

## Section 8

# CIP SCHEDULE

This section of the document summarizes the departments' capital needs and provides funding and scheduling recommendations.

The Capital Improvements Plan (CIP) ordinance adopted by the City Council includes the five-year schedule.

## **FISCAL YEARS 2026–2030 CAPITAL PLAN**

In November 2013, the citizens of Tulsa approved \$355.0 million of General Obligation (GO) bonds for streets and bridges called Improve Our Tulsa (IoT). In November 2019, the program was extended and added \$427.0 million in additional GO bonds for streets and bridges called Improve Our Tulsa 2 (IoT II). In August 2023, the program was extended a second time adding an additional \$384.9 million in GO bonds for streets, bridges, parks, cultural, and recreational facilities called Improve Our Tulsa 3 (IoT III). To date, all the \$355.0 million has been issued from the IoT 1 program, \$224.4 million of the \$427.0 million has been issued from the IoT II program, and \$156.2 million of the \$384.9 million has been issued from the IoT III program. The remaining \$431.3 million will be issued in future years with the next series planned for issuance in FY2026. The Mayor and City Council share a commitment to improving the condition of our roadways and providing funds for critical services such as public safety, federal mandates, building code, and short-term capital needs. Goals identified in PlaniTulsa, the City's comprehensive plan, were used to prioritize the allocation of the authorized \$2.4 billion in the IoT 1, 2, and 3 programs. In April of 2016, City of Tulsa voters approved a temporary sales tax levy of slightly over 3/10ths of a cent for the purpose of funding large scale economic development projects. The tax went into effect in January 2017 and will be in place for 15 years. The tax will fund over \$510.6 million in major capital and economic development projects across the city. The commitment of these resources is likely to mean that any newly identified or unfunded capital improvement projects will not be funded until the conclusion of these programs. Information about these programs is contained in the FY26 Capital Budget – Funded Programs Status and Operating Impact (Section 6) of this document and includes a list of the proposed funding for FY26.

Historically, the City of Tulsa has had an aggressive capital improvements program. The Third Penny Sales Tax program, has financed almost \$2.4 billion in needed projects over the last thirty years. That amount has been augmented by \$2.0 billion of additional general obligation and revenue bond dollars and millions more from federal grants and loans. In November 2008, the City of Tulsa electorate approved a street improvement package totaling \$451.6 million. The program was comprised of \$285 million in general obligation bond proceeds and \$166.6 million in sales tax revenue which was derived from an extension of the existing third penny sales tax in addition to a 0.167% increase. The program funded 128 arterial and residential street projects across the City. The 2006 Sales Tax program, approved in May 2006, which provided \$465 million for capital projects throughout the City, is in the final stage of implementation. All the appropriations to fund these improvements are complete.

In alignment with industry best practice, the City of Tulsa is proactive in reviewing its capital needs both annually and in the strategic view of long-range goals and needs as identified in various master plans. These planning efforts have been undertaken both internally and with sister organizations involved in major capital programs in the region. The City's Finance Department reviews and maintains an inventory of master plans and recommendations that extend as far out as 50 years with over 585 projects totaling over \$7.7 billion. The re-authorization of the IoT program referenced above relies on these master plans as a basis for identifying the potential list of proposed projects. Section 7, Master Plan Priorities, provides a summary of each of the major master plans and highlights the goals for the physical improvements they govern. Funding recommendations covering these areas follow in Section 8, the 2026–2030 Capital Plan.

