- Preliminary Design
- Final Design

Subtotal:	\$	21,252.80
Engineering: (% +/-)	15%	\$ 3,320.23
Contingency: (% +/-)	20%	\$ 4,426.97
Estimated Project Cost:	\$	29,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

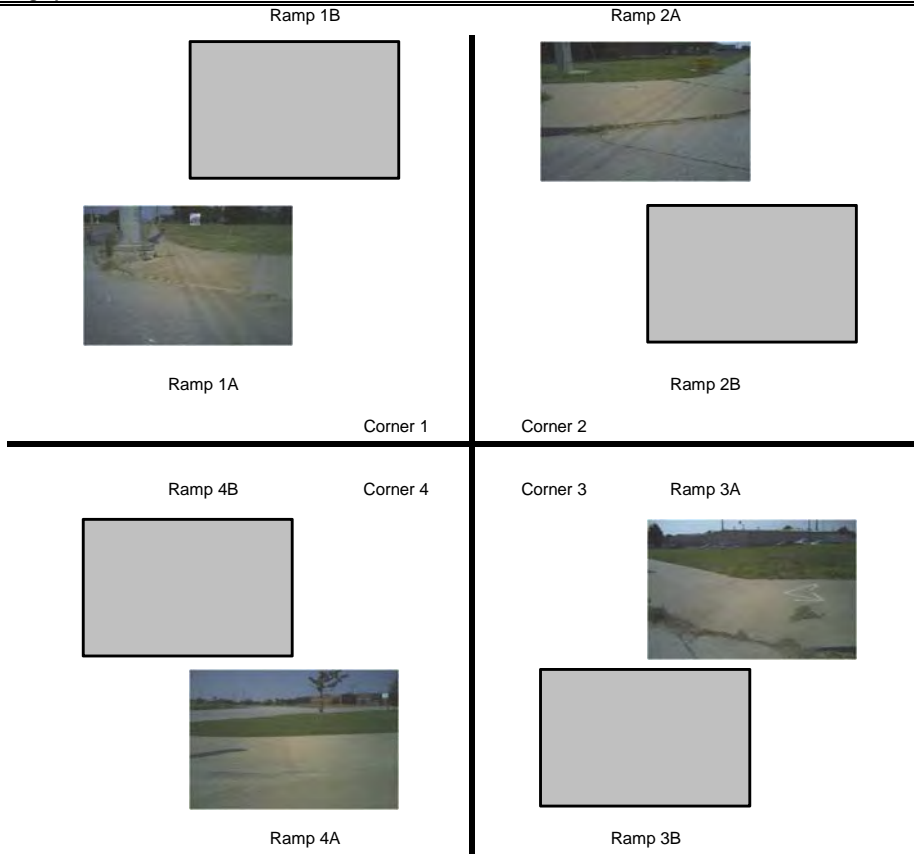

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	Good	N/A	
Crosswalk cross slope is greater than 2%	X	N/A	-	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk striping	No	N/A	No	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%	X		X		X				Remove and replace ramp
Ramp cross slope is greater than 2%			X				X		
Ramp width is less than 36"									
Obstruction present in ramp or landing area	X								
No textured surface at base of ramp	X		X		X		X		Install colored truncated domes
No color contrast at base of ramp	X		X		X		X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X		X		X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"	X		X		X		X		Regrade roadway
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H

Ramp does not land in crosswalk									Remove and replace ramp
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									Install colored truncated domes
Ramp running slope is greater than 8.33%	X		X						
Ramp cross slope is greater than 2%	X		X						
Ramp width is less than 36"									Install landing area
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X						
No color contrast at base of ramp	X		X						
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						
No pedestrian push buttons									Install landing area
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									Install landing area
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									Install landing area
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		-		-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

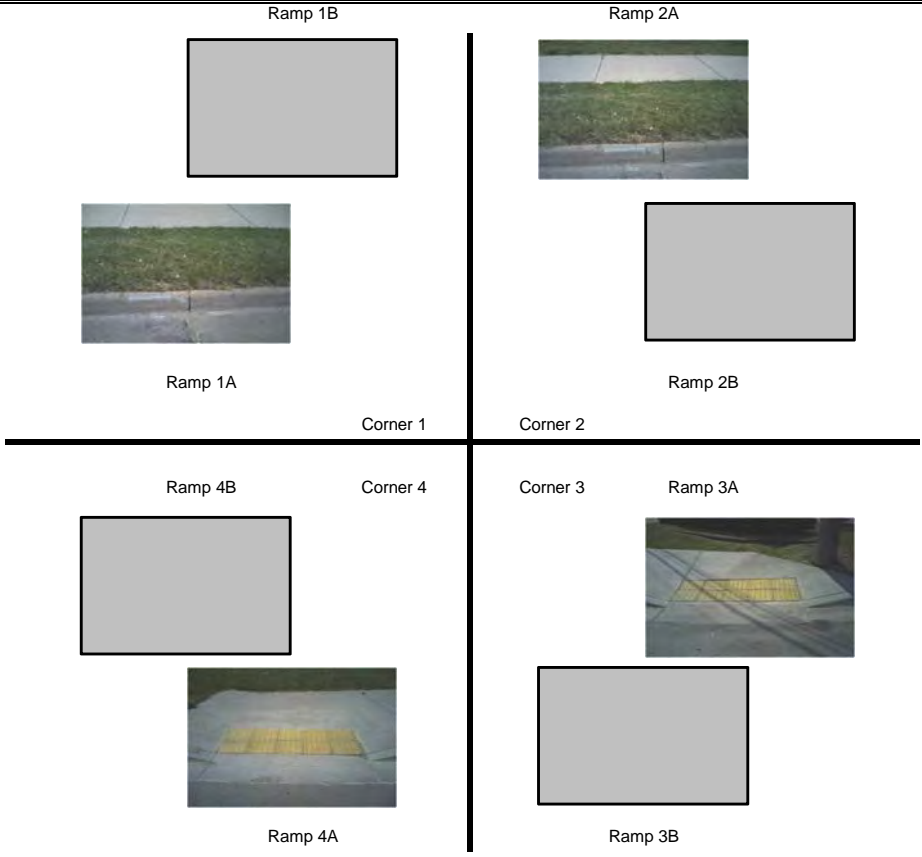

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	Poor	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	N/A	-	N/A	
Crosswalk striping	N/A	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%							X		Remove and replace ramp
Ramp cross slope is greater than 2%							X		
Ramp width is less than 36"							X		
Obstruction present in ramp or landing area							X		
No textured surface at base of ramp					X	X			Install colored truncated domes
No color contrast at base of ramp					X	X			
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist				X	X				Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"					X	X			Regrade roadway
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-	-	-	H	H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

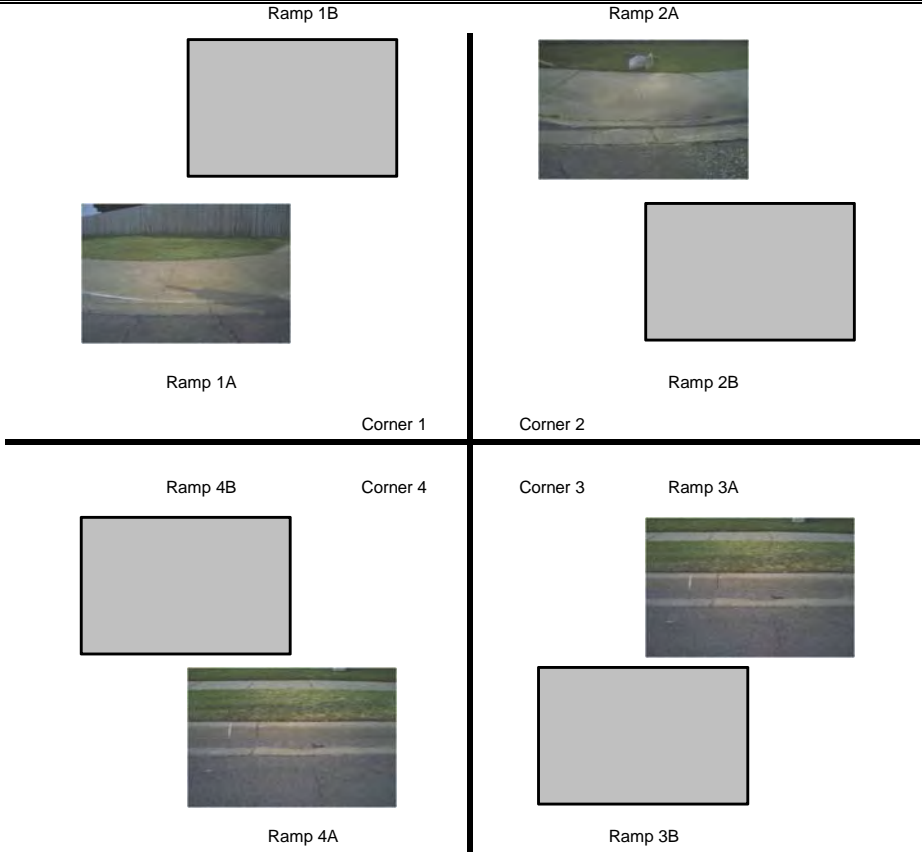

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	Good	N/A	
Crosswalk cross slope is greater than 2%	N/A	N/A	-	N/A	
Crosswalk striping	N/A	N/A	No	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%					X	X			Remove and replace ramp
Ramp cross slope is greater than 2%					X	X			
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist					X	X			Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-	-			H	H

Estimated Project Cost:	\$	14,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

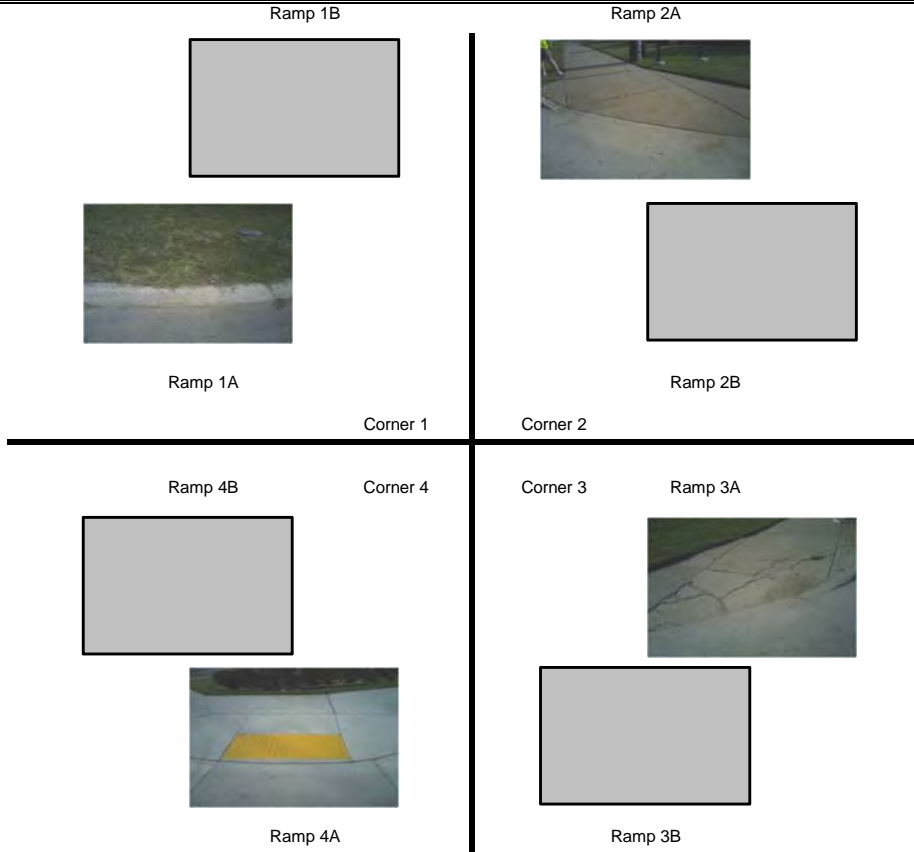

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	Poor	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	N/A	-	N/A	
Crosswalk striping	N/A	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed					X		X		Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2'									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-	-	-	-	H	-	H	-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

