CITY OF TULSA – BUILDING REPORT

BUILDING NAME:	Tulsa Zoo
TOTAL COSTS:	\$ 256,375
GENERAL NOTES:	
	<p>This is a public zoo. There are many aspects of this property and access issues are complex. This report is just for the Zoo itself. Mohawk Park and the Nature Center are on separate reports.</p> <p>There are mixed levels of access throughout the property but the two things that stand out, from an access perspective, are the restrooms and the path of travel around the Lowlands exhibit are a priority. Both are out of compliance and are the highest priorities for this property. More details are provided for both later in this report.</p> <p>One of the high priorities is to replace the curb ramp leading from the parking on the north side to the building (see pictures #4 & #5). This curb ramp is at a dangerous slope and needs to be replaced.</p> <p>Another VERY high priority is the ramp that leads to the Macaw Grille. It's dangerous in its current condition and needs to be replaced.</p> <p>Some of the stalls that look like they were supposed to have been the accessible stalls, became "family" stalls. While it's understandable to have family stalls, the accessible stalls are required by law.</p> <p>Every non-compliant restroom in this park needs to have signage indicating the location of the nearest accessible restroom, until all are brought into compliance.</p>
PARKING LOTS:	<p>The Tulsa Zoo has a total of 21 accessible parking spaces. 9 of them are to the south and 15 to the north of the main entrance. Not every accessible parking space has a sign. There are areas where there are signs at each end of the accessible parking, but none for the spaces in the middle. This is a violation. Additionally, the spaces in the east lot are not the closest spaces to the accessible route and the signage indicates these spaces are only accessible on weekends and holidays.</p> <p>Many of the accessible parking spaces do not have access aisles. Each parking space is required to have an access aisle serving it.</p>
NUMBER OF ACCESSIBLE PARKING SPACES	<p>21 accessible parking spaces are provided. Only one is marked as a van space and only five signs are provided. EACH accessible space is required to have an access aisle serving it and a sign in front of it. With 21 accessible spaces, four of them are required to be van accessible parking spaces.</p>
PARKING AND EXTERIOR VIOLATIONS:	
	<p>The parking spaces are required to have access aisles that connect to an accessible path of travel and most of the spaces provided do not have access aisles.</p> <p>Each accessible space is required to have a sign indicating it's a reserved space. Several of the spaces have no signage.</p>

CITY OF TULSA – BUILDING REPORT

	<p>The path of travel along the sidewalk has trees that fall below 80". These need to be maintained so they are above 80".</p> <p>As noted above, the curb ramp from the accessible parking into the building has a 16.7% slope and needs to be replaced for compliance.</p>
PARKING RECOMMENDATIONS:	
<p style="text-align: center;">PRIORITY HIGH COST: \$28,950</p>	<p>Ensure each accessible parking space has both a sign and a path of travel that does not require the user to travel behind parked cars or in the vehicular route. This can easily be accomplished by moving the accessible parking spaces to the other side of the north lot. See picture #3 below.</p> <p>Provide four van accessible parking spaces. They need to be dispersed in the north and south lots.</p>
ZOO INTERIOR AND EXTERIOR PATH ISSUES:	
	<p>Many of the exterior routes around the zoo are overgrown with shrubbery or overhead protrusion. This is a maintenance issue that needs to become a priority to maintain. See the photo sheets, but even at the main entry area the shrubs protrude into the path of travel.</p> <p>Over by the primate area that path of travel crosses the train tracks. This is allowed, but the path must be maintained for compliance as it crosses.</p> <p>The only accessible picnic tables found were at the trunk stop.</p> <p>Many of the trails use mulch as a surface. This is not considered firm, stable and slip resistant.</p>
<p>INFORMATION COUNTER, SECURITY OFFICE AND MAIN ENTRY:</p> <p style="text-align: center;">PRIORITY MEDIUM COST: \$16,250</p>	<p>The information counter is 40 1/4" with no lowered section.</p> <p>The door into the office area has only 5 1/4" on the pull side.</p> <p>The first restroom in the information area is substantially compliant except the mirror is 49" instead of 40" and the pipes under the lavatory are not wrapped.</p> <p>The second restroom in the information area is substantially compliant except the pipes under the lavatory are not wrapped.</p> <p>The break room has a counter at 36" high.</p> <p>The main entry area has counters for the guests that are 43" high, none are lowered. There is a slight level change along the path in front of the exterior guest counter (refer to photos at the end of this report)</p> <p>The security office restroom has the flush control mechanism on the wrong side of the water closet, there is no back grab bar and the pipes under the lavatory are not wrapped or protected from contact.</p>
NATURE EXCHANGE AND CRANE DEPOT:	
<p>GENERAL INFORMATION:</p>	<p>This is a small building that has classes and information about nature. It is an area of public accommodation and is required to be brought into compliance as part of the overall barrier removal program.</p> <p>Directly across from the Nature Exchange is the "Crane Depot" which has a counter that is 45 3/4" high</p>

CITY OF TULSA – BUILDING REPORT

<p>PRIORITY MEDIUM COST: \$14,250</p>	<p>with no lowered area. This is a violation that needs to be resolved.</p> <p>The entry door into the volunteer area has a slope that is 15.5%.</p> <p>All doors have knobs.</p> <p>The sink provided in the volunteer area is 36" high with cabinets that prevent knee clearance.</p>
<p>MEN'S RESTROOM:</p> <p>PRIORITY MEDIUM COST: \$12,850</p>	<p>The entry into the men's restroom is only 27". None of the interior features of this restroom are accessible. No accessible stall is provided, the lavatory is not accessible, the urinal is not accessible, there is no signage indicating the location of the nearest accessible restroom.</p> <p>This needs to be altered for compliance. In the meantime, signage indicating the location of the nearest accessible restroom is required to be provided.</p>
<p>WOMEN'S RESTROOM:</p> <p>PRIORITY MEDIUM COST: \$12,850</p>	<p>The entry into the women's restroom is only 27". None of the interior features of this restroom are accessible. No accessible stall is provided, the lavatory is not accessible, there is no signage indicating the location of the nearest accessible restroom.</p> <p>This needs to be altered for compliance. In the meantime, signage indicating the location of the nearest accessible restroom is required to be provided.</p>
MARKET GIFT SHOP AND RESTROOMS:	
<p>GIFT SHOP:</p>	<p>The gift shop is substantially compliant.</p>
<p>MEN'S RESTROOM:</p> <p>PRIORITY MEDIUM COST: \$ 250</p>	<p>The standard stall is only 59" wide, which is an acceptable tolerance.</p> <p>The door into the men's room is recessed 9". This is slightly over the allowable 8" but is acceptable as an existing condition.</p> <p>The pipes under the lavatory are not wrapped or otherwise protected from contact.</p>
<p>WOMEN'S RESTROOM:</p> <p>PRIORITY MEDIUM COST: \$ 250</p>	<p>The door into the women's room is recessed 8 3/4". This is slightly over the allowable 8" but is acceptable as an existing condition.</p> <p>The pipes under the lavatory are not wrapped or otherwise protected from contact.</p>
HELMERICH NATURE CENTER:	
<p>GENERAL INFORMATION:</p> <p>PRIORITY MEDIUM COST: \$4,250</p>	<p>The walk in front of the center has cross slopes up to 4.5%.</p> <p>In the auditorium, the only access to the stage is from an exterior door. If major renovations are planned this should be altered at that time. However, the ramp provided only has a handrail on one side of it. Another handrail should be installed as a higher priority. (cost not included in this report)</p> <p>The door into the employee area has only 9 1/2" on the pull side of the door. 18" is required.</p> <p>The employee break room has a sink mounted in a 36" high counter with cabinets preventing knee clearance.</p> <p>The classrooms also have sinks mounted in 36" high counters with cabinets that prevent knee clearance.</p>

CITY OF TULSA – BUILDING REPORT

<p>WOMEN'S RESTROOM #1: In lobby</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 250</p>	<p>The signage is mounted on the door instead of on the wall on the latch side of the door.</p> <p>The stall is substantially compliant but the toilet paper is mounted only 4" above the grab bar. It's required to have at least 12" so it doesn't obstruct the use of the grab bar.</p> <p>The pipes under the lavatory are not wrapped or otherwise protected from contact.</p>
<p>MEN'S RESTROOM #1: In lobby</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$1,250</p>	<p>The signage is mounted on the door instead of on the wall on the latch side of the door.</p> <p>The stall is substantially compliant but the toilet paper is mounted only 4" above the grab bar. It's required to have at least 12" so it doesn't obstruct the use of the grab bar.</p> <p>The pipes under the lavatory are not wrapped or otherwise protected from contact.</p>
<p>UNISEX RESTROOM #1: In the Helmerich office area</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$3,250</p>	<p>The signage is mounted on the door instead of on the wall on the latch side of the door.</p> <p>The room is substantially compliant but the toilet paper is mounted only 6" above the grab bar. It's required to have at least 12" so it doesn't obstruct the use of the grab bar.</p> <p>The door has both a closer and a latch but only has 2" on the push side of the door. A minimum of 12" is required.</p>
<p>UNISEX RESTROOM #2: In the Helmerich office area</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 5,650</p>	<p>The signage is mounted on the door instead of on the wall on the latch side of the door.</p> <p>The room is substantially compliant but the toilet paper is mounted only 6" above the grab bar. It's required to have at least 12" so it doesn't obstruct the use of the grab bar.</p> <p>The door has both a closer and a latch but only has 2" on the push side of the door. A minimum of 12" is required.</p> <p>The flush control for the water closet is mounted on the wrong side.</p> <p>The center line of the water closet is 20". It is required to be 18" absolute or 16" to 18" for new ADAAG. It meets neither.</p>
<p>SHOWER ROOM: In the Helmerich office area</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$15,875</p>	<p>The room does not have the required 5' turning radius inside.</p> <p>No grab bars are installed.</p> <p>The lavatory is 36" high and has cabinets underneath preventing the required knee clearance.</p> <p>There is only 12" on the pull side of this door. A minimum of 18" is required, 24" is preferred. The door either needs to be altered, or a power assist mechanism installed. The costs provided are for a power assist mechanism to be installed.</p> <p>There is no compliant path of travel to the shower. It narrows to only 27 1/2".</p>
<p>TRUNK STOP AND AMPHITHEATER</p>	
<p>GENERAL INFORMATION:</p>	<p>The counter provided is 43 1/2" high with no lowered section.</p> <p>The ramp to the amphitheater is only 32" wide with handrails on only one side. It's required to be a</p>

