

## Give your Deferred Compensation Contribution an Automatic Boost

Recently the Deferred Compensation Board approved a change to allow participants in the Deferred Compensation Plan to contribute to Nationwide on a percentage basis. This does not take away the change the current option of a set dollar amount but adds an additional feature that may be chosen instead. The percent-based contribution option helps you:

- Give your contribution an automatic raise every time you get one
- Avoid the risk of forgetting to increase your contributions
- Increase the potential to achieve your investing goals

To change your contribution option to the percentage base visit your account online at [Tulsa457.com](http://Tulsa457.com). If you have never accessed your account online you will need to register with your account number. If you do not know your account number please contact Nationwide at (877) 677-3678.