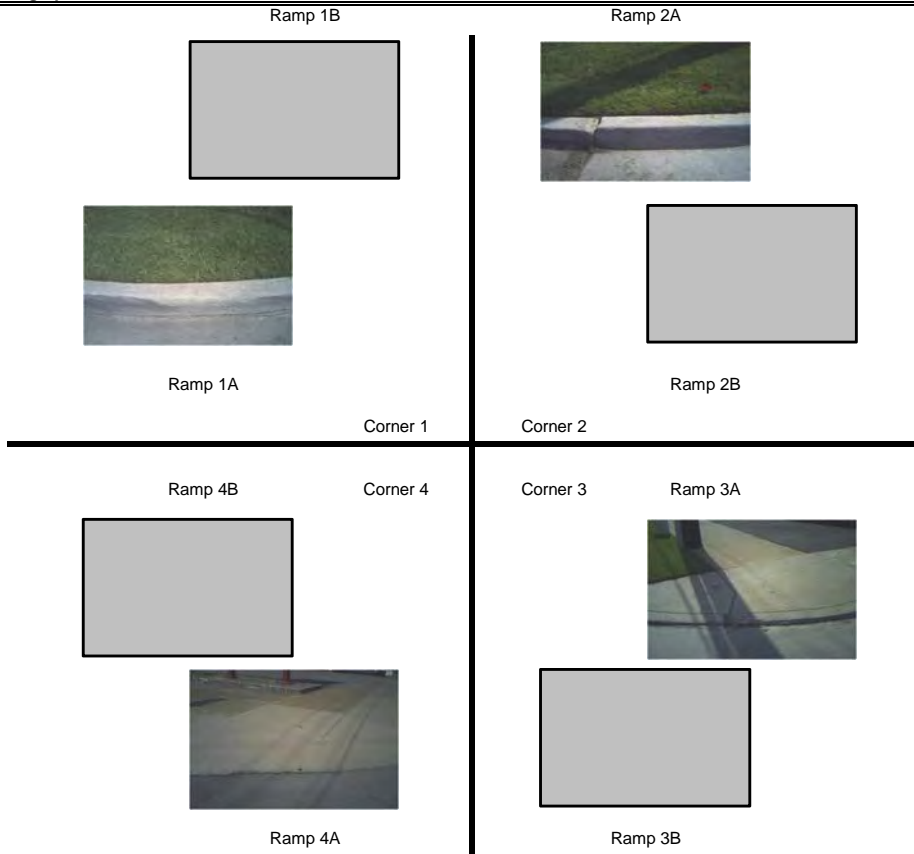

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	N/A	N/A	
Crosswalk cross slope is greater than 2%	-	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X						
Ramp running slope is greater than 8.33%	X								
Ramp cross slope is greater than 2%			X						Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X						Install colored truncated domes
No color contrast at base of ramp	X		X						
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		-		-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

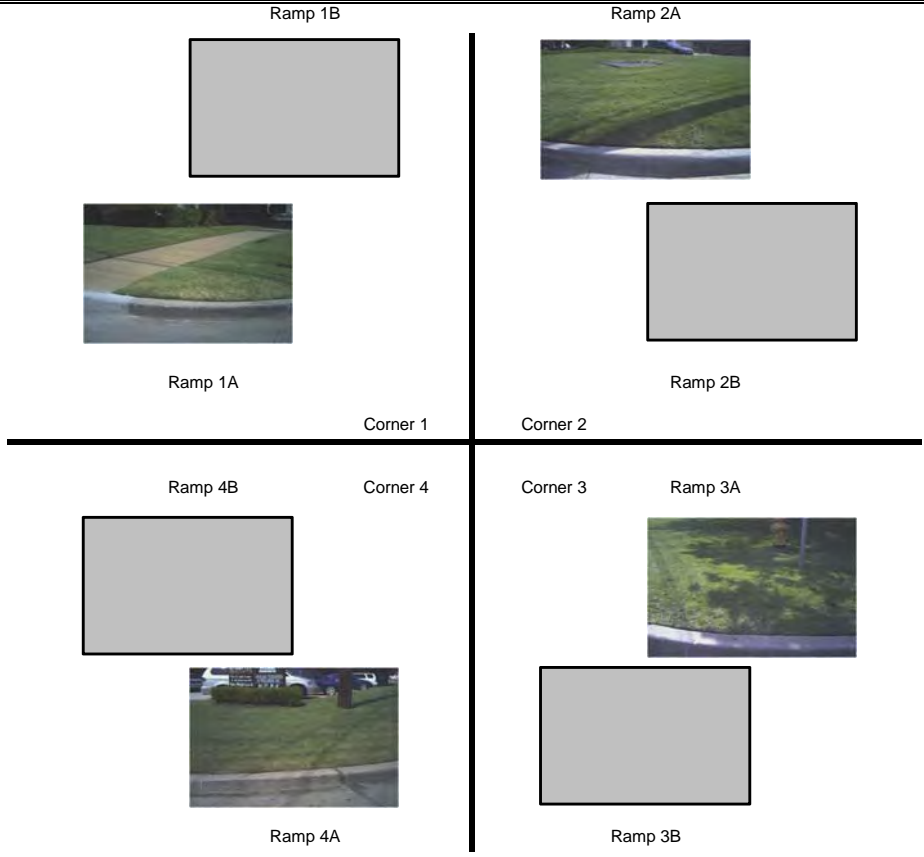

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	Poor	N/A	Repare roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	X	N/A	-	N/A	
Crosswalk striping	No	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Install handicap ramp
No 48" extension into crosswalk			X		X		X		
Ramp does not exist and is needed			X		X		X		
Flare cross slope is greater than 10%	X								Remove and replace ramp
Ramp running slope is greater than 8.33%	X								
Ramp cross slope is greater than 2%	X								
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									Install landing area
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X								
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp	X								
Ramp not needed due to existing geometry									Regrade roadway
Ramp Priority:	H		H		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

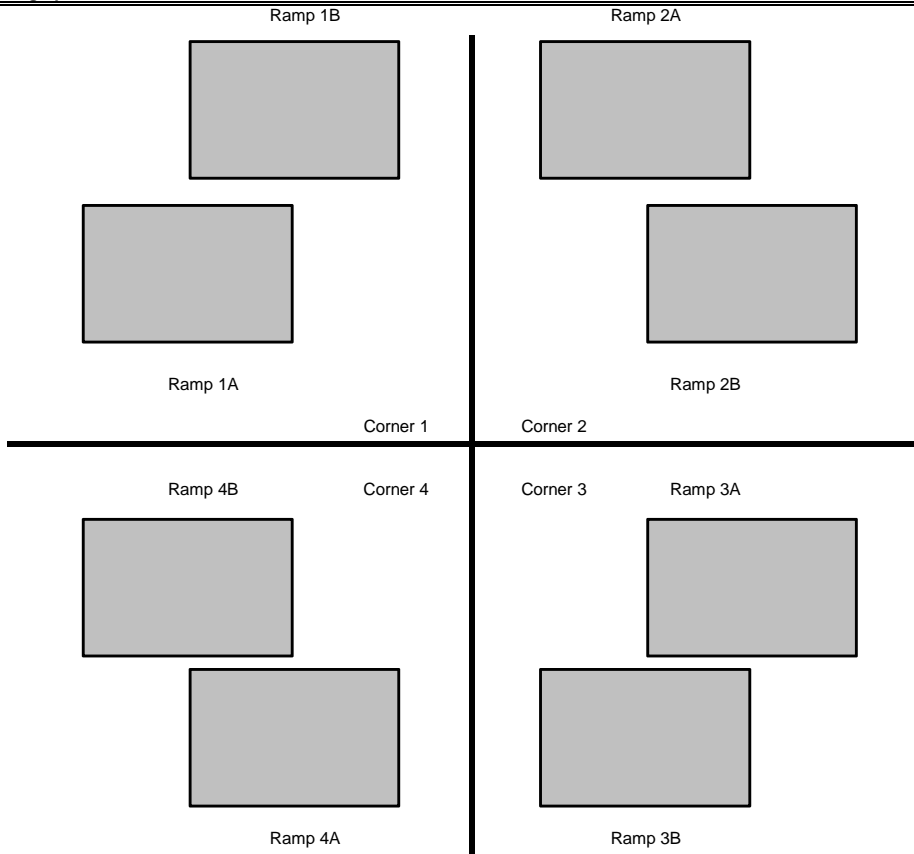

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	N/A	N/A	
Crosswalk cross slope is greater than 2%	X	N/A	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk striping	No	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X						
Ramp running slope is greater than 8.33%	X		X						
Ramp cross slope is greater than 2%									Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		-		-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	Poor	N/A	Repare roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	X	N/A	X	N/A	
Crosswalk striping	No	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Remove and replace ramp
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X		X		X		Remove and replace ramp
Ramp running slope is greater than 8.33%	X				X		X		
Ramp cross slope is greater than 2%	X		X				X		
Ramp width is less than 36"									Install colored truncated domes
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X		X		X		
No color contrast at base of ramp	X		X		X		X		Install landing area
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X		X		X		
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									Regrade roadway
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									Regrade roadway
Ramp transition onto roadway is greater than 0.25"			X				X		
Ponding occurs at base of ramp	X		X		X		X		
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H

Contingency: (% +/-)	20%	\$ 2,362.06
Estimated Project Cost:	\$	15,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

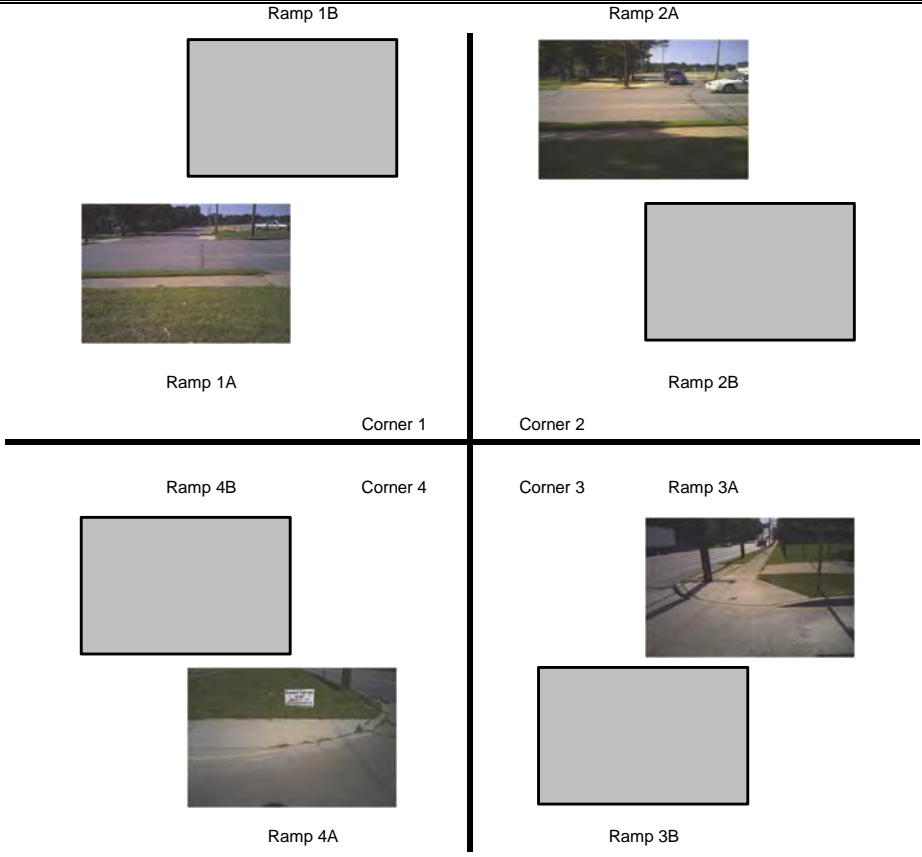

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	Poor	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	N/A	X	N/A	
Crosswalk striping	N/A	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Remove and replace ramp
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%				X		X			Remove and replace ramp
Ramp running slope is greater than 8.33%					X		X		
Ramp cross slope is greater than 2%					X		X		
Ramp width is less than 36"									Install colored truncated domes
Obstruction present in ramp or landing area					X		X		
No textured surface at base of ramp					X		X		
No color contrast at base of ramp					X		X		Install landing area
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist					X		X		
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									Install landing area
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									Install landing area
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									Install landing area
Ramp Priority:	-	-	-	H	H	H	H	H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