CITY OF TULSA – BUILDING REPORT

<p>PRIORITY MEDIUM COST: \$ 8,650</p>	<p>minimum of 36" wide with handrails on both sides.</p> <p>The only accessible seating in the amphitheater is in the very front, but there are no companion seats provided;</p>
<p>WOMEN'S RESTROOM:</p> <p>PRIORITY MEDIUM COST: \$ 6,650</p>	<p>The baby changing station is mounted in the accessible stall. This can remain in the stall as long as there is another one in the common areas.</p> <p>There are seven stalls and no ambulatory stall. When there are six or more there is a requirement for a stall that is 36" wide with an outward swinging door and grab bars on both sides.</p> <p>The accessible stall has the door directly in front of the water closet, instead of opening in front of the clear floor space as required.</p> <p>The center line of the water closet is 23" which far exceeds all reasonable tolerances.</p>
<p>MEN'S RESTROOM:</p> <p>PRIORITY MEDIUM COST: \$ 4,250</p>	<p>The pipes under the lavatory are not wrapped or otherwise protected from contact.</p> <p>The urinal is mounted 25" to the rim. It's required to be at or below 17".</p> <p>The accessible stall does not have a side grab bar installed and the toilet paper is mounted at 30" from the back wall making it difficult to reach.</p> <p>The center line of the water closet is 20" which far exceeds all reasonable tolerances. 18" absolute is required.</p>
ANIMAL EXHIBITS:	
<p>SEA LION EXHIBIT:</p>	<p>The Sea Lion exhibit is in the process of being relocated. Because this will be new construction, ALL aspects of this new exhibit are required to be fully compliant.</p>
<p>PRIMATE EXHIBIT</p> <p>PRIORITY MEDIUM COST: \$ 14,250</p>	<p>The path of travel to the primate building leads over the train tracks. This path is allowed, but it isn't compliant. It needs to be maintained in an accessible condition.</p> <p>The button for the auto door into the building is mounted on a sloped surface.</p>
<p>MEN'S RESTROOM:</p> <p>PRIORITY MEDIUM COST: \$ 4,320</p>	<p>The lavatory does not have the pipes wrapped or otherwise protected from contact and it's directly in the door swing for the main door. This needs to be altered for compliance.</p> <p>The urinal is not compliant at 21" instead of the required 17" maximum height.</p> <p>The accessible stall has signage calling it the "family" stall and there are two water closets inside, which reduces the needed clear floor space.</p>
<p>WOMEN'S RESTROOM</p> <p>PRIORITY MEDIUM COST: \$ 6,550</p>	<p>The accessible stall has signage calling it the "family" stall and there are two water closets inside, which reduces the needed clear floor space.</p> <p>The lavatory does not have the pipes wrapped or otherwise protected from contact.</p>
DRINK PAVILLION (NEW CONSTRUCTION)	

CITY OF TULSA – BUILDING REPORT

<p>GENERAL INFORMATION:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$11,450</p>	<p>Because this building is new construction, everything is required to be in full compliance.</p> <p>The ramp leading to the "MaCaw Landing Grille" has a ramp that is dangerous. This should be altered as one of the highest priorities. The ramp slope is from 13.8% to 15.1% with a cross slope up to 11.1% at the bottom. It also only has a hand rail on one side instead of both, as required.</p>
<p>WOMEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 4,250</p>	<p>The changing table is mounted at 40", which is too high for compliance.</p> <p>The pipes under the lavatory are not wrapped or otherwise protected from contact.</p> <p>The center line of the water closet is 21" which exceeds all allowable tolerances.</p> <p>The toilet paper is mounted only 5" above the grab bar. A minimum of 12" is required so the use of the grab bar is not obstructed.</p>
<p>MEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 3,250</p>	<p>The baby changing table is mounted at 40", which is too high for compliance.</p> <p>The pipes under the lavatory are not wrapped or otherwise protected from contact.</p> <p>The center line of the water closet is 21" which exceeds all allowable tolerances.</p> <p>The toilet paper is mounted only 5" above the grab bar. A minimum of 12" is required so the use of the grab bar is not obstructed.</p>
<p>RAIN FOREST</p>	
<p>GENERAL INFORMATION:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$16,250</p>	<p>The ramp by the Rain Forest to the restrooms is okay, but signage keeping people to the right is recommended to avoid accidents.</p>
<p>WOMEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 6,750</p>	<p>The signage is mounted on the door instead of the wall adjacent to the latch side of the door.</p> <p>There is a 4% slope to the entrance door.</p> <p>The pipes under the lavatory are not wrapped or otherwise protected from contact.</p> <p>Baby changing table is located in the accessible stall.</p> <p>Six stalls are provided and there is no ambulatory stall. One stall must be 36" wide, have outward swinging door and grab bars on both sides. This is in addition to the fully accessible stall.</p>
<p>MEN'S RESTROOM:</p> <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 3,250</p>	<p>The signage is mounted on the door instead of the wall adjacent to the latch side of the door.</p> <p>There is a 4% slope to the entrance door.</p> <p>The pipes under the lavatory are not wrapped or otherwise protected from contact.</p> <p>Baby changing table is located in the accessible stall.</p> <p>The toilet paper dispenser is mounted 5 1/2" above the grab bar, which obstructs the use of the grab bar. It needs to be a minimum of 12" above the grab bar or 1 1/2" below.</p>

CITY OF TULSA – BUILDING REPORT

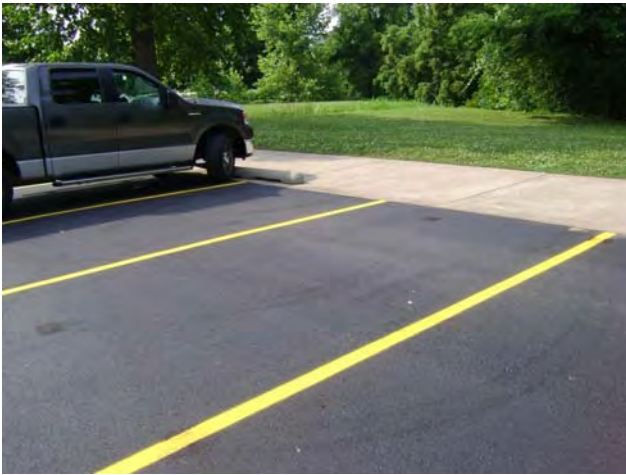

JAGUAR ICE CREAM AND SURROUNDING AREAS:	
GENERAL INFORMATION: <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 9,640</p>	<p>The counter provided is substantially compliant.</p> <p>The seating area is not directly accessible from the ice cream counter. There is a route, but it's somewhat hidden and a person leaving the ice cream counter may not see it. The route needs to be moved, or at least identified through signage.</p> <p>The bonfire pit provided has no access to it at all. This is an amenity and needs to be compliant.</p> <p>The observation area is substantially compliant, but there are no accessible telescopes provided. One should be installed for compliance.</p>
WOMEN'S RESTROOM: <p style="text-align: right;">PRIORITY MEDIUM COST: \$2,150</p>	<p>The signage is mounted on the door instead of the wall adjacent to the latch side of the door.</p> <p>There is a 3.3% slope to the entrance door.</p>
MEN'S RESTROOM: <p style="text-align: right;">PRIORITY MEDIUM COST: \$150</p>	<p>The signage is mounted on the door instead of the wall adjacent to the latch side of the door.</p>
FOREST, DESERT, TUNDRA, LOWLAND, AREA:	
GENERAL INFORMATION: <p style="text-align: right;">PRIORITY HIGH COST: \$ 28,950</p>	<p>The ramp between the Forest and the Lowland area has no handrail.</p> <p>The path of travel uses pavers that do not have grass grown in them and is therefore dangerous. This is not only dangerous for people with disabilities, but for the general public.</p> <p>The Lowland Building was being remodeled and was closed. It was not assessed for compliance.</p>
WOMEN'S RESTROOM: (Forest area) <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 4,720</p>	<p>The signage is mounted on the door instead of the wall adjacent to the latch side of the door.</p> <p>The entry door has only 6" on the push side, but the door has a closure and a latch.</p> <p>The pipes under the lavatory are not wrapped or otherwise protected from contact.</p> <p>There is an alternate stall, but no fully compliant stall. This needs to be resolved. In the meantime, signage needs to be provided indicating the location of the nearest accessible restroom.</p>
MEN'S RESTROOM: (Forest area) <p style="text-align: right;">PRIORITY MEDIUM COST: \$ 4,720</p>	<p>The signage is mounted on the door instead of the wall adjacent to the latch side of the door.</p> <p>The pipes under the lavatory are not wrapped or otherwise protected from contact.</p> <p>There is an alternate stall, but no fully compliant stall. This needs to be resolved. In the meantime, signage needs to be provided indicating the location of the nearest accessible restroom.</p> <p>The stall that is provided has no back grab bar and the side grab bar is only 32" long.</p> <p>The urinal provided is mounted at 21" off the floor and has steps in front of it.</p>

CITY OF TULSA – BUILDING REPORT

1. Parking. *The accessible parking spaces in the main parking lot do not have the required access aisle or the required signage. Many do not have a compliant path of travel to the Zoo entrance.*

2. Parking. *The main parking spaces do not have the required signage. Each individual parking space is required to have it's own sign.*

3. Parking. *These spaces are not designated as accessible spaces but should be. They are closer to the accessible route into the building and already provide a smooth path of travel into the main entrance.*

4 Path of Travel. *This curb ramp is dangerously non-compliant and needs to be removed and replaced with one that is fully compliant.*

CITY OF TULSA – BUILDING REPORT

5. Path of Travel. *This curb ramp is dangerously non-compliant and needs to be removed and replaced with one that is fully compliant. The maximum allowable slope is 8.33% and this doubles that.*

6. Restrooms – These are the only restrooms in this area and are not accessible. They need to be altered for access but in the meantime, signage needs to be provided indicating the location of the nearest accessible restroom.

7. Doors – This is the main entry door into the volunteer area at the Nature Center. The ramp helps with access but does not make the door compliant.

8. Path of travel - This level change is at the bottom of a ramp, which leads to ticketing, and needs to be resolved for compliance.

CITY OF TULSA – BUILDING REPORT

9. Toilet Stalls. The accessible stalls in many areas were labeled as "family" stalls with two water closets in them. This reduces the required clear floor space for the stall.

10. Paths of Travel. Many of the trails have loose material on them, which wash away and cause access problems. Follow the requirements for Exterior Surfaces (provided as part of this process) and use a bonding agent to maintain access.

11. Paths of Travel. Many of the trails have loose material on them, which wash away and cause access problems. Follow the requirements for Exterior Surfaces (provided as part of this process) and use a bonding agent to maintain access.

12. Path of Travel. This button is mounted on a sloped area. It's required to be on a level surface with a slope not to exceed 2% in any direction.

CITY OF TULSA – PARKS REPORT

PARK NAME:	Centennial Park
AMENITIES OFFERED:	1 Rec Center
NUMBER OF PARKING SPACES:	110 total spaces –
NUMBER OF ACCESSIBLE PARKING SPACES	7 – Compliant 0 – Attempted 5 - Required
TOTAL COST RANGE:	\$ 5,150 to \$6,385 (depending on solutions chosen)

The accessible parking spaces are substantially compliant, however the curb ramp leading to the main entrance (in the front of the building) has a 13.7% slope, which is dangerous. This should be altered for compliance. .