## A SUMMARY OF THE CAPITAL BUDGET AND FIVE-YEAR CAPITAL PLAN

The following is a summary of all proposed, but unfunded capital expenditures for the next five years. It does not include project allocations in previously approved capital programs. *The amount shown does not include each department's funding from the approved 2017 Limited Purpose Sales Tax Program, 2023, 2020 and 2014 Sales Tax Extension (Improve Our Tulsa I, II, III), 2023, 2020 and 2014 General Obligation Bond Program (Improve Our Tulsa I, II and III), the 2008 Street Improvement Program, or the 2006 Sales Tax Extension. Information on the projects and appropriations for these programs is contained in Section 6.*

<b><u>PROGRAM/DEPARTMENT</u></b>	<b><u>Proposed 5-Year Funding</u></b>
<b><u>PUBLIC SAFETY AND PROTECTION</u></b>	
<b>Fire</b>	\$ 60 million
The Fire Department's highest priority is the replacement of its apparatus, followed by the construction/expansion of around 10 Fire Stations and facilities.	
<b>Total Public Safety and Protection</b>	<b>\$ 60 million</b>
<b><u>CULTURAL DEVELOPMENT AND RECREATION</u></b>	
<b>Parks and Recreation Department</b>	\$ 27 million
The maintenance of the Park systems aging facilities is the Department's highest priority. Park system projects have been prioritized in the Park's Master Plan and funding has been allocated toward its implementation in previous capital programs.	
<b>Tulsa Zoo</b>	\$ 17 million
TMZI has identified capital projects with the highest priorities including replacement of various facility roofs and HVAC equipment across the zoo, followed by a new access road and employee parking lot.	
<b>Gilcrease Museum</b>	\$ 5 million
The continued maintenance and improvements of the supporting facilities around the newly constructed Gilcrease Museum have been identified as the highest priority projects.	
<b>BOK Center and Arvest Convention Center</b>	\$ 19 million
The continued maintenance and improvements of the BOK Center and Arvest Convention Center have been identified as the highest priority projects.	
<b>Performing Arts Center</b>	\$ 75 million
The Tulsa PAC capital improvements plan intends for the continued upgrades of the facilities aging infrastructure and improvements to ADA compliance with potential expansion in the future.	
<b>River Parks Department</b>	\$ 41 million
The continued improvements of both west and east banks of the Arkansas river has been identified as the highest priority projects followed by the acquisition of the vacant concrete plant site.	
<b>Total Cultural Development and Recreation</b>	<b>\$ 184 million</b>
<b><u>SOCIAL AND ECONOMIC DEVELOPMENT</u></b>	
<b>Planning and Neighborhoods Department Projects</b>	\$ 95 million
As the City works to address homelessness at the intersection of housing and mental health, the City of Tulsa has released its Path to Home Strategy.	

# CAPITAL PLAN

<b><u>PROGRAM/DEPARTMENT</u></b>	<b><u>Proposed 5-Year Funding</u></b>
<b>Tulsa Authority for Economic Opportunity (TAEO) Economic Development</b> TAEO will continue to pursue various economic development efforts as identified in the City's various plans well as efforts such as the beautification of Route 66 and infrastructure to support the Peoria/Mohawk Business Park.	\$ 8 million
<b>Total Social and Economic Development</b>	\$ 103 million
<b><u>PUBLIC WORKS AND INFRASTRUCTURE</u></b>	
<b>Streets and Expressways</b> One of the top priorities of the City continues to be arterial and residential street resurfacing. Funding to match ODOT eight-year plan improvements and improvements identified in the Bicycle and Pedestrian Master Plan currently underway are a high priority.	\$ 438 million
<b>Water</b> The City continues implementing the IMG Water System Study, which identified the most critical needs in this area, such as protecting the Spavinaw watershed from pollution and the maintenance of the existing distribution system.	\$ 960 million
<b>Sanitary Sewer</b> The City completed all required projects to meet the consent orders issued by State and Federal regulatory authorities to eliminate specific incidents of residential sewage overflows. Future Utility Revenue Bonds and Enterprise Fund resources will be dedicated to the completion of any future consent orders, as well as the upkeep of existing assets.	\$ 824 million
<b>Flood Control</b> The continued implementation of the Citywide Flood Control Plan is the highest priority. Floodplain acquisition, planning services for the Hazard Mitigation Program, and urgent small drainage improvements are identified as the highest priorities by the plan.	\$ 99 million
<b>Metropolitan Tulsa Transit Authority (MTTA)</b> MTTA's highest priorities are the completion of the 11 <sup>th</sup> Street Bus Rapid Transit (BRT), continued replacement of current fleet, and replacement of the Downtown Transit Center	\$ 7 million
<b>Total Public Works and Transportation</b>	\$ 2,327 million
<b><u>ADMINISTRATIVE AND SUPPORT SERVICES</u></b>	
<b>Facilities Maintenance Projects</b> The continued maintenance of all City-owned facilities has been identified as the highest priority by the plan.	\$ 34 million
<b>Equipment Management Projects</b> The continued maintenance and replacement of all City-owned equipment has been identified as the highest priority by the plan.	\$ 14 million
<b>Short Term Capital Projects</b> Projects in this category include the replacement of various existing capital equipment, such as department fleet, facility equipment, and minor facility purchases and repairs.	\$ 102 million
<b>Total Administrative and Support Services</b>	\$ 150 million
<b><u>TOTAL PROPOSED FIVE-YEAR FUNDING PROGRAM</u></b>	\$ 2,824 million