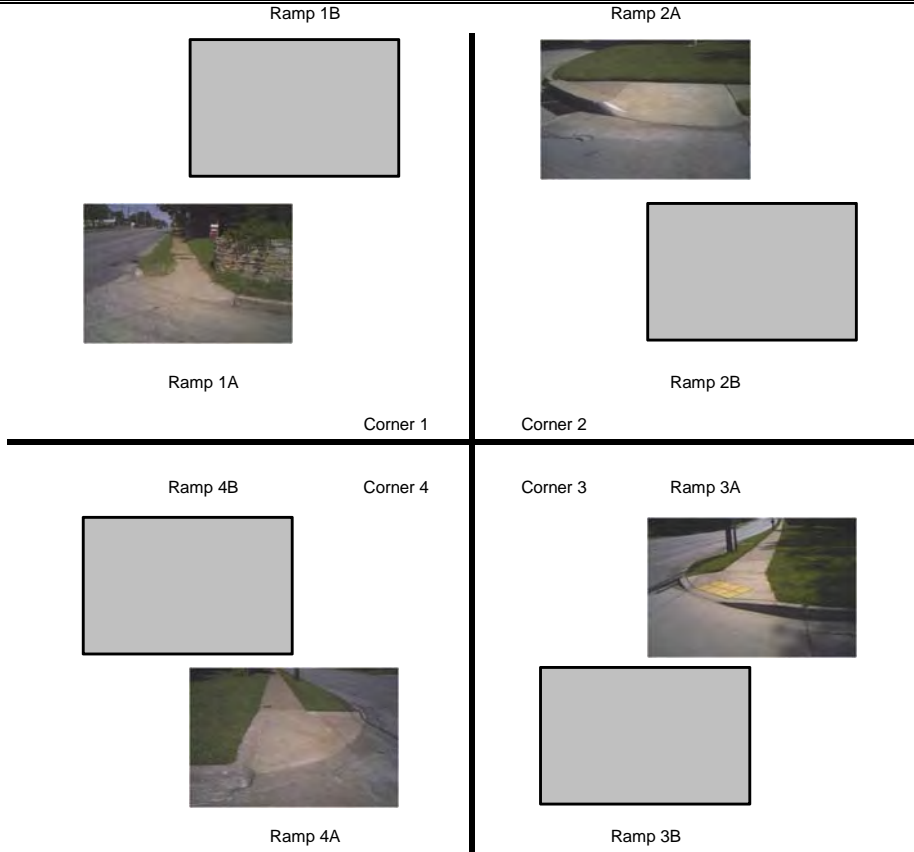

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	Poor	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	-	N/A	-	N/A	
Crosswalk striping	No	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X		X		X		
Ramp running slope is greater than 8.33%	X						X		
Ramp cross slope is greater than 2%	X		X						Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X		X		X		
No color contrast at base of ramp	X		X		X		X		Install colored truncated domes
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X		X		X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"					X				
Ponding occurs at base of ramp	X		X		X		X		Regrade roadway
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	Poor	N/A	Repare roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	X	N/A	-	N/A	
Crosswalk striping	No	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations	
	1A	1B	2A	2B	3A	3B	4A	4B		
Ramp does not land in crosswalk									Remove and replace ramp	
No 48" extension into crosswalk										
Ramp does not exist and is needed										
Flare cross slope is greater than 10%	X	X	X	X	X	X	X	X		
Ramp running slope is greater than 8.33%			X	X	X	X	X	X		
Ramp cross slope is greater than 2%	X	X	X	X	X	X	X	X		
Ramp width is less than 36"										
Obstruction present in ramp or landing area										
No textured surface at base of ramp	X	X	X	X	X	X	X	X		Install colored truncated domes
No color contrast at base of ramp	X	X	X	X	X	X	X	X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X	X	X	X	X	X	X	X	Install landing area	
No pedestrian push buttons										
Pedestrian pushbutton diameter is not 2"										
Pedestrian pushbutton height is greater than 42"										
Pedestrian head offset is greater than 10' from the nearest crosswalk edge										
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist										
Ramp transition onto roadway is greater than 0.25"	X	X	X	X	X	X	X	X	Regrade roadway	
Ponding occurs at base of ramp										
Ramp not needed due to existing geometry										
Ramp Priority:	H	H	H	H	H	H	H	H

Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X						Install colored truncated domes
No color contrast at base of ramp	X		X						Install colored truncated domes
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"			X						Regrade roadway
Ponding occurs at base of ramp	X		X						Regrade roadway
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

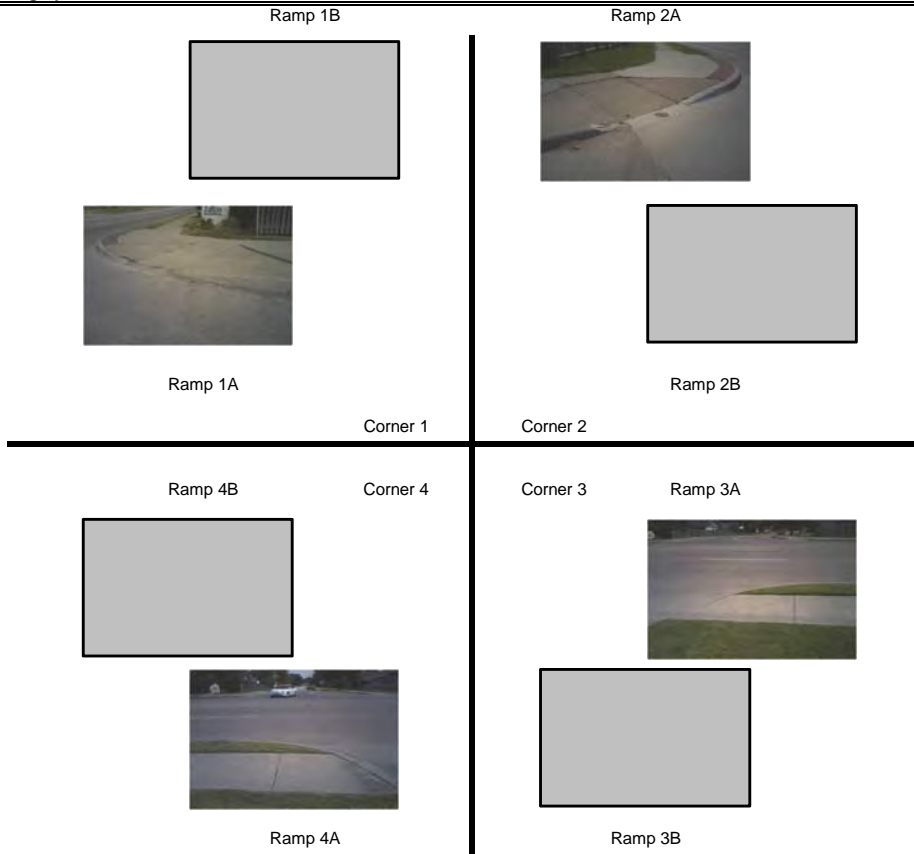

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	N/A	N/A	
Crosswalk cross slope is greater than 2%	-	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X		X						Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		-		-

Subtotal:	\$	12,126.40
Engineering: (% +/-)	15%	\$ 2,088.69
Contingency: (% +/-)	20%	\$ 2,784.91
Estimated Project Cost:	\$	17,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

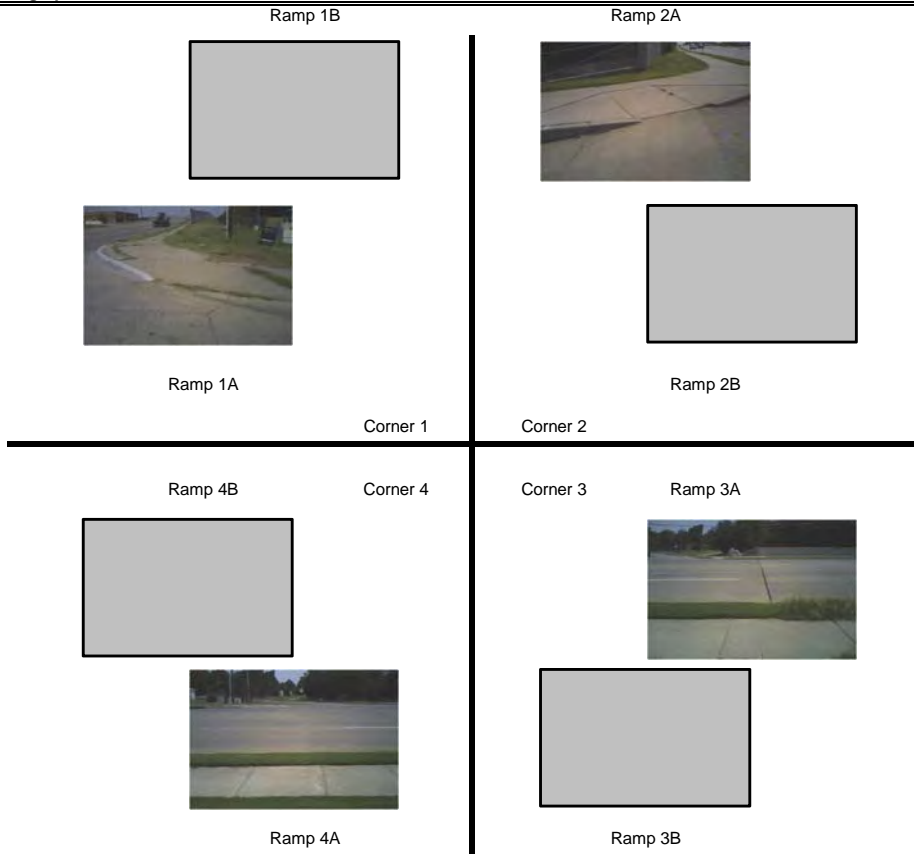

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	Good	N/A	
Crosswalk cross slope is greater than 2%	N/A	N/A	X	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk striping	N/A	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%				X		X			
Ramp running slope is greater than 8.33%						X			
Ramp cross slope is greater than 2%					X	X			Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp					X	X			Install colored truncated domes
No color contrast at base of ramp					X	X			
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist				X		X			Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp					X				Regrade roadway
Ramp not needed due to existing geometry									
Ramp Priority:	-	-	-	-	H	H

Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist				X	X				Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-	-	M	M

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

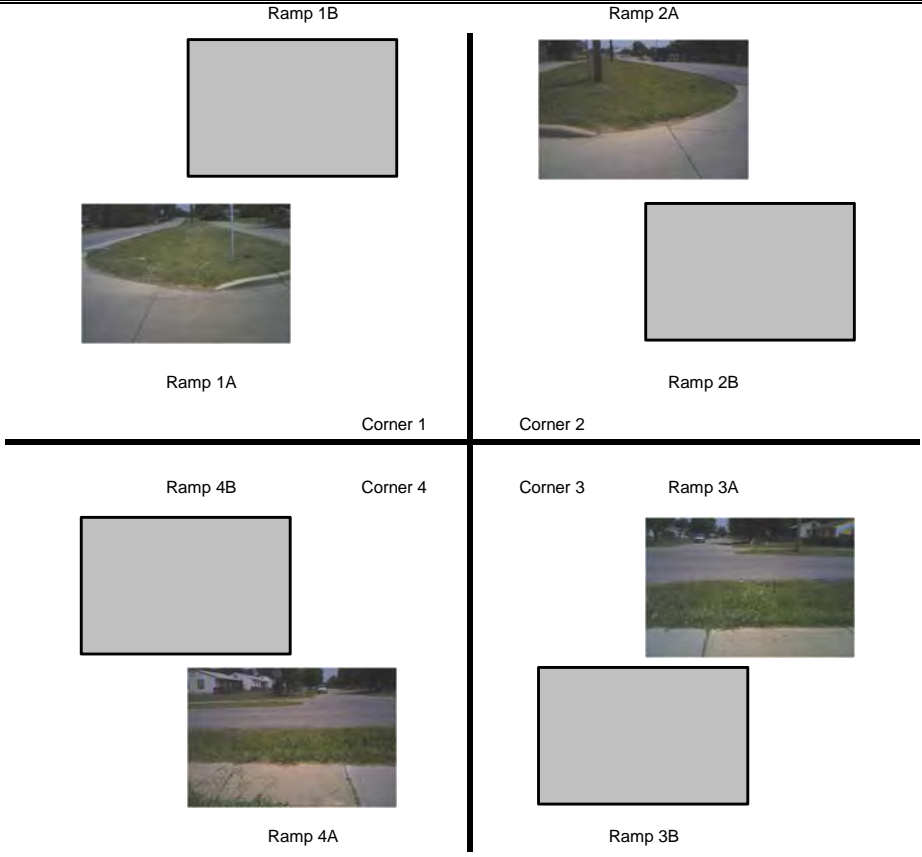

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	N/A	N/A	Repare roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	X	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Remove and replace ramp
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									Install colored truncated domes
Ramp running slope is greater than 8.33%				X					
Ramp cross slope is greater than 2%				X					
Ramp width is less than 36"									Install landing area
Obstruction present in ramp or landing area									
No textured surface at base of ramp				X					
No color contrast at base of ramp				X					Install landing area
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist				X					
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									Regrade roadway
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									Regrade roadway
Ramp transition onto roadway is greater than 0.25"				X					
Ponding occurs at base of ramp				X					
Ramp not needed due to existing geometry									Ramp Priority:
				H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	N/A	N/A	
Crosswalk cross slope is greater than 2%	-	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X						
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%			X						Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area			X						
No textured surface at base of ramp	X		X						Install colored truncated domes
No color contrast at base of ramp	X		X						
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"	X		X						Regrade roadway
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		-		-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