PRIORITY: HIGH
COST: \$2,490

RECOMMENDATION

Replace the existing curb ramp with a curb ramp that has a slope that does not exceed 8.33%.

CITY OF TULSA – PARKS REPORT

<p>Recreation Building</p> <p>This building is relatively new and substantially in compliance. There are minor items that needs to be resolved for full compliance, such as:</p> <ol style="list-style-type: none"> 1. The mirror in the unisex restroom is mounted at 49 ½” to the reflecting surface and it’s required to be no higher than 40”. <p>PRIORITY: LOW COST: \$45</p>	<p>RECOMMENDATIONS:</p> <p>Lower the mirror so the bottom of the reflecting surface does not exceed 40” above the floor.</p>
<ol style="list-style-type: none"> 2. The baby changing station is in the stall in both the men’s and women’s restrooms. It’s okay to have one in the stall as long as there is also one in the common area. <p>PRIORITY: LOW COST: \$45 (to move) COST: \$380 (install a new one)</p>	<p>RECOMMENDATION:</p> <p>Install a baby changing station in the main part of the restroom.</p>
<p>Kitchen:</p> <ol style="list-style-type: none"> 1. The kitchen has a hand sink but the pipes under it are not wrapped. <p>PRIORITY: LOW COST: \$ 120</p>	<div data-bbox="856 1019 1150 1404" data-label="Image"> </div> <p>RECOMMENDATION:</p> <p>Wrap pipes to protect against contact.</p>

CITY OF TULSA – PARKS REPORT

<p>2, Secondly, the door leading in/out of the kitchen has only 12 5/8” on the pull side of the door. A minimum of 18” is required.</p> <p>PRIORITY: MEDIUM COST: \$ 2,600 (Install power door) \$ 1,700 (move door)</p>	<p>RECOMMENDATION:</p> <p>Alter door to ensure there is a minimum of 18” on the pull side of the door or install a power assisted mechanism to operate the door.</p>
<p>Fitness Center</p> <p>A sink is provided in the fitness center and it has cabinets that obstruct the required knee clearances for a forward approach.</p> <p>PRIORITY: MEDIUM COST: \$750</p>	<p>RECOMMENDATION:</p> <p>Alter sink to ensure the required knee clearance is provided.</p>

**CITY OF TULSA – PARKS REPORT
HICKS PARK**

PARK NAME:	Hicks Park	
AMENITIES OFFERED:	1 Play Ground 1 Lighted Field 6 Lighted Tennis Courts 1 Rec Center 0.5 Miles of Trail	1 Indoor Gym 1 Picnic Shelter 9 Picnic Tables 1R Restrooms
NUMBER OF PARKING SPACES:	157 total spaces -	
NUMBER OF ACCESSIBLE PARKING SPACES	0 – Compliant 8 – Attempted* 6 - Required * PLEASE NOTE – The parking spaces themselves were substantially compliant. However, part of an accessible parking space is the accessible route from that space to the element it serves. The path of travel for these spaces requires travel along a sidewalk with a non-compliant cross slope.	
TOTAL ESTIMATED COST:	\$ 74,094 to \$118,454	
GENERAL NOTES:	This park was built in 1976. There was an addition added in 2000. Because the addition was added after the ADA went into effect, it should be fully compliant. This increases the requirement for these items, no matter how small, to be brought into compliance.	
<p>The striping on the parking spaces has worn off and it's difficult to tell where any of the spaces begin or end. It should be restriped for clarity, but this is not a violation of an access requirement.</p> <p>The sidewalk along the front of the accessible parking spaces has a cross slope up to 4.9%, which more than doubles the allowable slope of 2%.</p> <p>PRIORITY HIGH COST: \$ 11,368</p>		<p>RECOMMENDATION:</p> <p>Replace the sidewalk along the front of the accessible spaces with a sidewalk that has no more than 2% slope. Place wheel stops so cars do not obstruct the path of travel.</p>

**CITY OF TULSA – PARKS REPORT
HICKS PARK**

<p>RECREATIONAL BUILDING</p> <p>1. The path of travel to the main entrance has a cross slope that is slightly out of compliance. It is not recommended to do anything to resolve this until there is work being done in that area anyway, then the sidewalk should be replaced.</p> <p>PRIORITY LOW COST: \$ 8,276</p> <p>2. The front door has a slope up to 5.8% in front of it. The maximum allowable slope in front of a door is 2% in any direction</p> <p>PRIORITY HIGH – See recommendation #2 → COST: \$ 2,550</p>	 <p>RECOMMENDATIONS:</p> <p>#1. WHEN construction is done in the front of the building, or IF the soil moves and the cross slope exceeds 3%, the sidewalk should be replaced. It measured 2.6% at it's highest point during inspection.</p> <p>#2. A power assist mechanism should be installed to overcome the slope and facilitate access.</p>
<p>The counter at the recreational center is 42 ¼” with no lower section. Transaction counters are required to have a section at least 36” wide lowered to 36” in height.</p> <p>PRIORITY MEDIUM COST: \$ 750</p>	<p>RECOMMENDATION:</p> <p>Lower a section of the main counter that is at least 36” wide to 36” height.</p>
<p>There is only one drinking fountain. Where there is one, there must be two. One for people who use wheelchairs and one for people who have trouble bending and stooping.</p> <p>PRIORITY LOW COST: \$ 2,700</p>	<p>RECOMMENDATION:</p> <p>Install a high/low drinking fountain in place of the single user.</p>

CITY OF TULSA – PARKS REPORT HICKS PARK

RECREATIONAL CENTER RESTROOMS AND LOCKER ROOMS:

1. The center line of the water closet is 20" in the men's restroom stall.
2. The men's locker room does not have a permanent bench installed.
3. The shower has 9" behind the shower seat in the men's locker room and 11" behind it in the women's locker room. Both have grab bars mounted at 38" aff instead of 36" maximum as required.
4. The faucet in the women's restroom takes more than 5 lbs. of pressure to activate.
5. There is no 5' turning radius in the woman's accessible shower.
6. The shower has 11" behind the shower seat and the grab bars are mounted at 38" aff instead of 36" maximum as required.
7. The second set of drinking fountains has two fountains but both are at the lower height. There is no standard height drinking fountain in the building.

PRIORITY: MEDIUM

COSTS: \$ 3,300 to \$ 4,550

RECOMMENDATIONS:

1. Either furr the wall out 2" or mount the grab bar on a wood panel that is a minimum of 18" wide. Mount the grab bar with a minimum of 12" above it on the wood. (\$275)
2. Install a bench that is 20" to 24" deep and 42" long along a wall, or get benches with backs that meet the requirements. (\$350)
3. Reinstall the shower seat closer to the wall and grab bars between 33" and 36" for compliance. (\$275)
4. Replace the faucet with one that takes less than 5 lbs of pressure to activate. (\$400)
5. Remove the door and replace with a curtain to allow maneuvering clearance. (\$275)
6. Reinstall the shower seat and grab bars for compliance. (\$275)
7. Install either a hi/lo unit to replace the existing one or a stand alone standard height unit near by. (\$ 1,450 - \$2,700)

RECREATIONAL CENTER SINKS (New Addition):

1. The kitchen has 34" counters but the sink has cabinets underneath it.
2. The craft room sink is mounted at 36" and has cabinets underneath it.

PRIORITY MEDIUM

COSTS: \$5,680

**CITY OF TULSA – PARKS REPORT
HICKS PARK**

	<p>RECOMMENDATIONS:</p> <ol style="list-style-type: none"> 1. The kitchen sink needs to have the proper knee clearance provided. Remove cabinets underneath the sink to provide proper knee clearance. (\$ 2,200) 2. Craft room sink is on a counter mounted at 36", so the counter needs to be lowered and knee clearance provided. (\$3,480)
<p>EXTERIOR ROUTES:</p> <ol style="list-style-type: none"> 1. The path of travel to the tennis courts has a running slope up to 19.8%. 2. There are no accessible parking spaces serving the pavilion, playground and ball fields. All of the accessible parking is on the building side of the park. 3. The path of travel from the parking lot to the pavilion, playgrounds and ball fields has slopes from 6.4% to 14.4%. 4. The path of travel to some of the amenities requires the use of a gravel path. <p>PRIORITY HIGH</p> <p>TOTAL ESTIMATED COST: \$39,470 to \$82,580</p>	<div style="display: flex; justify-content: space-around;">   </div> <p>RECOMMENDATIONS:</p> <ol style="list-style-type: none"> 1. This path is dangerous and needs to be replaced with a ramp with fully compliant slopes, keeping the area in front of the gate level (no more than 2% slope in any direction). (If concrete: \$21,895) 2. Install a minimum of two accessible parking spaces adjacent to the accessible route to these amenities. (Cost: \$2,200) 3. Replace this entry point with compliant slopes leading to the main paths. (Cost: \$5,600) 4. Resurface the accessible routes with compliant material. This does not have to be concrete or asphalt, but can be other packed materials with bonding agents. Costs will depend on materials used. (Cost: \$9,775 to \$ 52,885)

CITY OF TULSA – PARKS REPORT

PARK NAME:	Hunter Park	
AMENITIES OFFERED:	1 Play Ground 1 Water Play Area 0.9 Miles of Trail 4 Outdoor Basketball Courts	1 Picnic Shelter 14 Picnic Tables 1 Restroom building 1 Disk Golf Course
NUMBER OF PARKING SPACES:	15 total spaces -	
NUMBER OF ACCESSIBLE PARKING SPACES	LOT BY PAVILION: 125 SPACES 0 – Compliant 4 – Attempted 5 - Required	LOT BY BASKETBALL: 39 SPACES 0 – Compliant 1 – Attempted 2 - Required
TOTAL ESTIMATED COST:	\$88,205	
GENERAL NOTES:	<p>As noted in other reports, the resurfacing along trails does not have to be concrete. There are many types of exterior surfaces that can be used and a document put out by the US Access Board accompanies these reports. This will detail surface type that can be used.</p> <p>This park has a dog park in it that was built recently. While access was attempted, the park actually has NO fully compliant entrances. Making this compliant is a higher priority because it was built new and built out of compliance.</p>	
<p>The striping on the parking spaces in both lots has worn off and will need to be replaced soon. None of the parking spaces in this park have the required access aisles. Pictured are two different spaces; one from the main parking area and one from the lot near the basketball courts. As designed, if anyone parks in either space they will block the access point to the sidewalks.</p> <p>Providing an access aisle eliminates the possibility of the access point being blocked by a vehicle.</p> <p>The path of travel from the pavilion parking to the water "maze" above requires travel on a sidewalk with an 18.6% slope. This is a dangerous route. There is another route that can be used, but you can't see it from the accessible parking spaces.</p> <p>PRIORITY HIGH COST: \$ 3,880</p>		<p>RECOMMENDATIONS:</p> <ol style="list-style-type: none"> 1. Restripe parking lots so each accessible space has an access aisle and each access aisle is in front of the access point provided. Add one fully compliant accessible space to each lot. 2. Ensure each accessible parking space has it's own sign. (Signs can not be shared between two spaces). 3. Remove the route with the 18.6% slope and provide signage indicating where the accessible route is located.