Repair of arterial streets that require multiple repairs of the same area to prolong usable life of street and prevent total replacement	15
Repair of bridges that require multiple repairs of the same area to prolong usable life of street and prevent total replacement	16
Repair of bridges that require multiple repairs of the same area to prolong usable life of street and prevent total replacement	17
Installation of new signage, durable pavement markings and delineation of medians to improve safety and congestion on arterial streets.	18
Installation of new signage, durable pavement markings and delineation of medians to improve safety and congestion on arterial streets.	19
Ongoing program to protect and preserve the quality and integrity of the City's water supply, implement TMUA Policy for Land Acquisition, monitor water quality in the Spavinaw/Eucha and Oologah watersheds, identify and mitigate encroachments to the Spavinaw and Oologah flowlines, protect city assets and landowner rights, maintain water system security and provide surveying (as required) along the flowlines.	20
Construct a new bridge across Spavinaw Creek to replace old bridge Facility No. 043, as noted on Oklahoma Department of Transportation Bridge Inspection Report, immediately upstream of Lake Spavinaw for access to local residents and staff use. Bridge will require new roadway approach and acquisition of right of way for installation. Bridge will be designed to meet latest federal/state bridge design criteria. This bridge is considered important in maintaining access for neighboring communities and for city of Tulsa staff use. The responsibility for the upkeep of this bridge happened as a result of ruling from the Mayes County District Court of Mayes County, OK, to address the issues brought forth by Tulsa Ozark Club (TOC) in Civil (Case) No. 3020, July 10, 1924.	21
Construction of Stem Wall for Spavinaw Water Treatment Plant Backwash Lagoon.	22
Implementation of the Court Master Agreement for the Spavinaw/Eucha watershed.	23
The purpose of this project is to provide concrete repairs to the Eucha Dam.	24
Ongoing projects to assess, rehabilitate, and repair raw water flowlines and associated facilities.	25
Improvements at Oologah Pump Station Chemical Bulding.	26
Evaluate and inspect the vertical turbine pump; inspect and redress the right angle drive; evaluate and upgrade the electrical switchgear; and evaluate the operational efficiency of the pumps and engines.	27
Evaluate and inspect the vertical turbine pump; inspect and redress the right angle drive; evaluate and upgrade the electrical switchgear; and evaluate the operational efficiency of the pumps and engines.	28
This project will provide the equipment and personal to inspect and assess the condition of the Oologah Raw Waterlines. Various tools are available for gathering this necessary data to thoroughly evaluate the condition of the pipelines.	29
The investigation will begin at the Oologah Pump Station and proceed to know areas of concern. Entry points will be identified along the flowlines which will be used to gain access to the pipelines. The gathered data will be used to create assessment reports and help in the scheduling of repairs as needed.	30
Flow Meter and large valve replacement at Bird Creek and Oologah Pump Stations	31
Ongoing maintenance of SCADA Systems for Raw Water.	32
This project will allow for concrete repairs at the Mohawk Water Treatment Plant	33
This project will allow for the repair and rehabilitation of the Reservoir Hill Pumps Station	34
Provides funding to purchase and use disinfection alternatives for the Mohawk Water Treatment Plant	35
Provides for the replacement of chemical tanks at the Mohawk Water Treatment Plant	36
Facilities identified for rehabilitation or replacement by EMA study. Includes PAC slurry system, chlorine system, chlorine scrubbers, and various chemical storage tanks and feed systems.	37
Replace obsolete PAC with Silo style storage located closer to point of application; Upgrade chemical feed systems to coordinate with 30 MGD expansion.	38
Provides for the funding of residual improvements in connection with Phase 3 at the A.B. Jewell Water Treatment Plant	39
Provide improvements needed during maximum filter loading by identifying performance levels when seals begin to leak. Evaluate how and where water is flowing past piping seals during maximum filter loading and entering into the filter gallery. Project will need to determine the extent of damage done to the piping encased in the concrete walls and assess the structural integrity of these concrete walls. All facility piping and supports in the filter gallery are showing signs of rust and distress and will also need to be assessed.	40
Provides funding to purchase and use disinfection alternatives for the A.B. Jewell Water Treatment Plant	41