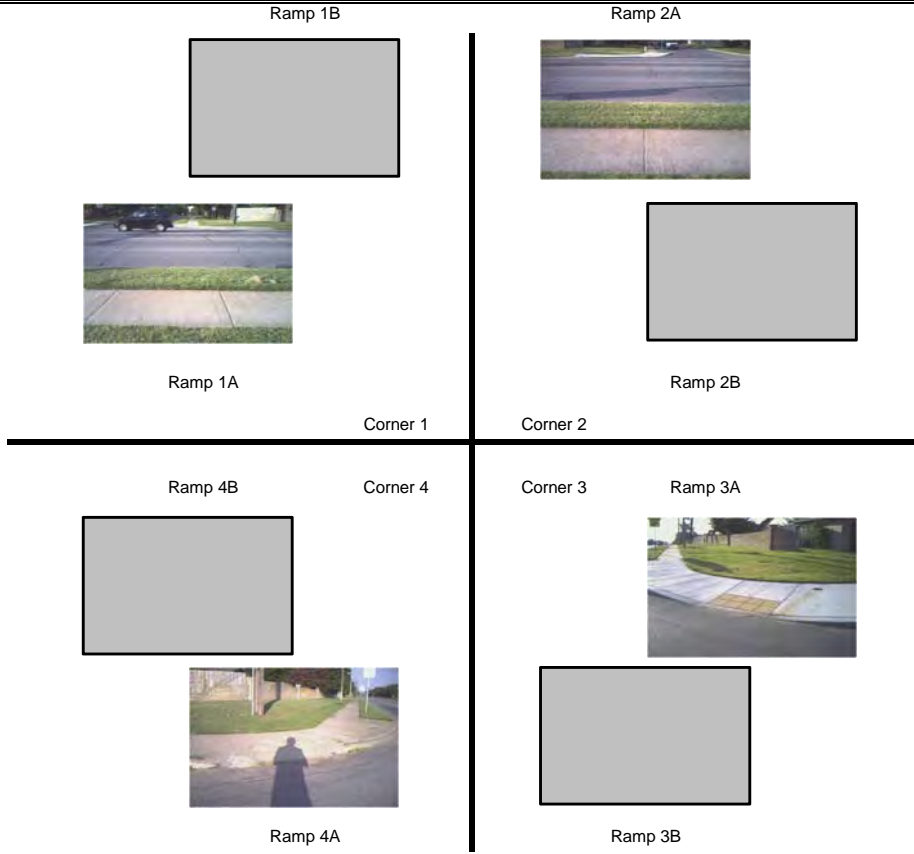

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	N/A	N/A	Repare roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	X	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations	
	1A	1B	2A	2B	3A	3B	4A	4B		
Ramp does not land in crosswalk									Remove and replace ramp	
No 48" extension into crosswalk										
Ramp does not exist and is needed										
Flare cross slope is greater than 10%			X							
Ramp running slope is greater than 8.33%										
Ramp cross slope is greater than 2%			X							
Ramp width is less than 36"										
Obstruction present in ramp or landing area			X							
No textured surface at base of ramp	X		X							Install colored truncated domes
No color contrast at base of ramp	X		X							
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						Install landing area	
No pedestrian push buttons										
Pedestrian pushbutton diameter is not 2"										
Pedestrian pushbutton height is greater than 42"										
Pedestrian head offset is greater than 10' from the nearest crosswalk edge										
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									Regrade roadway	
Ramp transition onto roadway is greater than 0.25"	X		X							
Ponding occurs at base of ramp										
Ramp not needed due to existing geometry										
Ramp Priority:	H		H		-		-

Estimated Project Cost:	\$	16,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	X	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Remove and replace ramp
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X						Remove and replace ramp
Ramp running slope is greater than 8.33%	X								
Ramp cross slope is greater than 2%	X		X						
Ramp width is less than 36"									Install colored truncated domes
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X						
No color contrast at base of ramp	X		X						Install landing area
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									Install landing area
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									Install landing area
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									Ramp Priority:

	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%							X		
Ramp cross slope is greater than 2%									Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp					X	X			Install colored truncated domes
No color contrast at base of ramp					X	X			
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist					X	X			Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-	-	-	M	H

Estimated Project Cost:	\$	15,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	Good	N/A	
Crosswalk cross slope is greater than 2%	N/A	N/A	X	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk striping	N/A	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%				X					
Ramp running slope is greater than 8.33%				X		X			
Ramp cross slope is greater than 2%				X					Remove and replace ramp
Ramp width is less than 36"				X					
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist				X		X			Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry

Estimated Project Cost:	\$	18,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

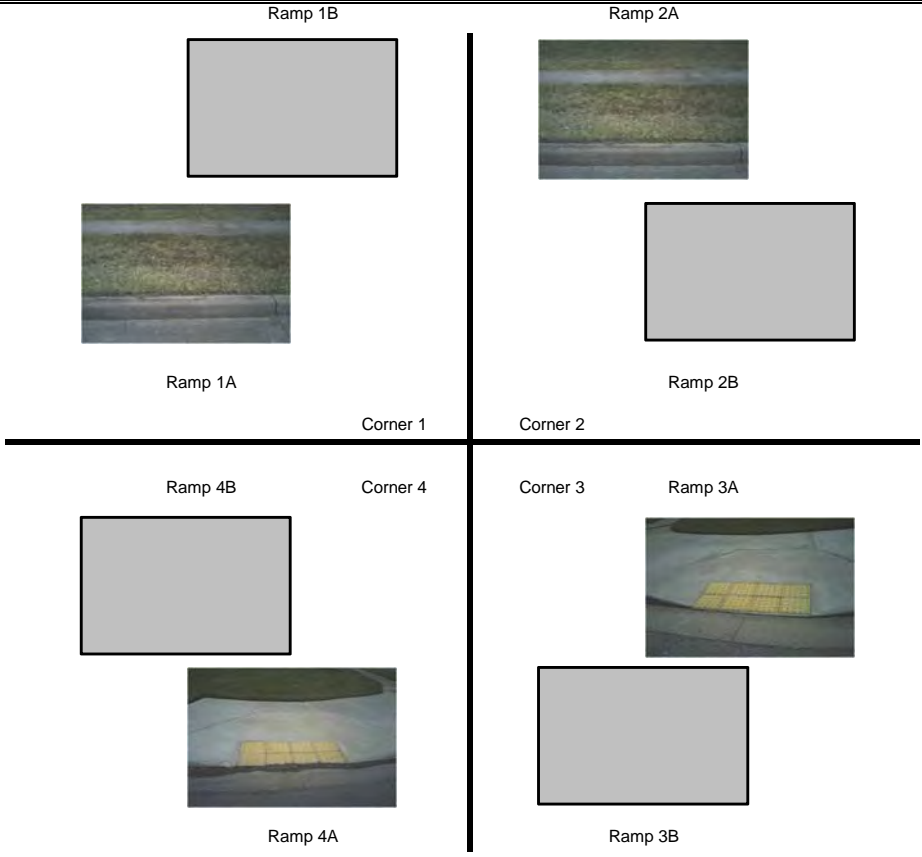

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	N/A	N/A	Repare roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	X	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Remove and replace ramp
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X						Install colored truncated domes
Ramp running slope is greater than 8.33%			X						
Ramp cross slope is greater than 2%	X		X						
Ramp width is less than 36"									Install landing area
Obstruction present in ramp or landing area			X						
No textured surface at base of ramp	X		X						
No color contrast at base of ramp	X		X						Install landing area
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									Install landing area
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									Regrade roadway
Ramp transition onto roadway is greater than 0.25"	X		X						
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									Ramp Priority:
Ramp Priority:	H		H		-		-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	Poor	N/A	Repare roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	X	N/A	-	N/A	
Crosswalk striping	No	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations	
	1A	1B	2A	2B	3A	3B	4A	4B		
Ramp does not land in crosswalk									Remove and replace ramp	
No 48" extension into crosswalk										
Ramp does not exist and is needed										
Flare cross slope is greater than 10%			X	X	X	X	X	X		
Ramp running slope is greater than 8.33%	X							X		
Ramp cross slope is greater than 2%	X		X	X	X	X	X	X		
Ramp width is less than 36"										
Obstruction present in ramp or landing area			X							
No textured surface at base of ramp	X		X	X	X	X	X	X		Install colored truncated domes
No color contrast at base of ramp	X		X	X	X	X	X	X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X	X	X	X	X	X	Install landing area	
No pedestrian push buttons										
Pedestrian pushbutton diameter is not 2"										
Pedestrian pushbutton height is greater than 42"										
Pedestrian head offset is greater than 10' from the nearest crosswalk edge										
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist										
Ramp transition onto roadway is greater than 0.25"					X	X			Regrade roadway	
Ponding occurs at base of ramp	X		X	X	X	X	X	X		
Ramp not needed due to existing geometry										
Ramp Priority:	H		H	H	H	H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	N/A	N/A	
Crosswalk cross slope is greater than 2%	X	N/A	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk striping	No	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X								
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%	X		X						Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X								Install colored truncated domes
No color contrast at base of ramp	X								
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	N/A	N/A	
Crosswalk cross slope is greater than 2%	X	N/A	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk striping	No	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%	X		X						Remove and replace ramp
Ramp cross slope is greater than 2%			X						
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X						Install colored truncated domes
No color contrast at base of ramp	X		X						
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	M		M		-		-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

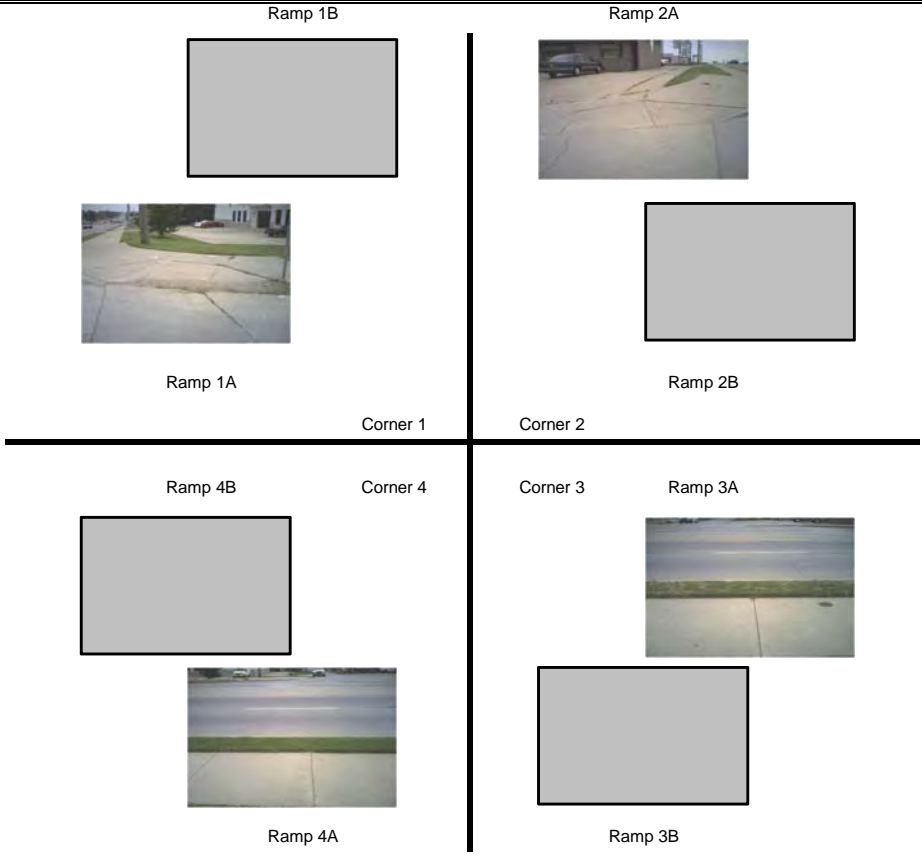

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	Good	N/A	
Crosswalk cross slope is greater than 2%	N/A	N/A	-	N/A	
Crosswalk striping	N/A	N/A	No	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%					X				
Ramp cross slope is greater than 2%									Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp					X	X			Install colored truncated domes
No color contrast at base of ramp					X	X			
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist					X				Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