CITY OF TULSA – PARKS REPORT

PLAYGROUND AREAS AND EXTERIOR AMENITIES:

1. The path of travel to the playgrounds has a level change into the playground area.
2. The pavilion has an accessible route to it but the grills do not. Grills are mounted in the dirt away from the pavilion and the foundation for the pavilion forms a level change in the route to the grill.
3. The disc golf stations do not have dedicated accessible routes to them, but most are on the grass not too far from a sidewalk. Each launch pad should be evaluated to ensure an accessible route is provided to it.
4. There are several picnic tables and benches that are on concrete slabs and, therefore, have level changes to get to them making them inaccessible.

PRIORITY MEDIUM

COST: \$ 20,175

RECOMMENDATIONS:

1. Alter the edges around the playground areas with ramps or other type of smooth transition into the actual play areas.
2. Ensure at least 5% of the grills have a full accessible route leading to them. Start with the grills that best serve, or are served by, other amenities. That would be those near pavilions, playgrounds or other amenities.
3. Ensure each disc launch pad has a route to it, even if it's grass, that doesn't have major level changes.
4. Ensure a minimum of 5% of the picnic tables and benches have accessible routes leading to them, starting with those that best serve other amenities.

CITY OF TULSA – PARKS REPORT

TRAILS AND DOCKS:

1. The trails have pits and uneven areas and some areas have loose gravel and level changes.
2. The fishing docks appear to have been made accessible at one point but have not been maintained. This has caused some dangerous area around the docks.

PRIORITY HIGH (VERY HIGH)

COST: \$ 18,475

RECOMMENDATION:

1. Ensure the annual budget includes maintenance of the trails and paths. This needs to begin by patching the level changes and gaps around the docks, which present a liability problem for the city.

RESTROOM BUILDING:

The restrooms provided for this park are not fully compliant but are very close. The following elements need to be altered for full compliance:

Lavatory - The pipes are not wrapped. The mirror is mounted at 44" above the finished floor.

Water Closet - The center line of the water closet is 19 1/4" from the side wall.

Signage is mounted on the door instead of the wall adjacent to the door,

Drinking fountain - There is only one drinking fountain. Where there is one there is supposed to be two. One for people in wheelchairs and one for people who have trouble bending or stooping.

PRIORITY MEDIUM

COST: \$ 2,250

RECOMMENDATIONS:

Install a high/low drinking fountain in place of the single user or install another drinking fountain within 200' of this one, serving the same area.

CITY OF TULSA – PARKS REPORT

PARK NAME:	Lacy Park	
AMENITIES OFFERED:	1 Play Ground 1 Lighted Field 4 Lighted Tennis Courts 1 Water Play Area 3 Picnic Tables	1 Rec Center 1 Municipal Pool Outdoor Basketball Courts 1 Indoor Gym
NUMBER OF PARKING SPACES:	118 total spaces -	
NUMBER OF ACCESSIBLE PARKING SPACES	0 – Compliant 5 – Attempted* 5 - Required *PLEASE NOTE – There are five accessible parking signs. Striping is so worn it can barely be seen and there are no access aisles or compliant paths of travel. Parking should be fixed in this park before anything else is done here.	
TOTAL ESTIMATED COST:	\$69,805	
GENERAL NOTES:	Because all of the amenities share the same parking lot, the parking should be adequately distributed. We recommend placing two spaces serving the pool and two serving the playground/tennis courts and two more serving the ball fields. This totals six, which is one more than necessary, but offers the best distribution. At least one van space in each location is best, but only one van space is required.	
<p>The accessible parking spaces in front of the Rec building do not comply. There are no compliant access aisles and there is an attempt at a path of travel, but it does not comply. There five signs for accessible parking, but none of the spaces comply.</p> <p>PRIORITY HIGH</p> <p>COST: \$13,225</p>	 <p>RECOMMENDATION:</p> <p>Install five fully compliant spaces with access aisles and a compliant path of travel to the areas they serve. It would be best to distribute them to best serve the various amenities, since all amenities use the same parking lot. See the general notes above.</p>	

CITY OF TULSA – PARKS REPORT

This playground has an accessible route leading to it but the route is not fully compliant because it is not served from accessible parking. Compliance would require an accessible parking space serving this amenity.

PRIORITY HIGH

COST: In Parking total above

RECOMMENDATIONS:

Install at least one of the required accessible parking spaces here to best serve the playground

REC CENTER

The main counter at the Rec Center is acceptable. Some of the doors in the facility have levers and some have knobs. There is a variety of problems with the restrooms:

Men's and Women's restrooms:

The main door only has 2 ¼" on the pull side (18" is required)

Stall is 40" by 53" and hardware is a knob

Grab bars are only 32" long mounted from 29 ½" to 43"

Lavatory – Pipes are not wrapped.

Meeting Room:

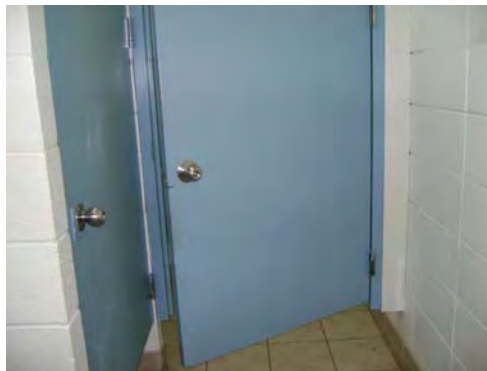

Door has knobs instead of levers

Multi Purpose Room:

Only has 4" on the pull side of the door.

PRIORITY MEDIUM

COST: \$31,625

RECOMMENDATIONS:

Men and Women's Restrooms: Ensure each restroom has at least one fully accessible stall. Modifying the existing stalls may be difficult with the type of walls, so a separate compliant stall or single user restroom are other options. Costs will vary depending on resolution chosen. Costs figured are an average.

Meeting Rooms and throughout Rec Center: Change all knobs to levers,, throughout the building

Move doors, change doors swings or install power assisted door mechanisms to overcome the door maneuvering clearance issues.

CITY OF TULSA – PARKS REPORT

POOL AND POOL BUILDING

The counter in the pool building is 36” high, which is acceptable as a transaction counter. The pool itself has a beach front entry which makes access easy. However, the restrooms are not fully compliant and should be altered for compliance.

Mens’s and Women’s Restrooms

Stall is 40” by 53” with grab bars on both sides and a round knob for entry.

Lavatory – Pipes are not wrapped.

Urinal in Men’s room is mounted at 23” high

Showers:

No compliant features are provided in either the individual showers or in the gang showers.

PRIORITY MEDIUM

COST: \$ 18,688

RECOMMENDATIONS:

Men and Women’s Restrooms: Ensure each restroom has at least one fully accessible stall. Modifying the existing stalls may be difficult with the type of walls, so a separate compliant stall or single user restroom are other options. Costs will vary depending on resolution chosen. Costs figured are an average.

Showers: Ensure each shower room has at least one accessible shower stall. This can be either a 36” by 36” transfer style shower or a 30” min by 60” min roll in shower.

TENNIS COURTS AND BALL FIELDS:

Tennis Courts:

The paths of travel to the tennis courts have slopes that exceed any acceptable tolerances. Both are located on the north side of the courts, so if one was resolved the other does not have to be. There is an internal path of travel between the courts.

Basketball Court:

The path of travel provided to the basketball courts also does not comply. This will need resurfacing for compliance and will have to connect to accessible parking. Currently, no accessible parking serves these amenities.

RECOMMENDATIONS:

Install a fully compliant ramp system or path of travel to either end of the tennis courts since there is an interior connection to the courts. This path can connect to and serve the basketball courts.

CITY OF TULSA – PARKS REPORT

Baseball Diamond

The baseball diamond does not have a fully compliant path of travel to it. The path will be required to be resurfaced for compliance and will need to fully connect to some accessible parking. Currently, no accessible parking serves this amenity.

PRIORITY HIGH

COSTS: \$6,267

RECOMMENDATIONS:
Install curb ramps and provide accessible parking to connect to the path of travel to the baseball diamond. Where the current path has a cross slope exceeding 2% it will need to be altered or resurfaced for compliance.

CITY OF TULSA – PARKS REPORT

PARK NAME:	McClure Park	
AMENITIES OFFERED:	1 Play Ground 3 Sports Fields 1 Lighted Field 4 Lighted Tennis Courts 2 Outdoor Raquetball Courts 1 Municipal Pool 1 Rec Center	1.42 Miles of Trail 2 Outdoor Basketball Courts 1 Indoor Gym 32 Picnic Tables 2R Restrooms 1 Concession 1 Disk Golf Course
NUMBER OF PARKING SPACES:	528 total spaces -	
TOTAL ESTIMATED COSTS:	\$57,300	
GENERAL NOTES:	This park has three different parking lots, each serving a different area of the park. Each was evaluated separately but none of them have the right number of accessible parking spaces.	
NUMBER OF ACCESSIBLE PARKING SPACES	Sports Lot – 159 total parking spaces. Four are identified as accessible. Six are required. Rec Center Lot – 136 total parking spaces. Two identified as accessible. Five are required. Pool Lot – 232 total parking spaces. Three identified as accessible. Seven are required.	
<p>SPORTS LOT - This accessible parking space is not compliant. There is no compliant signage, no access aisle, no path of travel. There are only two spaces here and six are required.</p> <p>PRIORITY HIGH COSTS: \$ 4,360</p>		<p>RECOMMENDATION:</p> <p>Install six fully compliant spaces that have a path of travel leading to the various ball fields offered. By utilizing some of the existing routes, this should be able to be done with just striping.</p>

CITY OF TULSA – PARKS REPORT

SPORTS LOT - This accessible parking space is not compliant because it does not have a compliant path of travel. The level change between the access aisle and the sidewalk varies but is up to 1" in some places.

PRIORITY HIGH
COSTS: \$ 5,140

RECOMMENDATION:

The level change has to be altered for compliance.

There is one space here, but it's a good place to add at least one more space to get closer to the number of spaces required.

REC CENTER LOT – These parking spaces are substantially compliant but the built up curb ramp serving them is not. This will need to be altered for a compliant path of travel.

This lot has two accessible parking spaces but five are required.

PRIORITY HIGH
COSTS: \$ 3,998

RECOMMENDATION:

Remove the existing built up curb ramp and install a compliant path of travel.

Install a total of five accessible parking spaces serving this lot.

CITY OF TULSA – PARKS REPORT

POOL LOT – These parking spaces are substantially compliant but have no path of travel to the building entrance.

This lot has two accessible parking spaces but seven are required.

PRIORITY HIGH
COSTS: \$ 7,940

RECOMMENDATION:

Install five more accessible spaces, complete with a fully compliant path of travel to the building entrance.

Ensure this lot ends up with a total of seven accessible parking spaces.