Comments	Ref.
Ongoing program to replace water meters citywide to support revenue assurance policies.	47
Monitor and evaluate transmission lines citywide. Funding may also be used to modify and improve entry for testing and monitoring.	48
	49
This program will focus on key sites citywide as determined by the City of Tulsa's Office of Economic Development. These key sites will be prioritized for public infrastructure needs so as to be shovel ready to attract industrial development.	50
Replace water lines that meet the replacement criteria and /or have excessive break histories. Priorities will be determined based on line condition, age, type of materials, and coordination with other infrastructure improvements in the area to maximize efficiency and minimize the impact to customers and businesses.	51
Replace water lines that meet the replacement criteria and /or have excessive break histories. Priorities will be determined based on line condition, age, type of materials, and coordination with other infrastructure improvements in the area to maximize efficiency and minimize the impact to customers and businesses.	52
Replace water lines that meet the replacement criteria and /or have excessive break histories. Priorities will be determined based on line condition, age, type of materials, and coordination with other infrastructure improvements in the area to maximize efficiency and minimize the impact to customers and businesses.	53
Provide water service to unserved, developed areas in response to citizen petitions.	54
	55
	56
	57
This project will provide maintenance as needed for the Utility Bridges with City waterlines.	58
Program to maintain and rehabilitate above ground treated water storage tanks. Funding may also be used to modify tanks to improve circulation for chloramine disinfection.	59
The program fund is to identify and design maintenance remedies to maintain compliance with ODEQ, and OSHA entry requirements for an above grade concrete tank.	60
This project will provide maintenance as needed for the Reservoir Hill Tank.	61
Repair or replace citywide water facility roofs that meet the requirement criteria or that have excessive leaks.	62
Ongoing program to replace water meters citywide to support revenue assurance policies.	63
Ongoing program to emergency repair waterlines	64
	65
This project Installs Advanced Metering Infrastructure (AMI) for new meter installations and all new commercial and 3-inch and larger meters are required to be AMR.	66
This project Installs Advanced Metering Infrastructure (AMI) for new meter installations and all new commercial and 3-inch and larger meters are required to be AMR.	67
This project Installs Automatic Meter Reading (AMR) for new meter installations and all new commercial and 3-inch and larger meters are required to be AMR.	68
Future projects identified within Constrained Inventory, but not funded within FY26-30 timeframe.	
	69
	70
This project is to install new aeration basin baffles at the Northside Wastewater Treatment Plant. The aeration basin baffles will be installed at the end of zone two between the anoxic zone and the aeration zone. The installation of the baffles will reduce the cost and improve the treatment facility operations.	71
Provide added capacity to overloaded lines.	72
Provide added capacity to overloaded lines.	73
Provide added capacity to overloaded lines.	74
Provide added capacity to overloaded lines.	75
The project includes, pre- and post-rehab flow monitoring, hydraulic modeling, SSES, design, and construction. Existing, defective pipes in the area will be replaced or rehabilitated with construction that may be performed using pipe bursting, lining, or open cut as all are acceptable installation methods.	76
The project includes, pre- and post-rehab flow monitoring, hydraulic modeling, SSES, design, and construction. Existing, defective pipes in the area will be replaced or rehabilitated with construction that may be performed using pipe bursting, lining, or open cut as all are acceptable installation methods.	77
	78
	79
The purpose of this project is to provide redundancy to the distribution of digester sludge from the Southside Wastewater Treatment Plant to the 71st street dewatering facility. Currently, the only avenue to convey sludge between the two facilities for further treatment is through the use of the 2-mile force main between the two facilities. This force main has not had any interruptions to date, but if there is a failure there is currently no backup for sludge transfer between the two facilities. This solution can provide an emergency backup and provide redundancy to facilitate the implementation of a more permanent redundant transfer line.	80