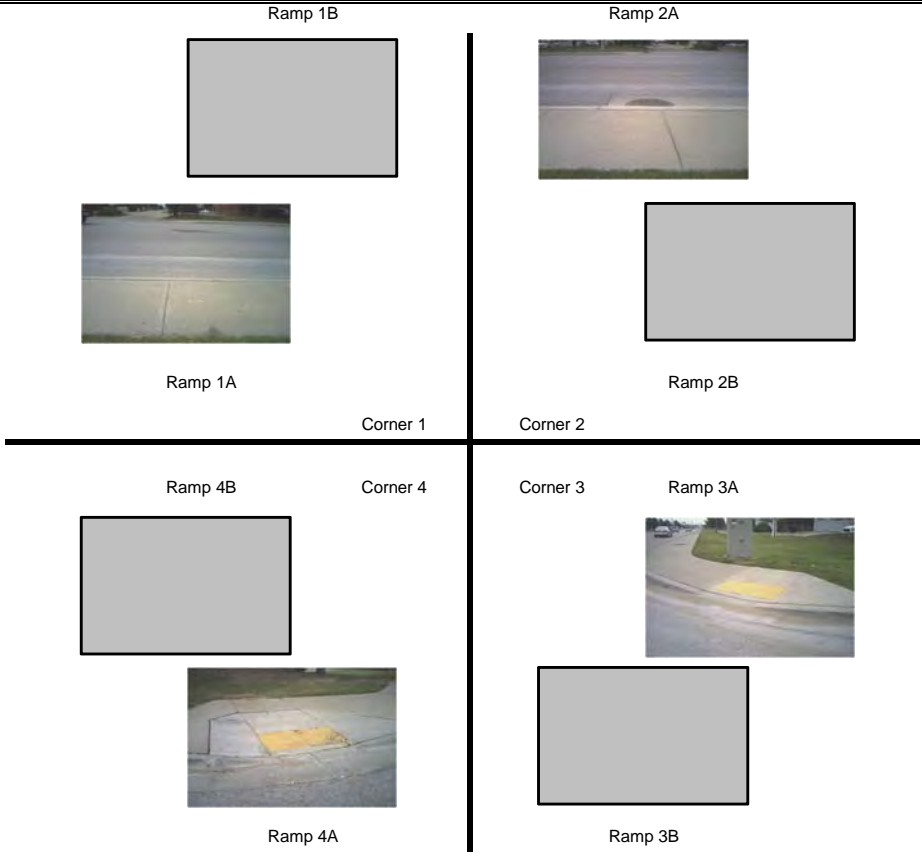

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	Good	N/A	
Crosswalk cross slope is greater than 2%	N/A	N/A	-	N/A	
Crosswalk striping	N/A	N/A	No	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%					X	X			Remove and replace ramp
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp					X	X			Install colored truncated domes
No color contrast at base of ramp					X	X			
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist					X	X			Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-	-	M	M

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

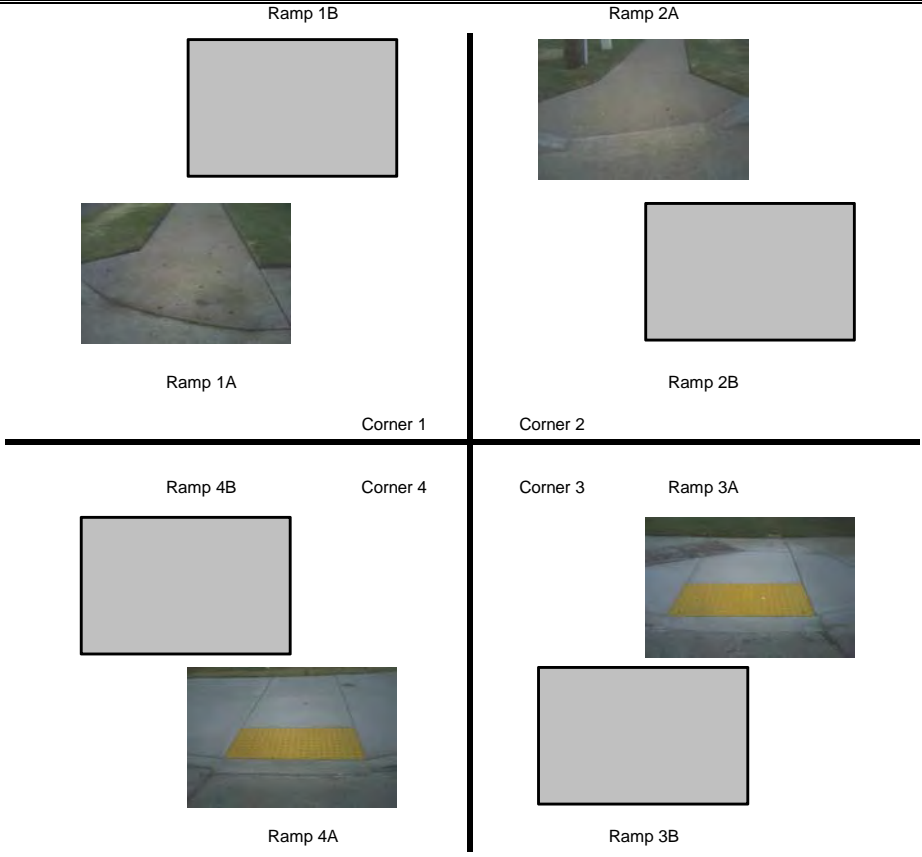

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	Good	N/A	
Crosswalk cross slope is greater than 2%	N/A	N/A	X	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk striping	N/A	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%					X				Remove and replace ramp
Ramp cross slope is greater than 2%						X			
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist				X		X			Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-	-	-	H	H	H	H	H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

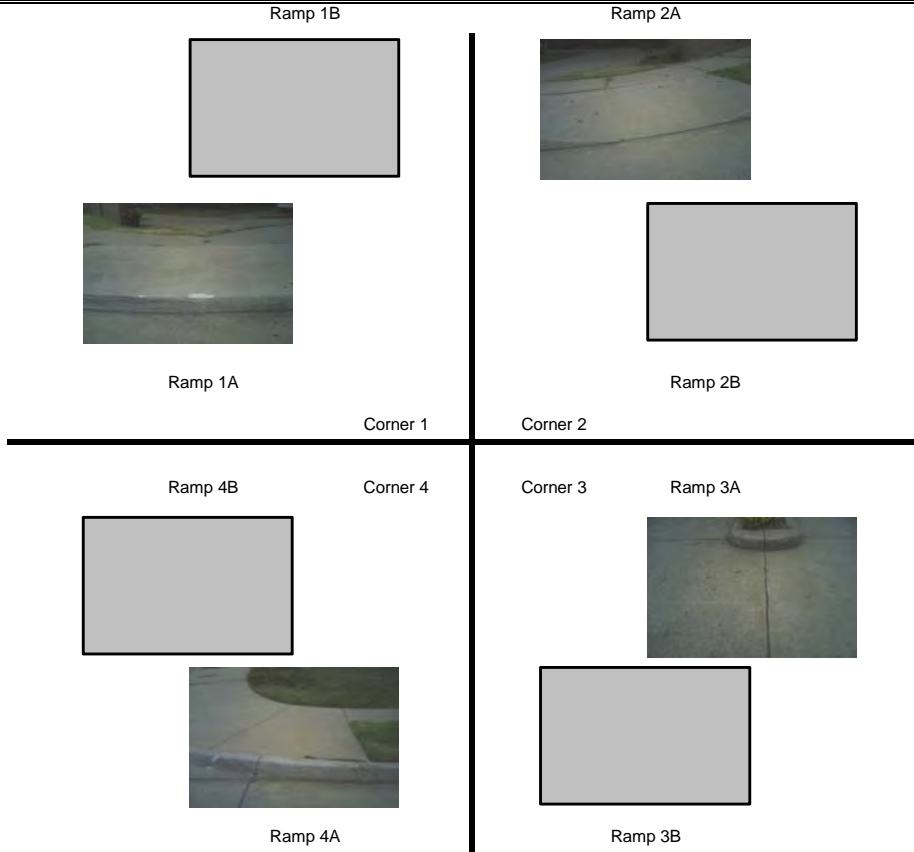

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	N/A	N/A	
Crosswalk cross slope is greater than 2%	-	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID						Recommendations		
	1A	1B	2A	2B	3A	3B		4A	4B
Ramp does not land in crosswalk	X		X						Remove and replace crosswalk pavement markings
No 48" extension into crosswalk									
Ramp does not exist and is needed									Remove and replace ramp
Flare cross slope is greater than 10%	X		X						
Ramp running slope is greater than 8.33%	X		X						
Ramp cross slope is greater than 2%	X		X						
Ramp width is less than 36"									
Obstruction present in ramp or landing area									Install colored truncated domes
No textured surface at base of ramp	X		X						
No color contrast at base of ramp	X		X						
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry

Estimated Project Cost:	\$	9,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

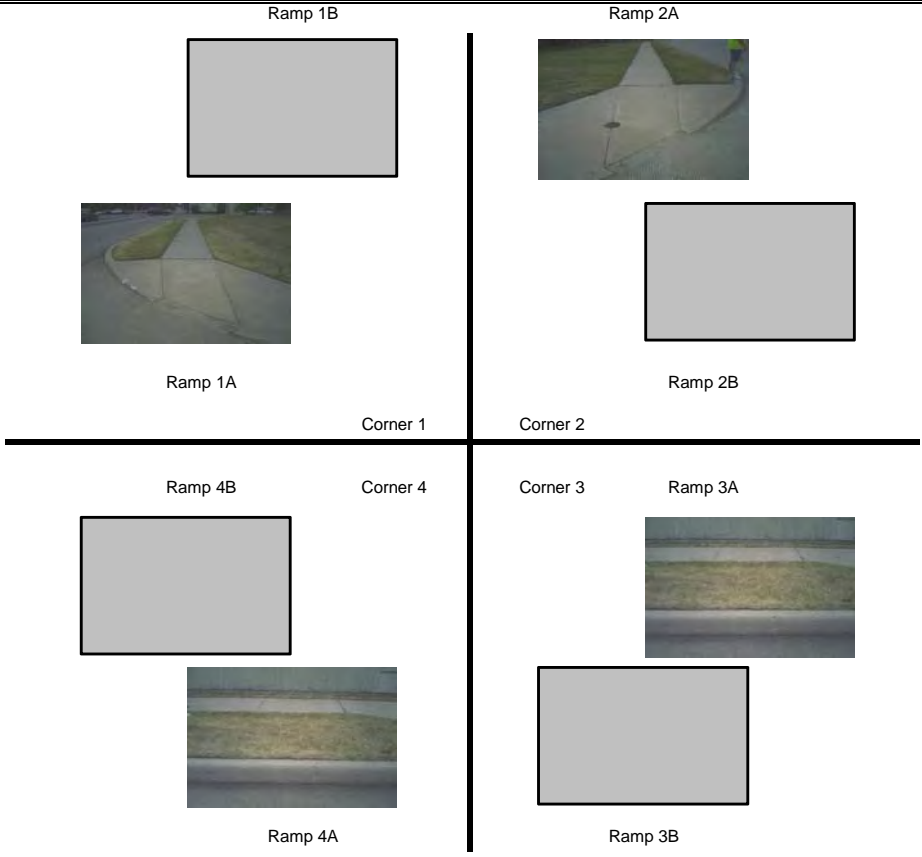

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Good	N/A	N/A	N/A	
Crosswalk cross slope is greater than 2%	-	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X								Install handicap ramp
Flare cross slope is greater than 10%			X						
Ramp running slope is greater than 8.33%			X						Remove and replace ramp
Ramp cross slope is greater than 2%			X						
Ramp width is less than 36"			X						
Obstruction present in ramp or landing area									
No textured surface at base of ramp			X						Install colored truncated domes
No color contrast at base of ramp			X						
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"			X						Regrade roadway
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		-		-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