EXTERIOR PATHS:

The path of travel to the tennis and basketball courts has level changes that prevent access and surfaces that are not firm, stable and slip resistant

There are no accessible picnic tables noted. They are all mounted on concrete slabs with elevation changes and no accessible seating.

There is no accessible route to the slide. .

PRIORITY HIGH
COSTS: \$ 21,600

RECOMMENDATION

Pave a path of travel that overcomes the level change and provides the stable surface requirements. Costs will vary depending on material used for surfacing, so the cost provided is an average.

CITY OF TULSA – PARKS REPORT

PATH TO CONCESSION BUILDING AND FIELDS:

A handrail is only provided on one side of this ramp. Ramps are required to have handrails on both side. The slope of the ramp has some areas that exceed the allowable 8.33%, but overall is compliant. We do not recommend altering the slope of the ramp. However, the level landing areas provided are only 30” wide. They are required to be a minimum of 60” wide.

PRIORITY MEDIUM
COST: \$ 15,500

RECOMMENDATION:

Install a new handrail to ensure this ramp has a compliant handrail on both sides.

Alter the level landing areas to ensure a minimum of 60” is provided every 30 feet.

BALL FIELD SEATING:

The seating provided has room for people in wheelchairs to sit. While this seating is not fully compliant, it’s not a place we recommend spending money unless the seating is going to be altered as part of a project. This is substantially compliant as it stands.

RECOMMENDATION:

Although not perfect, there is room for a person in a wheelchair to sit with family members to watch a game. It is not recommended to start a project just to alter the seating. |

CITY OF TULSA – PARKS REPORT

REC/POOL BUILDING

The counter at the pool building is 42 ¼” high with no lowered section. (PRIORITY MEDIUM)

Mens’s and Women’s Locker/Restrooms (PRIORITY MEDIUM)

There are no accessible dressing rooms in either the Men’s or Women’s locker rooms.

Water closet in Women’s Restroom – The flush control is on the wrong side.

Showers; (PRIORITY MEDIUM)

There is a semi-accessible transfer shower with a seat but no accessible shower head or grab bars.

The door to the Staff Lounge has only 10 ¾” on the pull side of the door. (PRIORITY LOW)

Kitchen:

The kitchen counter is 36” high and has cabinets underneath that prevent full knee clearance. (PRIORITY LOW)

PRIORITY MEDIUM

COST: \$8,200

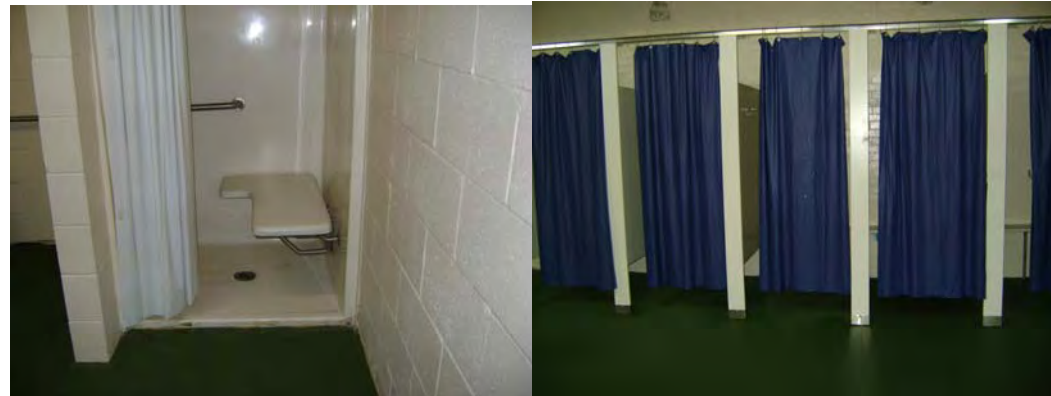

PRIORITY LOW

COST: \$ 4,920

RECOMMENDATIONS:

Alter one shower in each locker room to provide full access for a person in a wheelchair. Alter counters in common use areas to ensure they do not exceed 34” height. Install a fully compliant restroom stall in each locker room.

RECOMMENDATIONS:

Ensure at least one dressing room, with an accessible bench, is provided in each locker room.

CITY OF TULSA – PARKS REPORT

PARK NAME:	Mohawk Park	
AMENITIES OFFERED:	1 play ground 1 sports field 1 water play area 6 picnic shelters 106 picnic tables	2 Restrooms Buildings 2 Concession Buildings 1 Disk Golf Course
NUMBER OF PARKING SPACES:	1503 total spaces -	
TOTAL ESTIMATED COSTS:	\$ 200,256 - \$275,720	
GENERAL NOTES:	<p>This park is part of a larger system that includes the Zoo and a Nature Center. Each of those are captured on their own report. This report is for the areas known as Mohawk Park alone.</p> <p>Each picnic shelter has it's own parking lot, most of which have no striping or designated accessible parking spaces. Each one is reported separately. We recommend ALL of the picnic shelters are brought into compliance, however not all are required. We are concentrating this report to bring Shelters # 2 and #3 into compliance and the rest to be put on a longer term plan. Once these comply, it needs to be advertised so people know where the compliant shelters are.</p> <p>An accessible route does not have to be concrete. This is a large park and how the areas that need surfacing are done will change costs considerably. Crushed granite with a bonding agent will be acceptable and other acceptable exterior surfaces can be found in the document attached to these reports.</p>	
NUMBER OF ACCESSIBLE PARKING SPACES	Because there are several parking lots each one is evaluated under the section it belongs.	
<p>SHELTER #1</p> <p>There is no striping on the parking lot serving this shelter.</p> <p>The entry to the shelter has broken concrete and level changes that prevent a fully compliant entry. None of the picnic tables are accessible.</p> <p>PRIORITY HIGH COST: \$ 9,420</p>		<p>RECOMMENDATION:</p> <p>Ensure at least one accessible parking space is provided with an access aisle that leads to the shelter entrance.</p> <p>Replace the entry to the shelter to remove level changes and broken concrete and provide a smooth transition into the shelter.</p>

CITY OF TULSA – PARKS REPORT

SHELTER #2

There are two parking lots that serve this shelter, one is gravel and the other paved but neither of them have accessible parking spaces or an accessible route to the shelter entrance.

If all six shelters will not be made accessible, then the ones that are concentrated on should be those with restrooms and/or other close amenities served by them. That makes this one a higher priority.

No accessible picnic table is provided in the shelter.

RESTROOM BUILDING:

The restroom building does not have a fully compliant toilet room but it won't take much for it to be compliant.

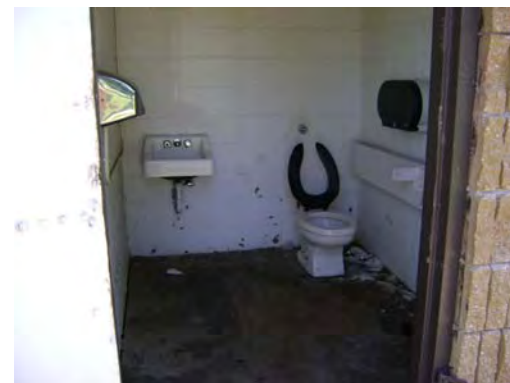

The following items need to be resolved:

Lavatory – Sink needs to be raised to a maximum of 34" with at least 27" knee clearance. Pipes need to be wrapped, faucets require grasping and twisting.

Water closet – No grab bars are installed. The seat is 16" off.

PRIORITY HIGH

COST: \$ 28,945

RECOMMENDATIONS:

- #1. Ensure EACH parking lot has at least one fully compliant accessible parking space that leads to an accessible route to the shelter and restroom building.
- #2. Replace either the lavatory with a completely new lavatory, mounted at the right height with compliant faucets and wrapped pipes OR raise this one and replace the features to make it fully compliant.
- #3. Replace the water closet with one that is 17" to 19" off OR put on an alternate seat that brings the seat height to between 17" and 19". Install compliant grab bars in toilet room.
- #4. Ensure at least one of the picnic tables is an accessible table with room for a person in a wheelchair to pull up underneath and join the family.

There are a number of barbeque grills, benches and picnic tables throughout the park. If ALL are not going to be made accessible, ensure a minimum of 5% of them are accessible and they are distributed throughout the park, serving different amenities and views.

PRIORITY MEDIUM

COST: \$11,750 – \$26,550

RECOMMENDATION:

Ensure all amenities have some locations with accessible routes leading to them. An accessible route does not have to be concrete, but does have to be firm, stable and slip

resistant ... see General Notes on page 1.

CITY OF TULSA – PARKS REPORT

Fishing piers are provided but located up a series of stairs. There is no accessible route to the reservoir.

PRIORITY MEDIUM
COST: \$19,700 - \$38,730

RECOMMENDATION:

Install accessible spaces at the top of this reservoir and signage at the bottom indicating that accessible parking is provided at the top, and how to get there. This is MUCH less expensive than trying to install some kind of accessible route. Ensure an accessible route is provided from the accessible parking to a fishing pier.

SHELTER #3

This shelter has no accessible parking serving it, but is one of the easiest ones to make accessible so access should be concentrated here as a priority.

Water is standing on the accessible route to the shelter.

There are no accessible picnic tables provided.

PRIORITY: HIGH
COSTS: \$ 9,300

RECOMMENDATIONS:

Install at least one fully compliant accessible parking space to serve this shelter. It is required to have an access aisle that leads to an accessible route to the shelter entrance.

Build the path of travel up or install drainage so water doesn't stand on the accessible route.

Install at least one accessible picnic table.

CITY OF TULSA – PARKS REPORT

SHELTERS #4 THROUGH #6

No accessible parking is provided at any of these shelters.
 No accessible route is provided.
 No accessible picnic tables are provided.

PRIORITY LOW
COSTS: \$19,205

RECOMMENDATIONS:

Access needs to be provided at all amenities offered by the park. There are six shelters and we recommend access be provided to shelters #2 and #3 first. Once that is done, making access to the other four shelters can be part of a longer term plan for Tulsa.

Costs for shelters #1 and #4 - #6 are noted as a lower priority at this point. Once #2 and #3 are compliant, their status will elevate accordingly.

PLAYGROUNDS AND TRAILS:

There are several play areas, from jungle gyms to full playgrounds. Because they are all so different, all should be fully compliant.

The jungle gym near Shelter #2 had no access to it. The grass path would be okay but it's full of valleys and pits which were evident because it had just rained.

The playground (lower picture on the right) has level changes to get into the play equipment.

PRIORITY HIGH
TOTAL ESTIMATED COST: \$14,866 to \$32,580

RECOMMENDATIONS:

Once again, not all of the exterior routes have to be concrete. Refer to the exterior surfaces document included in these reports for exterior routes, especially in parks where there are a lot of trails.

Treat the ground to establish firmness, or resurface a path of travel leading to the jungle gym.

Install fully compliant ramps leading from the edge of the playground into the play area. Ensure the bottom of them are fully submerged in the surface material so there is no level change at the end.