Comments	Ref.
<p>This project improves the reliability of the length of sludge transfer piping to transfer digested sludge from the Southside Wastewater Treatment Plant to the 71st street dewatering facility. Currently, the only conduit to convey sludge between the two facilities for further treatment is through the use of a signal 2-mile force main between the two facilities. The present force main has provided reliable service to date, but is the only transfer pipe. Note that the pipeline has experienced point failures but prompt attention by TMUA staff have installed immediate point repairs to minimize the pipeline's downtime. An overbearing concern is that the pipeline includes a 200 linear foot section of pipe that was first placed into service in the 1950's. With sludge piping of this age, there is an overbearing concern that a significant length of this 1950's pipe could fail, thus requiring an emergency bypass temporary piping in conjunction with a significant emergency repair response.</p>	81
	82
	83
<p>Provide rehabilitation of sanitary sewers in portions of the wastewater collection system in the Central Business District (CBD) and nearby areas which are in planning for redevelopment. The project area is contained within maintenance areas 28-S, 29-S, 31-S, 32-S, 33-S, 34-S, and 63-S. The goal of the project is to replace aging sewer lines before they fail to mitigate sinkhole risk; and to ensure that the sewer system can support redevelopment in the project area.</p>	84
<p>The West Bank Interceptor Improvements will include repair, rehabilitation and/or replacement of 27 large vault style manholes and 3,522 linear feet of large diameter interceptor located along the Arkansas River from approximately W. 21st Street South to W. 51st Street South. The rehabilitation recommendations come from the Interceptor Corrosion Assessment study referenced below which identified observed corrosion in prestressed concrete cylinder pipe (PCCP) with embedded steel cylinder (ECP). Corrosion was also observed compromising the structural integrity of the manholes on the West Bank Interceptor. 27 manholes are recommended for repair, rehabilitation and/or replacement starting at Manhole 039-0509 and ending at Manhole 040-0544. The pipeline rehabilitation will begin at Manhole 040-0554 and end at Manhole 040-0544, with two (2) additional pipeline rehabilitations at segments 039-0498:039-0497 and 040-0559:040-0558.</p>	85

<p>The project consists of a multi-year rehab and replacement project in the West Tulsa basin of the South slope wastewater collection system. The project includes, pre- and post-rehab flow monitoring, hydraulic modeling, SSES, design, and construction. Construction activities will include a mix of rehabilitation and capacity enhancements, depending on solutions that are determined to be most cost-effective during the flow monitoring and modeling phase of the project. The I&amp;I Abatement target for this basin has not yet been defined. The West Tulsa basin is defined as the collection system that is monitored by permanent flow monitors TL-10, and TL-42, jointly. It contains 358,000 linear feet of pipe and encompasses maintenance areas 38-S, 39-S, 40-S, and 41-S.</p>	87