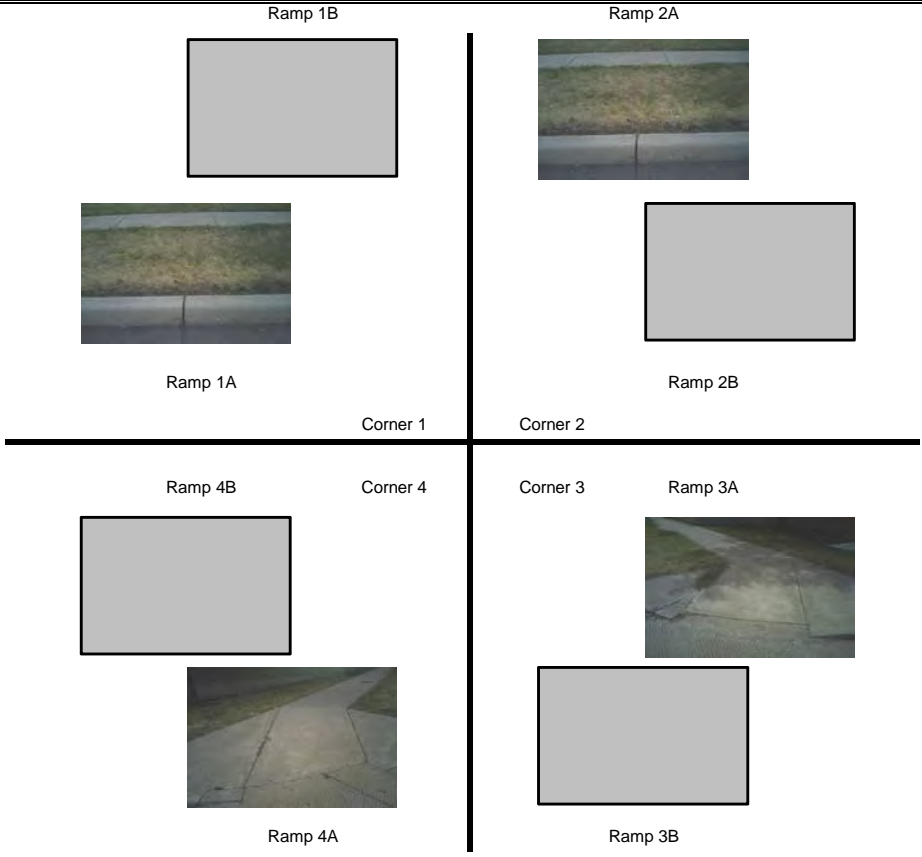

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	X	-	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Install handicap ramp
No 48" extension into crosswalk					X				
Ramp does not exist and is needed								X	
Flare cross slope is greater than 10%	X		X					X	Remove and replace ramp
Ramp running slope is greater than 8.33%	X		X					X	
Ramp cross slope is greater than 2%	X		X					X	
Ramp width is less than 36"									Install colored truncated domes
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X		X					X	
No color contrast at base of ramp	X		X					X	
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									Regrade roadway
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"	X		X					X	
Ponding occurs at base of ramp	X		X					X	
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H			H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	Good	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	X	N/A	X	N/A	
Crosswalk striping	No	N/A	No	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Remove and replace ramp
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X			X	X		Remove and replace ramp
Ramp running slope is greater than 8.33%						X			
Ramp cross slope is greater than 2%	X					X			
Ramp width is less than 36"									Install colored truncated domes
Obstruction present in ramp or landing area	X		X			X			
No textured surface at base of ramp	X		X			X	X		
No color contrast at base of ramp	X		X			X	X		Install landing area
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X			X	X		
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									Install landing area
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									Regrade roadway
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp	X		X			X			
Ramp not needed due to existing geometry					X	X			Remove ramp
Ramp Priority:	H		H		H	H	H	H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Subtotal:	\$	10,297.60
Engineering: (% +/-)	15%	\$ 1,586.74
Contingency: (% +/-)	20%	\$ 2,115.66
Estimated Project Cost:	\$	14,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	-	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X		X						Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		-		-

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

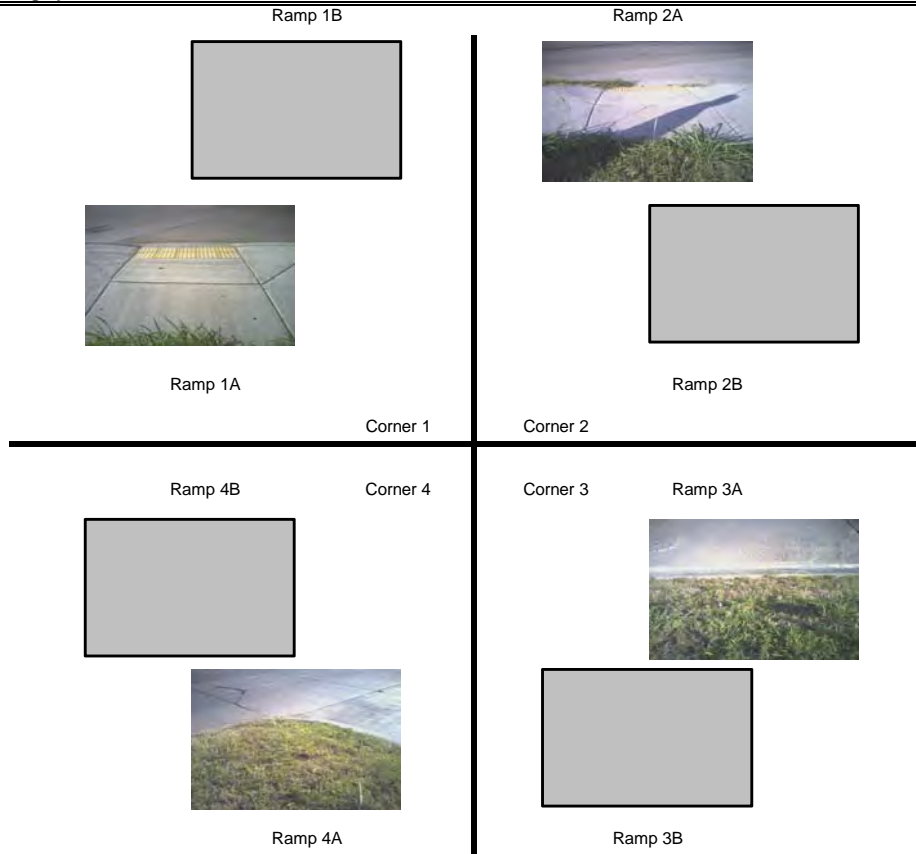

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	Poor	N/A	Good	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	-	N/A	-	N/A	
Crosswalk striping	No	N/A	No	N/A	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X		X		X		X		Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H

Pavement condition at the crosswalk	Poor	N/A	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	-	N/A	N/A	N/A	
Crosswalk striping	No	N/A	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%	X		X						Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X								Install colored truncated domes
No color contrast at base of ramp	X								
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X		X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry

Ramp does not land in crosswalk	X						X		Remove and replace crosswalk pavement markings
No 48" extension into crosswalk									
Ramp does not exist and is needed								X	Remove and replace ramp
Flare cross slope is greater than 10%	X							X	
Ramp running slope is greater than 8.33%	X							X	
Ramp cross slope is greater than 2%	X								Install colored truncated domes
Ramp width is less than 36"								X	
Obstruction present in ramp or landing area									Install landing area
No textured surface at base of ramp								X	
No color contrast at base of ramp								X	
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X							X	Regrade roadway
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									Regrade roadway
Pedestrian pushbutton height is greater than 42"								X	
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"								X	
Ponding occurs at base of ramp	X								
Ramp not needed due to existing geometry									
Ramp Priority:	H							H

Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H							H

Contingency: (% +/-)	20%	\$ 3,170.63
Estimated Project Cost:	\$	19,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	N/A	Repare roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	X	N/A	N/A	
Crosswalk striping	N/A	No	N/A	N/A	

Ramp Issues	Ramp ID						Recommendations		
	1A	1B	2A	2B	3A	3B		4A	4B
Ramp does not land in crosswalk			X	X					Remove and replace crosswalk pavement markings
No 48" extension into crosswalk									
Ramp does not exist and is needed					X				Remove and replace ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%					X				
Ramp cross slope is greater than 2%			X	X					
Ramp width is less than 36"									Install colored truncated domes
Obstruction present in ramp or landing area			X	X					
No textured surface at base of ramp			X	X					Install landing area
No color contrast at base of ramp			X	X					
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X	X					Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									Regrade roadway
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"			X	X					Regrade roadway
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									Ramp Priority:
Ramp Priority:			H	H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

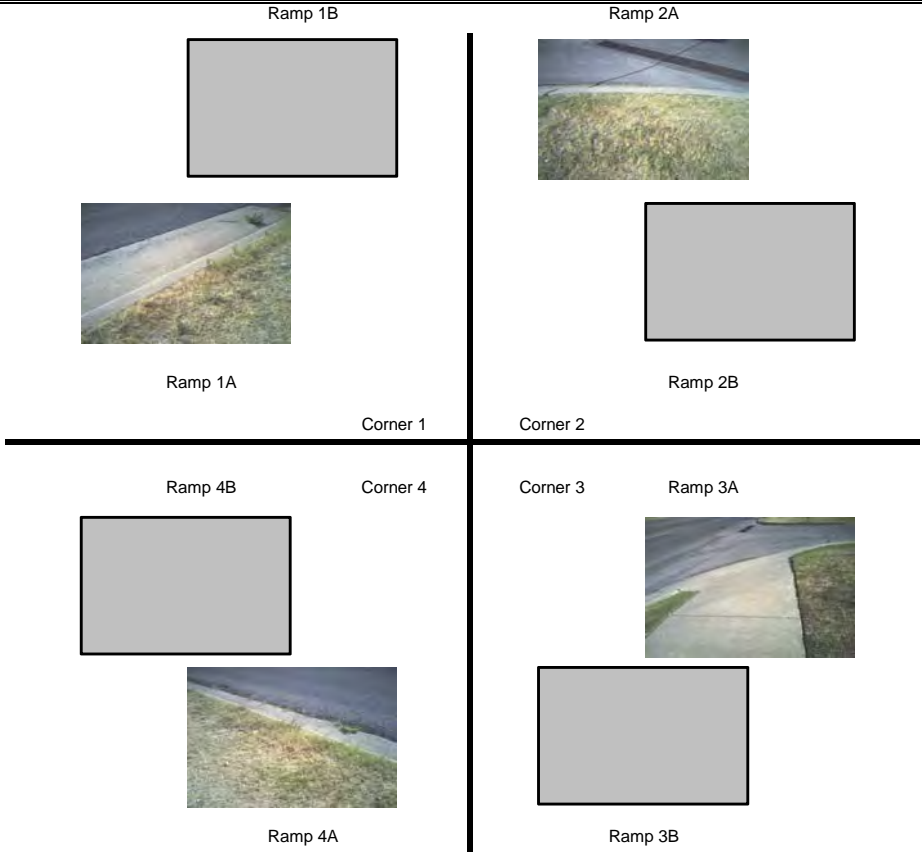

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	N/A	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	-	N/A	N/A	
Crosswalk striping	N/A	No	N/A	N/A	

Ramp Issues	Ramp ID						Recommendations	
	1A	1B	2A	2B	3A	4A		4B
Ramp does not land in crosswalk			X	X				Remove and replace crosswalk pavement markings
No 48" extension into crosswalk								
Ramp does not exist and is needed								Remove and replace ramp
Flare cross slope is greater than 10%								
Ramp running slope is greater than 8.33%								Install colored truncated domes
Ramp cross slope is greater than 2%			X	X				
Ramp width is less than 36"								Install landing area
Obstruction present in ramp or landing area								
No textured surface at base of ramp			X	X				Install landing area
No color contrast at base of ramp			X	X				
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X	X				Install landing area
No pedestrian push buttons								
Pedestrian pushbutton diameter is not 2"								Install landing area
Pedestrian pushbutton height is greater than 42"								
Pedestrian head offset is greater than 10' from the nearest crosswalk edge								Install landing area
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist								
Ramp transition onto roadway is greater than 0.25"								Install landing area
Ponding occurs at base of ramp								
Ramp not needed due to existing geometry								Install landing area
Ramp Priority:			M	M

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

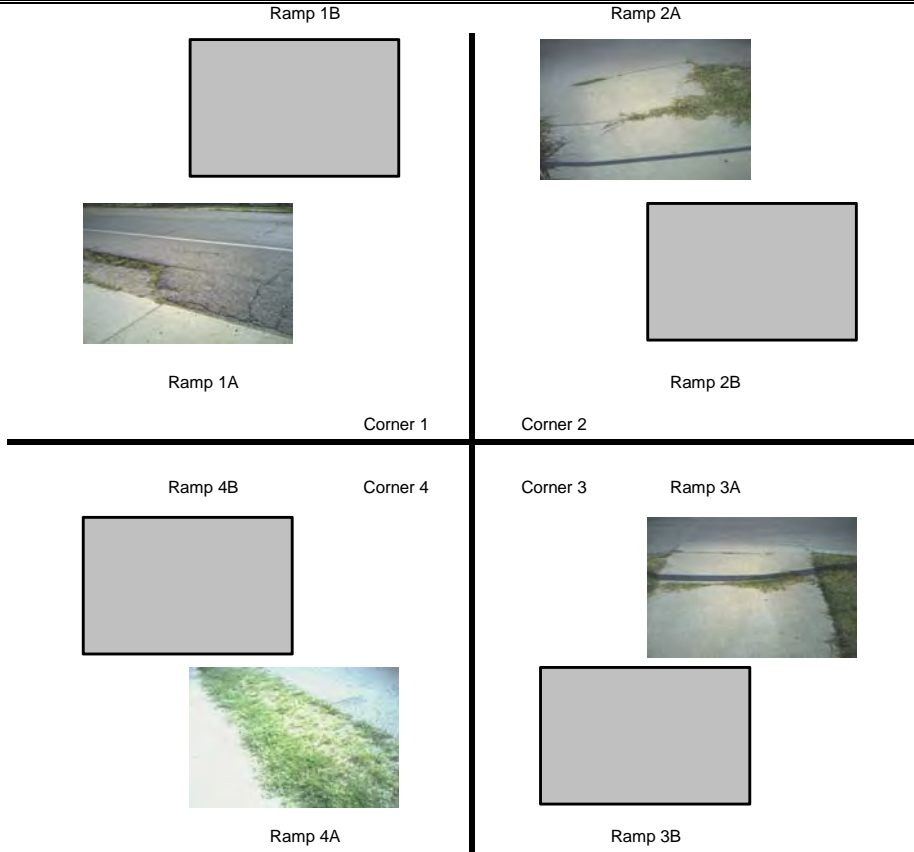

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	Poor	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	-	N/A	-	
Crosswalk striping	N/A	No	N/A	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed	X		X		X		X		Install handicap ramp
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H		