CITY OF TULSA – PARKS REPORT

TRAILS:

PRIORITY HIGH

TOTAL ESTIMATED COST: \$ 48,620 to \$72,540

RECOMMENDATION:

The federal government has a document in process regarding outdoor developed areas. It is currently in draft form but is not enforceable. We recommend keeping an eye on the development of this document.

In the meantime, existing trails should be maintained so the surfaces are without level changes or pits and the surface is firm, stable and slip resistant (not loose gravel).

JIM PIELSTICKER PLAYGROUND:

This is the major playground for the Mohawk park and all attempts to provide full access should be taken.

1. The accessible parking itself is compliant but the path of travel from the accessible parking to the main entry to the park requires travel in a vehicular route.
2. A ramp is provided into the playground area but it has a significant level change at the bottom and it is a liability problem. This is a HIGH priority for resolution
3. The emergency call box has no accessible route to it. Since these are for emergencies, they should be compliant. (photo next page).
4. The path of travel to the fishing area has only loose gravel on it's surface.

PRIORITY HIGH

TOTAL ESTIMATED COST: \$ 38,450

RECOMMENDATION:

1. Install a path of travel in front of the accessible parking spaces that leads to the main entry route so people using the accessible parking spaces do not have to travel in a vehicular path.
2. The ramp leading into the playground area must be replaced or altered to get rid of the level changes. This is a huge liability issue. Ensure the path delivers the user safely and smoothly into the playground area.
3. Ensure the emergency call stations around the park have an accessible path of travel to them and a clear and level landing area around them so they can be used by people using mobility aides.

CITY OF TULSA – PARKS REPORT

RECOMMENDATION:

The path of travel to the fishing area should be resurfaced with a compliant product. See General Notes for surface types and documentation.

CITY OF TULSA – PARKS REPORT

PARK NAME:	Reed Park	
AMENITIES OFFERED:	2 Play Ground 1 Sports Fields 1 Lighted Field 2 Tennis Courts 1 Water Play Area 1 Municipal Pool 1 Rec Center	0.41 Miles of Trail 1 Outdoor Basketball Court 1 Indoor Gym 9 Picnic Tables 1 Restrooms Disk Golf Course
NUMBER OF PARKING SPACES:	196 total spaces -	
NUMBER OF ACCESSIBLE PARKING SPACES	0 – Compliant 5 – Attempted* 6 - Required *PLEASE NOTE – There are five accessible parking spaces with access aisles. However, there are no curb ramps without traveling in the vehicular path of travel.	
TOTAL ESTIMATED COST:	\$108,270	
GENERAL NOTES:	Because all of the amenities share the same parking lot, the parking should be adequately distributed. We recommend placing one or two spaces to serve the ball fields and tennis court area. The path of travel is not in very good shape and needs a lot of repair.	
<p>The accessible parking spaces in front of the Rec building do not fully comply because there is no path of travel without going in a vehicular route.</p> <p>Six accessible spaces are required and should be distributed to serve all amenities.</p> <p>PRIORITY HIGH</p> <p>COST: \$9,300</p>		<p>RECOMMENDATION:</p> <p>Install three or four fully compliant spaces with a compliant path of travel to the Rec Center entrance and then the other two or three over to serve the other amenities. This would provide some distribution and serve all amenities.</p>

CITY OF TULSA – PARKS REPORT

The path of travel to the lower playground has a level change to get into the play area.

The path of travel to the upper playground is not compliant. There's no route up to it, but more importantly it's narrow and dangerous. This is something that should be resolved as the highest priority because it's a liability issue. It also has the level change issue to get into the play area, same as the lower one.

PRIORITY HIGH (VERY HIGH)

COST: \$ 16,850

RECOMMENDATIONS:

Lower Playground:

A ramp of some sort needs to be installed to provide access to the play equipment. Currently there is only a path of travel to the edge of the play area.

Higher Playground:

We recommend filling this in or tearing it out. An alternate accessible path can be provided to resolve the access issues, but it won't resolve the liability problem. A ramp also needs to be provided into the play area, as noted above.

REC CENTER

The main counter at the Rec Center is acceptable.

The door to the Parent's Lounge is only 29" wide. (PRIORITY MEDIUM)

The stage in the Rec Center has no access to it. (PRIORITY MEDIUM)

Kitchen:

The kitchen counter is 36" high and has cabinets underneath that prevent full knee clearance. (PRIORITY LOW)

Men's and Women's Locker Rooms:

The restroom elements are substantially compliant. The showers in both locker rooms have access features but are not compliant sizes. If this locker room is altered, they should be made fully compliant. However, this is a lower

RECOMMENDATIONS:

Parent's Lounge: This door needs to be widened to a minimum of 32" clear width.

Stage: An accessible route needs to be provided to the stage, if this stage is used for any type of community activity.

Kitchen and Art Room Sinks: If these sinks are used by the community, they are required to be compliant. Compliance means the counters are 34" high with knee clearance under the sink.

CITY OF TULSA – PARKS REPORT

<p>priority. (PRIORITY LOW)</p> <p><u>Art Class:</u></p> <p>The counter in the Art Class is 36” high and the sink has cabinets preventing full knee clearance. (PRIORITY LOW)</p> <p>PRIORITY MEDIUM COST: \$6,900</p> <p>PRIORITY LOW COST: \$ 11,520</p>	<p>RECOMMENDATIONS (CON’T):</p> <p><u>Men’s and Women’s Locker Rooms:</u> The showers in the locker rooms are 40” by 58” with the narrow end open. This does not comply with any access standard. However, it is a lower priority because it does have some accessible features and is usable by some. We recommend investing in a couple sturdy shower chairs in case they are needed. If these rooms are altered, or a complaint is taken, the showers should be brought into full compliance.</p>
<p>POOL AND POOL BUILDING</p> <p>The path of travel to the pool has broken concrete and a level change to get into the building. (PRIORITY HIGH)</p> <p><u>Mens’s and Women’s Restrooms</u> (PRIORITY MEDIUM)</p> <p>The women’s restroom has the water closet mounted with the center line at 27” from the wall.</p> <p>Lavatory – Pipes are not wrapped in either the men’s or women’s lavatory.</p> <p>Urinal in Men’s room is mounted at 21” high with a center line at 11 ½”.</p> <p><u>Showers:</u> (PRIORITY LOW)</p> <p>No compliant features are provided in the showers provided. Grab bars are installed, but they are not compliant for this size shower.</p> <p>PRIORITY HIGH COST: \$ 19,845</p> <p>PRIORITY MEDIUM COST: \$ 3,685</p> <p>PRIORITY LOW COST: \$ 1,888</p>	<div data-bbox="825 542 1264 873" data-label="Image"> </div> <div data-bbox="825 878 1163 1330" data-label="Image"> </div> <p>RECOMMENDATIONS:</p> <p><u>Path of Travel:</u> The path of travel to the pool should be altered for compliance. ADA requires an accessible route be maintained in an accessible condition. This is also a liability issue, which makes it a higher priority.</p> <p><u>Men and Women’s Restrooms:</u> Ensure each restroom has at least one fully accessible stall. Modifying the existing stalls may be difficult with the type of walls, so a separate compliant stall or single user restroom are other options. Costs will vary depending on resolution chosen. Costs figured are an average.</p> <p>Showers: Ensure each shower room has at least one accessible shower stall. This can be either a 36” by 36” transfer style shower or a 30” min by 60” min roll in shower.</p>

CITY OF TULSA – PARKS REPORT

TENNIS COURTS, BALL FIELDS AND EXTERIOR AMENITIES:

Picnic Tables:

There are several picnic tables around the site and all are noted on elevated concrete slabs with level changes.

Tennis and Basketball Courts:

The paths of travel to the tennis and basketball courts is gravel with pits and level changes.

Baseball Diamond

The gravel path noted above also leads to the baseball diamonds, but it requires crossing a bridge with a significant level change caused by wearing away of the soil in front of it. There is a separate parking lot on the baseball diamond side, with no compliant parking, but the path from the Rec Center seems to be utilized by most.

PRIORITY HIGH

COSTS: \$38,282

RECOMMENDATIONS:

Ensure a minimum of 5% of the picnic tables have accessible routes to them and accessible seating at them.

Resurface the path of travel to the tennis and basketball courts. Ensure pits are filled and level changes are mitigated. Costs were figured using a RAP material with bonding agent and can increase significantly depending on surface material chosen.

RECOMMENDATIONS:

Resurface the path of travel to the baseball diamonds. Ensure pits are filled and level changes are mitigated. Costs were figured using a RAP material with bonding agent and can increase significantly depending on surface material chosen.

CITY OF TULSA – PARKS REPORT

PARK NAME:	VETERANS PARK
AMENITIES OFFERED:	1 play ground 1 Restroom Building 2 sports fields 1 Memorial 2 water play area 6 picnic tables 1 picnic shelter
NUMBER OF PARKING SPACES:	44 total spaces - One with H/C symbol painted on it, but no compliant signage, no access aisle and no path of travel from the space to
TOTAL ESTIMATED COSTS:	\$ 36,560
GENERAL NOTES:	This park has a memorial to veterans, many of whom are disabled. The ramps serving this memorial have egregious slopes that are both non-compliant and dangerous. This should be among the first things altered by the City.
NUMBER OF ACCESSIBLE PARKING SPACES	0 – Compliant 1 – Attempted 2 - Required
<p>This accessible parking space is not compliant. There is no compliant signage, no access aisle, no path of travel. There is only one space and two are required.</p> <p>PRIORITY HIGH COSTS: \$ 3,500</p>	<div style="text-align: center;">  </div> <p>RECOMMENDATION:</p> <p>Install two fully compliant spaces. Based on the configuration of this park, it would be best to provide one near the sidewalk leading to the amenities and one near the sidewalk leading over to the memorial.</p>

CITY OF TULSA – PARKS REPORT

This playground has an accessible route leading to it. However, the path into the playground area is dangerous because of the level changes. This should be resolved for liability purposes.

PRIORITY MEDIUM

COSTS: \$ 4,500

RECOMMENDATIONS:

Add material to bring the edge of the playground closer to the edge of the material and reduce the

The slopes of the ramps leading up to the memorial are excessively over any reasonable tolerance. They measure 26.8% and are not allowed to exceed 8.33%. These need to be replaced for compliance.

PRIORITY HIGH

COSTS: \$ 28,560

RECOMMENDATIONS:

Remove and reinstall ramps with slopes as gentle as possible and no slope over 8.33%. While only one accessible route is required, we recommend replacing both ramps because of the severe nature of the slopes in place. Costs provided are for replacement of both ramps.