Construction activities will include a mix of rehabilitation and capacity enhancements, depending on solutions that are determined to be most cost-effective during the flow monitoring and modeling phase of the project.</p>	90
<p>The project consists of a multi-year rehab and replacement project in the Crow Creek basin of the South slope wastewater collection system. The project includes, pre- and post-rehab flow monitoring, hydraulic modeling, SSES, design, and construction. Construction activities will include a mix of rehabilitation and capacity enhancements, depending on solutions that are determined to be most cost-effective during the flow monitoring and modeling phase of the project. The I&amp;I Abatement target for Crow Creek is a 30% reduction. The Crow Creek basin is defined as the collection system that is monitored by permanent flow monitor TL-26. It contains 442,000 linear feet of pipe and encompasses maintenance areas 44-S, 45-S, and 62-S.</p>	91
<p>The project consists of a multi-year rehab and replacement project in the Joe-LaFortune basin of the South slope wastewater collection system. The remaining project activities include SSES, design, and construction.</p>	92
<p>Provide improved wet weather performance of the lift station. Phase 1, 2 and 3 Improvements are mostly complete. This project scope is described as Phase 4 Improvements in February 2012 study. It includes the design and construction of a new submersible lift station to supplement and work in tandem with the existing lift station to increase firm pumping capacity to 41.9 MGD (sizing to be confirmed during design phase). Selected consultant for Phase 4 shall provide a business case evaluation for the final Phase 5 Improvements as part of design scope.</p>	93
	94
	95
Replacement of plant capital at Haikey Creek Waste Water Treatment Plant	96
	97
Annual repairs, pump replacements, etc. to the collection system lift stations.	98

Project reflects funds not allocated to a specific I&I Abatement project.	104
Unserved area projects.	105
Reflects estimate of need for short term infrastructure reinvestment.	106
Annual rehab and replacement of sewer areas.	107
The scope of this BCE is to develop an asset management plan in FY19 to perform future, annual condition assessment on collection system force mains based on criticality. Over 60 miles of force main are currently operated and maintained by SOM and WPC.	108
The scope of this BCE is to develop an asset management plan (AMP) in FY19 to perform condition assessment on the remaining 323,000 LF of large diameter concrete interceptor based on criticality.	109
	110
This program will focus on providing sanitary sewer services to key sites citywide as determined by the City of Tulsa's Office of Economic Development. These key sites will be prioritized for public infrastructure needs and work toward "site certification" so as to be shovel ready to attract industrial development.	111
Program to fund manhole condition assessment, rehabilitation, and replacement as part of the City of Tulsa SSO mitigation plan to prevent sanitary sewer overflows, correct unsafe structural conditions, and reduce risk with regards to the management of these assets. This will be an ongoing program to manage risk, correct deficiencies, and meet regulatory requirements.	112
Program to fund emergency sanitary sewer system repairs, rehabilitation, and replacement as part of the City of Tulsa SSO mitigation plan to prevent sanitary sewer overflows. Operations will take the lead on this CIP line item with technical support from Engineering Services.	113
TMUA ES 2021-03 Large Diameter Gravity Main Assessment provided rehabilitation recommendations for large diameter gravity main sewer pipe in various locations in the TMUA collection system. Rehabilitation recommendations for assets of similar class and failure form were grouped together and separated into Phase 1 with the potential to fail within zero (0) to five (5) years and Phase 2 with the potential to fail between five (5) to ten (10) years. This business case development project form includes Phase 1 reinforced concrete pipe with the potential to fail due to observed corrosion compromising the structure integrity of the pipe. Rehabilitation by cured-in-place pipe (CIPP) lining is recommended for 3,710 linear feet. Pipe segments are located in Maintenance Zones 044 and 045 (Crow Creek) and 046 and 047 (East Bank).	114