Client: City of Tulsa, Oklahoma
 Program: ADA Self-Evaluation and Transition Plan Update
 KHA No.: 061274700

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

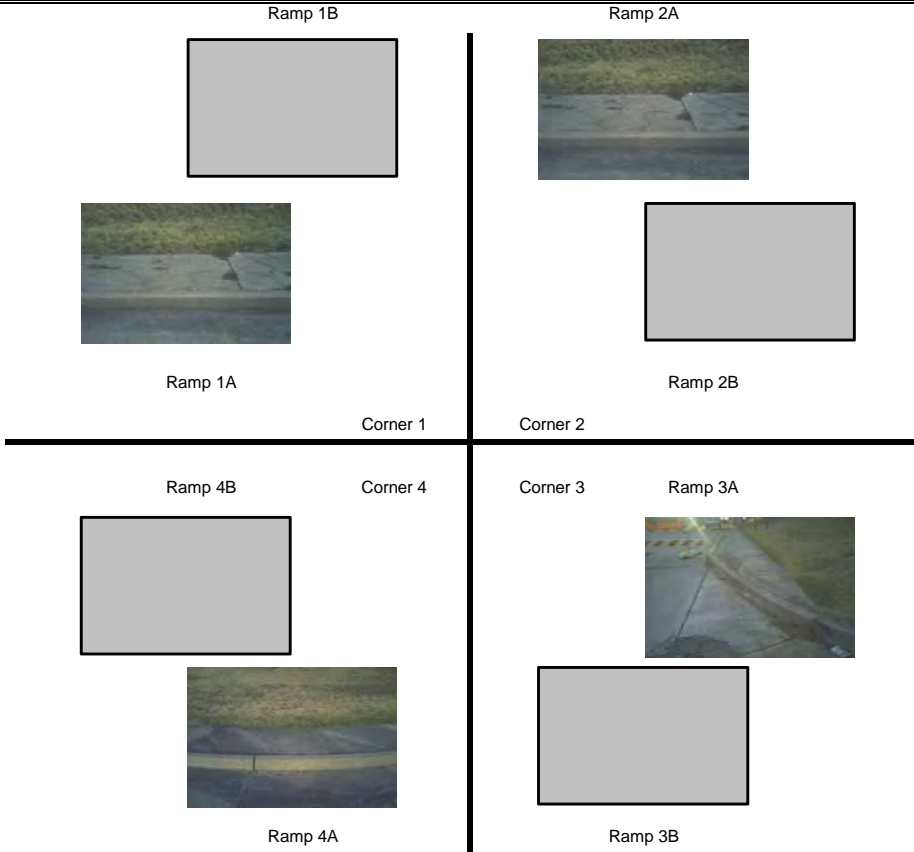

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	Poor	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	-	
Crosswalk striping	N/A	N/A	N/A	No	

Ramp Issues	Ramp ID						Recommendations		
	1A	1B	2A	2B	3A	3B		4A	4B
Ramp does not land in crosswalk							X		Remove and replace crosswalk pavement markings
No 48" extension into crosswalk							X		
Ramp does not exist and is needed	X								Install handicap ramp
Flare cross slope is greater than 10%							X		Remove and replace ramp
Ramp running slope is greater than 8.33%							X		
Ramp cross slope is greater than 2%							X		
Ramp width is less than 36"							X		Install colored truncated domes
Obstruction present in ramp or landing area							X		
No textured surface at base of ramp							X		Install landing area
No color contrast at base of ramp							X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist							X		
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H						H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

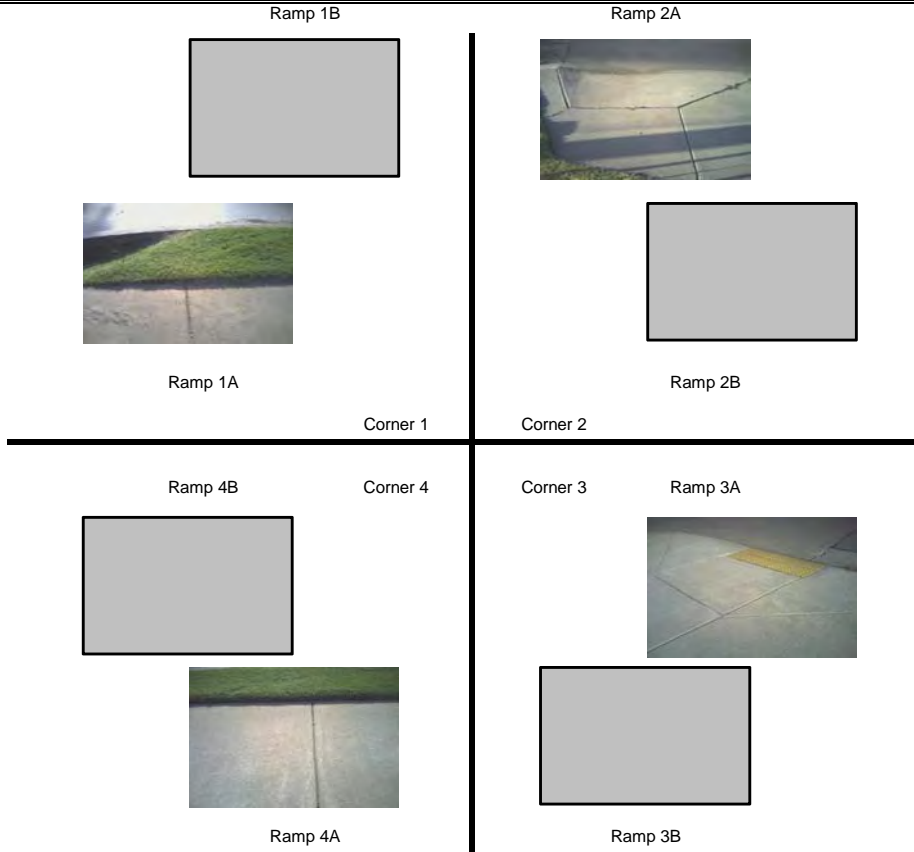

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Good	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	X	N/A	X	Repave roadway and install crosswalk pavement markings
Crosswalk striping	N/A	No	N/A	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:

Estimated Project Cost:	\$	30,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

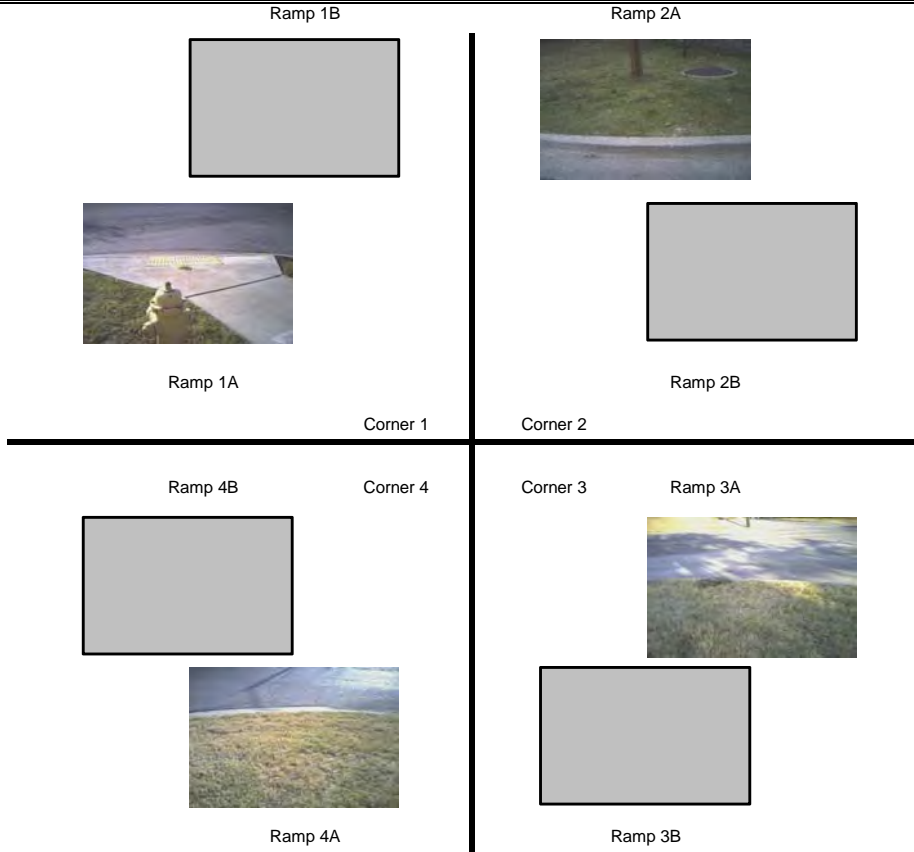

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	Poor	Repave roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	-	N/A	-	
Crosswalk striping	N/A	No	N/A	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed			X		X		X		Install handicap ramp
Flare cross slope is greater than 10%	X								
Ramp running slope is greater than 8.33%	X								
Ramp cross slope is greater than 2%	X								Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X								Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"	X								Regrade roadway
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H

Crosswalk striping	N/A	N/A	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X							X	
Ramp running slope is greater than 8.33%	X								
Ramp cross slope is greater than 2%	X								Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X							X	
No color contrast at base of ramp	X							X	Install colored truncated domes
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X							X	Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H							H

No textured surface at base of ramp			X	X					Install colored truncated domes
No color contrast at base of ramp			X	X					
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X						Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	-		H	H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

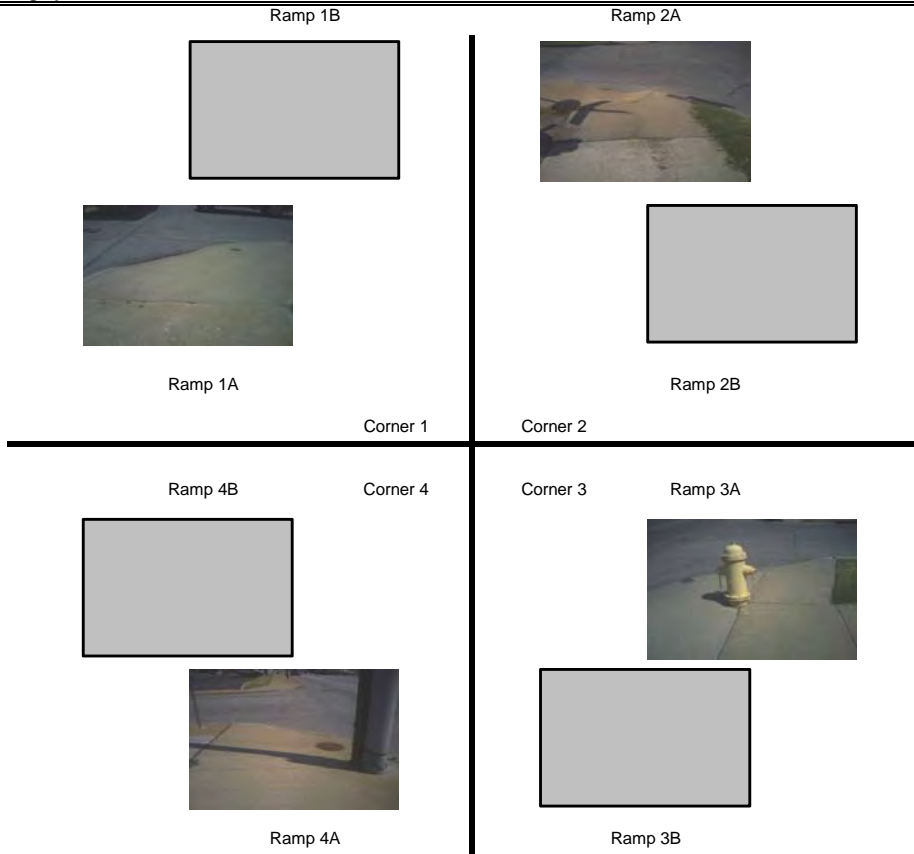

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Good	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	X	N/A	-	Repave roadway and install crosswalk pavement markings
Crosswalk striping	N/A	Yes	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%	X		X						
Ramp running slope is greater than 8.33%									
Ramp cross slope is greater than 2%	X						X		Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X						X		Install colored truncated domes
No color contrast at base of ramp	X						X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X		X				Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"							X		Regrade roadway
Ponding occurs at base of ramp			X		X				
Ramp not needed due to existing geometry									
Ramp Priority:	H		H		H		H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