CITY OF TULSA – PARKS REPORT

PARK NAME:	Whiteside Park	
AMENITIES OFFERED:	1 Play Ground 6 Sports Fields 2 Lighted Tennis Courts 1 Jr Pool 1 Rec Center	1 Miles of Trail 1 Indoor Gym 1 Picnic Shelter 7 Picnic Tables 1R Restrooms
NUMBER OF PARKING SPACES:	2 Lots 105 total spaces in rec center lot 55 total spaces serving playgrounds	
NUMBER OF ACCESSIBLE PARKING SPACES:	2 – Substantially compliant in playground lot, but only one has a sign 4 – Substantially compliant in rec center lot 6 - Required	
TOTAL ESTIMATED COST:	\$52,403 (\$62,976 is the cost alternative, if fixing up the rec center is decided)	
GENERAL NOTES:	<p>The striping is very light and difficult to see, but the spaces are substantially compliant. The accessible parking serving the playground has two compliant parking spaces but only one has the required signage.</p> <p>The recreation center was not operational. It was built in 1963 and no decision has been made on whether this building would be reopened or not.</p>	
<p>The accessible parking spaces in front of the playground area (smaller lot) has two accessible parking spaces but only one has a sign.</p> <p>PRIORITY HIGH</p> <p>COST: \$250</p>		<p>RECOMMENDATION:</p> <p>While not perfect, the accessible parking spaces are substantially compliant except for a sign required at one of the spaces over by the playgrounds (smaller lot).</p>

CITY OF TULSA – PARKS REPORT

RECREATIONAL BUILDING

The doors throughout the building have round knobs instead of levers.

The reception desk/info counter is 37 ½” high.

Neither the men’s or women’s restrooms have any access features. No accessible stalls are provided.

The men’s and women’s restrooms (front) only have 2 ¼” on the pull side of the door.

Room A has a sink in it. The counter is 39” high with cabinets under the sink.

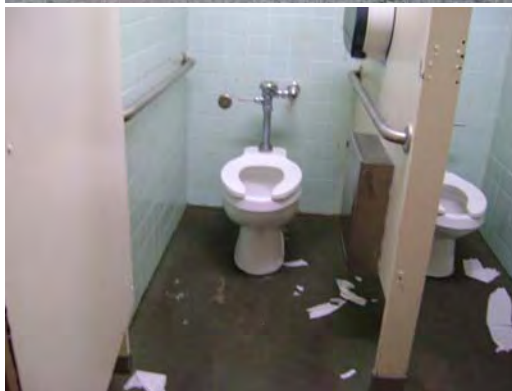

The women’s shower room has a 60” by 34” shower that is large enough for access features, but non are installed.

The men’s shower room does not have an accessible shower at all.

Only one exterior drinking fountain is provided. Where there is one there is supposed to be two, one for people in wheelchairs and one for people who have trouble bending or stooping.

PRIORITY DEPENDSON IF THIS BUILDING WILL BE USED OR NOT. CURRENTLY THERE IS A DECISION TO BE MADE ON THE FUTURE OF THIS BUILDING

COST: \$ 62,976 (If building is reopened to the public)

RECOMMENDATION:

If this building will be kept for public use;

Replace all door knobs with lever hardware

Ensure all information counters/reception desks are fully compliant

Ensure each restroom has one fully compliant 6’ wide stall. If this is not possible because of the wall construction, ensure there is a fully compliant unisex restroom.

In common use areas where sinks are provided, ensure the sink is in a counter that does not exceed 34” aff and has full knee clearance.

Both the men’s and women’s shower rooms need to have fully compliant showers installed.

Where drinking fountains are provided there needs to be two, one shall not exceed 36” aff and the other at standard heights (between 38” and 43” aff.

CITY OF TULSA – PARKS REPORT

POOL AND POOL BUILDING

The door to the pool area is only 28" wide. A minimum of 32" clear width is required. (PRIORITY HIGH)

Mens's and Women's Restrooms

The men's and women's restrooms do not have accessible stalls, the stall width is only 35 ½". An accessible stall is required to be 60" minimum. (PRIORITY MEDIUM)

Lavatory – Pipes are not wrapped in either the men's or women's lavatory. The lavatories also have push faucets that do not stay on a minimum of 10 seconds. (PRIORITY LOW)

Urinal in Men's room is mounted at 24" high in a 57" deep alcove that is only 28 ½" wide. The urinal is required to be no higher than 17" and the alcove must be at least 36" wide. (PRIORITY MEDIUM)

The hand dryers protrude into the path of travel. (PRIORITY LOW)

Mirrors in the men's and women's rooms are mounted too hi, at 48" (men's) and 43" (women's) respectfully.

PRIORITY HIGH

COST: \$ 1,200

PRIORITY MEDIUM

COST: \$ 13,750

PRIORITY LOW

COST: \$ 1,100

RECOMMENDATIONS:

Men and Women's Restrooms: Ensure each restroom has at least one fully accessible stall. Modifying the existing stalls may be difficult with the type of walls, so a separate compliant stall or single user restroom are other options. Costs will vary depending on resolution chosen. Costs figured are an average.

The hand dryers either need to be moved out of the circulation path or a smaller dryer needs to replace them.

CITY OF TULSA – PARKS REPORT

TENNIS COURTS, SAND VOLLEYBALL, PLAYGROUNDS AND EXTERIOR AMENITIES:

Exterior Benches:

There are several picnic tables around the site and all are noted on concrete slabs with elevation changes.

Tennis, Basketball Courts and Ball Fields:

The path of travel to the tennis and basketball courts is gravel with pits and level changes. The path to the tennis courts has a slope up to 14.4%.

Playground:

Even where there is a path of travel into a play area, there is a level change at the bottom of it.

PRIORITY HIGH

COSTS: \$19,853

RECOMMENDATIONS:

Ensure a minimum of 5% of the picnic tables have accessible routes to them and accessible seating at them.

Resurface the path of travel to the tennis and basketball courts. Ensure pits are filled and level changes are mitigated. Costs will vary depending on surfacing used. A bonding agent and can increase durability and reduce maintenance.

Where ramps are provided, or anywhere the surfaces change, ensure there is no more than 1/4" level change (1/2" if there is a 1:2 bevel). This is both a violation of ADA accessible route requirements and a liability issue.

CITY OF TULSA – PARKS REPORT

TENNIS COURTS:

There are currently two doors into the tennis courts. One has a curb in front of it with a significant level change and the other has a 14.4% slope leading to it. Neither are accessible and the 14.4% slope is a potential danger.

Although only one of the doors has to be altered for compliance, and it's more cost effective to alter the one with the level change, that ramp should not be left as is. It should be removed or altered for compliance.

PRIORITY HIGH

COST: \$16,250

One of the two doors to the tennis courts need to be accessible. The path between the courts can be inside the court area. An accessible route has to be provided and the end with the level change (pictured top) seems to be the most cost effective to alter. However we recommend altering the more expensive side to remove the liability issue. So costs are figured for that.

Item No.	Item Description	Quantity	Unit	Unit Price	Item Cost
1	CONCRETE SIDEWALK (SD-1)	2	SY	\$ 80.00	\$ 160.00
2	SIDEWALK REMOVAL (SD-1)	2	SY	\$ 10.00	\$ 20.00
3	SHEET ALUMINUM SIGNS	0	SF	\$ 20.00	\$ -

Basis for Cost

- No Design
- Preliminary Design
- Final Design

Subtotal:	\$	180.00
Engineering: (% +/-)	15%	\$ 51.43
Contingency: (% +/-)	20%	\$ 68.57
Estimated Project Cost:	\$	300.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Project Details

Issues (excludes arterial sidewalk network)	Issue Exists	Recommendations
Sidewalk route to stop is non-compliant		
Connection needed from arterial sidewalk network to curb		
No transit stop signage		
Running slope of sidewalk in front of stop is greater than 2.0%		
Cross slope of sidewalk in front of stop is greater than 2.0%		
Running slope of sidewalk route to lift lighting area is greater than 5.0%		
Running slope of lift lighting area is greater than 2.0%		
Lift lighting area is less than 96" x 60"		
Clear floor space next to stand-alone bench is non-compliant	X	Remove and replace clear floor space
Clear floor space completely under shelter is non-compliant

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	-	-	-	-	
Crosswalk cross slope is greater than 5%	-	-	-	-	
Crosswalk striping	No	No	No	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed							X		Install handicap ramp
Flare cross slope is greater than 10%	X		X		X				
Ramp running slope is greater than 8.33%	X		X		X				
Ramp cross slope is greater than 2%	X		X		X				Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X		X				Install colored truncated domes
No color contrast at base of ramp	X		X		X				
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X		X				Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"	X		X		X				Remove and replace pedestrian push button
Pedestrian pushbutton height is greater than 42"	X		X		X				Relocate pedestrian push button
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist	X		X		X		X		Install clear floor space
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to intersection geometry									
Ramp Priority:	H		H		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	-	Good	-	-	
Crosswalk cross slope is greater than 5%	-	-	-	-	
Crosswalk striping	No	Yes	Yes	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk			X						Install handicap ramp
Ramp does not exist and is needed					X	X	X		
Flare cross slope is greater than 10%	X				X	X	X		
Ramp running slope is greater than 8.33%	X				X	X	X		Remove and replace ramp
Ramp cross slope is greater than 2%	X				X	X	X		
Ramp width is less than 36"									
Obstruction present in ramp or landing area					X				
No textured surface at base of ramp					X				Install colored truncated domes
No color contrast at base of ramp					X				
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X				X	X			Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"	X		X		X				Remove and replace pedestrian push button
Pedestrian pushbutton height is greater than 42"	X		X		X				Relocate pedestrian push button
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist	X	X			X	X			Install clear floor space
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp					X				Regrade roadway
Ramp not needed due to intersection geometry

Estimated Project Cost:	\$	34,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	-	-	-	-	
Crosswalk cross slope is greater than 5%	-	-	-	-	
Crosswalk striping	Yes	Yes	Yes	Yes	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Remove and replace crosswalk pavement markings
No 48" extension into crosswalk	X								
Ramp does not exist and is needed									Remove and replace ramp
Flare cross slope is greater than 10%	X		X	X	X				
Ramp running slope is greater than 8.33%	X		X	X	X			X	
Ramp cross slope is greater than 2%					X				
Ramp width is less than 36"									Install colored truncated domes
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X	X	X				Install landing area
No color contrast at base of ramp	X		X	X	X				
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X	X	X			X	Remove and replace pedestrian push button
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"	X		X	X	X			X	Relocate pedestrian push button
Pedestrian pushbutton height is greater than 42"	X		X	X	X			X	
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									Install clear floor space
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist	X		X	X				X	
Ramp transition onto roadway is greater than 0.25"	X				X				Regrade roadway
Ponding occurs at base of ramp								X	
Ramp not needed due to intersection geometry									
Ramp Priority:	H		H	H	H			M

Estimated Project Cost:	\$	19,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