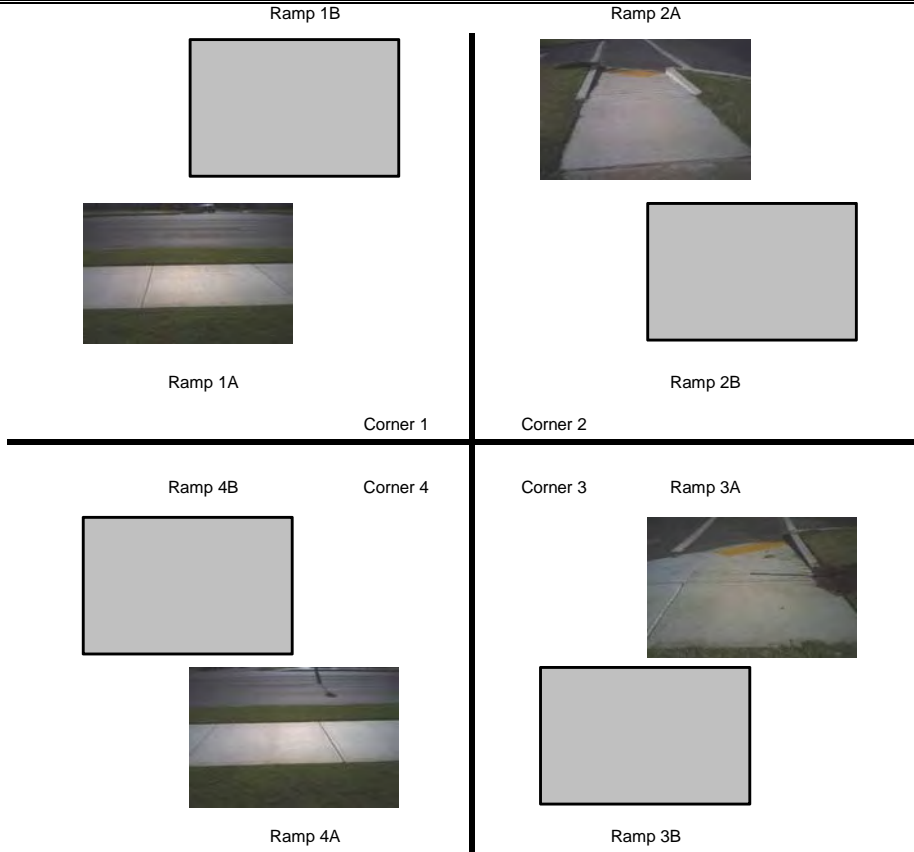

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Good	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	-	N/A	-	
Crosswalk striping	N/A	Yes	N/A	Yes	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%							X		Remove and replace ramp
Ramp cross slope is greater than 2%									
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp									
No color contrast at base of ramp									
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X		X				Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp	X		X		X		X		Regrade roadway
Ramp not needed due to existing geometry

Estimated Project Cost:	\$	18,000.00

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

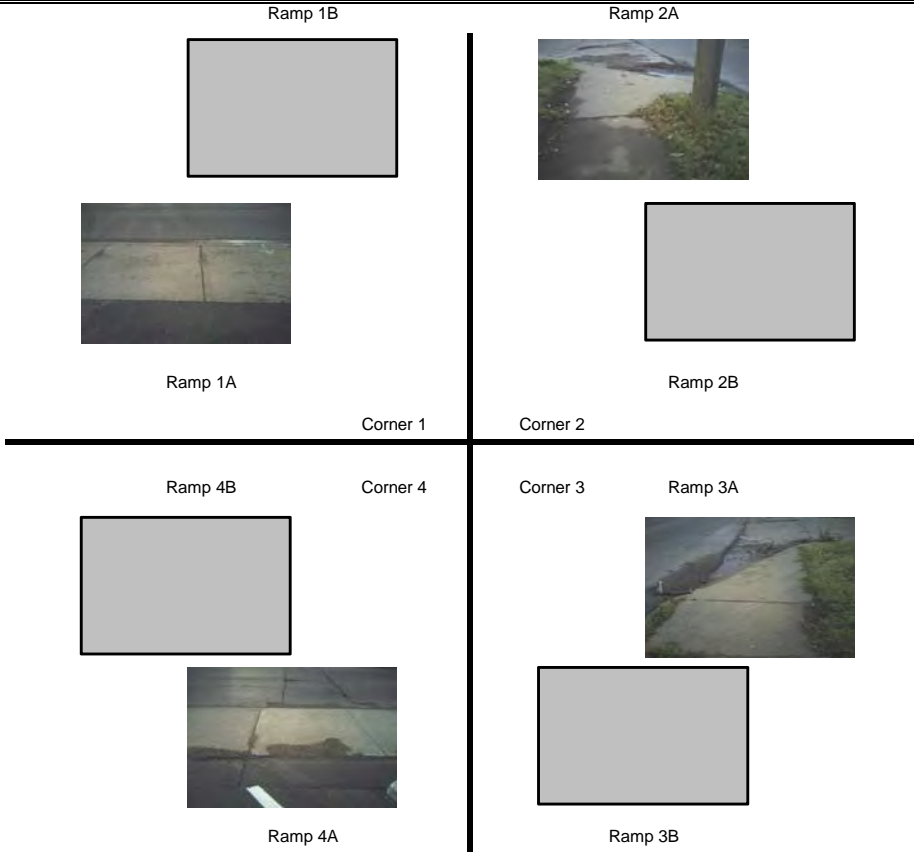

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	Poor	N/A	N/A	Repare roadway and install crosswalk pavement markings
Crosswalk cross slope is greater than 2%	N/A	X	N/A	N/A	
Crosswalk striping	N/A	No	N/A	N/A	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									Remove and replace ramp
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									Remove and replace ramp
Ramp running slope is greater than 8.33%			X		X				
Ramp cross slope is greater than 2%			X		X				
Ramp width is less than 36"									Install colored truncated domes
Obstruction present in ramp or landing area			X		X				
No textured surface at base of ramp			X		X				
No color contrast at base of ramp			X		X				Install landing area
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist			X		X				
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									Regrade roadway
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist			X		X				Regrade roadway
Ramp transition onto roadway is greater than 0.25"			X		X				
Ponding occurs at base of ramp			X		X				
Ramp not needed due to existing geometry									
Ramp Priority:			H		H

Ramp does not land in crosswalk									Remove and replace ramp
No 48" extension into crosswalk									
Ramp does not exist and is needed					X	X			
Flare cross slope is greater than 10%									Install colored truncated domes
Ramp running slope is greater than 8.33%					X	X			
Ramp cross slope is greater than 2%					X	X			
Ramp width is less than 36"									Regrade roadway
Obstruction present in ramp or landing area									
No textured surface at base of ramp					X	X			
No color contrast at base of ramp					X	X			
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist									
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"					X	X			
Ponding occurs at base of ramp					X	X			
Ramp not needed due to existing geometry									
Ramp Priority:			H	H					

Client: City of Tulsa, Oklahoma
 Program: ADA Self-Evaluation and Transition Plan Update
 KHA No.: 061274700

Date: 6/26/12
 Prepared By: EPE
 Checked By: SRA

Project Name: Intersection of Dawson Rd and N Harvard Ave

GPS ID: 34049

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

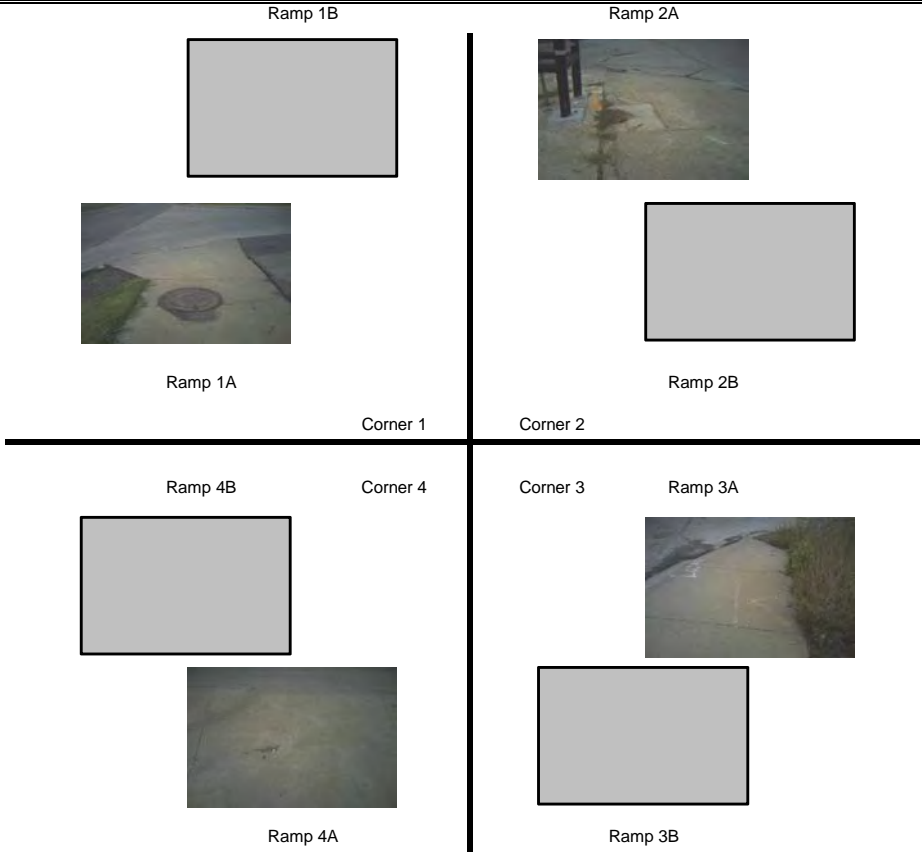

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	X	Repave roadway and install crosswalk pavement markings
Crosswalk striping	N/A	N/A	N/A	No	

Ramp Issues	Ramp ID								Recommendations
	1A	1B	2A	2B	3A	3B	4A	4B	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%							X		
Ramp running slope is greater than 8.33%							X		
Ramp cross slope is greater than 2%	X						X		Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X						X		Install colored truncated domes
No color contrast at base of ramp	X						X		
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X						X		Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"	X						X		Regrade roadway
Ponding occurs at base of ramp									
Ramp not needed due to existing geometry									
Ramp Priority:	H						H

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

Project Location

Field Observations

Intersection Issues	Crosswalk				Recommendations
	N	E	S	W	
Pavement condition at the crosswalk	N/A	N/A	N/A	Good	
Crosswalk cross slope is greater than 2%	N/A	N/A	N/A	-	
Crosswalk striping	N/A	N/A	N/A	No	Install crosswalk pavement markings

Ramp Issues	Ramp ID								Recommendations
	1A	2A	2B	3A	3C	4A	4B	4C	
Ramp does not land in crosswalk									
No 48" extension into crosswalk									
Ramp does not exist and is needed									
Flare cross slope is greater than 10%									
Ramp running slope is greater than 8.33%							X		
Ramp cross slope is greater than 2%							X		Remove and replace ramp
Ramp width is less than 36"									
Obstruction present in ramp or landing area									
No textured surface at base of ramp	X			X	X	X	X	X	Install colored truncated domes
No color contrast at base of ramp	X			X	X	X	X	X	
Landing area is less than 5' x 5', has a cross slope greater than 2% or does not exist	X			X		X	X	X	Install landing area
No pedestrian push buttons									
Pedestrian pushbutton diameter is not 2"									
Pedestrian pushbutton height is greater than 42"									
Pedestrian head offset is greater than 10' from the nearest crosswalk edge									
Clear floor space for pedestrian pushbutton is less than 30" x 48", has a cross slope greater than 2% or does not exist									
Ramp transition onto roadway is greater than 0.25"									
Ponding occurs at base of ramp	X			X	X	X	X	X	Regrade roadway
Ramp not needed due to existing geometry									
Ramp Priority:	M	-		L	M	M	M	H