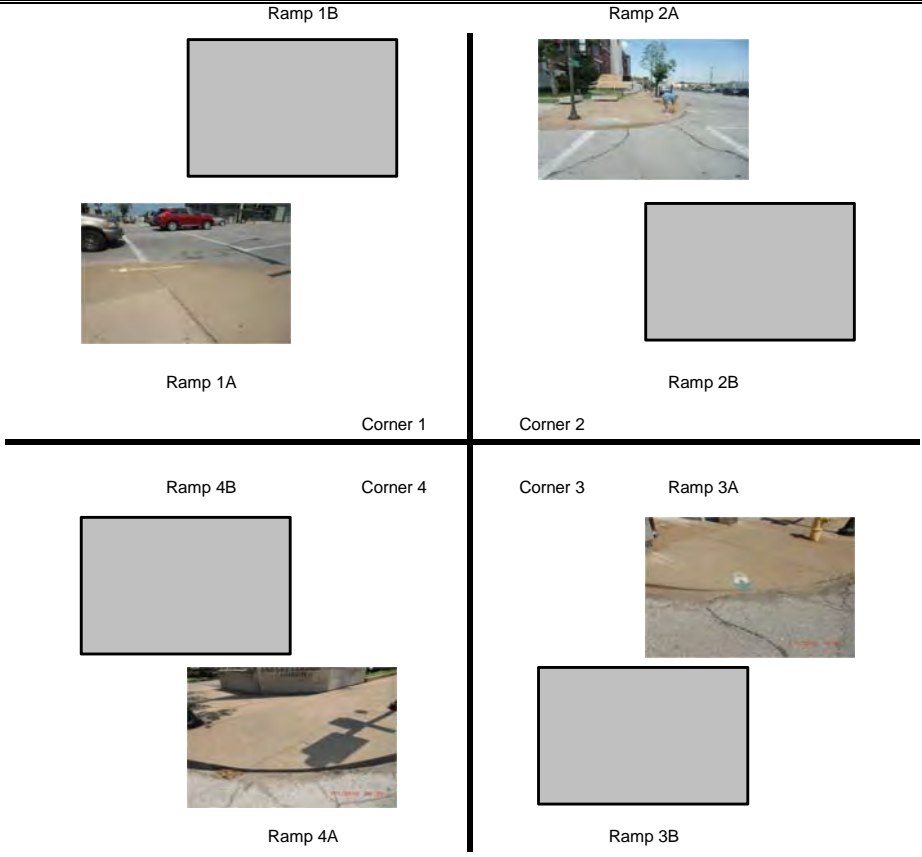

Project Location

Estimated Project Cost:	\$	18,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	-	-	-	-	
Crosswalk cross slope is greater than 5%	-	-	-	-	
Crosswalk striping	Yes	Yes	Yes	Yes	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X		X						Install handicap ramp
Flare cross slope is greater than 10%					X	X	X	X	
Ramp running slope is greater than 8.33%					X	X	X	X	
Ramp cross slope is greater than 2%					X	X	X	X	Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area					X				
No textured surface at base of ramp					X	X	X	X	Install colored truncated domes
No color contrast at base of ramp					X	X	X	X	
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist					X				Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to intersection geometry									
Ramp Priority:	H		H		H		H	H

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X						
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%	X						X		Remove and replace ramp
Ramp width is less than 36"			X						
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist					X				Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"			X						Regrade roadway
Ponding occurs at base of ramp							X		
Ramp not needed due to intersection geometry									
Ramp Priority:	H		H		M		L

Contingency: (% +/-)	20%	\$ 1,853.60
Estimated Project Cost:	\$	12,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	-	N/A	N/A	N/A	
Crosswalk cross slope is greater than 5%	-	N/A	N/A	N/A	
Crosswalk striping	Yes	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X						
Ramp running slope is greater than 8.33%	X		X						
Ramp cross slope is greater than 2%									Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area			X						
No textured surface at base of ramp	X		X						Install colored truncated domes
No color contrast at base of ramp	X		X						
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"	X								Remove and replace pedestrian push button
Pedestrian pushbutton height is greater than 42"	X		X						Relocate pedestrian push button
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist	X		X						Install clear floor space
Ramp transition onto roadway is greater than 0.25"	X		X						Regrade roadway
Ponding occurs at base of ramp	X		X						
Ramp not needed due to intersection geometry									
Ramp Priority:	H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Estimated Project Cost:	\$	31,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

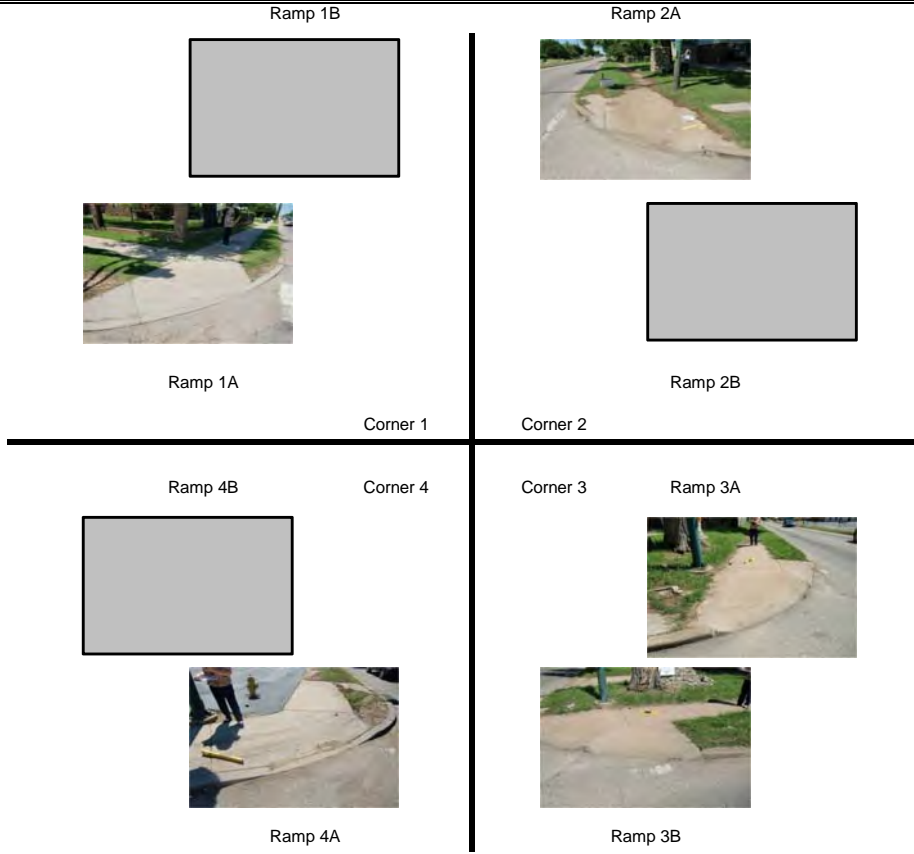

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	-	Good	-	
Crosswalk cross slope is greater than 5%	-	-	-	-	
Crosswalk striping	Worn	Worn	Worn	Worn	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Remove and replace crosswalk pavement markings
No 48" extension into crosswalk			X	X					
Ramp does not exist and is needed			X				X		Remove and replace ramp
Flare cross slope is greater than 10%			X				X		
Ramp running slope is greater than 8.33%	X				X		X		
Ramp cross slope is greater than 2%	X				X		X		
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X		X		X		Install colored truncated domes
No color contrast at base of ramp	X		X		X		X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X						X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"			X						Relocate pedestrian push button
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist	X		X				X		Install clear floor space
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to intersection geometry									
Ramp Priority:	H		H		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Estimated Project Cost:	\$	21,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

	Estimated Project Cost:	\$ 44,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

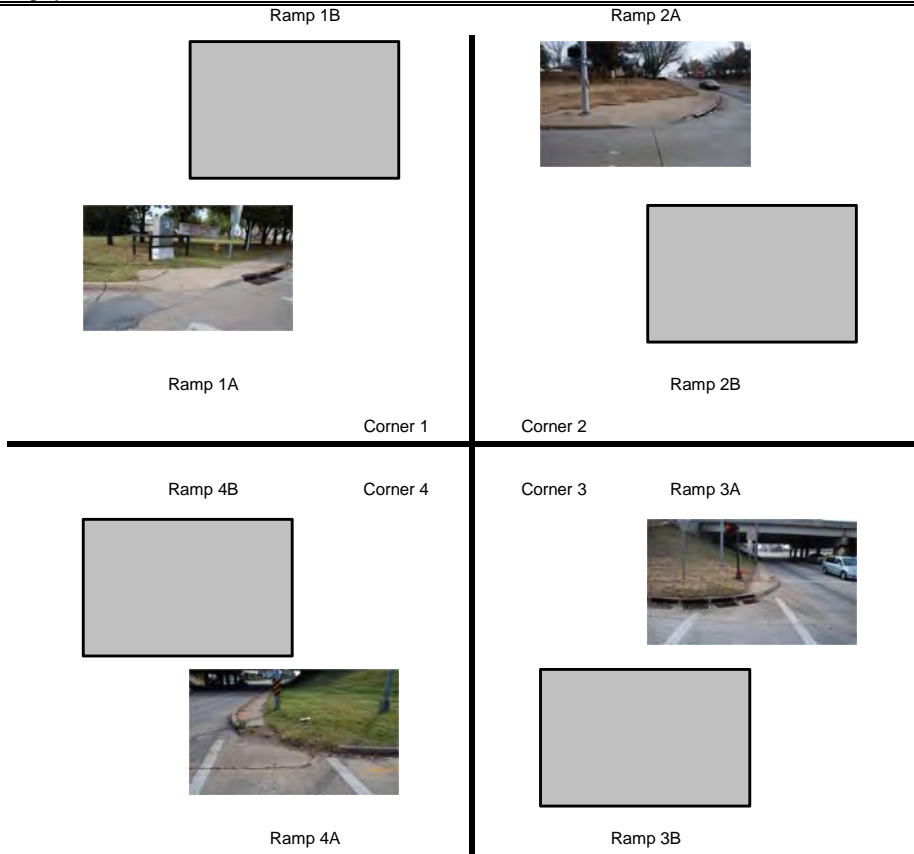

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Danger	Danger	Good	Good	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 5%	X	-	-	-	
Crosswalk striping	Worn	Worn	Worn	Worn	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Remove and replace crosswalk pavement markings
No 48" extension into crosswalk	X		X		X		X		
Ramp does not exist and is needed									Remove and replace ramp
Flare cross slope is greater than 10%								X	
Ramp running slope is greater than 8.33%									Install colored truncated domes
Ramp cross slope is greater than 2%	X		X		X				
Ramp width is less than 36"									Install landing area
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X		X		X		Remove and replace pedestrian push button
No color contrast at base of ramp	X		X		X		X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X		X		X		Relocate pedestrian push button
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"	X		X		X		X		Remove existing push buttons and install pedestal pole
Pedestrian pushbutton height is greater than 42"	X		X		X		X		
Pedestrian head offset is greater than 10' from the nearest crosswalk edge			X		X		X		Install clear floor space
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist			X		X		X		
Ramp transition onto roadway is greater than 0.25"									Install clear floor space
Ponding occurs at base of ramp									
Ramp not needed due to intersection geometry									
Ramp Priority:	H		H		H		H
